

JING-ZHANG FIRST MILE

A governed route from the laboratory to the first real user, first operable scenario, first verifiable order and first verified reuse

JING-ZHANG FIRST MILE: FROM LAB TO REAL ADOPTION

ONE SPINE · THREE STATIONS · TWO WINGS · FOUR OUTCOMES · FIVE GATES

FOUR FIRST-MILE OUTCOMES

- 01 First real user
- 02 First operable scenario
- 03 First verifiable order
- 04 First verified reuse

FIVE LAUNCH GATES

- G0 Real need
- G1 Product ready
- G2 First use
- G3 First adoption
- G4 First reuse

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

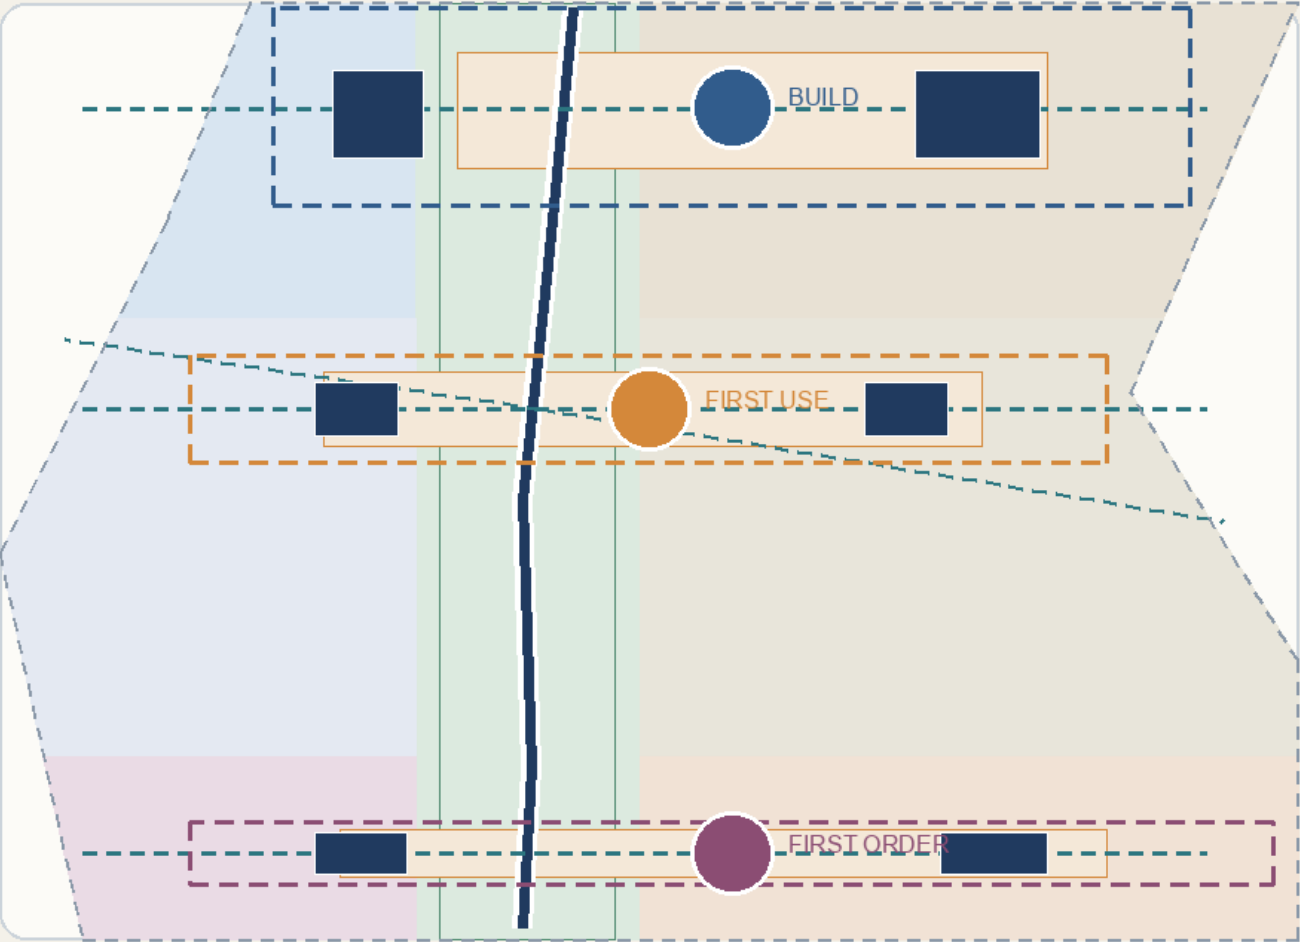

Xiaokang × Codex Urban Agent · 2026-08

