

01 Site Overview

Jing-Zhang AI Innovation Belt

● **43.6 km² | COORDINATED STUDY AREA**
Official announcement textual area /
Official polygon not yet available

▭ **≈11.41 km² | GENERAL DESIGN MODEL AREA**
Submitted provisional_rough polygon /
Non-statutory boundary

▭ General Design Model Area (provisional_rough)

Three Key Areas

▭ Zhongzhiyuan / AI Acceleration Area

▭ AI Origin Community / LIVING LOAD

▭ Dazhongsi / AI Cluster

▬ Jing-Zhang Public Spine

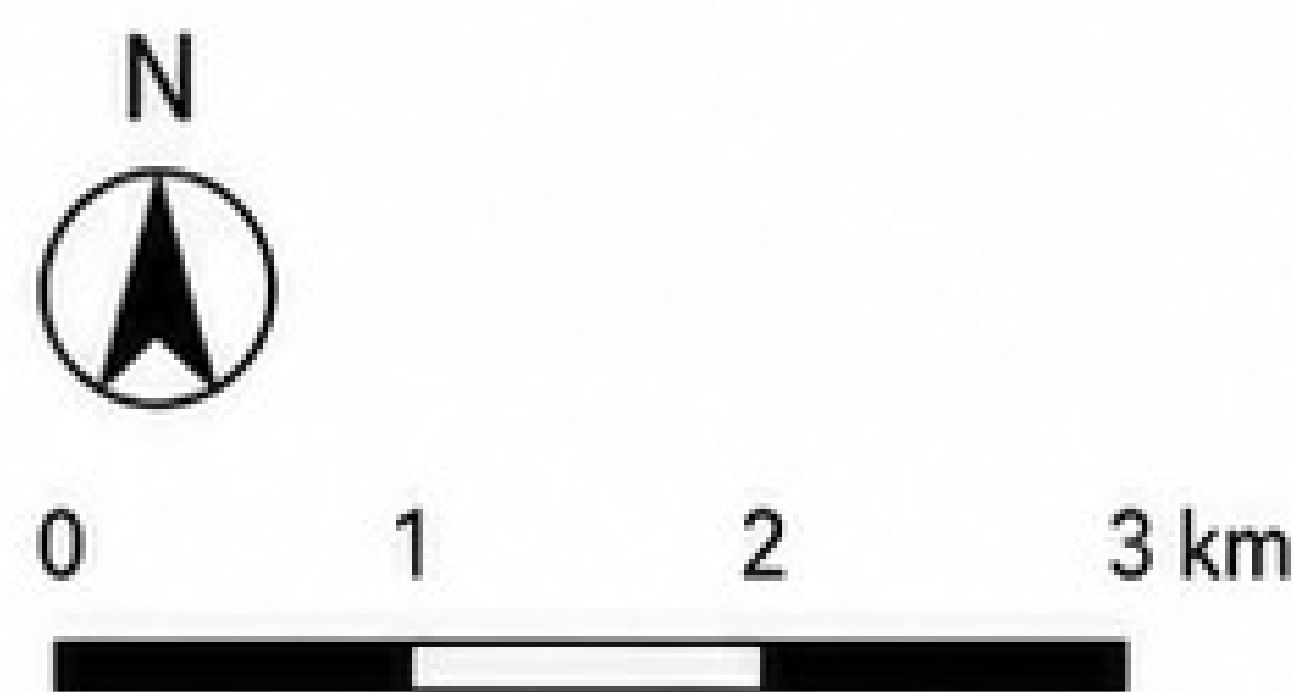

● Rail Transit (Existing)

○ Rail Transit (Planned)

