

JZ-1909 AI Belt

The New Switchback — a century relay from the Pride Line to the Intelligence Belt · two strokes spell the human

In 1909, Zhan Tianyou answered the verdict that Chinese could not build their own railway with the Qinglongqiao switchback — trading length for height, clever geometry over brute force: the origin of China's modern engineering sovereignty. In 2026, the AI innovation belt must answer how the intelligence-era city should be organized — from railway sovereignty to intelligence sovereignty, the origin of the next century's urban paradigm. Under the New Switchback motif, three mandates are written into the character 人: AI empowers industry on one stroke, AI empowers space on the other, and the junction is people first. The switchback itself becomes the spatial syntax: ≈ 11.4 sqkm (provisional extent) is organized as one rail, two rivers and three stations, with the Two Wings as the two strokes of 人 and six east-west stitch axes — structurally aligned with the approved regulatory plan's 'one belt, one axis, two centers, multiple nodes'. The pilgrimage route is one grand switchback, the three stations are relay switch points, the interchange halls are switchback interchanges, and every switch plaza returns the choice of direction to people. Every spatial metric is recomputable from the submitted GeoJSON under EPSG:4548; statutory controls are honestly marked as pending official data.

$\approx 1,141.3$ ha Overall design area Announcement ≈ 11.4 sqkm; provisional recompute matches	23.5% Green ratio (recomputed) green_space layer union / submitted area; calibers reconciled in the proposal	≈ 9.8 km Heritage rail slow-mobility spine Links three stations and all cultural nodes	63 Land-use parcels Planar partition from shared cut lines; seamless full coverage	19 Demonstration renewal buildings 8 new · 9 converted · 2 retained; demolition pending survey	3 / ≈ 368.4 ha Key areas Zhongzhiyuan · AI Origin · Dazhongsi (provisional)
---	---	--	---	---	---

Provisional constraint boundary: all drawings and area metrics in this booklet derive from the maintainer-registered provisional extent — for design discussion and self-check only; fully recomputed once official boundaries are published.

Evidence chain and overall structure

JZ-1909 AI Belt | Evidence Chain & Package

Announcement × Taskbook × Site package → 9 layers × recomputed metrics × 3 matrices → report, figures, bilingual pages

Provisional boundary (intake only): recalculate everything once official geometry arrives

Structure: 1 rail • 2 rivers • 3 stations • 6 axes • nodes (Amap base, north up)

— Six axes: E-W stitch ◆ Nodes: 9 switch plazas

STRUCTURE / 一轨两河三站 • 六轴多点

- One rail: ≈9.8 km heritage spine (core of the plan's 'belt')
- Two rivers: Qinghe living room × Xiaoyue corridor (linking the 'three belts')
- Three stations: AI Market · AI Origin · Full-Stack relay points (carrying the 'two centers')
- Six axes: east-west stitch axes — N-S continuity, E-W connection
- Multiple nodes: 9 switch-plaza network matching the plan's nodes

EVIDENCE FLOW

Sources: official announcement (2026-05-09), agent taskbook, site package & source registry, regulatory-plan draft (2024-12-20) & approval report (2026-08-12); boundary is PROVISIONAL.

Announcement × taskbook × site package → nine layers × recomputed metrics × three matrices → proposal / figures / bilingual pages.

