

J//Z · AFTER THE APPLAUSE

AFTER THE APPLAUSE

HOW EVERYONE GETS HOME

HOW THE DISTRICT RETURNS BY MORNING

SEVEN TIME FRAMES · FIVE FLOWS · THREE HANDOFF ZONES · 12 SCENARIOS · FOUR STRESS TESTS

CONCEPT ILLUSTRATION / NOT A SITE RECORD / NOT AN APPROVED SCHEME

WE DO NOT DESIGN THE EVENT. WE DESIGN THE WAY HOME.

T0 is the urban-design starting point. Arrival, queues, equitable waiting, phased release, night transfer, resident homecoming, and morning reset share one spatial and temporal evidence system. Event scale may remain unknown; everyday continuity, human takeover, and reset ownership may not.

THREE ZONES / ONE PLACE, ONE HANDOFF

- 01 ZHONGZHIYUAN
NORTH RELIEF HALL: DISTRIBUTED RELEASE + HIGH-ROUTE FALLBACK
- 02 AI ORIGIN
MIDDLE COEXISTENCE HALL: ON-SITE QUEUE + PROTECTED RESIDENT LINE
- 03 DAZHONGSI
SOUTH TRANSFER HALL: FOUR-QUADRANT FLOW + LAST-SERVICE FALLBACK

SEVEN-FRAME URBAN TIME SECTION

FIVE FLOWS ON ONE PLAN: PRIORITY IS SPATIAL

ORIGINALITY BOUNDARY

The original contribution is a time-based public-space handoff: seven frames, five flows, three zones, four states, and morning acceptance form one urban-design object. Festival image, soundscape, generic mobility, park programming, or AI dispatch alone are not claimed as original.

Nearby works are credited for abstract comparison only: Mobility Commons, Encounter Commons, People First JZ, Open Model Loop, and Civic Foundry. No prose, drawings, or mechanisms are copied or adapted.

PROVISIONAL OVERALL AREA / 11.413 km²

**43.6 km²**

COORDINATED / EVENT-TRANSIT HANDOFF

11.413 km²

OVERALL / HOME + RECOVERY

3 × 7

KEY AREAS × TIME FRAMES

OTHERS DESIGN HOW AN EVENT HAPPENS. THIS PROPOSAL STARTS AT T0: HOW EVERYONE GETS HOME AND THE DISTRICT RETURNS TO DAILY LIFE BY MORNING.

NOT AN OFFICIAL BOUNDARY

FOUR STATES, NO ENTITLEMENT CLAIM

- 01

ORDINARY DAY
HOME LINE OPEN; EVENT KIT STORED
- 02

SETUP
LOGISTICS MARKED; RESIDENT BYPASS KEPT
- 03

PEAK EVENT
QUEUES STAY INSIDE; DISTRIBUTED RELEASE
- 04

T+12 RESET
TEMPORARY USE EXITS; COMMUTE RETURNS

THE COMPLETE TOPOLOGY ONLY TESTS HOW EVENT PRESSURE OVERLAPS DAILY NEEDS. IT CHANGES NO STATUTORY USE AND MAKES NO TEMPORARY EVENT

SEVEN-FRAME URBAN TIME SECTION, T-120 TO 06:00

EVERY FRAME CHECKS FIVE FLOWS. IF ANY FLOW BREAKS THE RESIDENT, ACCESSIBLE, OR EMERGENCY ROUTE, THE STATE CHANGE FAILS.

01

ZHONGZHIYUAN

NORTH RELIEF HALL: DISTRIBUTED RELEASE + HIGH-ROUTE FALLBACK

1:1 LANDMARK / HIGH-GROUND RELIEF DECK

HOME LINE, TRANSIT HANDOFF, AND MORNING RESET ARE ALL REQUIRED

CAPACITY / STATION LOAD / OWNERSHIP / APPROVAL PENDING

02

AI ORIGIN

MIDDLE COEXISTENCE HALL: ON-SITE QUEUE + RESIDENT LINE

1:1 LANDMARK / TWO-WAY HOME GALLERY

HOME LINE, TRANSIT HANDOFF, AND MORNING RESET ARE ALL REQUIRED

CAPACITY / STATION LOAD / OWNERSHIP / APPROVAL PENDING

03

DAZHONGSI

SOUTH TRANSFER HALL: FOUR-QUADRANT FLOW + LAST-SERVICE FALLBACK

1:1 LANDMARK / LAST-SERVICE HANDOFF GATE

HOME LINE, TRANSIT HANDOFF, AND MORNING RESET ARE ALL REQUIRED

CAPACITY / STATION LOAD / OWNERSHIP / APPROVAL PENDING

FIVE FLOWS: RESIDENT + ACCESSIBLE JOURNEYS FIRST

- VISITOR WAY HOME
- EQUITABLE WAITING
- PROTECTED RESIDENT LINE
- STAFF / REMOVAL
- LAST-SERVICE HANDOFF

THREE SPATIAL LINES × FIVE OPERATIONAL FLOWS

VISITORS, WAITING, AND TRANSIT HANDOFF MAY SHARE SPACE, BUT NEVER BREAK THE TEAL RESIDENT LINE. REMOVAL LOGISTICS ENTER CROSSINGS ONLY AFTER THE HOMEWARD PEAK RECEDES.

