

One source for three scopes, five functions, three zones/two wings, five stations, and M1-M4

ENTERABLE JING-ZHANG · FORMAL INTAKE · REVIEW REPAIR

01 / 05

Site Overview | Enterable One Line, Four Chapters, Five Stations

Every station has direct entry; corridor is an overview only. Four chapters connect public paths, knowledge, interfaces, and human accountability.

01	02	03	04
Time and Arrival	Heritage and Knowledge	Civic Intelligence and Duty	Validation and Recovery
Rail evidence -> public entry	Open frame -> learning hall	AI / HUMAN / OFFLINE	PUBLIC -> CONTROL -> EXIT

PROVISIONAL GEOMETRY · FIVE STATIONS 5/5 DIRECT · M1-M4 UNCHANGED · INSTITUTIONAL AND LIVE OPERATION NOT CLAIMED

Every concept response is located; boundaries, ownership, and institutional roles remain unclaimed

Taskbook Crosswalk | 3 Positionings × 5 Functions × 3 Zones + 2 Wings × 5 Stations × M1–M4

Conceptual recommendation. No M5, fifth chapter, SC-11, or new official core area. Every human role is a candidate responsibility.

THREE POSITIONINGS | DOCUMENTED TASKBOOK INPUT

Centennial Jing-Zhang Cultural Belt
Heritage evidence → public knowledge → correctable memory

Metropolitan AI Life Experience Belt
Ordinary use first · AI/HUMAN/OFFLINE

AI Integrated Innovation Belt
Open collaboration → human gate → bounded return

FIVE FUNCTIONS | TASKBOOK-DOCUMENTED / PROPOSAL-CONCEPT

Full-Stack Independent
AI Innovation System

World-Class AI
Innovation Ecosystem

New Paradigm for
AI-Enabled Scenarios

Intelligent and Vibrant
AI City

Global Voice in
AI Governance

THREE ZONES AND TWO WINGS | NAMES/ROLES DOCUMENTED; BOUNDARIES, OWNERSHIP, PARTNERSHIPS NOT CLAIMED

Zhongguancun Technology
Services Wing · service interface

Dazhongsi AI
Industry Cluster · low-impact access

Beijing AI Origin
Community · human-accountable service

Zhongzhiyuan AI
Acceleration Area · bounded recovery

Xiaoyue River Scenario
Enablement Wing · public return

FIVE STATIONS | PROJECT-DOCUMENTED; CONCEPTUAL CARRIERS; REAL OPERATIONS NOT CLAIMED

CANONICAL M1–M4 RESPONSIBILITY CHAIN | EACH STEP CAN STOP AND RETURN TO ORDINARY USE

Mechanism	Spatial carrier	Users	Collaborative input	Output	Feedback loop	Human role	Evidence
M1 EVIDENCE Evidence Lineage	Xizhimen / source layer Milestones and honor display	Public, learners, reviewers	Need, sources, rights	Credential + limits	Dispute → review → version	Evidence & Source Steward	Contract recorded Operations UNKNOWN
M2 OPEN Open Collaboration	Dazhongsi → learning space Canopy, hall, co-learning table	Residents / learners / devs	M1, public material, needs	Brief + exit path	Learning → provenance to M1	Knowledge & Program Steward	Concept only Partnership NOT CLAIMED
M3 HUMAN Human Service Gate	AI Origin dual-channel kiosk · AI/HUMAN/OFFLINE	Public, staff, appellants	M1/M2, risk, capacity	Human/offline decision	Appeal → revise/reject/return	Public Service & HR Steward	Process concept Operator UNKNOWN
M4 RETURN Controlled Validation & Return	Zhongzhiyuan signal field Observe/boundary/recovery	Validators / public / upkeep	Valid M3, scope, stop plan	Receipt/recovery state	Result → public review → M1/M2	Validation & Recovery Steward	Synthetic demo Approval NOT CLAIMED

Evidence boundary: official boundary, ownership, utilities, fire, heritage, measured accessibility, budget, insurance, DPIA, operator, real-user testing, and pilot approval are UNKNOWN / EXTERNAL_DEPENDENCY / NOT CLAIMED.

Four spatial carriers by eight resource axes, each with entry, exit, human, and evidence gates

Agent.2 | Concise Eight-Resource Ecosystem Map

4 spatial carriers × 8 resource axes. Every cell is a conceptual interface—not ownership, investment, data authorization, partnership, or pilot commitment.