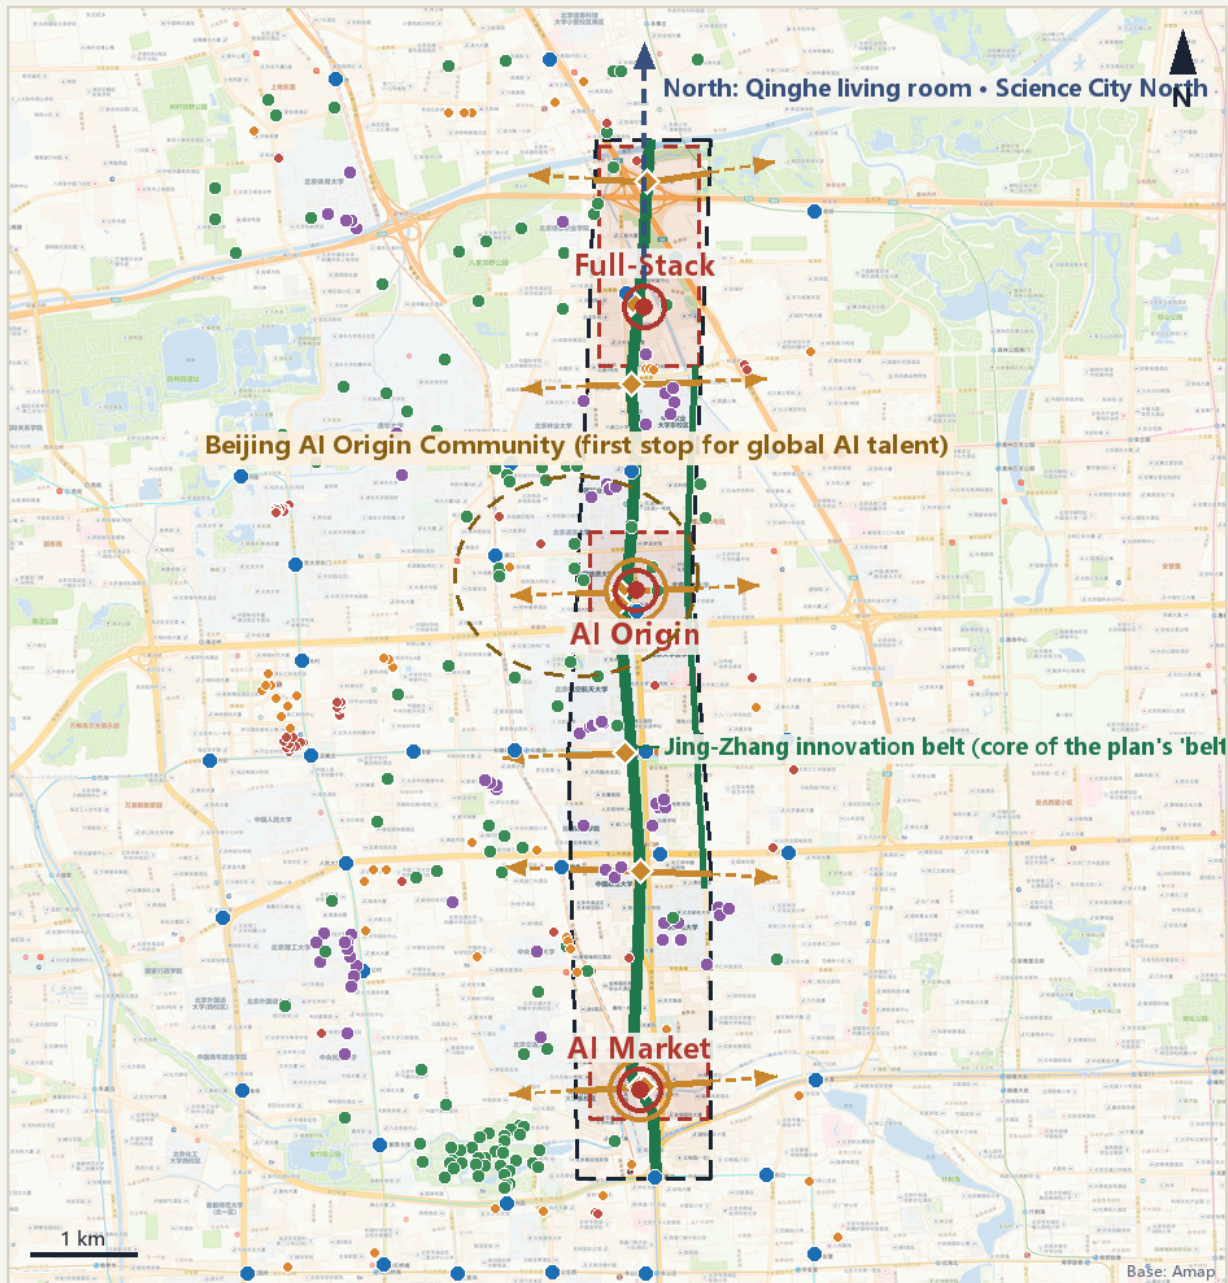

Level	Announced area	Core question answered	Required depth
Coordinated research area	≈ 43.6 sqkm	How the AI ecosystem organizes; how zones and wings cooperate	Strategy and structure
Overall design area	≈ 11.4 sqkm	How renewal structure, land use, projects and facilities land	Conceptual urban design (directional)
Key areas	≈ 368.4 ha	How the three station districts are implemented	Conceptual urban design (directional) + delivery-path advice

