

Civic AI Commons: Overall Concept

One heritage civic spine · Three halls · Five stitches · Twelve scenarios

CIVIC AI COMMONS

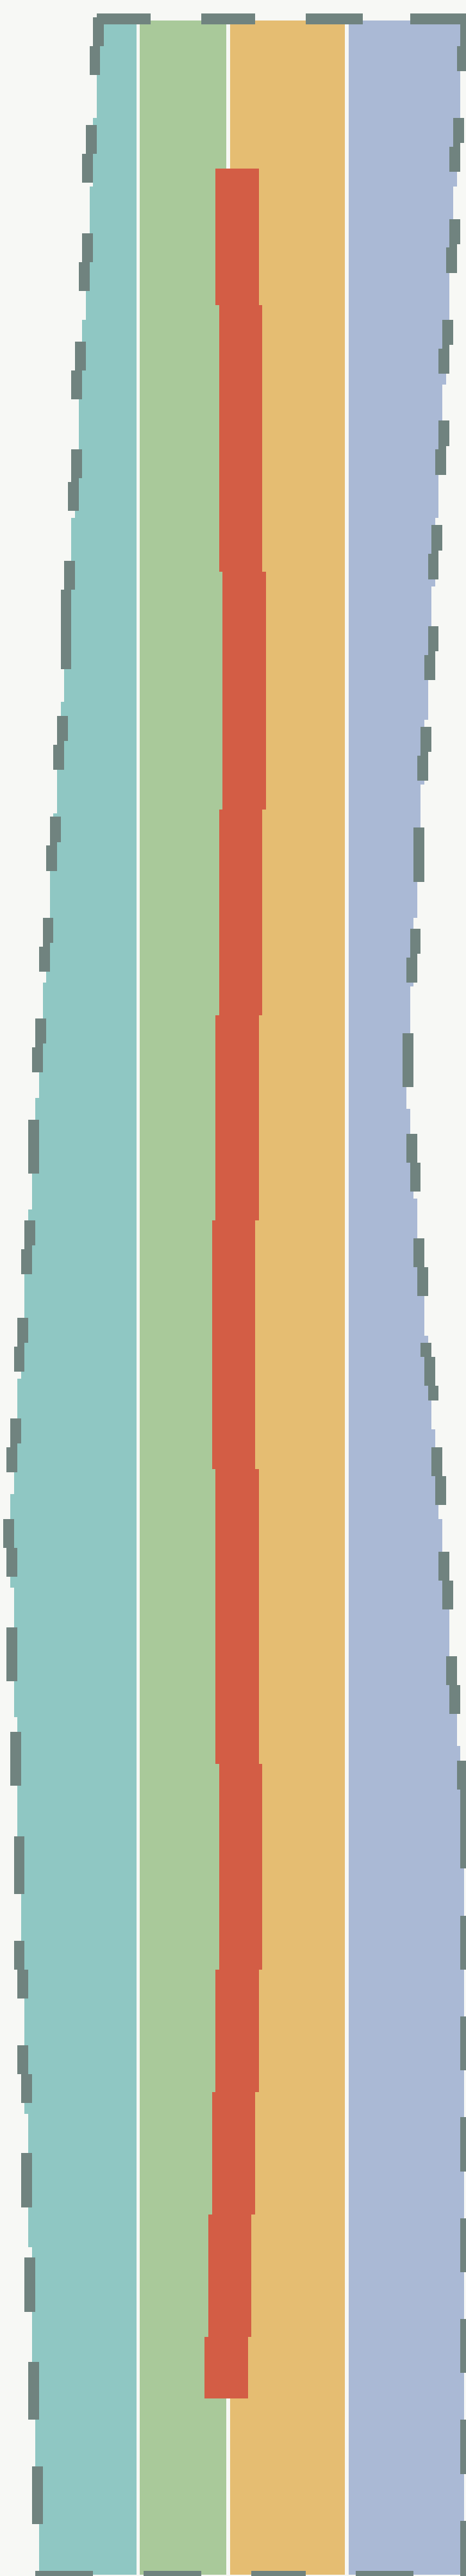

- 01 Questionable: visible purpose and accountability
- 02 Testable: bounded time and scope
- 03 Exitable: human takeover and stop rule

