GLORY JZ | OVERALL STRUCTURE

Green corridor - three concept nodes - two service wings

EN

READING KEY

- ONE BELT
Continuous slow green corridor
- THREE NODES
Display, dialogue, contribution
- SERVICE WING 1
Knowledge and technical referral
- SERVICE WING 2
Public experience and feedback
- STATUS
Concept layer; official data must supersede

PROVISIONAL - CONCEPT ONLY

GLORY • JZ

Metric contract and evidence

Known finite values - low confidence - formula and use limit shown

EN

site_area_sqm

11,412,825.386

`polygon_area(provisional boundary, EPSG:4548)`

confidence: low / provisional

green_ratio

0.110044

`green_space_area_sqm / site_area_sqm`

confidence: low / provisional

public_space_ratio

0.003167

`public_space_area_sqm / site_area_sqm`

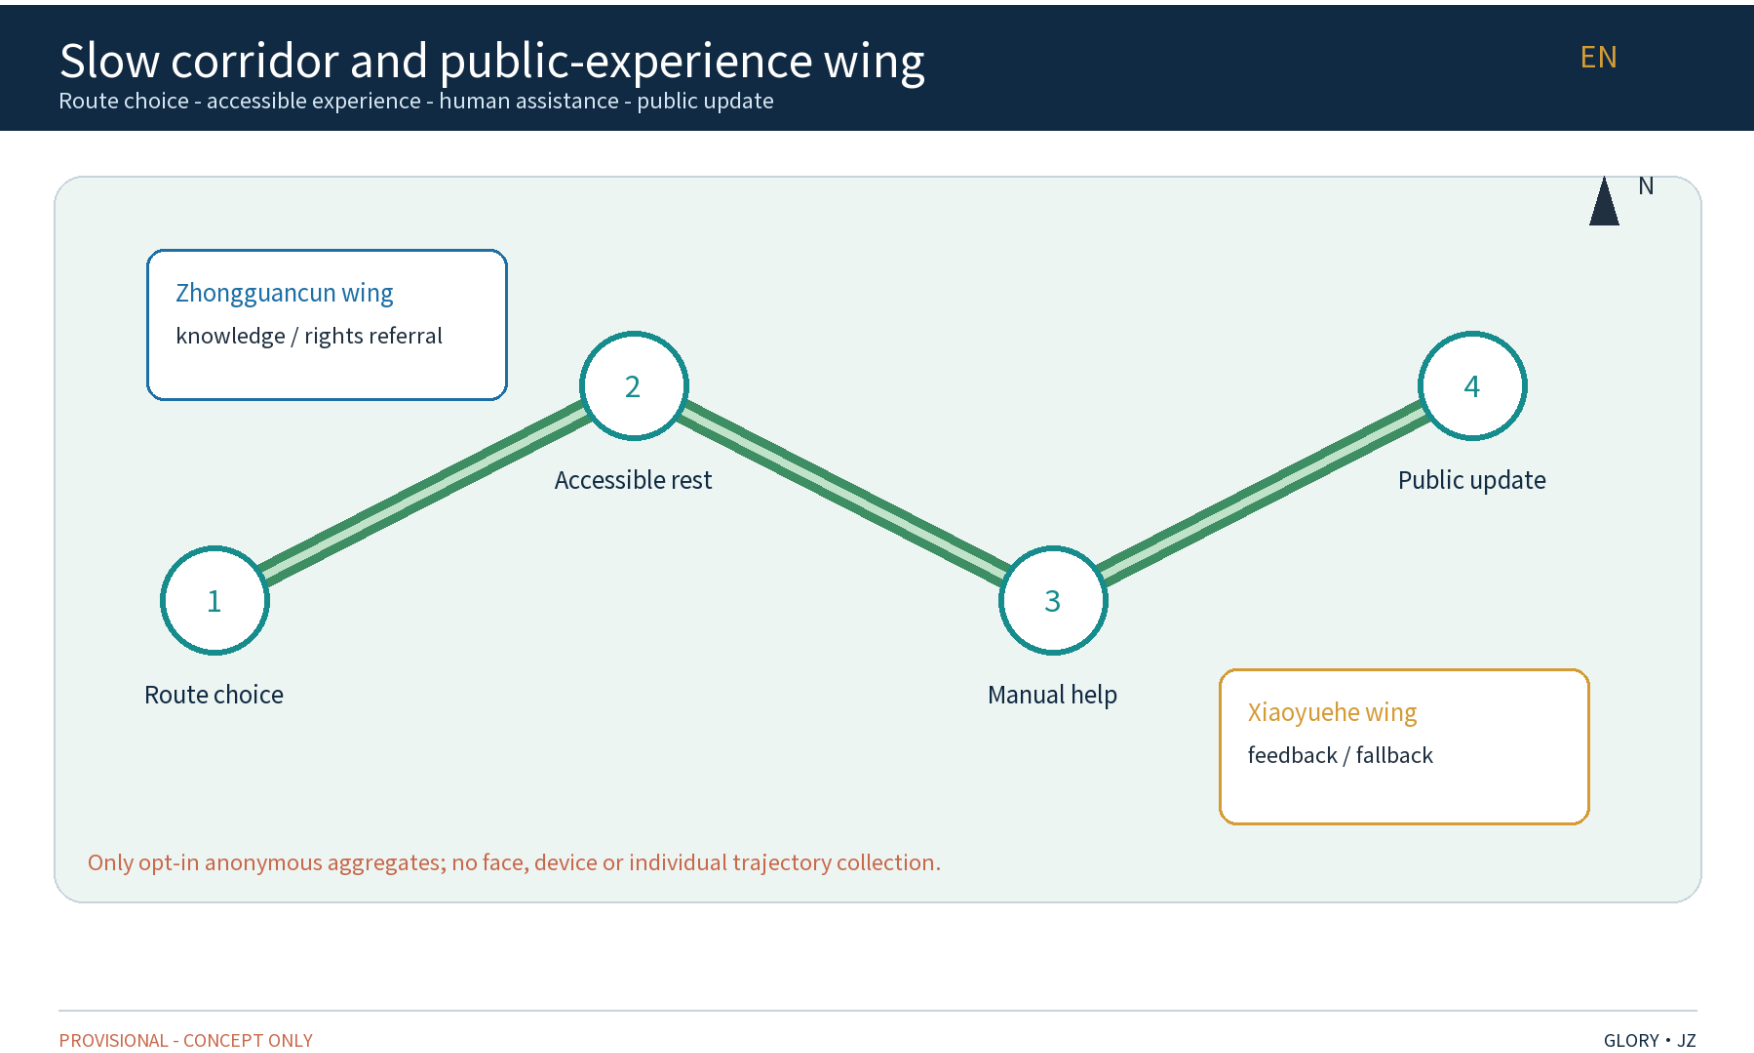

confidence: low / provisional

USE LIMIT

All three values are geometry-derived concept values for package recomputation and visual consistency only. They are not statutory area, FAR, height, capacity, engineering or investment evidence. Recompute after official boundary, green-space, public-space and land-use data are released.

PROVISIONAL - CONCEPT ONLY

GLORY • JZ

concept / limited / pending are explicit in the narrative and matrices; statutory controls remain to verify

Three levels: coordination study, overall design, and detailed concept studies. The overall design is a concept-level control-interface checklist, not a statutory-depth submission.

Regional synergy: all five named areas are E0 / to verify; no partnership, recruitment or cross-region data exchange is claimed.

Evidence boundary: existing conditions, land-use controls, intensity, height/massing, road red lines, parking, municipal capacity and approvals are limited/pending.

AI governance: ten scene cards and three industry validation cards with aggregate-only input, human review, withdrawal and exit.

Bilingual sync: manifest translation_of=proposal.md; the local font is bundled for offline HTML/PDF/PNG output.

Section anchor: overall design scope - urban renewal and regulatory-plan-depth urban design
Concept-level interface checklist; not a statutory planning-depth deliverable.