5

SIMULTANEOUS FLOWS

PROVISIONAL BOUNDARY | Concept generation, display, and checks only; not an official redline or approval basis. EPSG:4326 / areas EPSG:4548.

F04

RECOVERY CLOCK: EXIT OWNER, TIME WINDOW, MORNING HANDOVER

HORIZONTAL POSITION SHOWS SEQUENCE, NOT AN UNMEASURED DURATION.

RESIDENT LINE OPEN

95% RESET TARGET BY T+12 / MORNING

NO SCALE-UP IF RESET FAILS

EVENT CAPACITY / T95 / STATION LOAD / RESIDENT DELAY / ACCESSIBLE WAITING DEMAND: UNKNOWN

TWELVE SCENARIOS: FOUR STRESS TESTS FIRST

T01-T04 are stress tests that must fail safely; S05-S12 place arrival, queueing, dispersal, transfer, and reset in the three zones.

T01

WEEKDAY PEAK + EVENT

STRESS TEST / FAIL SAFELY

T02

STORM CLOSES LOW ROUTE

STRESS TEST / FAIL SAFELY

T03

ONE STATION ENTRY FAILS

STRESS TEST / FAIL SAFELY

T04

ACCESSIBLE EQUIPMENT FAILS

STRESS TEST / FAIL SAFELY

S09

PROTECTED RESIDENT WAY HOME

SPATIAL SCENARIO / HANDOFF

S10

DAZHONGSI FOUR-QUADRANT DISPERSAL

SPATIAL SCENARIO / HANDOFF

S11

LAST-SERVICE TRANSIT PORCH

SPATIAL SCENARIO / HANDOFF

S12

NEXT-MORNING PUBLIC-SPACE RESET

SPATIAL SCENARIO / HANDOFF

FOUR PASS GATES

RESIDENT AND EMERGENCY ROUTES STAY CONTINUOUS

EQUITABLE WAITING IS NOT RELEGATED TO A BACK DOOR

A NIGHT ALTERNATIVE AND HUMAN ROUTING EXIST WHEN RAIL FAILS

PAPER / COLOUR WAYFINDING ENABLES TAKEOVER WHEN DIGITAL SYSTEMS FAIL

VERIFIABLE ROLE OF AI

Hourly demand forecasts, split-station advice, queue ETA, accessible-shuttle booking, last-service connections, and a temporary-asset reset ledger. Require human takeover, offline signs, and minimum data; do not infer need through facial recognition.

FOUR STATES OF ONE PUBLIC SPACE + RESET RESPONSIBILITY

01

ORDINARY DAY

HOME LINE OPEN; EVENT KIT STORED

02

SETUP

REMOVAL ROUTE MARKED; RESIDENT BYPASS KEPT

03

PEAK EVENT

QUEUES STAY INSIDE; DISTRIBUTED RELEASE

04

T+12 RESET

TEMPORARY USE EXITS; MORNING COMMUTE RETURNS

RESET CONTRACT / MORNING HANDOVER

Every temporary asset has an ID, installation window, exit owner, surface protection, removal path, and next destination. Removal logistics enter visitor-resident crossings only after T+90. By T+12 or 06:00, reopened area, damage, waste, noise, and resident-route recovery are inspected. Failure blocks the next scale-up.

95%

T+12 / MORNING RESET DESIGN TARGET

A TARGET, NOT MEASURED PERFORMANCE OR A STATUTORY DEADLINE.

KEEP UNKNOWN UNTIL PROFESSIONAL DATA ARRIVES

OFFICIAL BOUNDARY / KEY-AREA POLYGONS / FAR / HEIGHT / FLOOR AREA / DEMOLITION / INVESTMENT / EVENT AND FIRE CAPACITY / STATION THROUGHPUT / ACCESSIBLE DEMAND / T95 CLEARANCE / RESIDENT DELAY / OPERATING PERFORMANCE

THE SEVEN FRAMES ARE A NARRATIVE AND ACCEPTANCE SEQUENCE, NOT AN APPROVED OPERATING TIMETABLE; 95% IS A DESIGN-SERVICE TARGET, NOT AN ACHIEVED RESULT.