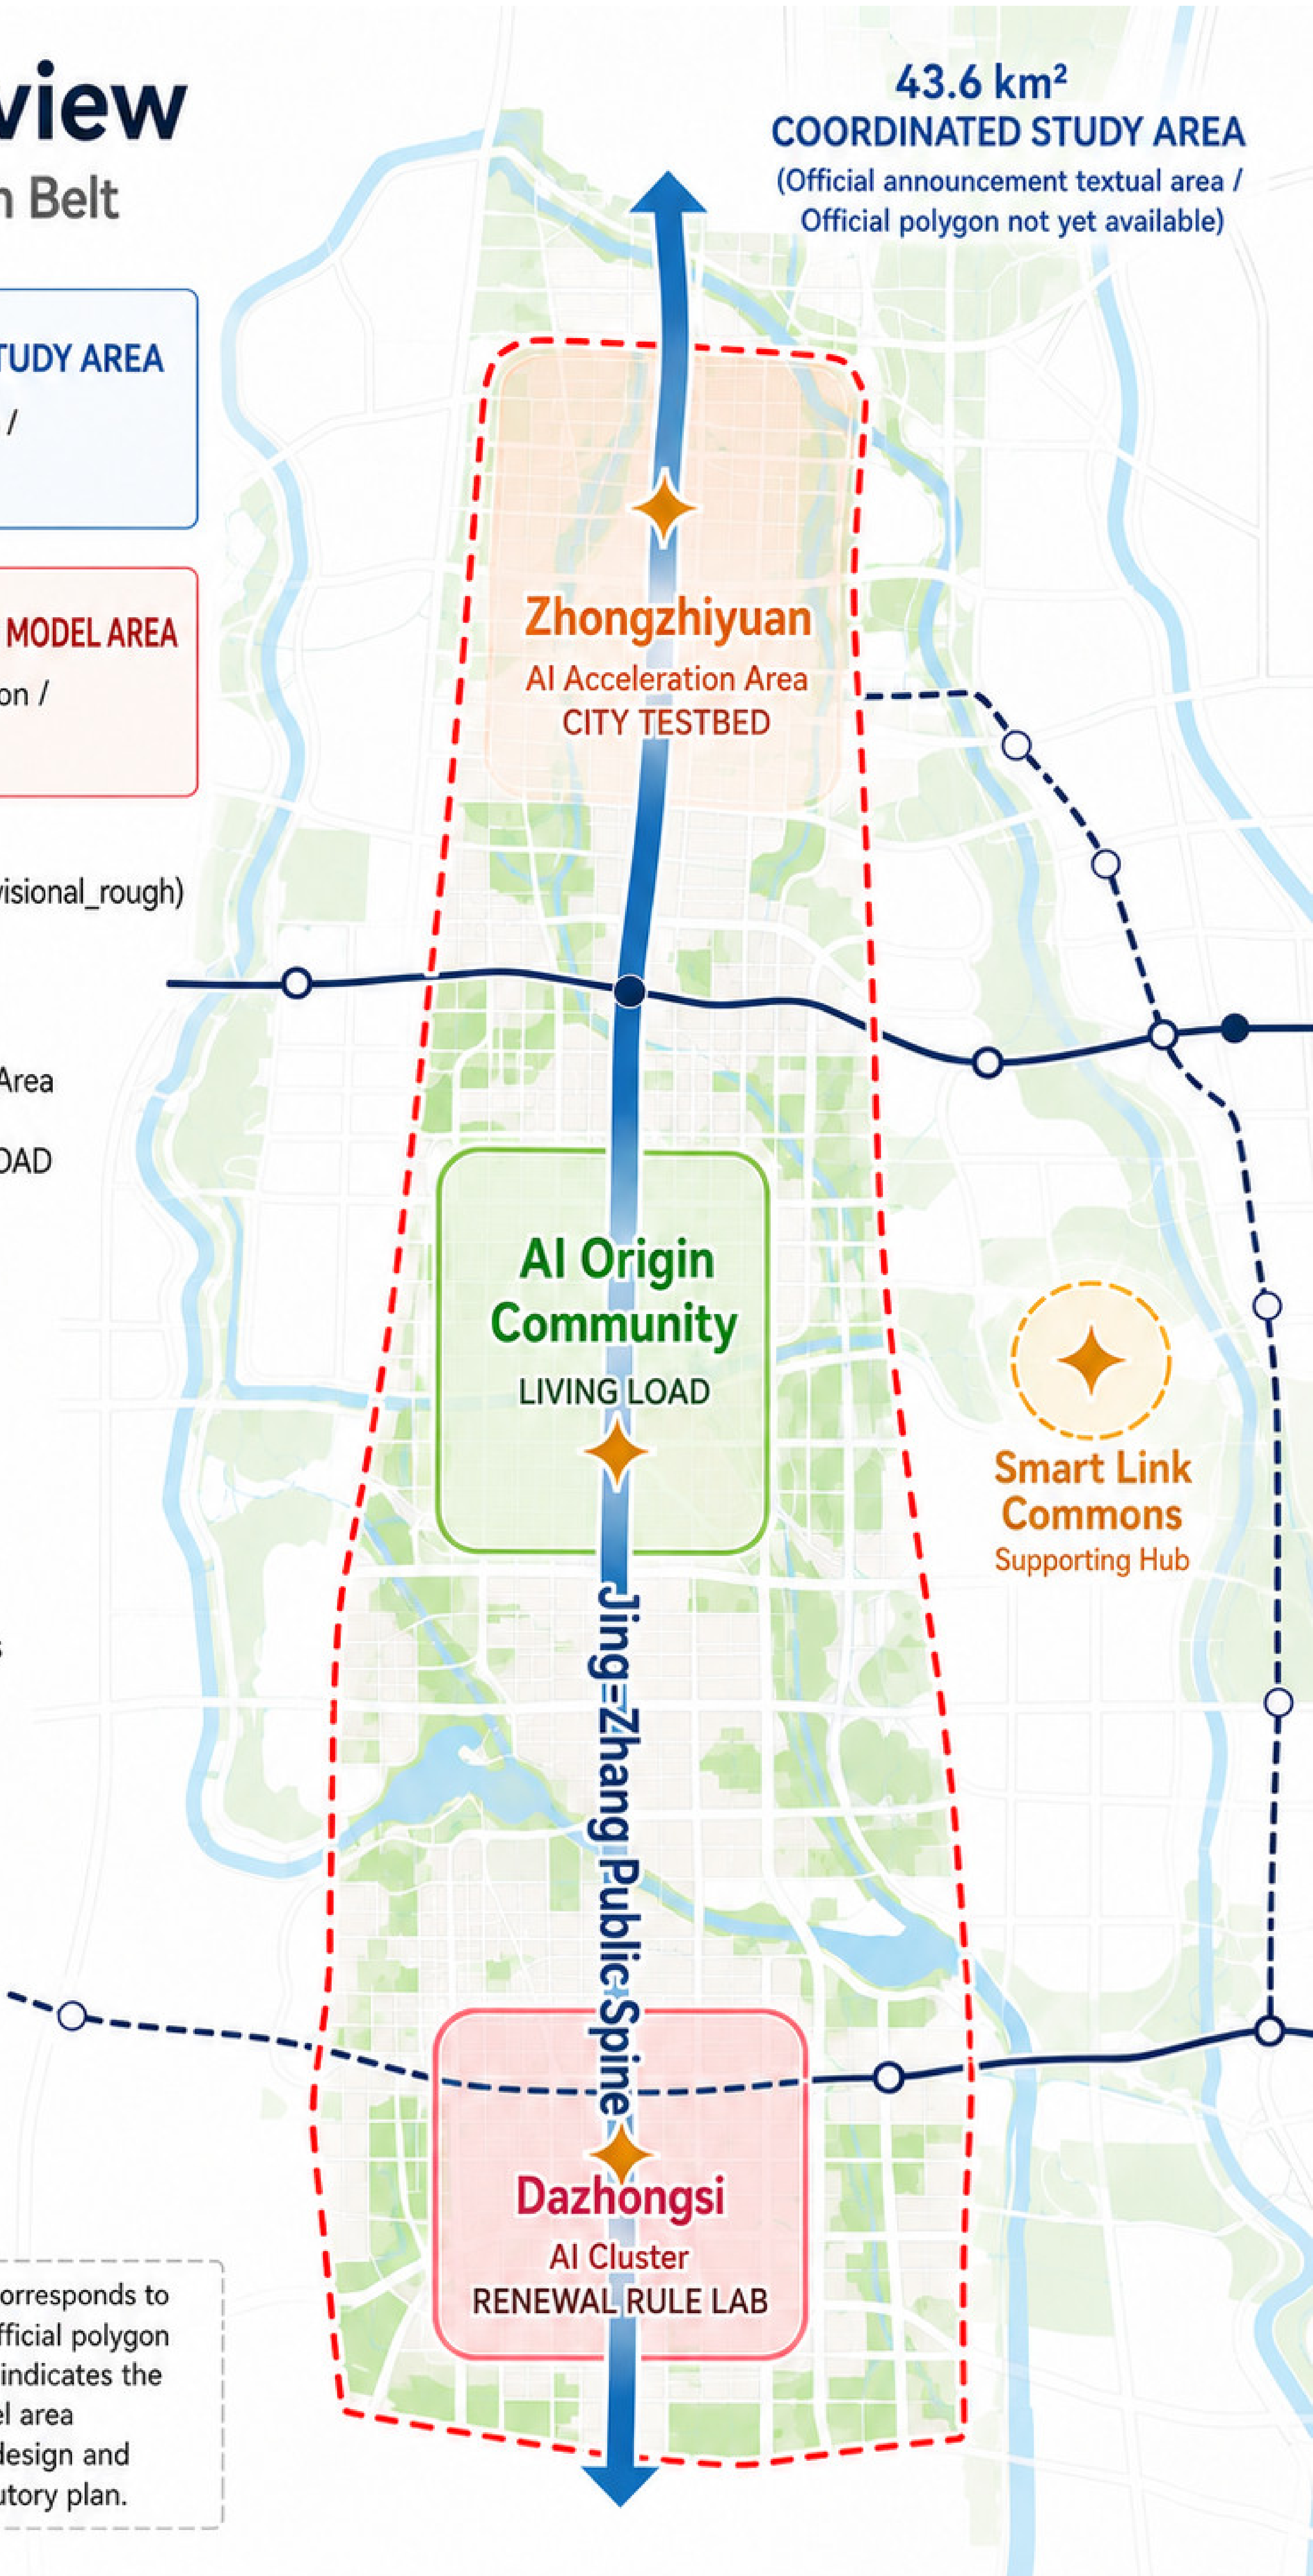

▬ Water & Blue-Green Corridors

▬ Parks & Open Space

★ 3 Core Honor Nodes
+ 1 Supporting Hub

Note: the 43.6 km² coordinated study area corresponds to the official announcement textual area; an official polygon is not yet available. The red dashed outline indicates the submitted ≈11.41 km² general design model area (provisional_rough), for conceptual urban design and research only, not an official redline or statutory plan.

