

Site overview

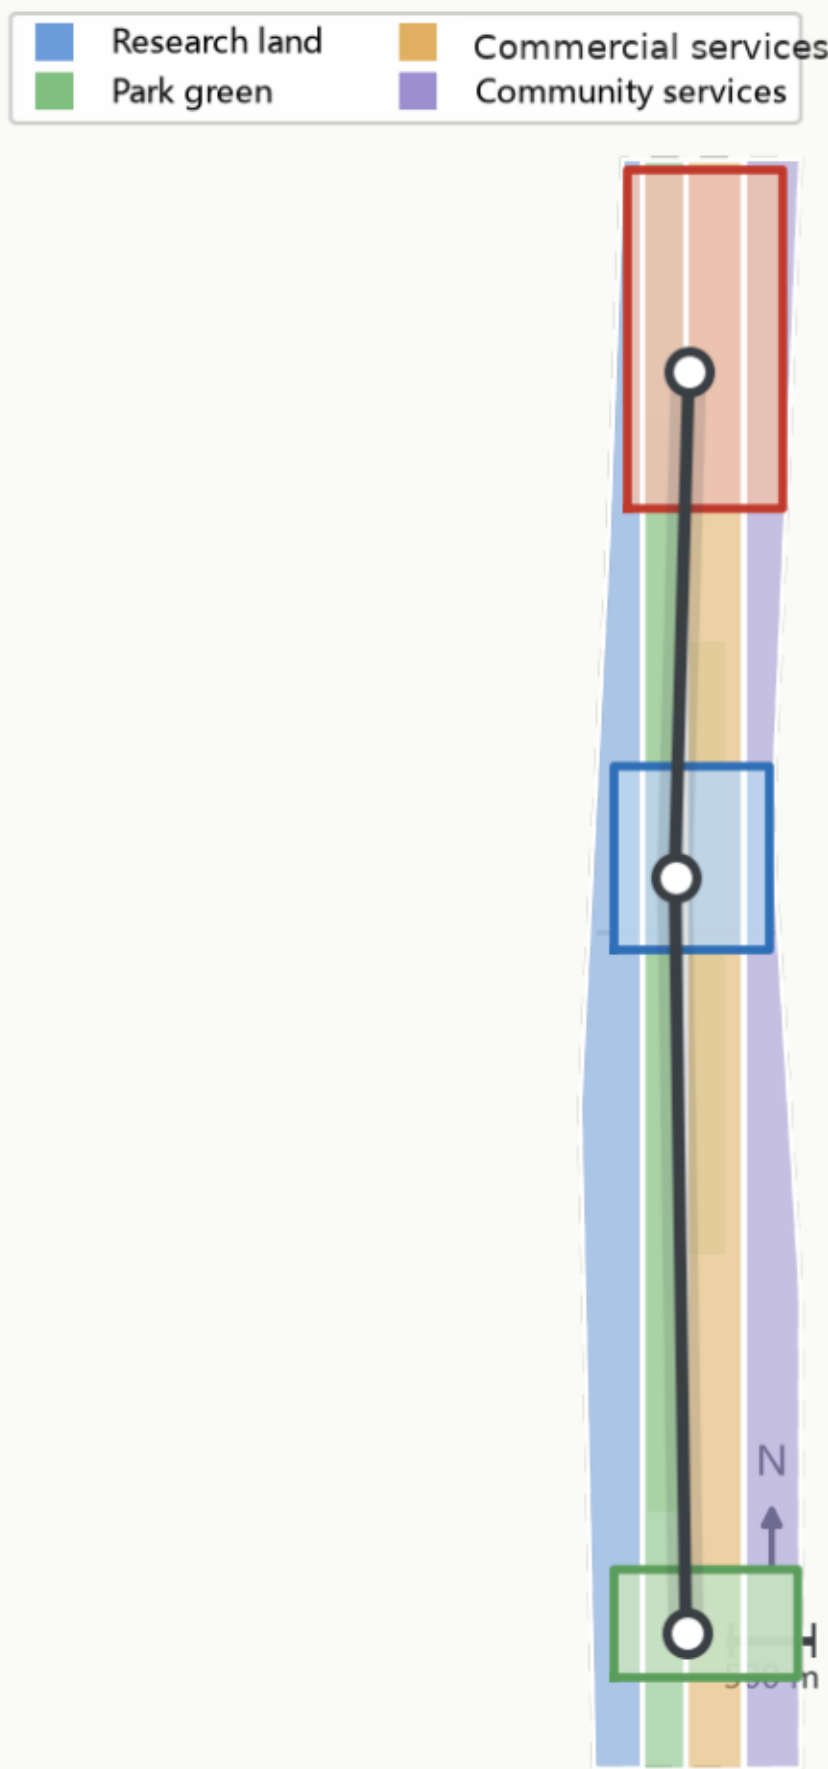

Land use and spatial structure

Three key areas

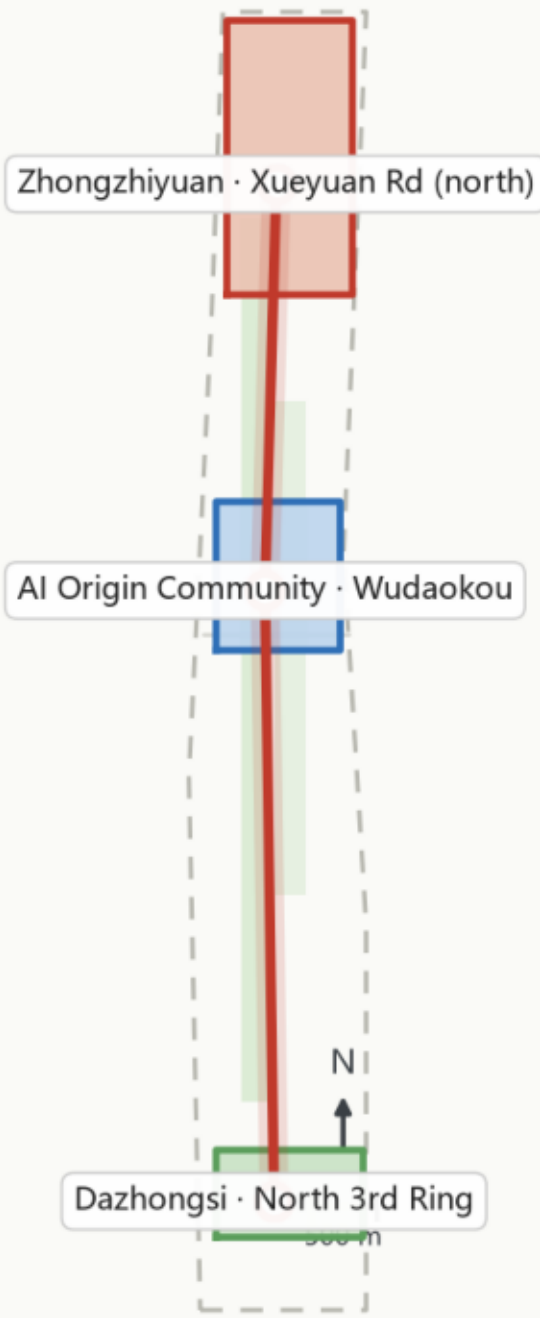

JingZhang AI Loop - Overall Concept (One Axis, Three Cores, Two Wings)

Land Use & Spatial Structure (concept): public/scenario along axis, mixed-use cores

Three Key Areas (concept)

AI Origin Community

Role: AI birthplace, open source
Now: 439 firms, 7k+ daily, covers about 3 km²
Levers: Origin Plaza, dev labs, memory corridor

Zhongzhiyuan

Role: AI accelerator, test & validation
Now: north end, Dongsheng core carrier
Levers: sandbox, review center, delivery corridor

Dazhongsi

Role: AI agglomeration, expo & exchange
Now: Bluejinglija->International Center (~4.888 reported)
Levers: expo, talent station, heritage link

PROVISIONAL boundary (temporary) - not an official redline; recalculate on official geometry