Overall Spatial Structure Plan (Amap base • regulatory alignment • AI Origin Community)

Overall Spatial Structure Plan | One Rail, Two Rivers, Three Stations • Six Axes (Ama

Amap geographic base × submitted GeoJSON structure × Amap POI facility check — aligned with the regulatory plan's 'belt-axis-centers-nodes' and carrying Beijing AI Or

Overall design area 11.4 sqkm (provisional): rail as trunk • three-station relay • six-axis stitch • node network

Base: Amap webd tiles (z15, GCJ02 Mercator, 2026-08); POI: Amap around-search within the regulatory-plan-belt (nodes); structure overlaid via EPSG:4548→WGS84

STRUCTURE / key points

- One rail: ≈9.8 km heritage spine — spatial skeleton of the plan-belt's core segment (Jing-Zhang innovation-and-exchange belt)
- Two rivers: Qinghe living room × Xiaoyue corridor (linking the 'three belts')
- Three stations: AI Market • AI Origin • Full-Stack relay points — carrying the 'two centers'; AI Origin matches Beijing AI Origin Community
- Six axes: east-west stitch axes answering 'N-S continuity, E-W connection'
- Multiple nodes: 9 switch plazas matching the plan's node system

ALIGNMENT / regulatory plan & AI Origin Community

- Plan: one belt, one axis, two centers, nodes**
 - one rail, three stations, six axes, nodes (aligned since v1.5)
- Beijing AI Origin Community: 'innovation source, first choice'**
 - carried by Wudaokou AI Origin — spatial anchor of the 'first stop' for global AI talent
- Campus-park-block fusion • 15-min lively living circle**
 - the AI Origin 'campus—park—block' slow-mobility stitch is its spatial landing
- Foundation-model ecosystem station: eight-factor services**
 - echoed by the Origin Hall + open-source collaboration center programming
- Beijing's first AI innovation blocks: 'one core, multiple nodes'**
 - this proposal's 'one rail, three stations, node network' plugs in

POI CHECK / facilities (Amap)

- metro stations 37
- universities 76
- parks & squares 121
- hospitals 57
- shopping malls 48

Station-level facilities match the 15-minute service-circle structure: metro stations spread evenly along the corridor and axes; the university cluster underpins the Wudaokou campus-park-block stitch.

LEGEND

- overall design area (provisional)
- key areas (provisional)
- heritage spine (one rail)
- E-W stitch axes (six)
- switch plazas (nodes)
- three stations

Amap geographic base + submitted GeoJSON structure + Amap POI facility check; north up. One rail, two rivers, three stations • six axes, multiple nodes — aligned with the plan's 'belt-axis-centers-nodes'; AI Origin station carries Beijing AI Origin Community's source-of-innovation core.

CRA 43.6 sqkm · ODA 11.4 sqkm · KDA 368.4 ha — gap-free partition with six east-west stitch axes (Amap base, north up)

Code	Category	Area (ha)	Share
09	Commercial services 09	255.6	22.4%
0701	Residential 0701	132.4	11.6%
0702	Community services 0702	65.8	5.8%
0802	Research 0802	306.5	26.9%
0804	Education 0804	113.4	9.9%
1401	Park green 1401	245.0	21.5%
1402	Protective green 1402	17.8	1.6%
1403	Square 1403	4.7	0.4%

Renewal logic: 8 new-build (concentrated at the three stations), 9 conversions (functional replacement), 2 retained (residential & education). Demolition names no object — existing stock, ownership and structural-safety data are missing and await official survey.

Detailed design of three key areas

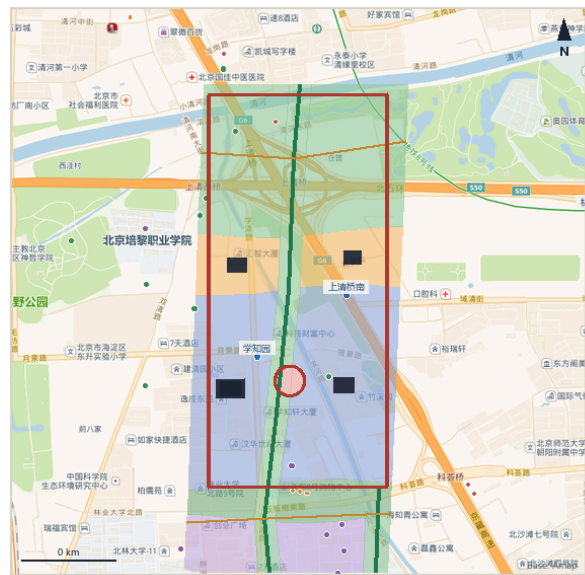

Key-Area Detailed Design | Three Relay Stations as Switchback Nodes

Zhongzhiyuan Full-Stack (192ha) → AI Origin (104ha) → Dazhongsi AI Market (72ha) | provisional, directional