PROVISIONAL BOUNDARY | NOT AN OFFICIAL PLANNING BOUNDARY

43.6 km² / 11.4 km² / 368.4 ha

Spatial Structure and Land-Use Protocol

A conceptual topology, not an approved regulatory plan

- 0802 R&D and validation
- 1401 Heritage park and open space
- 05 Innovation services and translation
- 0702 Community services and talent life

- Complete coverage of provisional boundary
- Shared edges without overlap
- Intensity and height pending official data

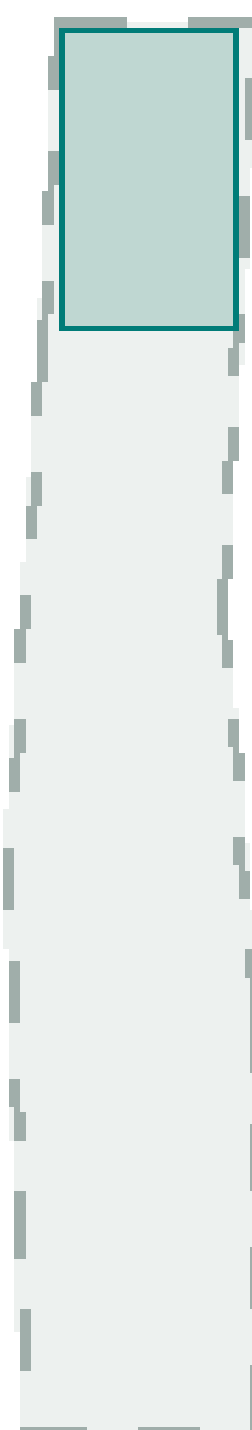

PROVISIONAL BOUNDARY | NOT AN OFFICIAL PLANNING BOUNDARY

Three Key Areas: One Protocol, Three Tests