One Line, Three Stations, Two Wings - One Continuous Handoff

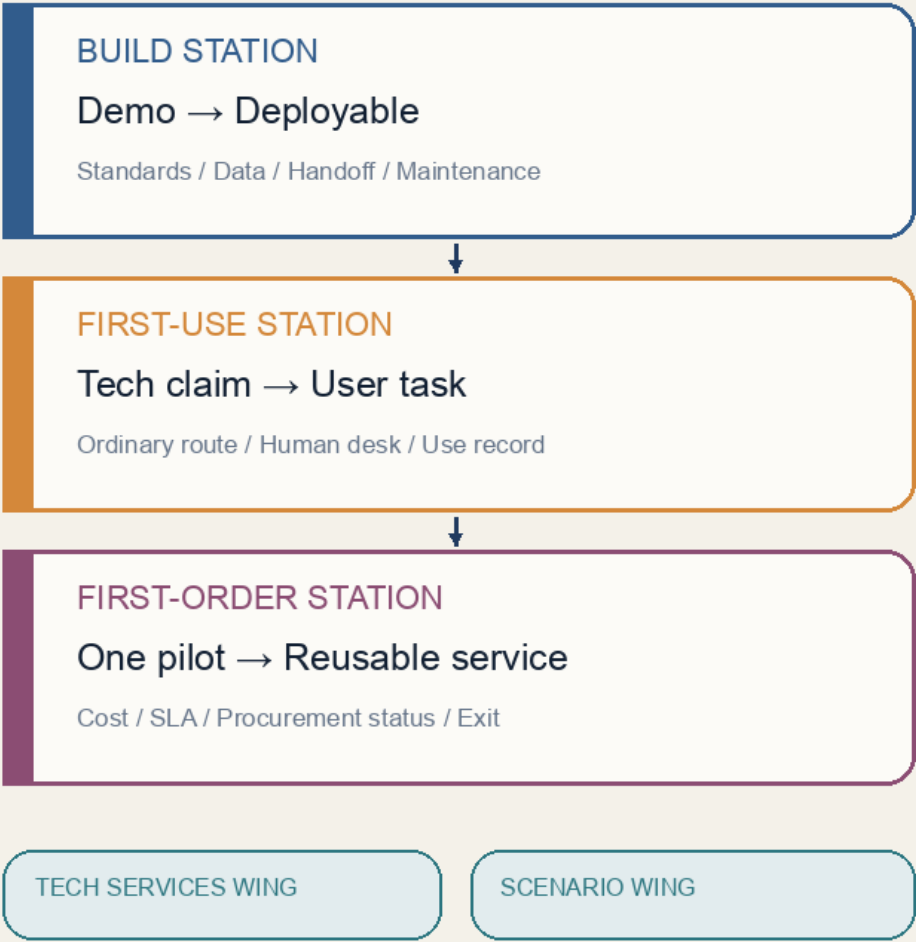

Build proves readiness, First Use proves adoption, and First Order proves operations and reuse; the two wings supply professional services and real scenarios.

SPATIAL STRUCTURE: THREE STATIONS AS A HANDOFF CHAIN

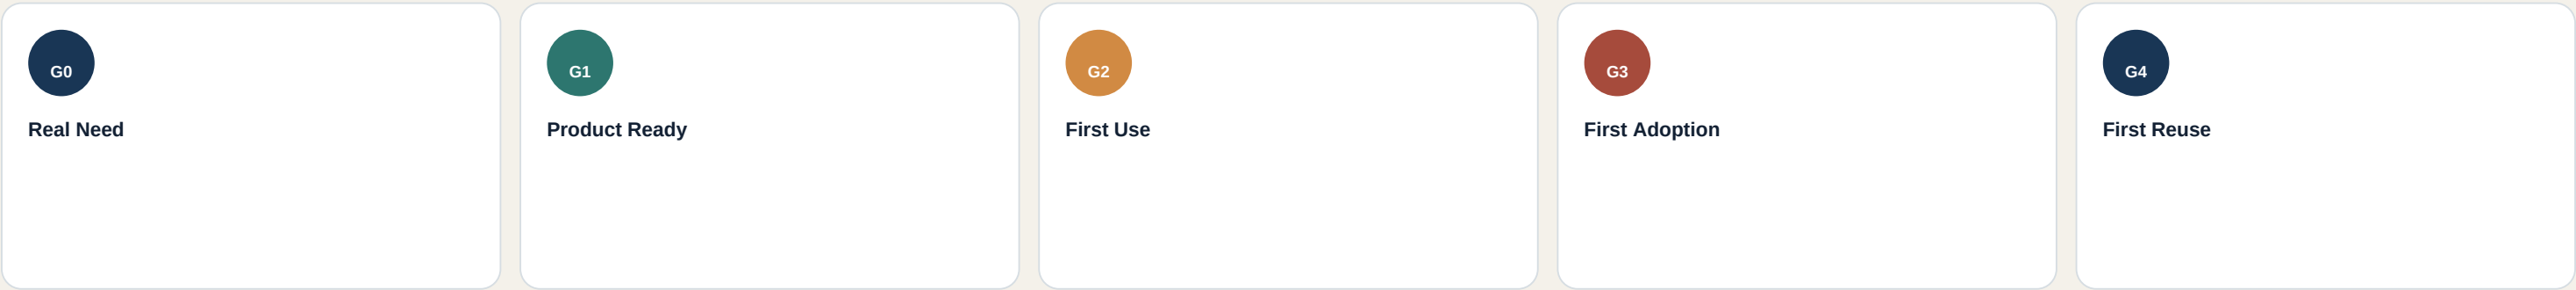

LAND USE AS BACKGROUND; THE DESIGN FOCUSES ON BUILD—USE—OPERATE HANDOFFS

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang x Codex Urban Agent · 2026-08

From Test Capacity to Adoption Capacity

Seven global cases support method, not statutory spatial control.

