

01 Overall Structure and Renewal

A green public axis connecting everyday life with an AI future

F01 Overall Concept and Spatial Framework

One axis, three cores, four connections | Greener, comfortable, liveable and resilient

Jing-Zhang as an open but controlled public interface

Zhongzhiyuan | 192.1 ha
Innovation incubation core

Beijing AI Origin Community | 104.3 ha
Talent vitality core

Dazhongsi AI Industry Cluster | 72.0 ha
Industry cluster core

A6 Qinghua E. Rd

A4 North 4th Ring

A2 North 3rd Ring

A5 Chengfu Rd

A3 Zhichun Rd

Self-drawn context from submitted GeoJSON | no commercial map screenshot

B0 is the existing-condition base. Cores are functional dots only. Audit points do not prove barriers; no new 2 km or key-area polygons are drawn.

JING-ZHANG / 2026

AI × GREEN LIFE

1 + 3 + 4

Jing-Zhang as an open but controlled public interface

01 Spatial connection

Continuous walking, accessibility, rail transfer and graded east-west interfaces

02 Innovation-chain connection

Learning, research, incubation, testing, adoption, industrialization and feedback

03 Everyday-life connection

Commuting, all-age activity, climate comfort, night and weekend services

04 Resilience connection

Shelter, supplies, people, mobility and professional emergency coordination

The cultural lead is Zhan Tianyou's spirit; rail is the carrier. Students engage through frontier projects, talks and first-hand feedback.

AI binding: spatial carrier + AI service + accountable operator. Humans decide high-risk matters.

Verified continuity

Field audit pending

One axis

The green public axis supports everyday public life.

Three cores

Zhongzhiyuan, AI Origin and Dazhongsi work differently together.

Four connections

Space, innovation, daily services and resilience work as one.

F02 Land Use & Renewal Summary

Protection and repair first

Focus: continuous active travel, accessibility, ecology and basic services.
Action: repair gaps, interfaces and everyday access.
Boundary: AI assists alerts and matching; it does not replace public essentials.

Adaptive reuse of existing space

Target: underperforming buildings, active ground floors and support space.
Action: adapt first, adding open interfaces and flexible services.
Responsibility: coordinate tenure, fire safety, utilities and operators.

Conditional construction

Trigger: demand, tenure, structure, fire safety, utilities and operators are verified.
Decision: discuss new construction only after those checks.
Boundary: accountable actors retain approvals, critical services and stop authority.

Pre-delivery checks

Need

Users, timing and service volume

Tenure

Available space and permissions

Safety

Structure, fire safety and accessibility

Utilities

Capacity, connection and maintenance

Operations

Named daily steward and maintainer

Accountability

Approval, critical service and stop authority

JING-ZHANG / 2026

AI × GREEN LIFE

SPATIAL CARRIER

Zhan Tianyou spirit-led campus-city learning interfaces, joint studios and project-talk spaces

AI SERVICE

Frontier-project matching, talk booking,
experiment scheduling and student
first-hand feedback

RESPONSIBLE OPERATOR

Firms / incubators stay open; schools coordinate governance

S2 Daily liveability / all-age weekends

SPATIAL CARRIER

Origin Community living rooms, shade, water, accessibility and resilience points

AI SERVICE

All-age demand, climate comfort, event booking and resource availability

RESPONSIBLE OPERATOR

Community, site operators and public-service departments

**CLOSED
LOOP**

resource / status

demand

match

handoff

confirmation

review

SPATIAL CARRIER

Controlled routes, handoff stops and human-takeover points: T01 / T02 / T03

AI SERVICE

T01 service robots; T02 low-speed shared short shuttle; T03 last-mile delivery

RESPONSIBLE OPERATOR

Licensed operators monitor, take over, stop and provide alternatives

SPATIAL CARRIER

Shelters, supply points, people assembly points and emergency-mobility interfaces

AI SERVICE

Resource / status aggregation, demand matching, handoff confirmation and review

RESPONSIBLE OPERATOR

Emergency authority leads; communities, sites and mobility operators coordinate

HIGH-RISK TASKS: HUMAN DECISION, AUTHORIZATION, TAKEOVER AND ACCOUNTABILITY

Walking, cycling, accessibility, metro and ordinary transit come first. Six road intersections are audit points, not presumed barriers.

04 Metrics, Tasks and Risks

A green public axis connecting everyday life with an AI future

F05 Project Packages, Metrics and Evidence Chain

Official textual scale is separate from provisional model metrics | recalculate when formal evidence arrives

JING-ZHANG / 2026

AI × GREEN LIFE

OFFICIAL TEXTUAL SCALE

Coordinated study

43.6 sq km

Overall design

about 11.4 sq km

Three cores

192.1 / 104.3 / 72.0 ha

PROVISIONAL MODEL METRICS

Model site area

11,412,825 sq m

Model green ratio

12.3423%

Model public-space ratio

7.3281%

INDICATORS

Accessibility

walk / access

Utilization

group / time

Response time

daily / emergency

Completion

handoff loop

All-age coverage

child / older / disabled

Green travel

walk / cycle / transit

NEAR / MID / LONG PROJECT PACKAGES

NEAR | close gaps

PHASE / PROJECT PACKAGE

Audit six corridors; repair green/accessibility gaps; open talks, project feedback and small T01 pilots

RELEASE EVIDENCE

Field continuity, accountable operator and user demand

MID | form networks

PHASE / PROJECT PACKAGE

Reuse ground floors; all-age climate nodes; controlled expansion of T02 shuttle and T03 delivery

RELEASE EVIDENCE

Tenure, roads, operational data and stage evaluation

LONG | conditional build

PHASE / PROJECT PACKAGE

Shared validation and industrialization carriers; resilience network; evidence-backed new construction

RELEASE EVIDENCE

Formal planning, carrying capacity and public-interest review

RECALCULATION TRIGGERS

RECALCULATE WHEN AVAILABLE: formal boundaries / regulatory plan / tenure / road redlines / utilities / heritage controls.

Provisional design model | Not an official redline, key-area boundary or engineering decision | 2026-08-31

Operating condition

This provisional model communicates design logic and metric checks only; it is not an official redline, statutory plan or engineering commitment.