Roles, civic interfaces, scenarios, and prerequisites

Zhongzhiyuan

Validation and governance

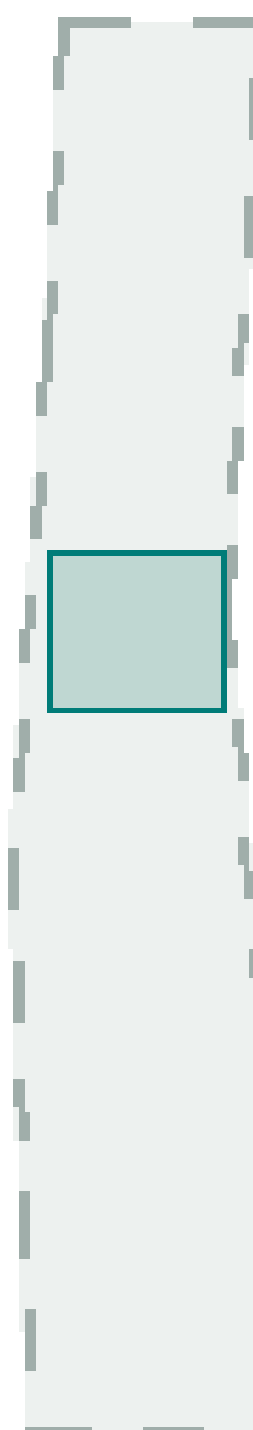

- Model-safety signal box
- Robot street test field

PROVISIONAL

Beijing AI Origin

Open source and talent

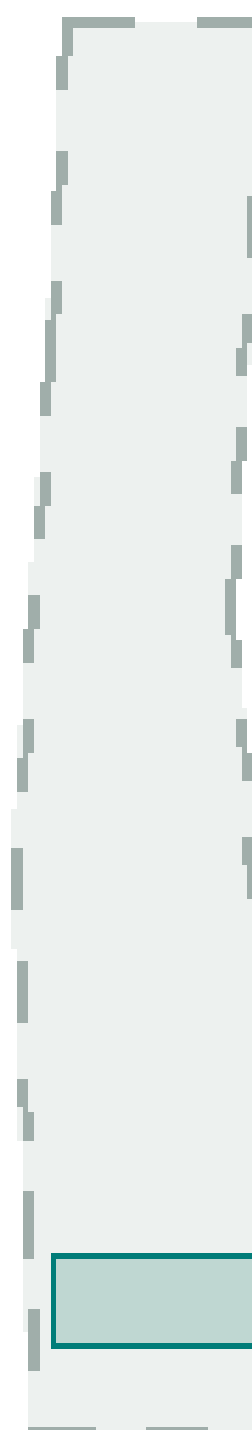

- Open-source departure hall
- Talent co-creation commons

PROVISIONAL

Dazhongsi

Translation and civic experience

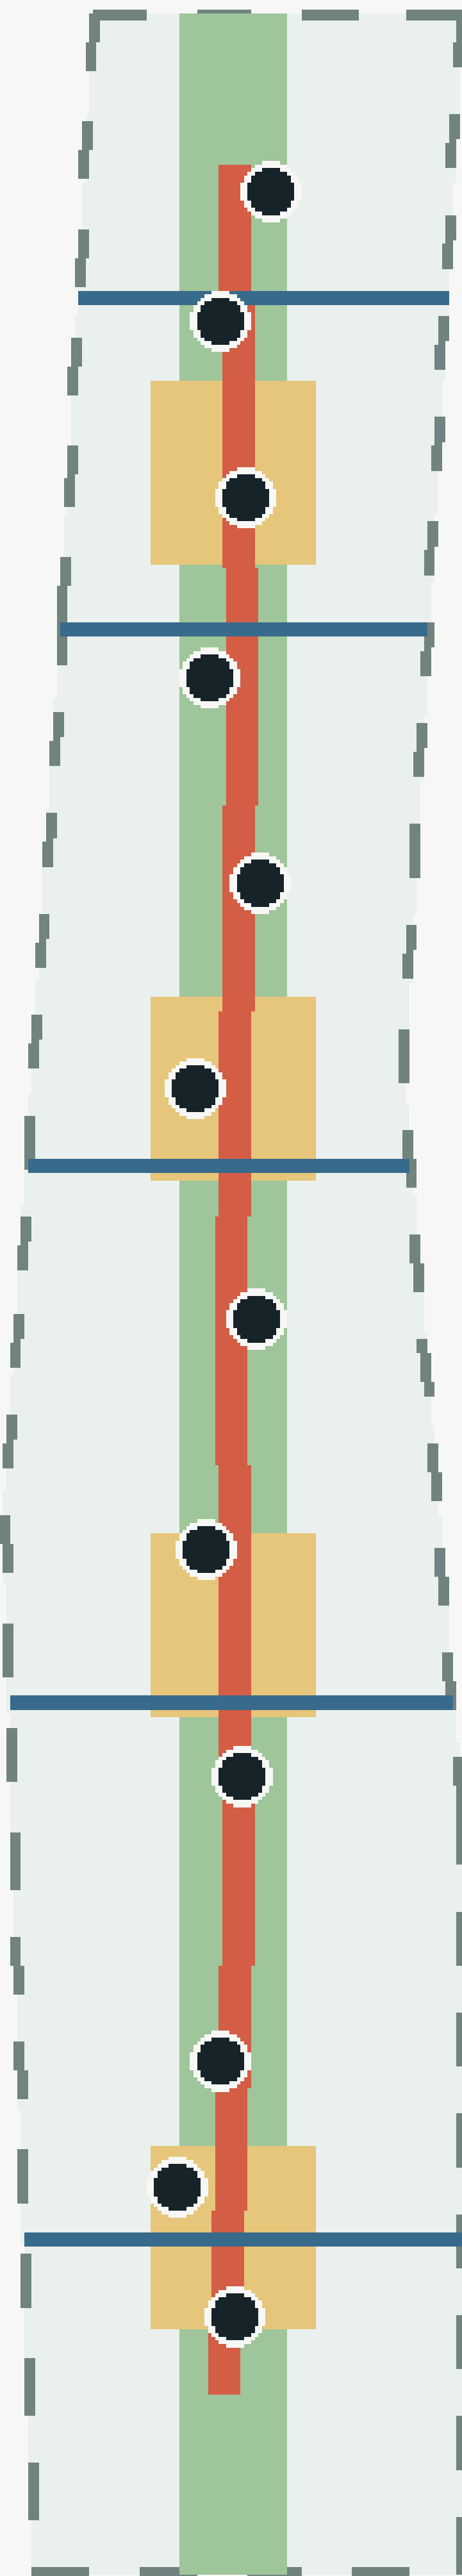

- Public-ledger plaza
- Global collaboration hall

PROVISIONAL

Integrated Mobility, Blue-Green, and Scenario Network

Continuous physical space; stoppable digital services

- Heritage civic spine