01 / Punggol

Digital-twin testing before live-district deployment

02 / Helsinki

Companies, researchers, city teams and residents co-test for reuse

03 / Tallinn

One city entry point links departments, sites, data and services

04 / Boston

A small internal city team is the front door for community problems

05 / Woven City

Residents and inventors iterate through ideation, testing and improvement

06 / European Union

Experimentation spaces, living labs and innovation procurement work together

07 / Beijing

Demand, capability and demonstration lists connect first use to orders

08 / Synthesis

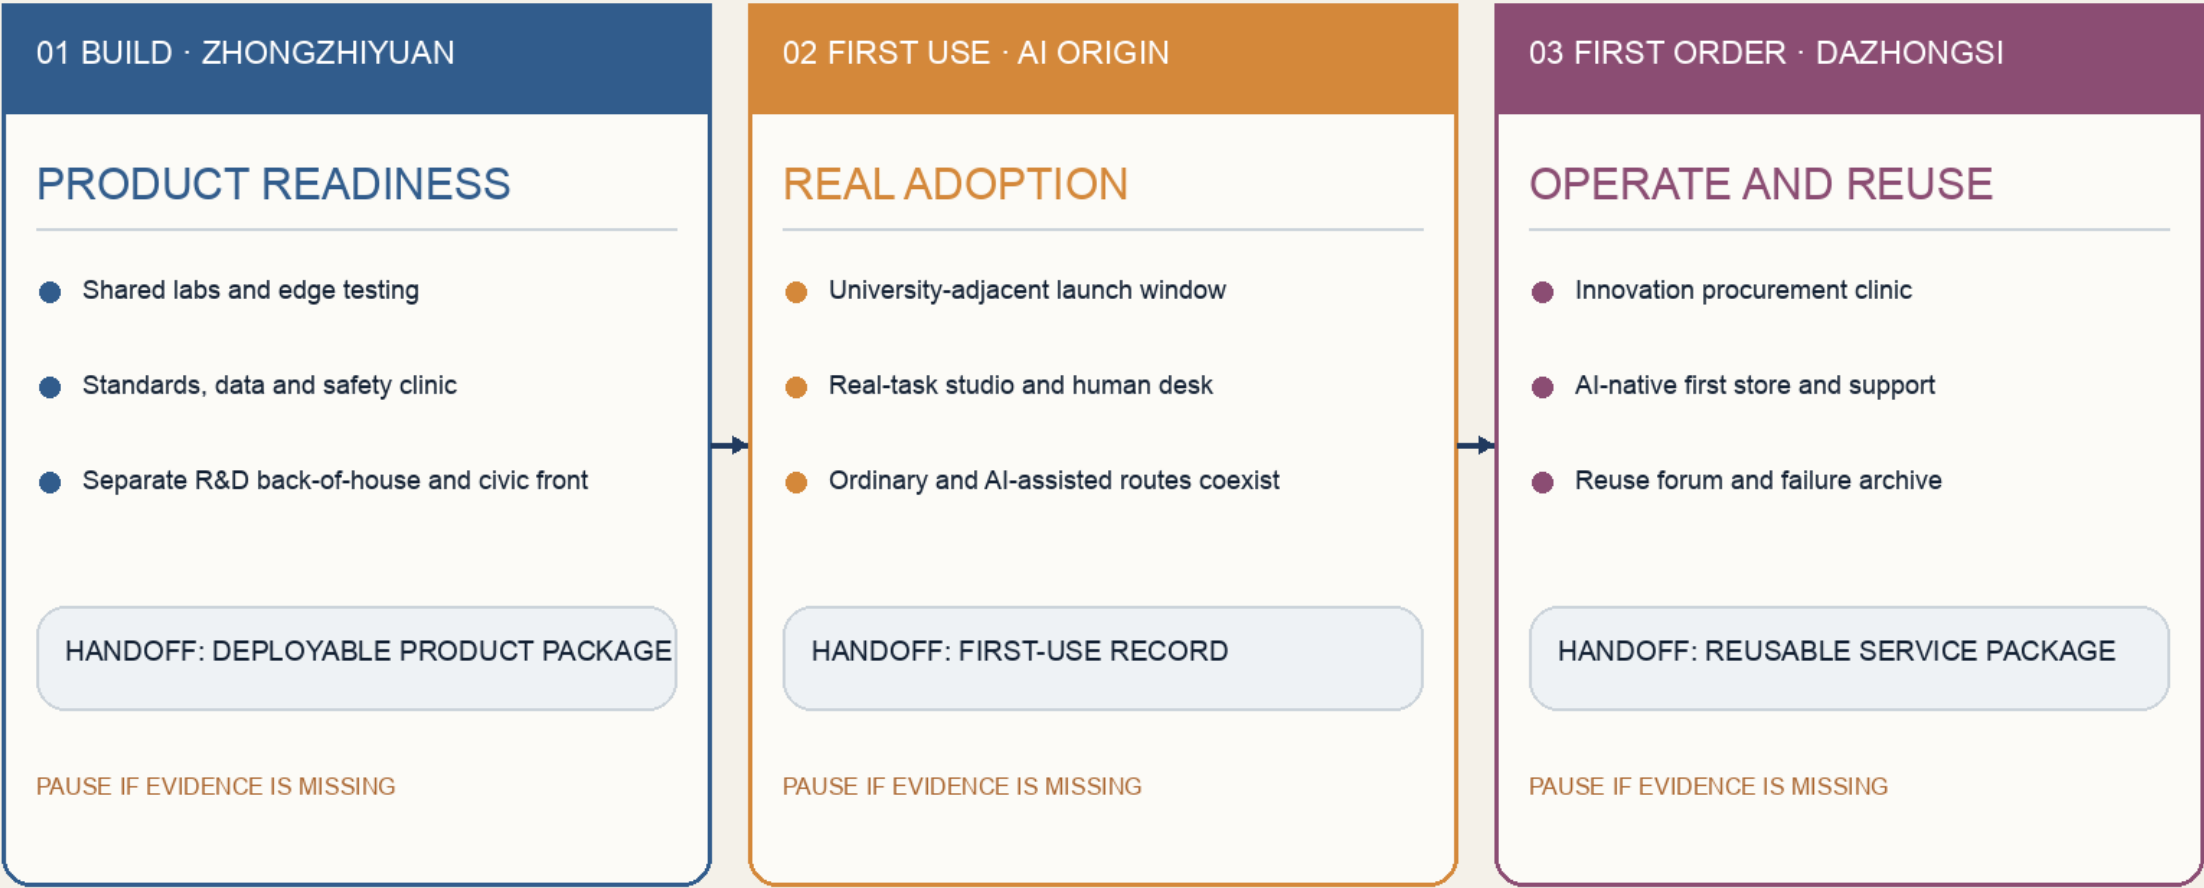

The urban-test bottleneck is not equipment; it is ownership, adoption, handoff and reuse evidence

Three Key Areas, Three Required Delivery Gates

Key-area extents are provisional; all spatial moves are concept recommendations for professional development.