Positioning: full-stack independence • original innovation • intelligent economy — concepts for professional deepening

Zhongzhiyuan • Full-Stack

Full-stack innovation / governance

announced: 192.1 ha (provisional)

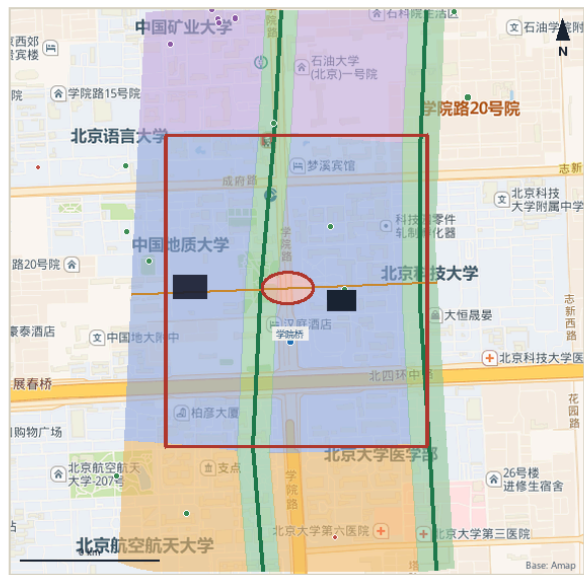

| Design moves

R&D core, lab, accelerator, gardens, Qinghe front

- demonstration renewal
- heritage spine
- forecourt plaza
- metro station (Amap POI)

Beijing AI Origin

Original innovation / transfer

announced: 104.3 ha (provisional)

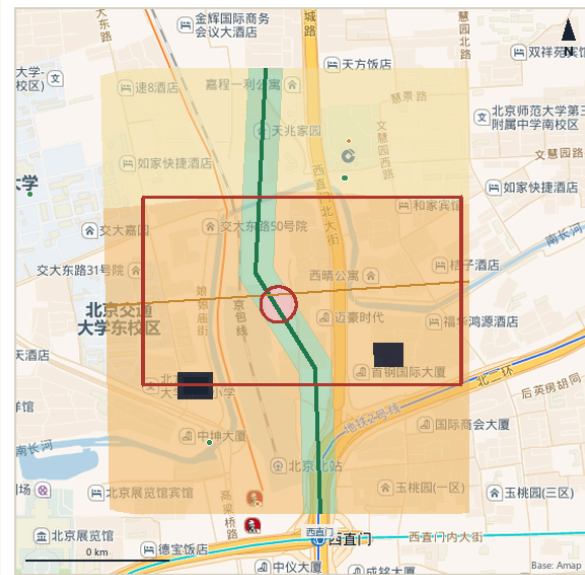

| Design moves

Memory hall, open-source hub, talent flats, stitching

- demonstration renewal
- heritage spine
- forecourt plaza
- metro station (Amap POI)

Dazhongsi • AI Market

Intelligent economy / exchange

announced: 72.0 ha (provisional)

| Design moves

Four-quadrant links, agent complex, AI retail

- demonstration renewal
- heritage spine
- forecourt plaza
- metro station (Amap POI)

Key areas are provisional polygons; panel base map: Amap (north up); metro/facility POI via Amap open platform (2026-08); buildings are demonstrative renewal projects (new/renovate/retain); areas follow annou

Zhongzhiyuan Full-Stack, Wudaokou Origin and Dazhongsi Smart-Market stations — forecourt plazas (graded 1.2/1.6/1.9 ha) + interchange halls + renewal units, at conceptual urban-design depth (directional).

Mobility, utilities and blue-green network

Mobility × Blue-Green Public Space System

One spine, two corridors, six stitch axes: heritage spine · Xiaoyue corridor · Qinghe living room | six east-west axes answer the plan's 'N-S continuity, E-W connection' | her

Slow-mobility skeleton approx. 25.5 km (total centerline length, EPSG:4548)
