- ONE BELT
Continuous slow green corridor
- THREE NODES
Display, dialogue, contribution
- SERVICE WING 1
Knowledge and technical referral
- SERVICE WING 2
Public experience and feedback
- STATUS
Concept layer; official data must supersede

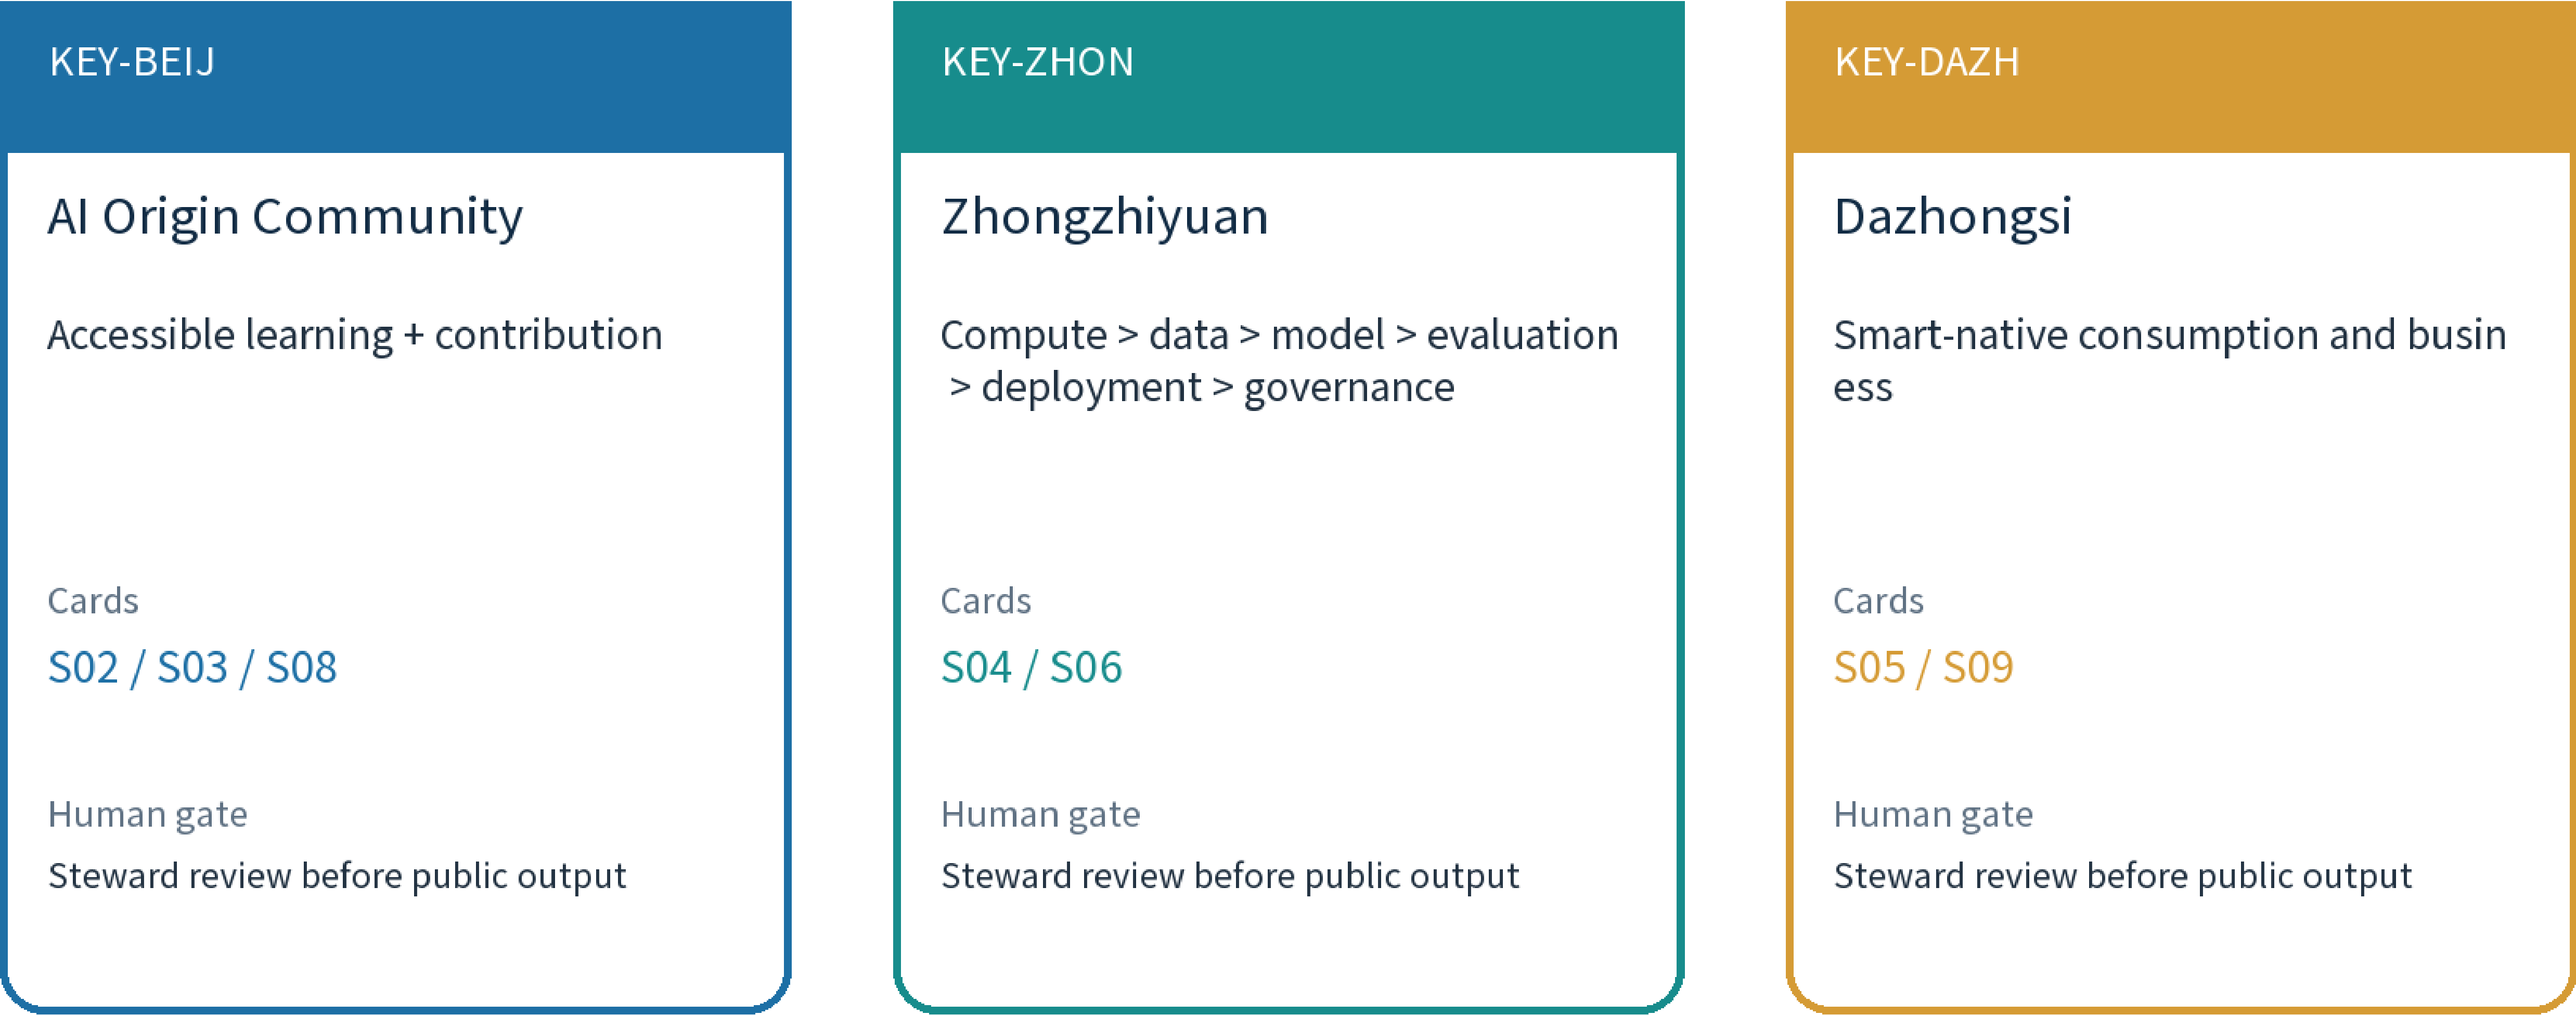

PROVISIONAL - CONCEPT ONLY

GLORY · JZ

Three areas and two wings

Spatial carrier - mechanism - human gate - exit

EN

Zhongguancun service wing + Xiaoyuehe scenario wing

Five regional interfaces: Beiwei Community, Future Science City, Huairou Science City, Beijing E-Town, and Beijing-Tianjin-Hebei. Each defines input, output, trigger, responsible roles, evidence grade and exit boundary.

All interfaces are E0 / to verify. They do not represent existing partnership, data exchange, venue, investment, recruitment, procurement or administrative coordination. If rights, facts, safety, freshness or accountable ownership cannot be verified, automated output stops and returns to a logged manual notice.

Section anchor: overall design scope - urban renewal and regulatory-plan-depth urban design
Concept-level interface checklist; not a statutory planning-depth deliverable.