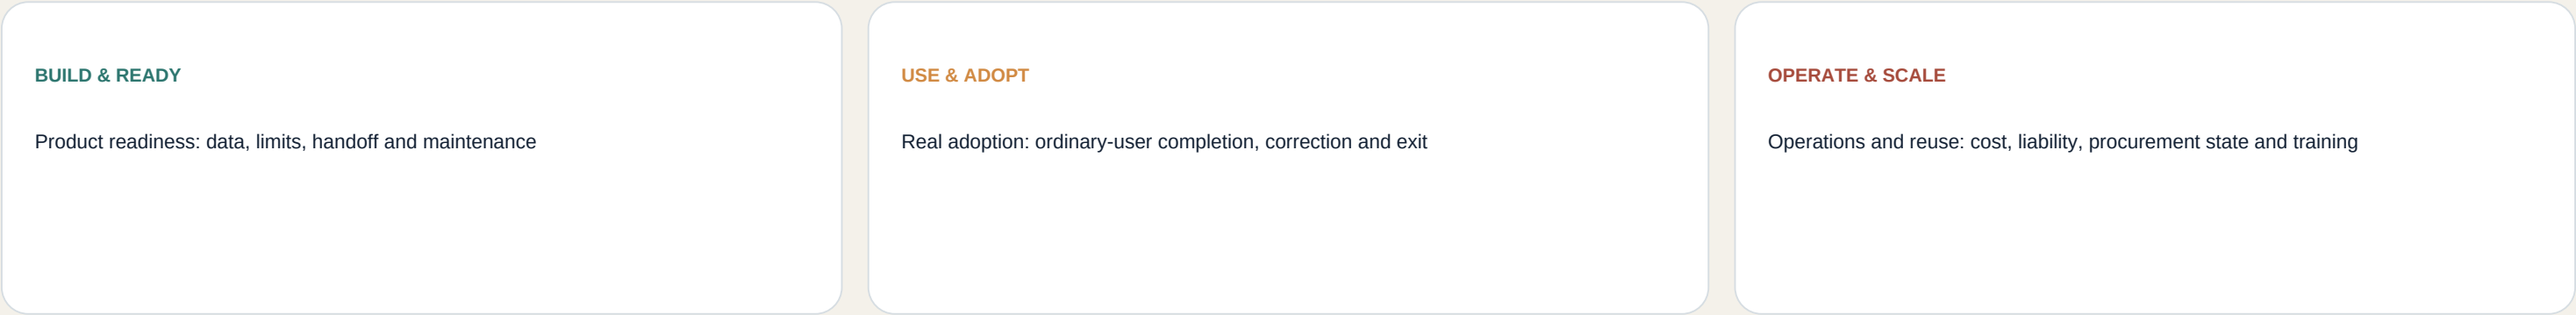

THREE KEY AREAS: EACH STATION MUST HAND OFF TO THE NEXT

ALL EXTENTS ARE PROVISIONAL; SPATIAL MOVES ARE CONCEPTUAL RECOMMENDATIONS

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang × Codex Urban Agent · 2026-08

Twelve Scenario Cards: A Scenario Is Not a Slogan

Every card needs a real problem owner, non-AI baseline, minimum data, human handoff, cost status and stop condition.

TWELVE SCENARIO CARDS | EVERY ONE MUST PASS THE FIRST-MILE GATES

REAL TASK, HUMAN BASELINE, MINIMAL DATA, OPERATING OWNER, COST STATE, HANDOFF AND STOP CONDITION ARE ALL REQUIRED

01

Urban Problem Launch Desk

Real-need intake | Human moderation

HUMAN HANDOFF / PAUSE / EXIT

02

Pre-Street Model Evaluation

Fact, bias and safety | Expert final review

HUMAN HANDOFF / PAUSE / EXIT

03

Agent Operations Handoff Pod

Unfamiliar operator takeover | Return on failure

HUMAN HANDOFF / PAUSE / EXIT

04

AI Startup Service Copilot

Public information | Human correction

HUMAN HANDOFF / PAUSE / EXIT

05

Accessible Slow-Mobility Task Chain

Barrier work-order closure | Paper and phone remain

HUMAN HANDOFF / PAUSE / EXIT

06

Multilingual Railway Culture Guide

Human historical review | No route tracking

HUMAN HANDOFF / PAUSE / EXIT

07

Public-Space Microclimate Assistant

Environmental advice | Site staff decide

HUMAN HANDOFF / PAUSE / EXIT

08

Low-Speed Robot First-Use Route

Bounded place, time and speed | Emergency stop

HUMAN HANDOFF / PAUSE / EXIT

09

AI-Native First Store

Product, after-sales and reuse | No profile pricing

HUMAN HANDOFF / PAUSE / EXIT

10

Innovation Procurement Clinic

Acceptance, cost and liability | No award promise

HUMAN HANDOFF / PAUSE / EXIT

11

First Mile Console

Gate, owner and pause state | Public view de-identified

HUMAN HANDOFF / PAUSE / EXIT

12

Reuse Stage and Failure Archive

Reuse conditions and failure lessons | Anonymous allowed

HUMAN HANDOFF / PAUSE / EXIT

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang x Codex Urban Agent · 2026-08

One Launch Contract for Every Scenario

Four task families, five gates and seven shared evidence fields; volume never substitutes for real adoption

SCENARIOS ARE NOT A LIST | TWELVE CARDS SHARE ONE LAUNCH CONTRACT

FOUR TASK FAMILIES, FIVE GATES, SEVEN EVIDENCE FIELDS; VOLUME NEVER SUBSTITUTES FOR REAL ADOPTION

01 | REAL NEED & PUBLIC SERVICE

Problem desk, startup service, accessibility, multilingual culture

02 | PRODUCT & SAFETY VALIDATION

Pre-street evaluation, operations handoff, microclimate, bounded low speed

03 | OPERATION & FIRST ORDER

AI-native store, procurement clinic, First Mile Console

04 | REUSE & PUBLIC FAILURE

Reuse stage, changed conditions, pause, exit and failure archive

G0-G4 LAUNCH CONTRACT

SHARED EVIDENCE: PROBLEM OWNER | HUMAN BASELINE | MINIMAL DATA | HANDOFF OWNER | COST STATE | STOP CONDITION | EXIT RESTORATION

