

Three nodes turn railway memory into a daily civic seam. This is a concept, not a survey or approval document.

STITCH JZ overall structure

One loop, three nodes, two wings, five interfaces

N / NORTH ↑ scale: 1 km schematic

PROVISIONAL | temporary concept geometry; not surveyed or statutory; recompute when official data arrives.

Regional learning interfaces

- ↔ Beiwei Community
- ↔ Future Science City
- ↔ Huairou Science City
- ↔ BDA
- ↔ Beijing-Tianjin-Hebei

Each node has a distinct tension, mechanism, prototype, sequence, value and case difference.

Three node mechanism cards

Tension → mechanism → prototype → sequence → value → difference

PROVISIONAL

N1 Bridge Court

Cross above, deliberate below

TENSION

Crossing and staying split

MECHANISM

Cross above, deliberate below

PROTOTYPE

Reversible lower room + accessible route

SEQUENCE

Daily crossing → event dialogue → staffed exit

VALUE

Public discussion at the crossing

DIFFERENCE

Not a copied elevated garden

Temporary concept geometry; not surveyed/statutory; recompute when official data arrives.

N2 Market Gallery

Borrow Both Ways

TENSION

Daily resources flow one way

MECHANISM

Borrow Both Ways

PROTOTYPE

Mobile stalls + two-sided entries

SEQUENCE

Service day → timed market → rights check

VALUE

Equal entry for residents and makers

DIFFERENCE

Not a sales or leasing booth

N3 Stitch Axis

Memory can be replayed

TENSION

Movement, memory and service are fragmented

MECHANISM

Memory can be replayed

PROTOTYPE

Slow route + signs + bilingual classes

SEQUENCE

Walk/class → event visit → paper fallback

VALUE

Reusable public knowledge

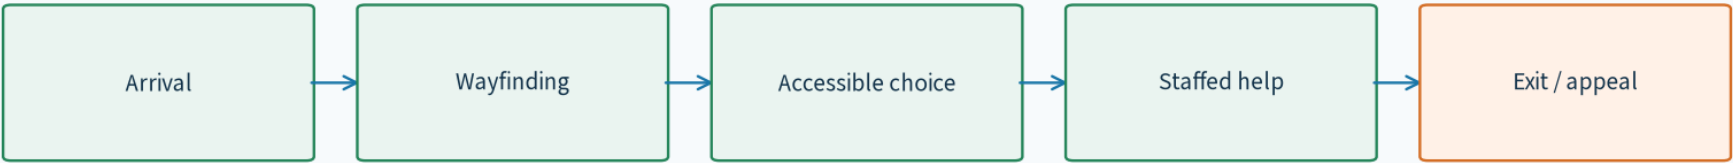

DIFFERENCE

Not only a landscape axis or screen

Mobility, public service and reversible event flow

Arrive → understand → choose → human help → leave/appeal

PROVISIONAL

Daily: rest, class, service

Event: timed zones, safety checklist, manual dispersal

Offline: paper route + staff + on-site notice

Temporary concept geometry; not surveyed/statutory; recompute when official data arrives.

Every card states user, space, input status, model role, output, human fallback, privacy, failure, owner, maturity and KPI.