Coordination of Four Leading Functions

43.6 km²

Coordinated Study Area

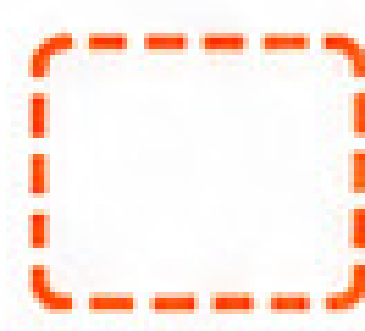

- Area stated in the official announcement
- Official boundary not yet available

 Official boundary not yet available

≈ 11.41 km²

General Design Model Area

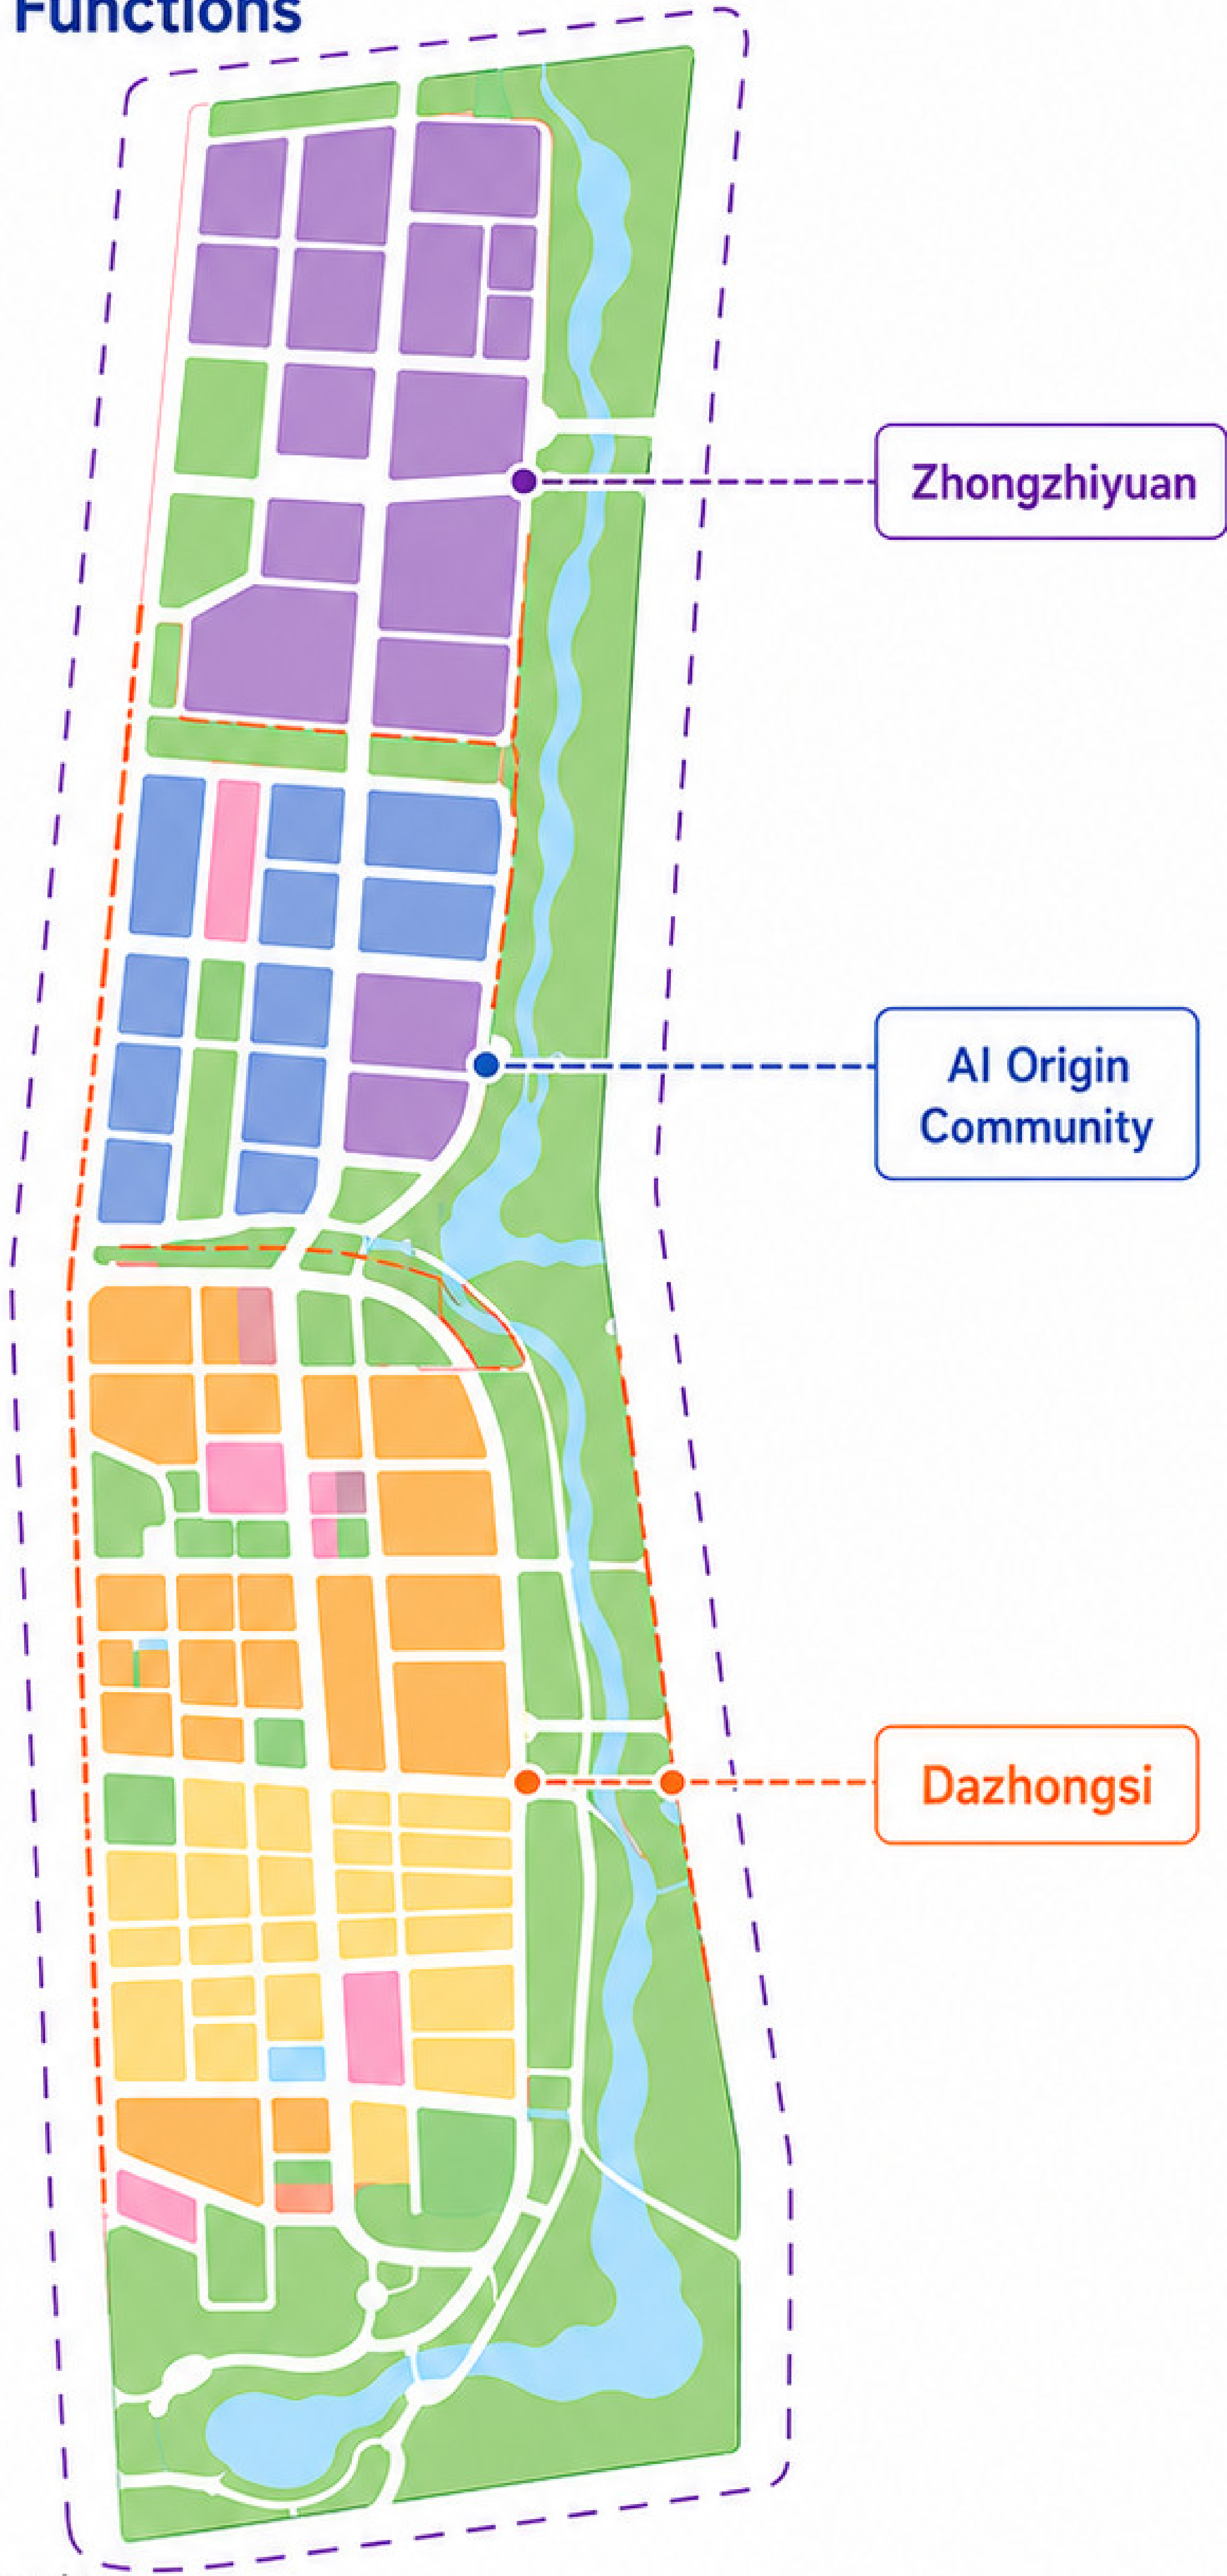

- Based on the submitted provisional rough boundary
- Non-official / non-statutory planning boundary

 Provisional rough boundary (submitted)

-  High-density Innovation & R&D
-  Mixed-use (Live-Work-Play)
-  Industrial Services & Support
-  Residential Living
-  Green & Open Space
-  Public Facilities & Education
-  Water

Note: This diagram uses a provisional rough boundary for conceptual urban design and research only. It does not constitute an official redline or an approved plan.