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

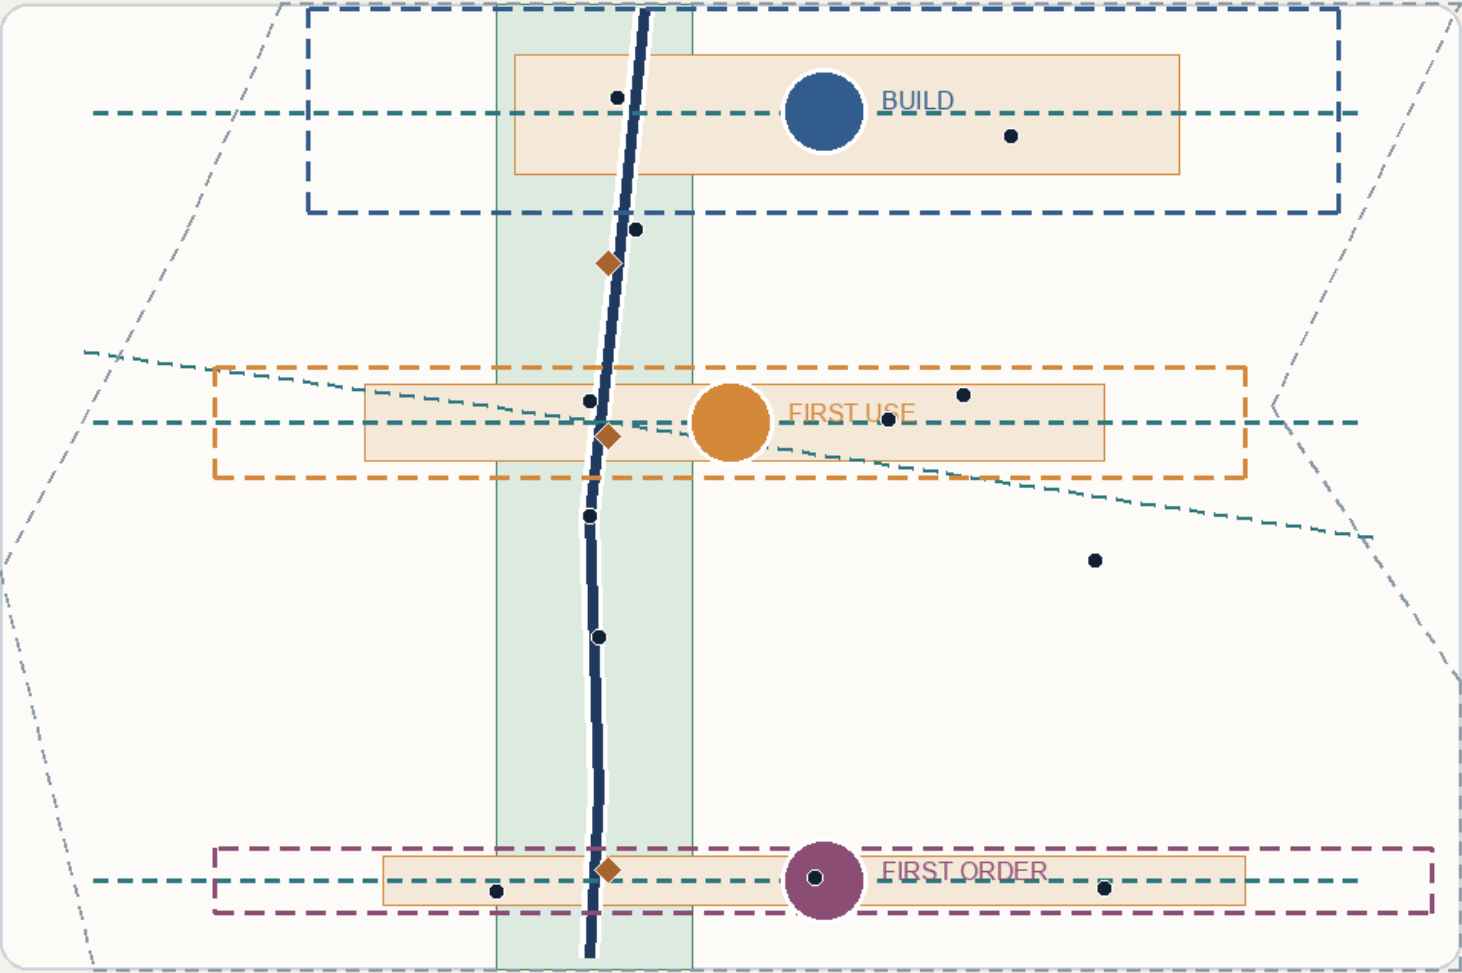

Xiaokang x Codex Urban Agent · 2026-08

Public Space Still Works When AI Is Removed

Ordinary paths, accessibility, shade, rest, staffed service and non-commercial use always remain primary.

MOBILITY + BLUE-GREEN: PUBLIC VALUE SURVIVES AI REMOVAL

THE ORDINARY ROUTE IS THE BASE; AI REMAINS OPTIONAL, OVERRIDABLE AND REVERSIBLE

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

FIVE-LAYER PUBLIC SECTION

- 1 BLUE-GREEN + SHADE
- 2 CONTINUOUS ORDINARY ROUTE
- 3 OPTIONAL AI SERVICE
- 4 HUMAN HANDOFF + APPEAL
- 5 SHUTDOWN + RECOVERY + REVIEW

THREE NON-NEGOTIABLES

- Accessibility and ordinary routes never depend on AI
- No default face, identity or continuous tracking
- Operators and on-site staff retain stop authority

Xiaokang × Codex Urban Agent · 2026-08

01

Ordinary route always exists

02

Visible and reachable human service

03

Data minimization

04

Low-speed tests are bounded in place and time

Eight Low-Regret Projects: Operations Before Construction

Small, reversible and staged; no device procurement without an owner, staff roster, maintenance and exit resource.

