

Three-Layer Spatial Penetration: 43.6km² Study Area • 11.4km² Overall Design • 369.3ha Key Area

Three-Layer Spatial Connectivity • Land Use Structure (29 Land Parcels • 9 Types • Intensity Classification)

Study Area

43.6km² (Public Notice Boundary)

Design Question: How to Organize a New Ecosystem for Global AI Innovation

Answer: "First Start" | Six-Loop System • Three Districts Coordination

Data Source: proposal Three-Layer Boundary: Public Notice 1.3

Overall Design Area

11.4km² (site_area_sqm 11,412,825m² actual)

Design Question: Industry, Space, Transportation, and Urban Integration

Answer: One Axis and Two Wings • Three Core Areas • Multiple Nodes • Blue-Green Infrastructure; 29 Land Parcels for Complete Coverage

Data Source: geometry/land_use.geojson LU-001~029

Key Area

368.4ha / 369.3ha actual (key_area_count 3)

Design Question: How to Achieve Fine-Grained and In-Depth Design

Answer: Validation by Zhongguancun • Key Points • Large Details for the New Three-Dimensional Model

Data Source: geometry/key_areas.geojson PROV-KEY-001/002/003

Land Use Composition (9 Types • Actual Area)

R&D Land	252.2 ha	Reserved Land	71.6 ha
Residential Land	210.8 ha	Commercial Service Land	66.1 ha
Park Land	207.5 ha	Sports Land	62.2 ha
Education Land	157.4 ha	Cultural Land	15.5 ha
Medical and Health Land	97.9 ha		

Variance Disclosure (Independent Reconciliation vs. Stated Area)

- Public Notice 368.4ha vs. Actual Total 369.3ha (±0.9ha)
- Land Parcels 29 Parcels vs. Land Use Areas +16m² (Closed Difference)

Zhongguancun 192. Distribution of Key Areas: Empirical Conformity Calculation for 369.3ha – Detailed Design Depth 2026 Proposal Draft

Note: Approximate location coverage of the three areas

Three Key Areas Combined: Empirical Conformity 369.3ha (Public Port Area 368.4ha)		
Zhongguancun AI Autonomous Innovation Acceleration Zone	192.9ha	Positioning: As a sub-area of Zhongguancun, constructing the AI full-chain innovation ecosystem with global governance rights Space: National-level AI group innovation, computing power, testing and standards governance; pilot testing ground for clean interfaces
Beijing AI Origin Community	104.3ha	Positioning: Located in the core area of the "AI Origin Community", a global AI talent entrepreneurship hub "first stop" Space: Integration of Zhongguancun (Qinghua/Beida/Zhongke Academy), park blocks and subway stations; promoting large AI model industry chain aggregation
Zhongguancun AI Industrial Cluster Area at Dazhong Temple	72.0ha	Positioning: Relying on the Yuyuantan Science & Technology Platform, gathering AI intelligent hardware, content consumption, intelligent terminal ecosystem enterprises Space: Pan-Zhongguancun fourth vertical axis corridor; intelligent terminal street data scenario pilot zone; international e-commerce gateway hub

Note: Actual area data is subject to discrepancies between this proposal and implementation records 369.3ha (368.4ha public port area subject to final government approval)

Transportation Skeleton x Blue-Green Public Space: 17 Roads 67.2km, 11 Green Spaces, 6 Public Space Nodes

Road System: 17 Roads · Blue Network: 11 Green Spaces · Public Space: 6 Public Space Nodes

- Beijing–Zhangjiakou Railway Corridor (Existing)
- Primary Roads (1 road, 9.7km)
- Secondary Roads (2 roads, 19.4km)
- Urban Roads (7 planned/under design)
- Green Corridors (1 corridor)
- Bicycle and Pedestrian Paths (1 path)
- Rail Direct Connection Alignment (1 route, indicative)
- Pedestrian Links (4 links)
- Green Spaces (11 sites, GREEN-001~101)
- Public Space Nodes (6 sites, triangle symbols)
- Overall Planning Boundary
- Railway Stations (5 stations)

Transportation Skeleton

17 roads · 67.2km [metric: road length m]
Dual-axis corridor connecting nine communities, 46 entrances
“Three belts” (pedestrian-friendly belt · green corridor · bike lane) full coverage
Bicycle and pedestrian prioritized green corridor

Integrated Railway Station Nodes

Wudaokou · Qinghe · Dazhongsi · Beijing North Station
Flat transfer platforms (Yongfeng Entrance South Plaza) · 15-minute walking
“One Station – One Theme” node integration with surrounding plazas

Blue Network

Beijing–Zhangjiakou Grand Canal Activity Belt (suburban belt)
Qinghe Riverside Ecological Park · Shuangxiu Interchange Community
Community BA Plaza · Station Integration Innovation Plaza (concept)
6 community green plazas · Station Integration · One-Station–One-Theme:
Innovation · Hospitality · Waterscape

Notes on the Concept Plan (subject to adjustment and recorded upon approval)

· Conceptual road alignment: metric annotation “Conceptual road, not the actual route [alignment]” · Parking locations: proposal data for transport review [source: GREEN-100/101 as concept plan (concept)]