Ten AI scene cards + three test protocols

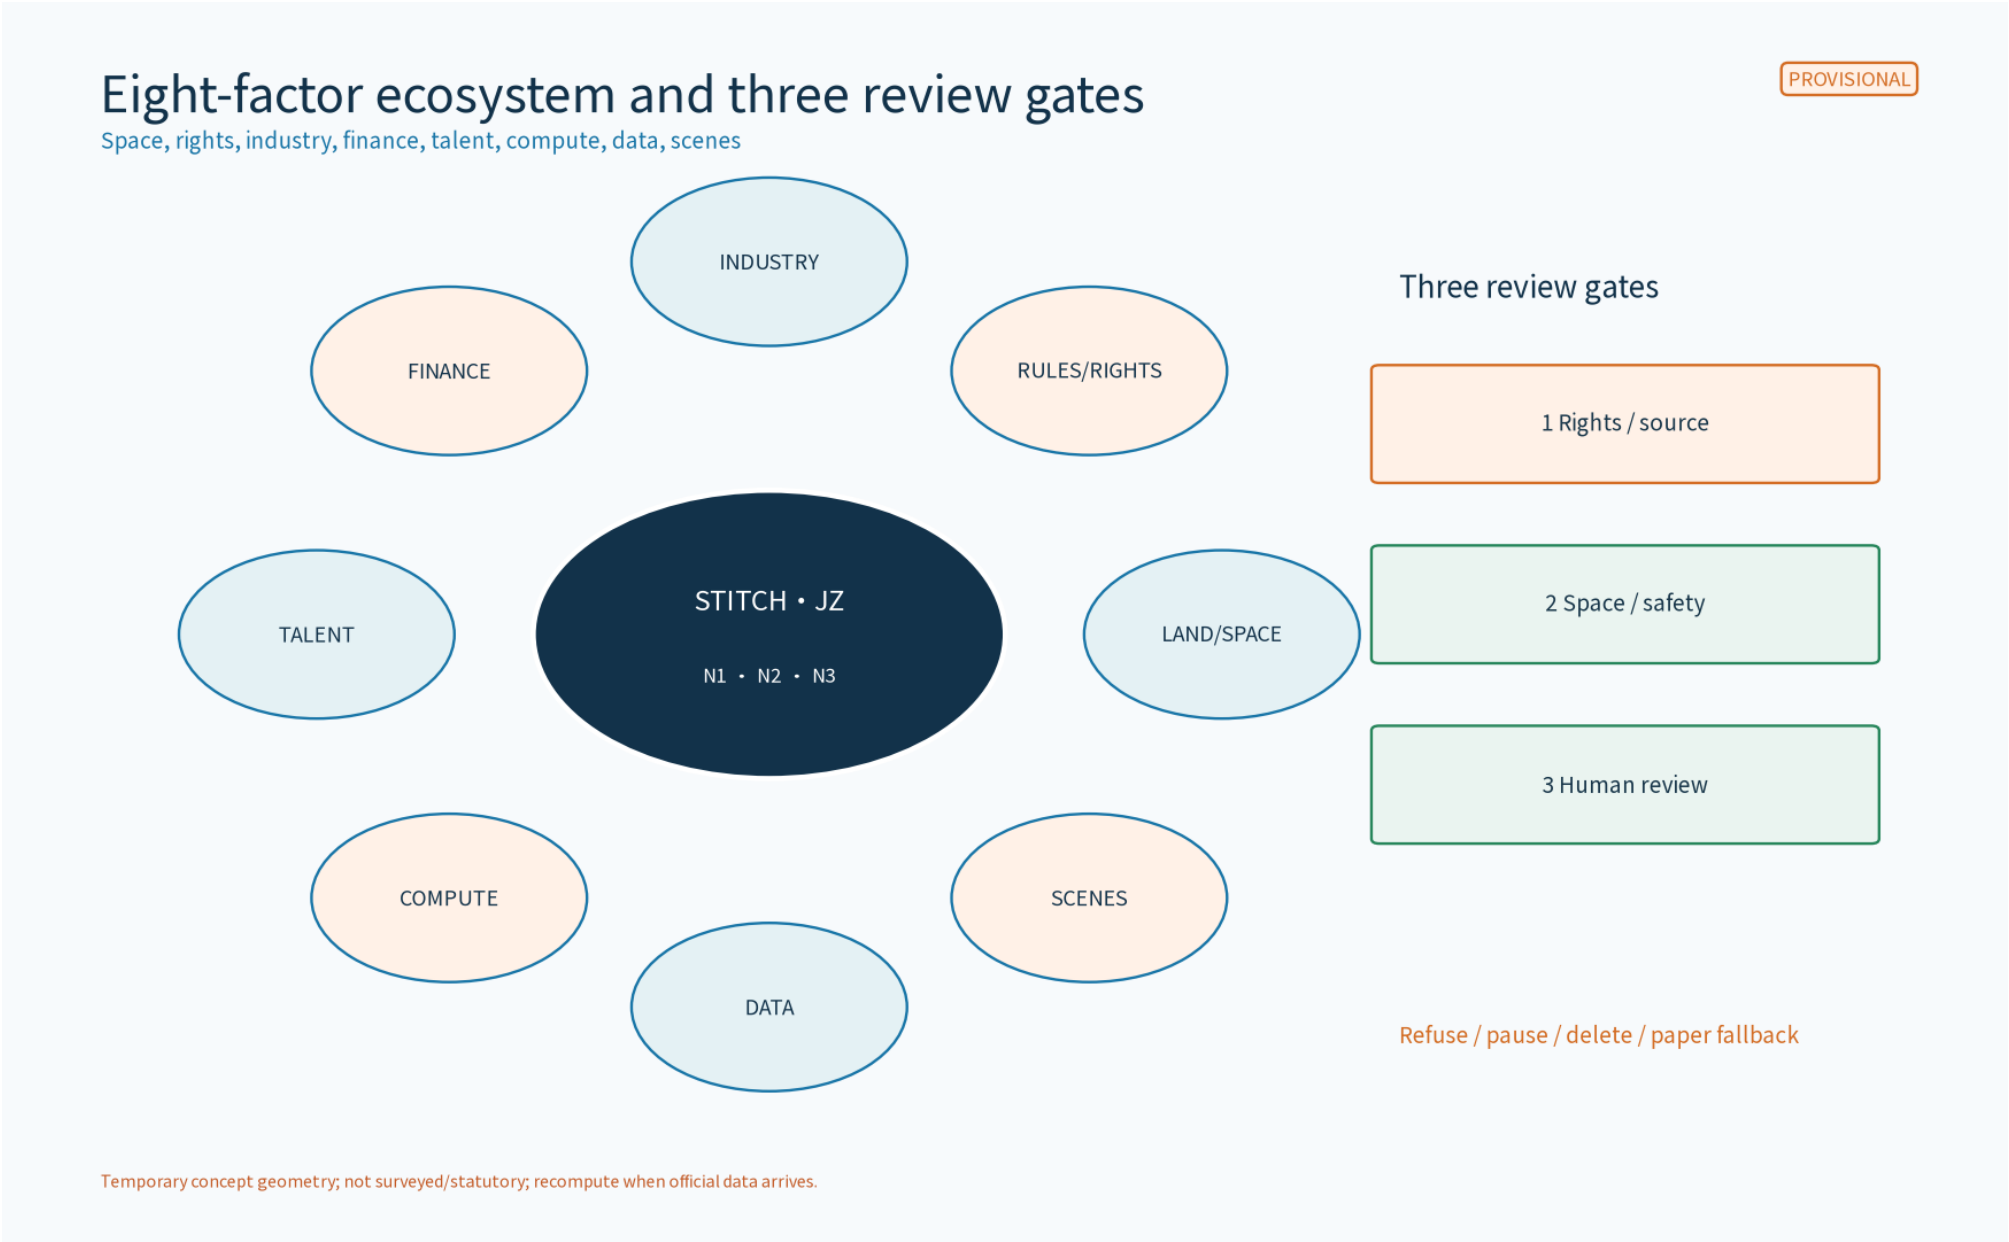

Every card has a spatial touchpoint, human role, privacy boundary and exit

PROVISIONAL

ID / USER	SPACE	AI OUTPUT	HUMAN / EXIT
SC01	axis / resident	aggregate prompt	staff, stop on false alert
SC02	bridge / access user	route candidate	access lead; manual guide
SC03	N3 / older person	priority prompt	operator; iterate bias
SC04	N1 / developer	match + missing items	rights lead; reject
SC05	N2 / tester	difference summary	auditor; archive
SC06	N2 / auditor	rule conflict	panel; refuse entry
SC07	under-bridge / staff	urgency class	maintenance lead; close
SC08	N3 / visitor	language candidate	editor; withhold
SC09	forum / resident	theme grouping	moderator; preserve text
SC10	report wall / public	review list	operator; withdraw

T01 aggregate match • T02 accessible route • T03 bilingual knowledge

Temporary concept geometry; not surveyed/statutory; recompute when official data arrives.

Metrics, rights and unknown-control ledger

Rounded public values; machine precision remains in metrics.json

PROVISIONAL

FORMAL VALUES

site ≈ 1,141 ha

green ratio ≈ 0.134

public ratio ≈ 0.003

OPERATING COUNTS

10 scene cards

3 test protocols

8 global cases

CONTROL LEDGER

Provisional geometry

UNKNOWN FAR / height / capacity

Human review + appeal

UNKNOWN/NULL means the controlling record is absent; it is not zero and not a performance claim.

PROVISIONAL | temporary concept geometry; not surveyed or statutory; recompute when official data arrives.