FM-01

First Mile Window

Task intake and public state

FM-02

Product-Ready Yard

Evaluation, handoff and edge test

FM-03

First-Use Community

Ordinary and AI paths coexist

FM-04

First-Order Living Room

Procurement clinic and reuse stage

FM-05

Slow-Mobility Stitching

Walk audit and low-regret repairs

FM-06

Blue-Green First-Use Edge

Microclimate, rest and controlled scenarios

FM-07

First Mile Console

G0-G4 evidence and pause state

FM-08

Global First Mile Network

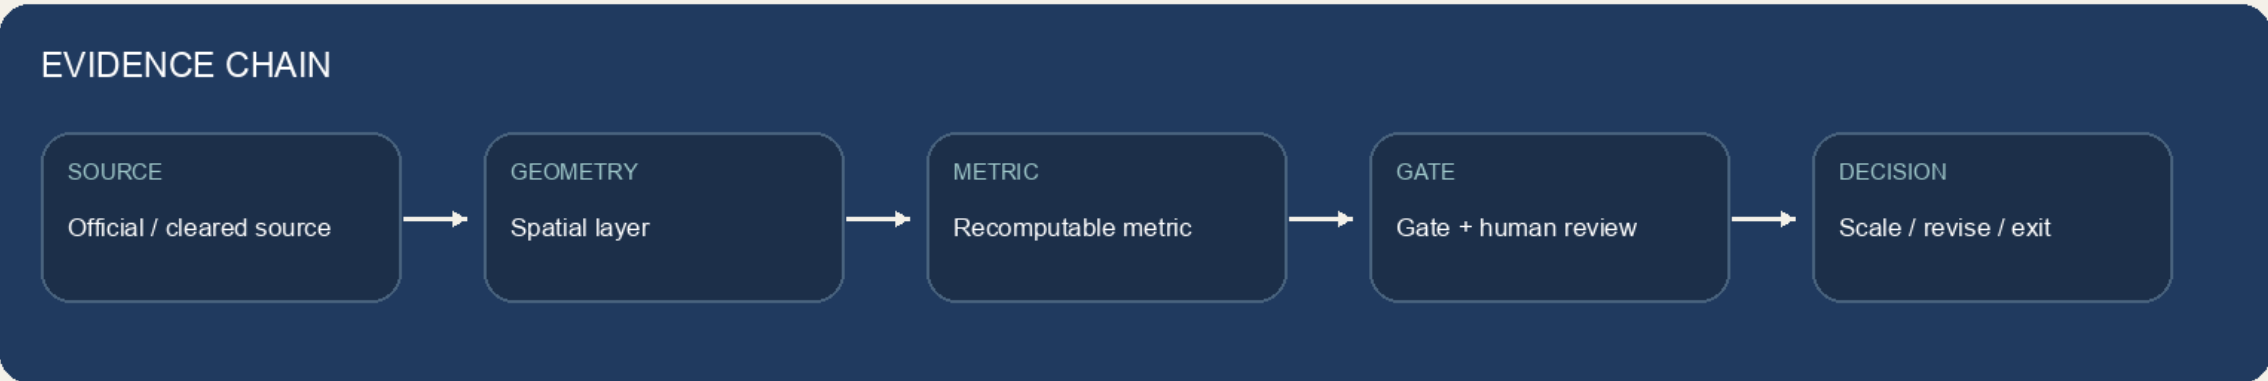

Bilingual reuse packs and failure review

Known Spatial Metrics Recompute; Adoption Outcomes Stay Unknown

Provisional geometry supports concept comparison, not an official redline or statutory target.