03 Structure of Three Key Areas

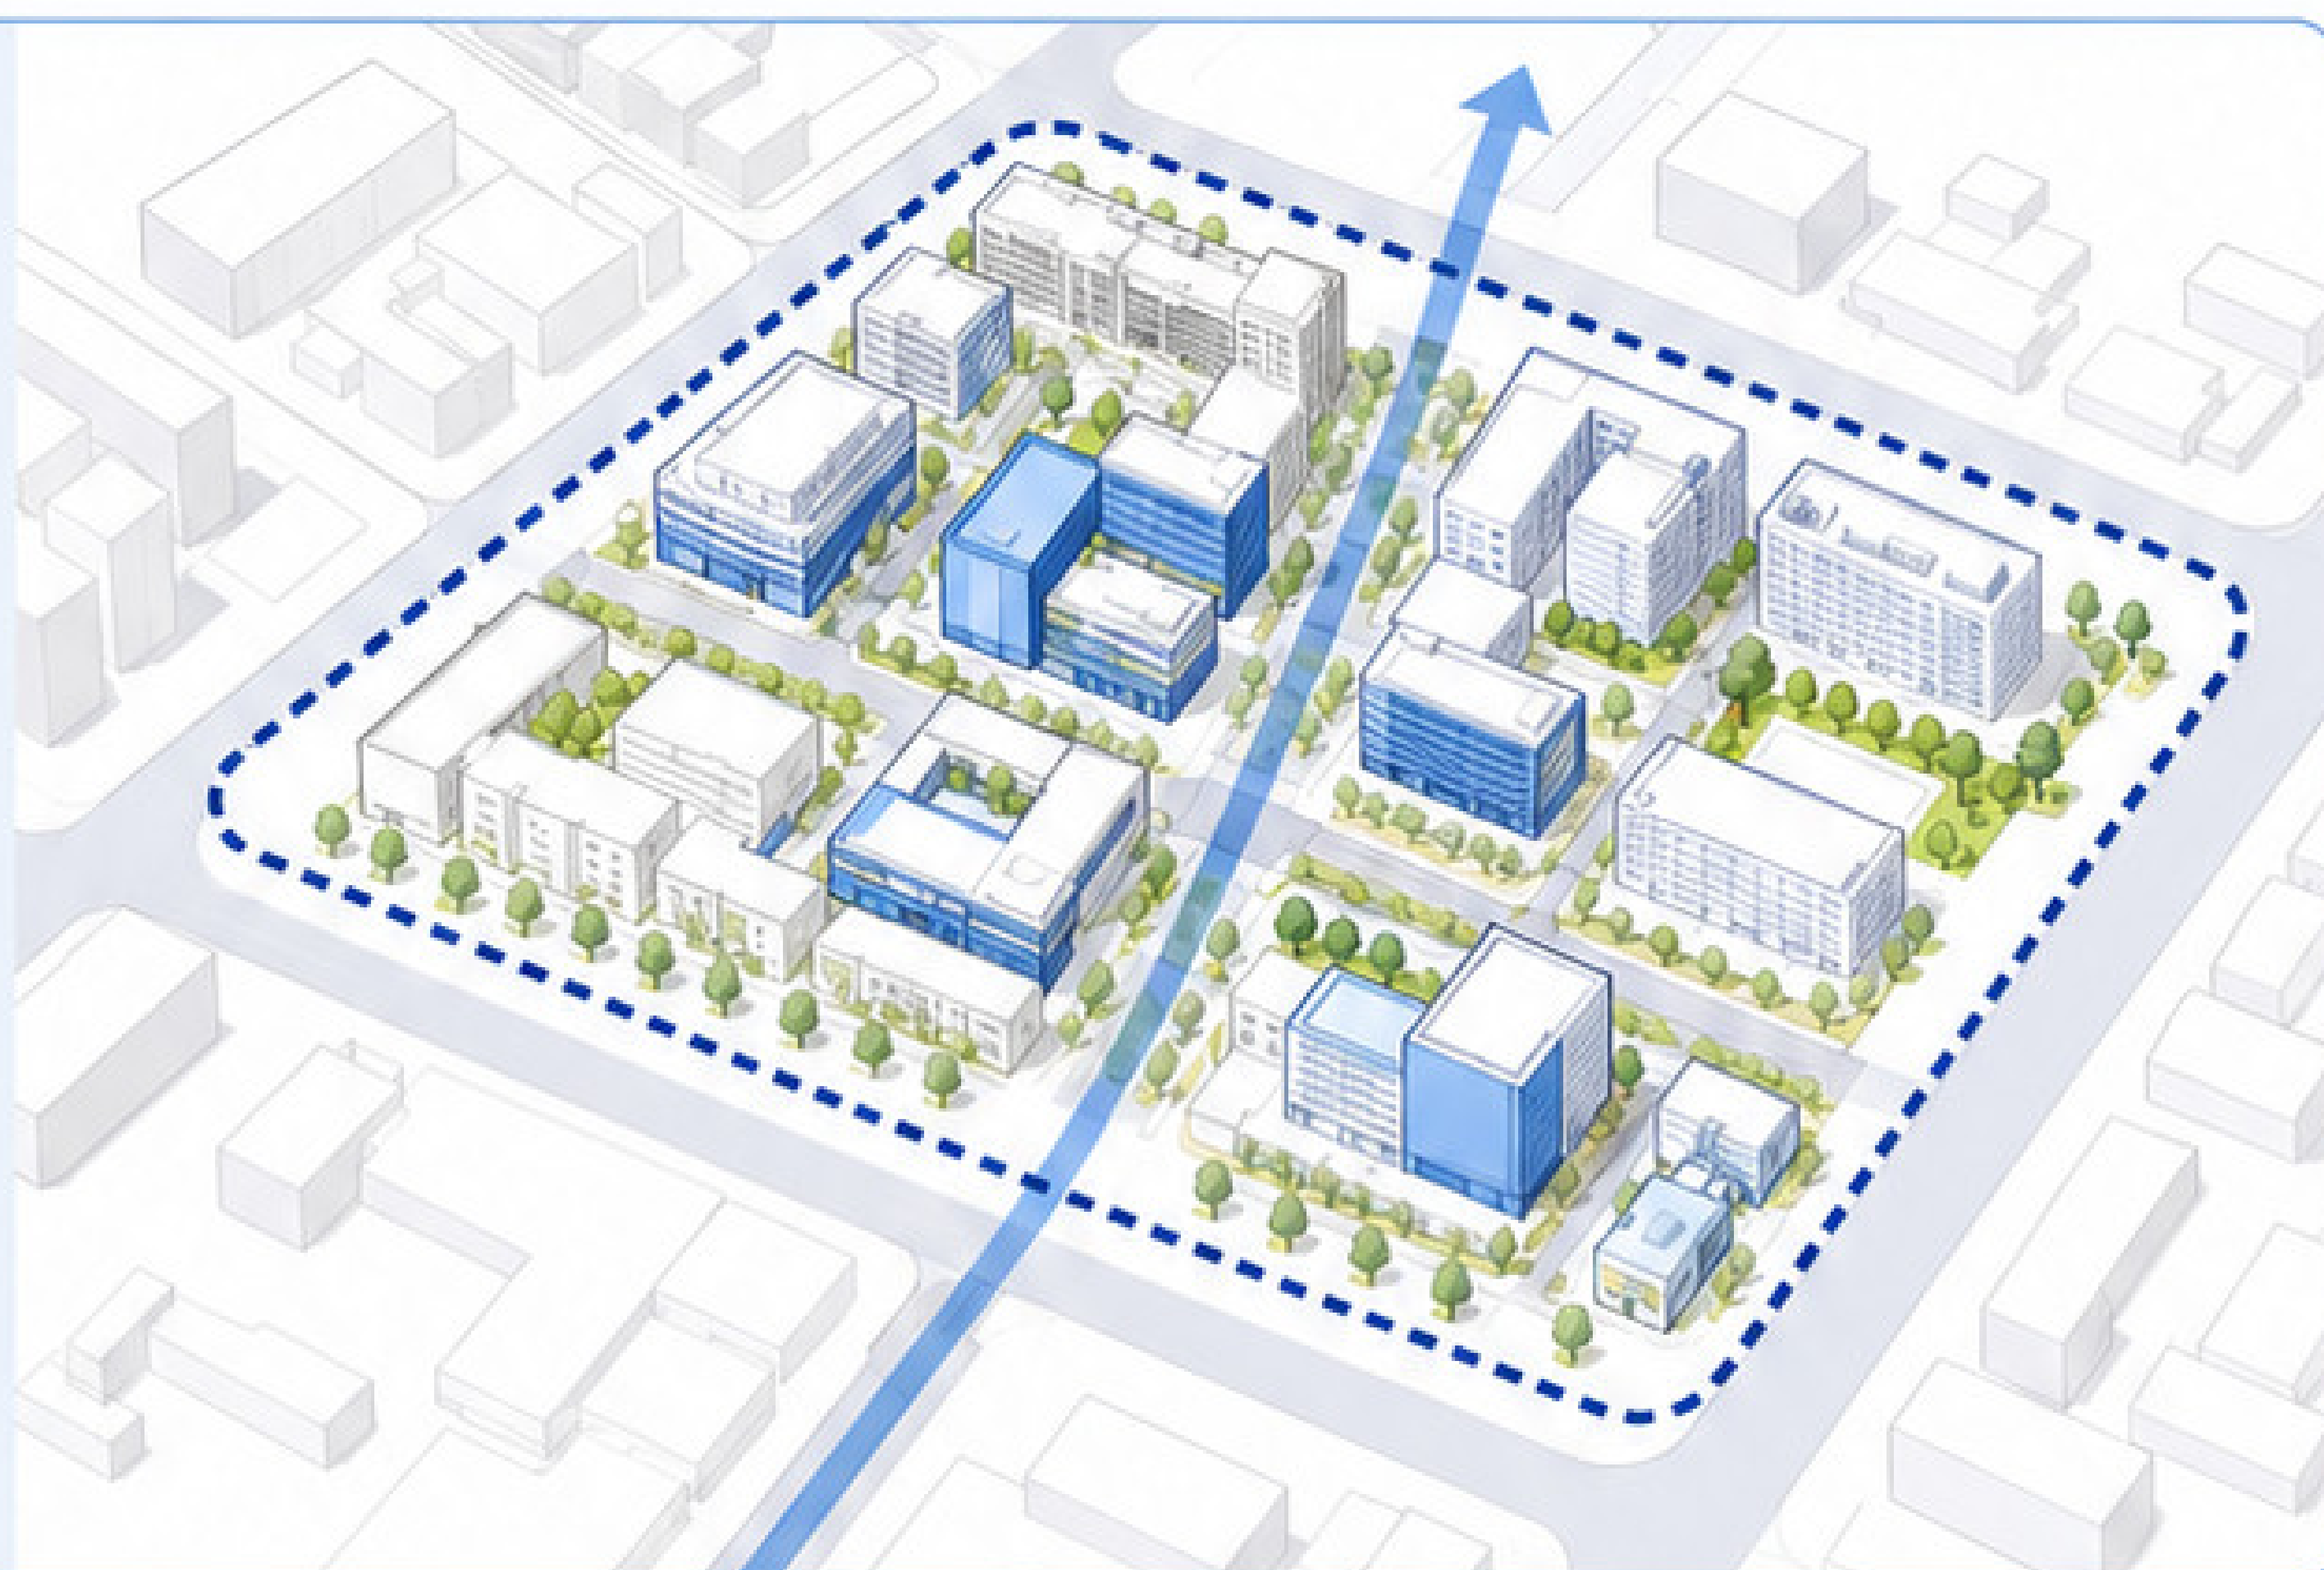

Three Roles & Spatial Structures

Zhongzhiyuan CITY TESTBED

The Last Mile Before AI
Enters the Real City

Public Front →
Controlled Test Core

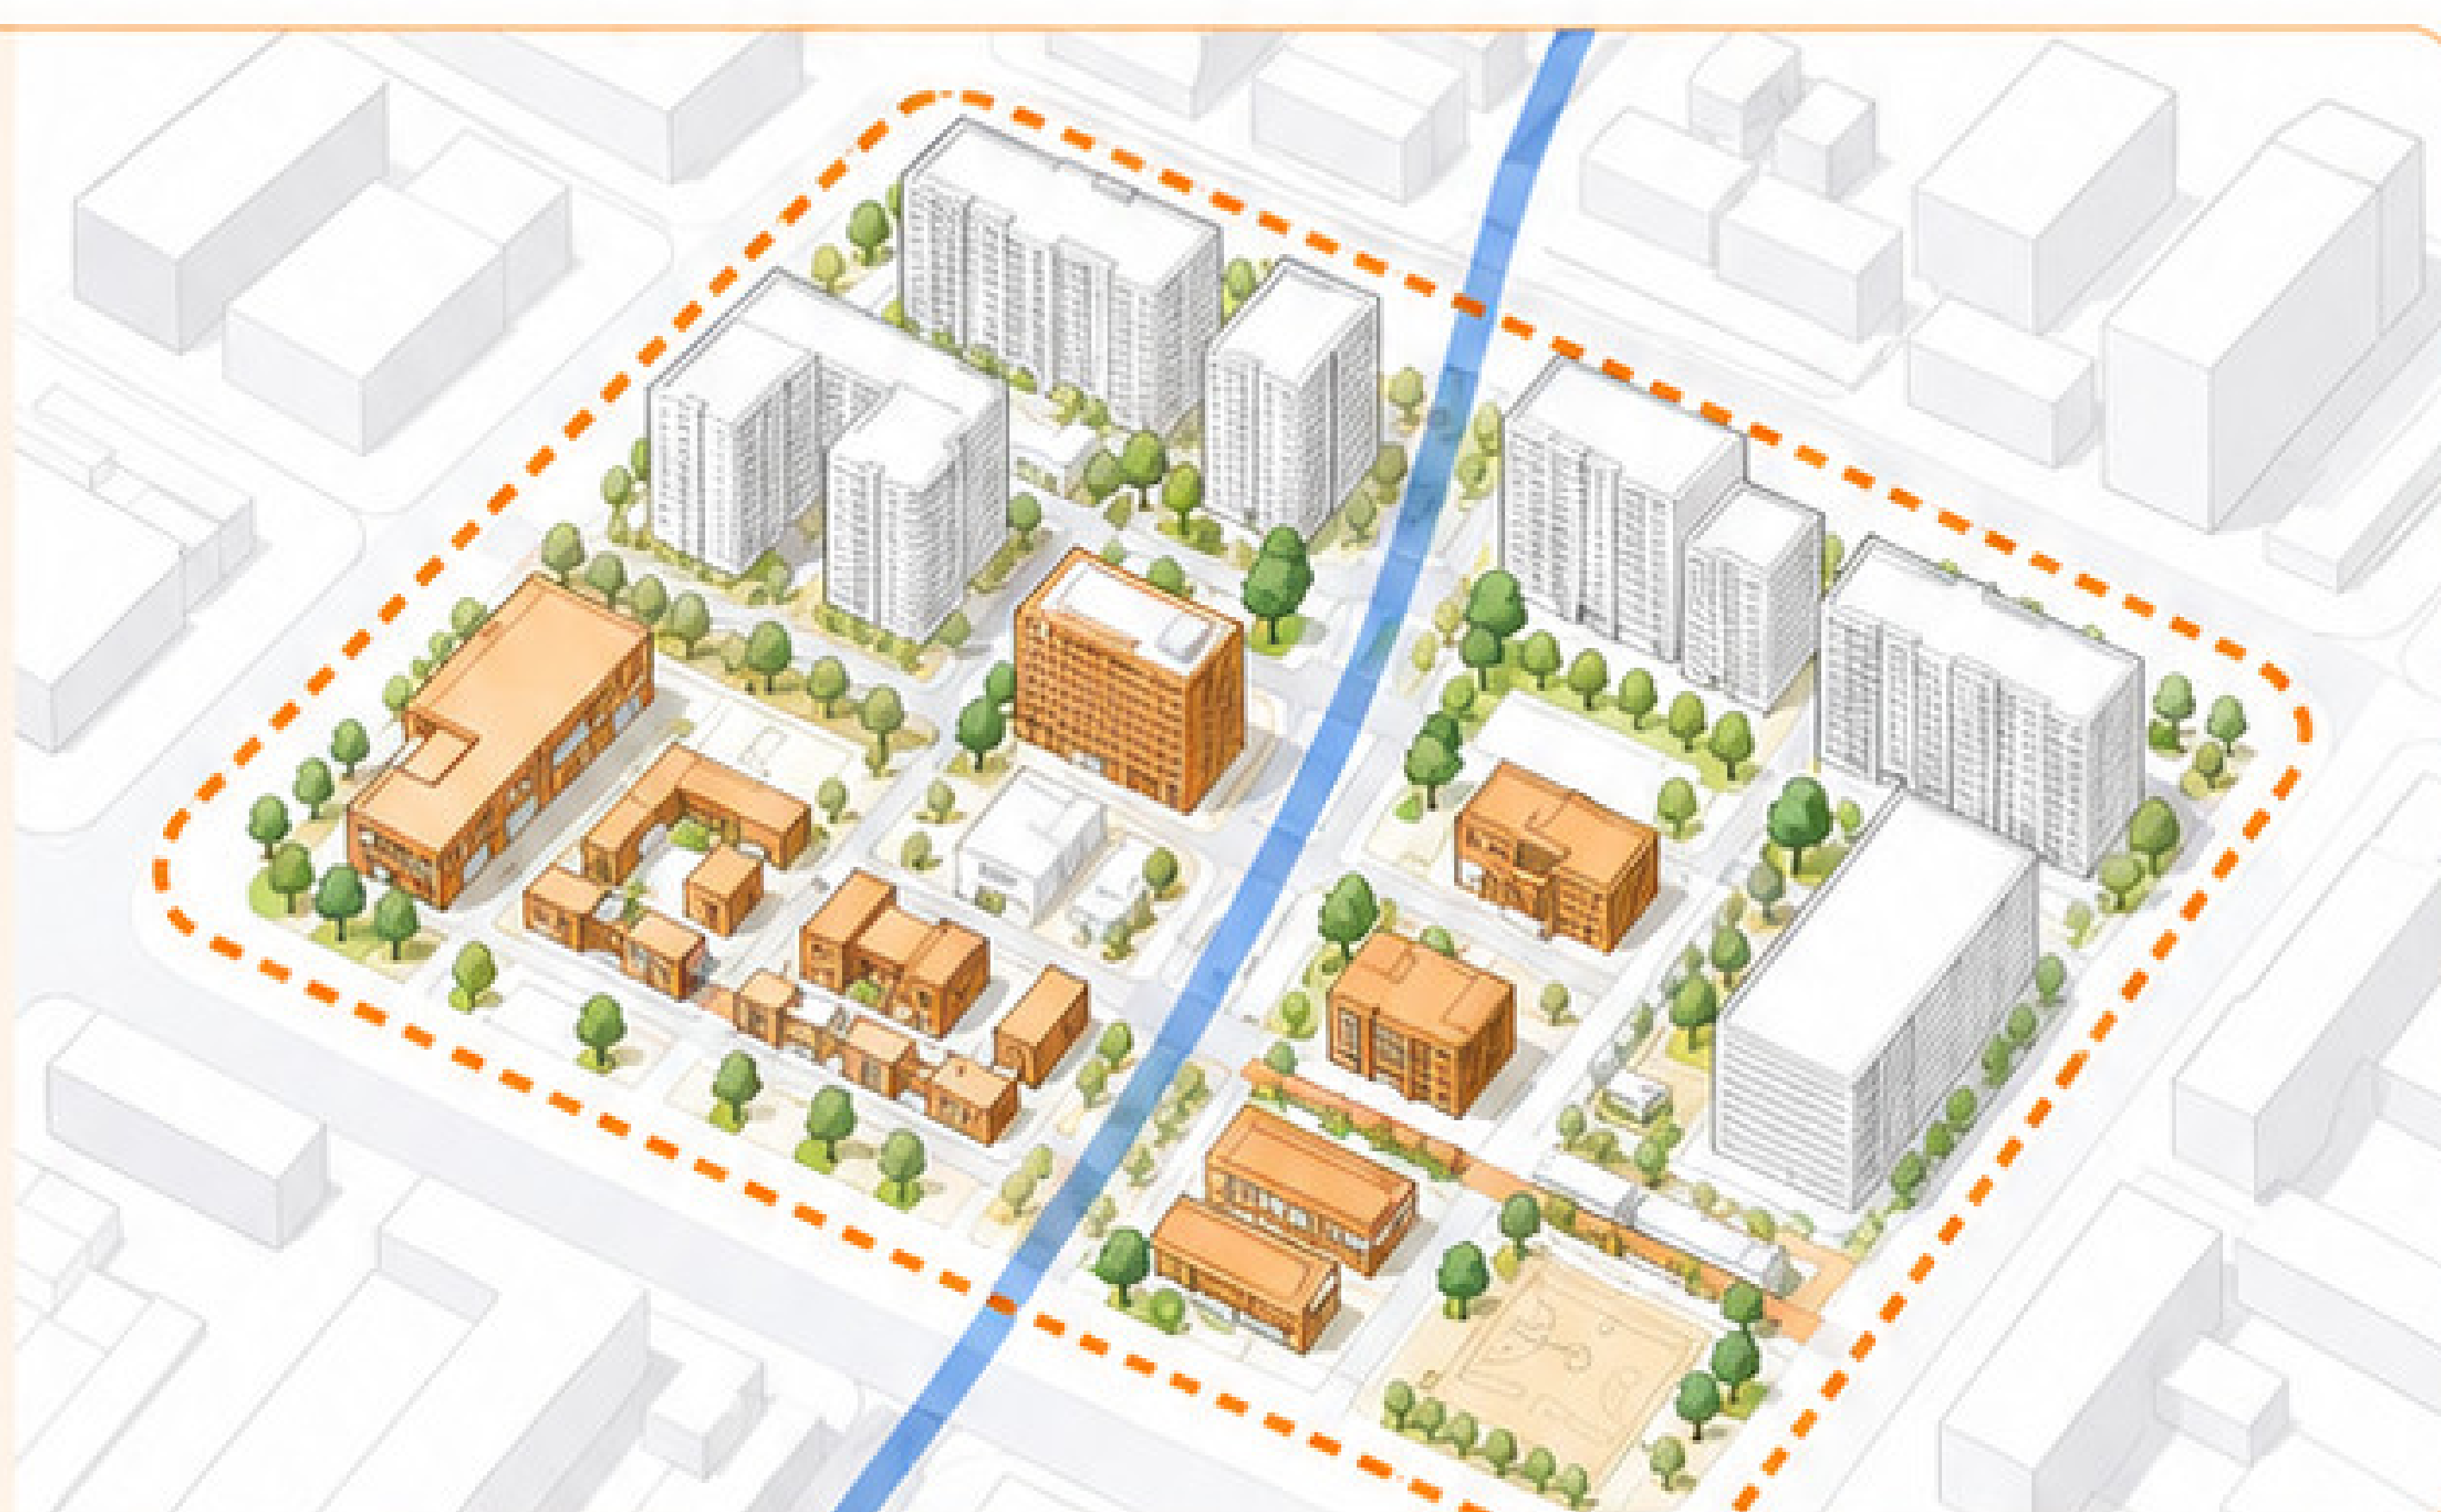

Prototype Transition →
Limited Real-life Edge

AI Origin Community LIVING LOAD

AI / HUMAN / OFFLINE /
LOW-NO SENSING