Spatial carrier	Land	Space	Industry	Capital	Talent	Compute	Data	Scenarios
Candidate role / evidence	resource types only	ordinary / bounded	need-validation flow	concept types only	candidate roles	task / term bound	four preferred types	entry / exit
Zhongzhiyuan Validation & Recovery role Evidence: CONCEPT Approval/operation: NOT CLAIMED	Existing public / renewal / temporary reversible type Exit: remove + restore Metric: restoration ratio	Observation + control Entry: ordinary use first Exit: close validation layer Metric: restored availability	R&D-validation type Entry: public-need relevance Exit: archive / demobilize Metric: need translation	Research grant / social capital / procurement types Exit: stop authorized spend Metric: traceable sources	Validation / replication / maintenance roles Exit: revoke role access Metric: role coverage	Term-bound service Entry: task/risk/quota Exit: expiry revocation Metric: expiry closure	Public / anonymized / synthetic / controlled Exit: delete / archive Metric: eligible-data ratio	SC-08-10 Human entry Stop/exit/restore Metric: restored count
AI Origin Public Service & HR role Evidence: CONCEPT Operator/business: NOT CLAIMED	Open ground floor / temporary service position Exit: clear equipment Metric: ordinary restoration	AI/HUMAN/OFFLINE Entry: human capacity Exit: human / offline Metric: takeover reach	Public-need interface No automated high impact Exit: stop referral Metric: human closure	Service procurement / grants Amount/provider UNKNOWN Exit: close before contract Metric: gate completeness	Service / appeal / upkeep Entry: duty + access training Exit: handoff / suspend Metric: duty coverage	Low-risk task compute Term/risk allocation Exit: revoke access Metric: timely recovery	Four allowed data types No real personal demo data Exit: minimized disposal Metric: banned-field events	SC-06-07 Human final say Offline/suspend Metric: offline availability
Zhongguancun Technology Services Wing Professional-interface role Partnership: NOT CLAIMED	Resource-condition advice No land allocation Exit: end advice Metric: issue closure	Shared meeting / advice Entry: public need + scope Exit: booking ends Metric: on-time closure	Professional referral type No enterprise list Exit: no-commit close Metric: response definition	Legal/procurement/finance Concept dependency only Exit: stop if gate fails Metric: risk disclosure	Mentor / reviewer / dev Skill + conflict gate Exit: withdraw/rotate Metric: reproduction ratio	Task-matched service Capacity/provider UNKNOWN Exit: quota expiry Metric: quota closure	Source catalog / control Rights + minimization Exit: revoke sharing Metric: source registration	Method/capability No pilot approval Stop referral Metric: closure
Five-Station Network Corridor upkeep/program role Evidence: PROJECT-DOCUMENTED Real spatial conditions: UNKNOWN	Public/renewal/reversible Carrier types only Exit: remove by station Metric: ordinary restores	Path/canopy/table/kiosk No basic-route obstruction Exit: modular removal Metric: offline availability	Need-learning-service flow Entry: public interest Exit: end referral Metric: valid needs	Program/upkeep types Amount/provider UNKNOWN Exit: cancel program Metric: public results	Public / learner / dev Entry: conduct rules Exit: voluntary/due process Metric: exit closure	Station/program term bound No existing data-center claim Exit: access recovery Metric: expiry recovery	Four allowed data types No cross-profile use Exit: ruled disposal Metric: disposal closure	SC-01-10 No eleventh card Pause/ordinary use Metric: restores

COMMON GOVERNANCE CYCLE FOR EVERY CELL

Source type → users → admission → candidate human role → boundary → exit → verifiable metric definition → evidence grade

A missing field keeps the AI/validation layer closed while ordinary use remains. This figure is the formal 32-cell matrix, bounded by the proposal, metrics, assumptions, and three matrices.

HARD BOUNDARIES

Land makes no ownership claim; capital names no amount or committed provider; compute claims no existing data center; data is public, anonymized, synthetic, or future-authorized controlled data, and real personal data never enters the demo.

Real partnership, government authorization, investment, procurement, operation, footfall, user testing, and pilot approval are NOT CLAIMED.

All areas and spatial relationships remain provisional design-model values

Land Use and Renewal | Learning Space as a Public Knowledge Interface

Retain-renovate-reversible add forms a low-risk renewal path; AI assistance, human support, and offline learning remain distinct.

Bright public learning hall

Long-span frame · visible shelves · knowledge index · human scale
Public naming carries no university, institutional, or existing-building identity

RETAIN

Rail public paths and ordinary use
No ownership or statutory intensity inferred

RENOVATE

Open ground floor, reading, co-learning, human support
Ordinary base remains when AI is off

REVERSIBLE ADD

Knowledge index, AI assistance, and offline exit
No engineering claim before external triggers

ORDINARY USE FIRST · PROVISIONAL DESIGN MODEL · NO DEMOLITION, INVESTMENT, CONSTRUCTION, OR APPROVAL CONCLUSION

The five-station narrative does not replace the three announced key areas; the learning space has no institutional identity

ENTERABLE JING-ZHANG · FORMAL INTAKE · REVIEW REPAIR

03 / 05

Three Key Areas | Formal Spatial Roles within the Five-Station Route

Key areas remain Dazhongsi, AI Origin, and Zhongzhiyuan. The learning space is a public knowledge interface, not a fourth official key area.

Dazhongsi

Open canopy -> learning hall

- Heritage body remains unchanged
- Reversible public interface outside edge
- Heritage approval NOT CLAIMED

AI Origin

Learning credential -> service passport

- AI / HUMAN / OFFLINE
- Humans retain high-impact decisions
- Live operation NOT CLAIMED

Zhongzhiyuan

Public court -> bounded validation

- Observation and control stay layered
- Pause, exit, and recovery remain visible
- Pilot approval NOT CLAIMED

ROUTE INTERFACE · DAZHONGSI -> FUTURE LEARNING SPACE -> AI ORIGIN · IMAGERY PROVES NO OFFICIAL BOUNDARY, AUTHORITY, OR LIVE OPERATION

ENTERABLE JING-ZHANG · FORMAL INTAKE · REVIEW REPAIR

04 / 05

Mobility and Blue-Green Continuity | Transitions, Not Black-Screen Loads

Public paths, mobile degradation, reduced motion, and fallback share one station order, key composition, and exit logic.

CAMERA	MATCH	LOADING	MOBILE	FALLBACK
Shared sightline and human scale	Frame, material, and knowledge index conti	Active time advances after scene ready	390x844 fallback retains all stations	Canvas/static semantic equivalent

Recomputable concept metrics are separated from external triggers for real implementation