METRICS + EVIDENCE: PROVE ADOPTION BEFORE SCALE

SPATIAL METRICS USE PROVISIONAL GEOMETRY; OPERATING OUTCOMES REMAIN UNKNOWN BEFORE A REAL PILOT

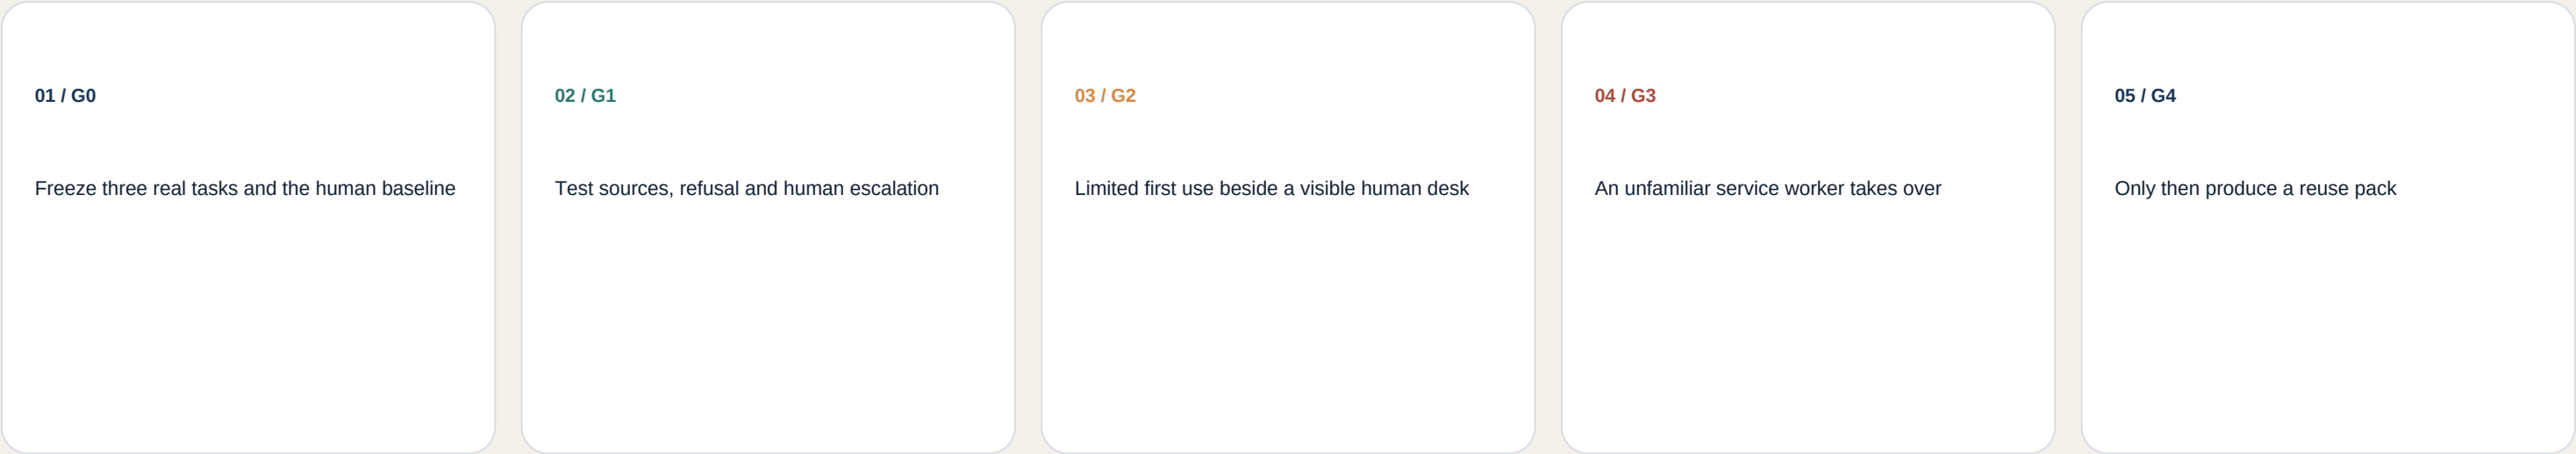

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang × Codex Urban Agent · 2026-08

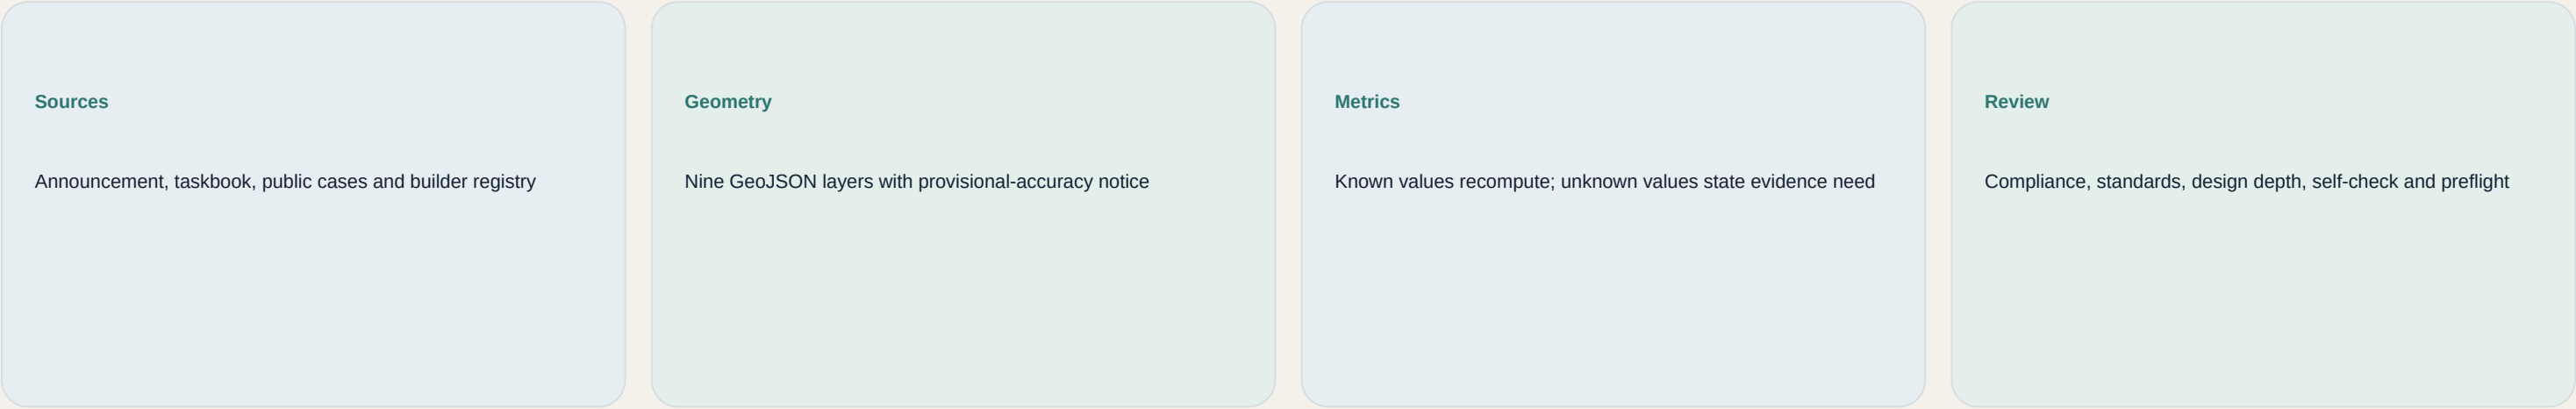

The First 90 Days: Verify One First Real User

Start with the AI Startup Service Copilot at AI Origin; do not fill the belt, buy robots or call traffic adoption.