Basic public services retain
human and offline paths

Dazhongsi RENEWAL RULE LAB

AI Renewal Unit
Detailed-Planning Workbench

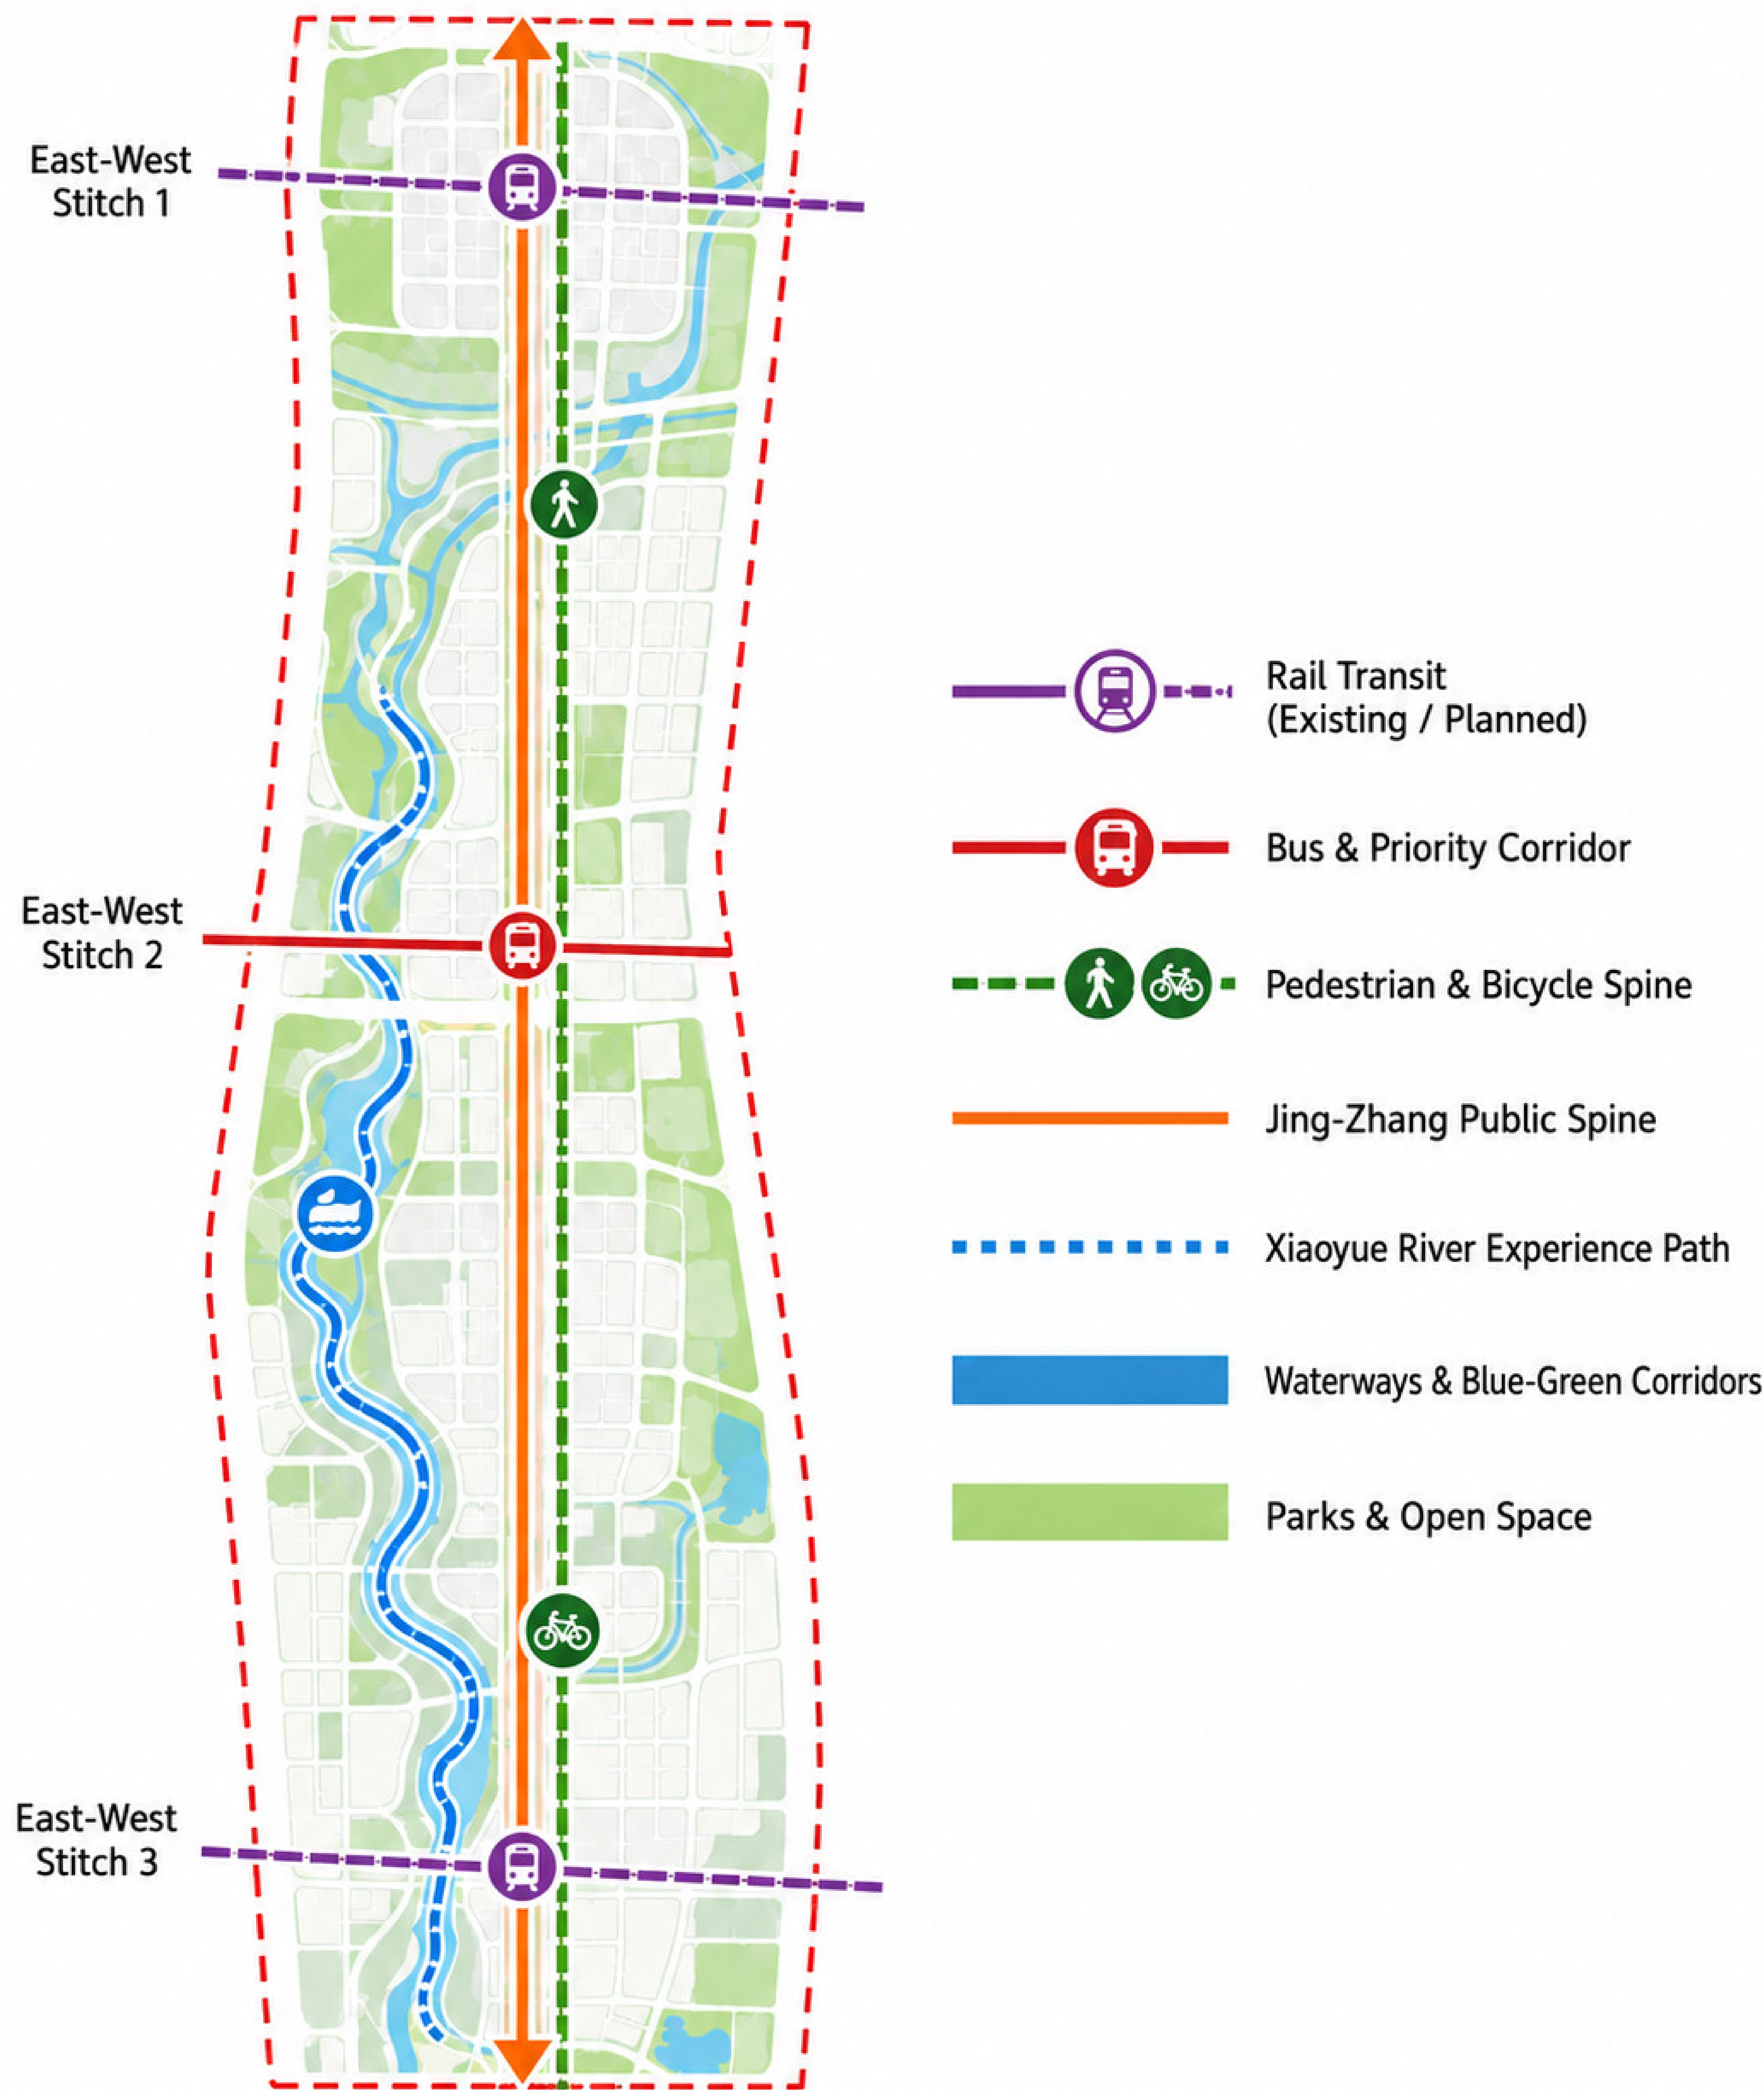

KEEP / ADAPT /
TEMPORARY / TRIGGERED

Note: provisional_rough, for conceptual urban design and research only;
not an official redline or approved plan.

04 Mobility & Blue-Green Network

Multi-network Integration · People-friendly

Note: provisional_rough, for conceptual urban design and research only;
not an official redline or approved plan.

05 Metrics & Evidence

Only confirmed scope, deliverable counts and method-level indicators

01	Space & Scope	- Coordinated research area: 43.6 km² - Overall design area: approx. 11.4 km² 3 key areas, approx. 368.4 ha total
02	Scenarios & Personas	12 AI scenario cards 4 test / validation scenario types 8 persona groups
03	Public Nodes	3 core honor nodes 1 supporting shared field - Services: AI / HUMAN / OFFLINE / LOW-NO SENSING
04	Infrastructure Support	- C: regional–district–edge compute matching - P: Protected / Flexible / Migratable - W: W0–W3 compute–water coordination
05	Planning Rules	- Civic AI Overlay: 6 planning–control categories - A / B / C: mandatory / conditional / guidance–experimental - No fabricated FAR, height, MW, MVA, water demand or pipe size
06	Operations	- C0–C6 commissioning method - Evidence Ledger - NORMAL / DEGRADED / MANUAL / EXIT

Note: Numbers shown are confirmed competition scope or proposal deliverable counts, not statutory controls, engineering capacity, or approval conclusions.