Concept: area positioning from public reporting, for professional deepening

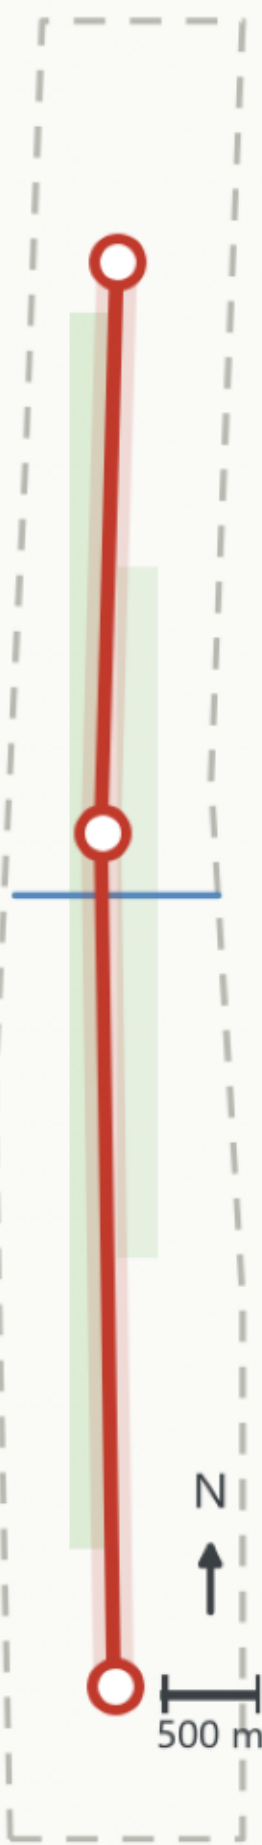

Mobility and blue-green public space

Metrics and evidence

Scenario, landmark and event nodes

Slow walk, blue-green system, rail nodes (concept)