- East-west stitches
- Ecological companion
- Public halls
- AI scenario nodes

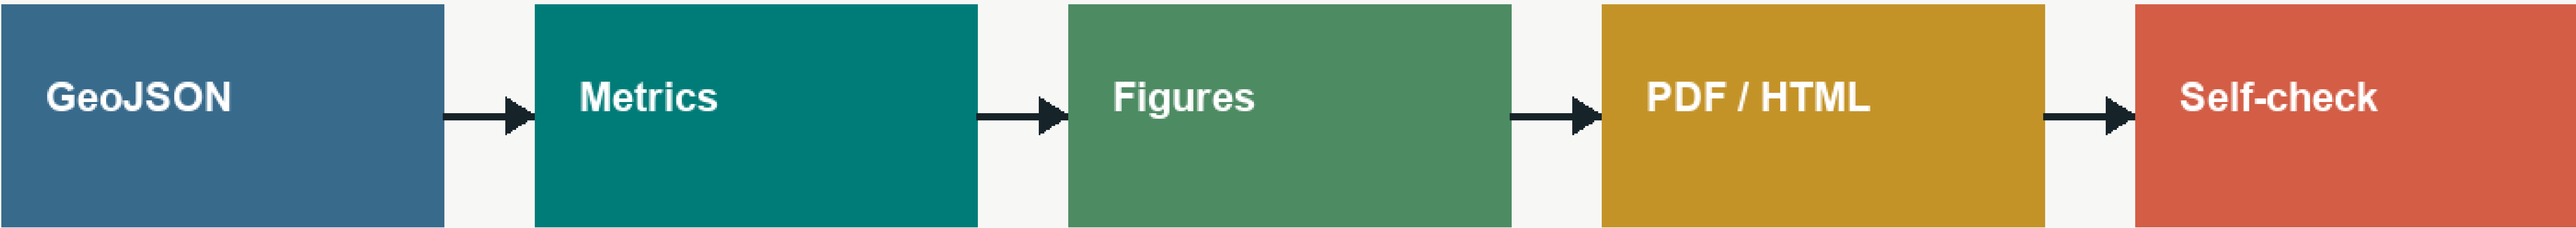

All alignments are conceptual relationships, not road redlines or engineering centerlines.

PROVISIONAL BOUNDARY | NOT AN OFFICIAL PLANNING BOUNDARY

Metrics and Evidence Chain

Known values are reproducible; statutory controls remain pending

site_area_sqm 11,412,825.386 m ²	green_ratio 0.261 ratio	public_space_ratio 0.114 ratio	scenario_node_count 12 count
--	--------------------------------------	---	---

Pending official data

FAR · Building height · Road redlines · Ownership / heritage / utilities