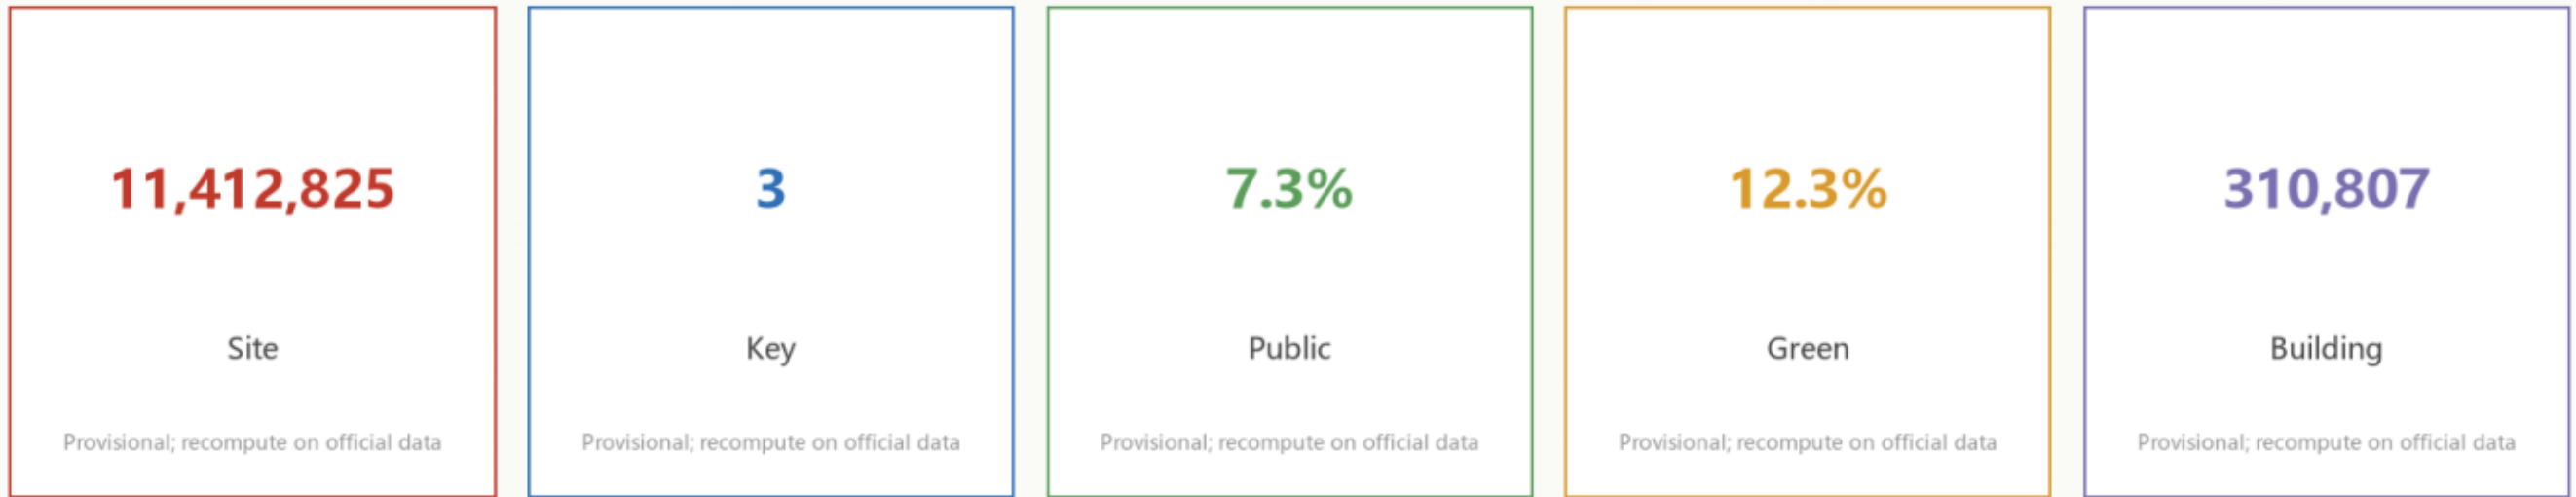

Nodes: Xizhimen Beijing North · Line13 (Zhichunlu/Wudaokou) · N3rd/N4th crossings

PROVISIONAL boundary (temporary) - not an official redline; recalculate on official geometry

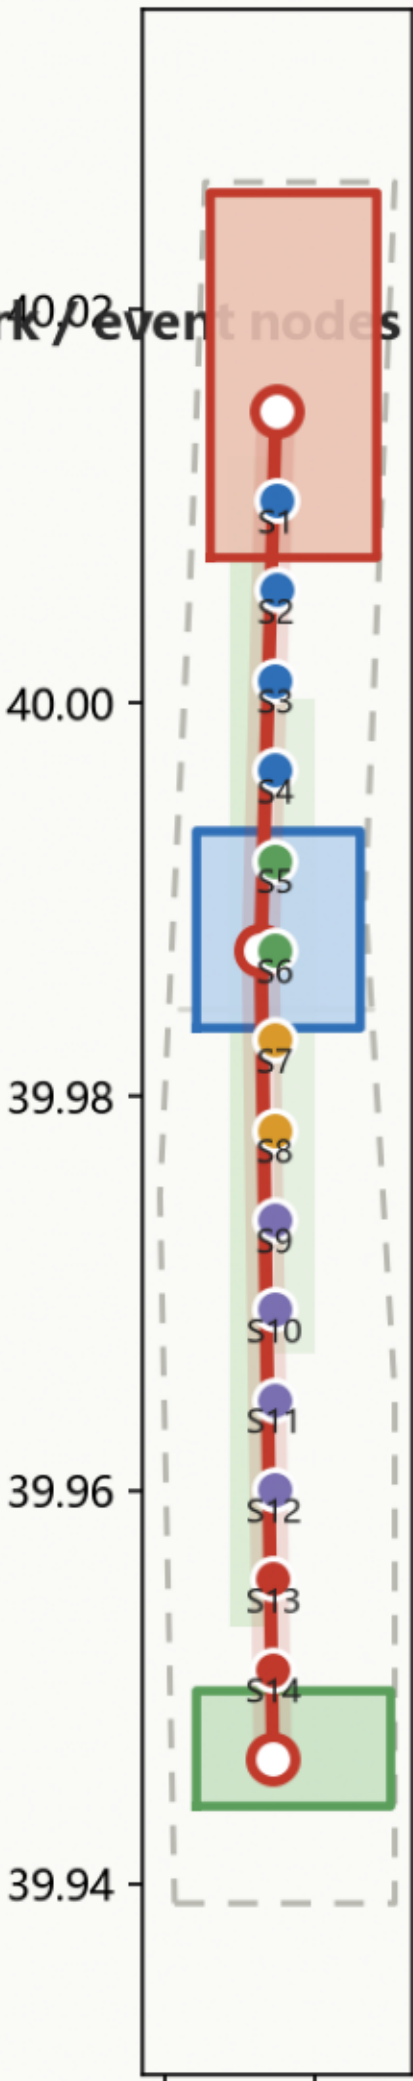

Concept; spine ~9km heritage green corridor; rail nodes public info

Core metrics (recomputed from submitted geometry)

Note: values to be recalculated once official redline & controls published

Scenario / landmark / event nodes (provisional, illustrative)

PROVISIONAL boundary (temporary) - not an official redline; recalculate on official geometry

Concept illustration; node placement indicative; not engineering siting