From Claim to Decision: Leave Reviewable Evidence

Sources, GeoJSON, metrics, matrices and self-checks form the authority layer; failures and pauses remain public evidence.

First-Mile Gate: Make the Adoption Journey Visible

An open gate, rail/path, five sleepers and a forward point form an original identity for progress and pause.

FIRST-MILE GATE: A BRAND FOR THE FIVE-GATE JOURNEY

MONO-COMPATIBLE, DISTANCE-LEGIBLE, READY FOR WAYFINDING, PASSPORTS, GATES AND EVENTS

MARK CONSTRUCTION

OPEN GATE
OPEN COLLABORATION

LAUNCH BADGE

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

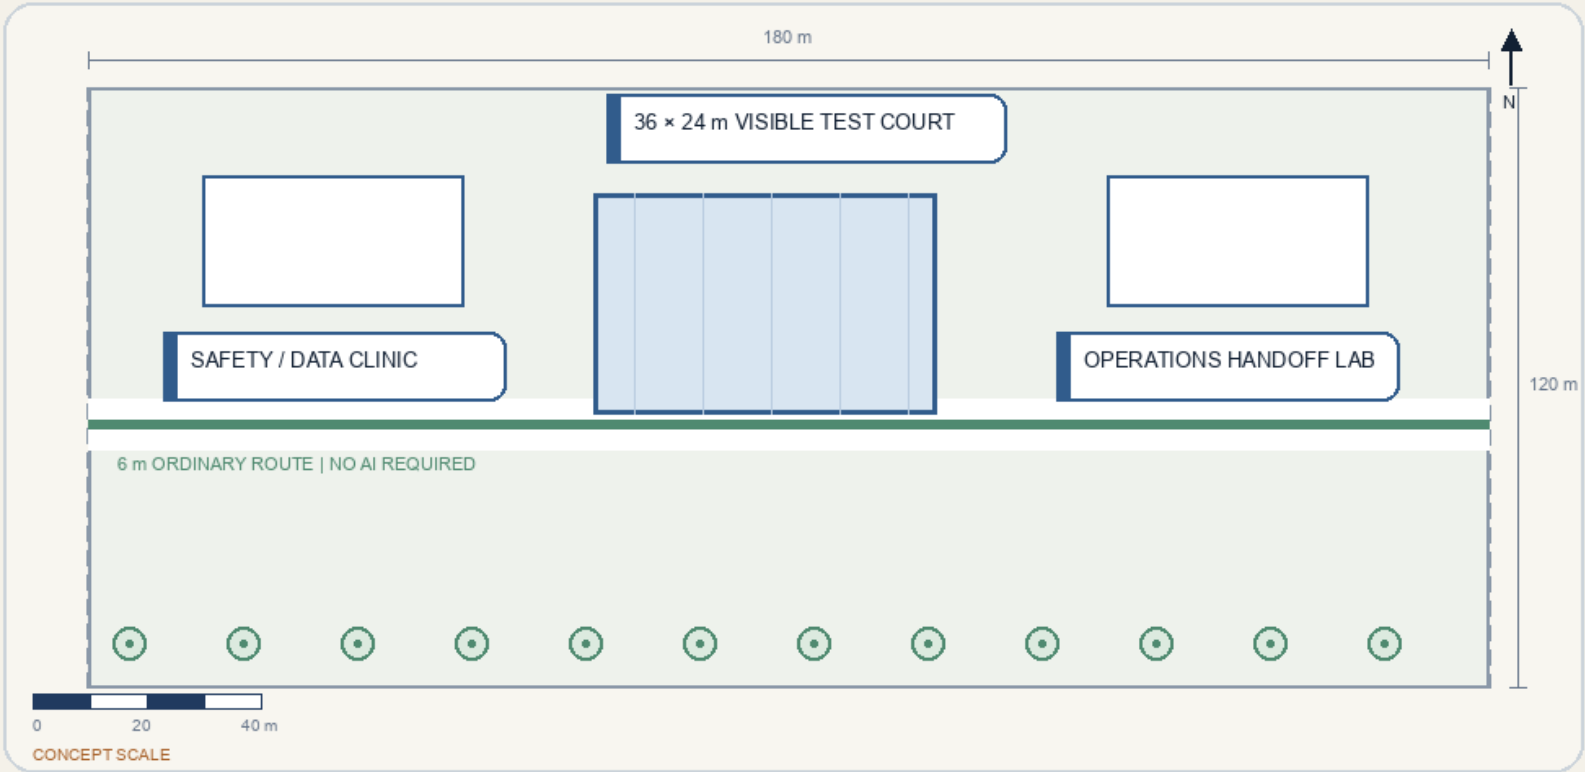

Xiaokang x Codex Urban Agent · 2026-08

Move from Regional Concept to Scale, Section, Quantity and Stop Conditions

Three concept study modules support spatial review and minimum provision; they are not legal parcels, surveys or construction drawings.

ZHONGZHIYUAN | PRODUCT-READY YARD

PUT MODEL, DEVICE AND OPERATING DUTY ON ONE HANDOFF DRAWING

CONCEPT STUDY MODULE

180 × 120 m / 2.16 ha

- Ordinary public path 6 m
- Visible test court 36 × 24 m
- Safety/data clinic 18 × 12 m
- Operations handoff lab 18 × 12 m
- Ecological buffer 12–20 m

KEY SECTION | PUBLIC BASE WORKS FIRST

STOP CONDITION | PAUSE AUTHORITY BEFORE BUILD-OUT

No data owner, human takeover or maintenance plan: stop before G1; buy no device.

BEFORE DESIGN: VERIFY REDLINE, TITLE, UTILITIES, TREES, FIRE AND ACCESSIBILITY

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang × Codex Urban Agent · 2026-08

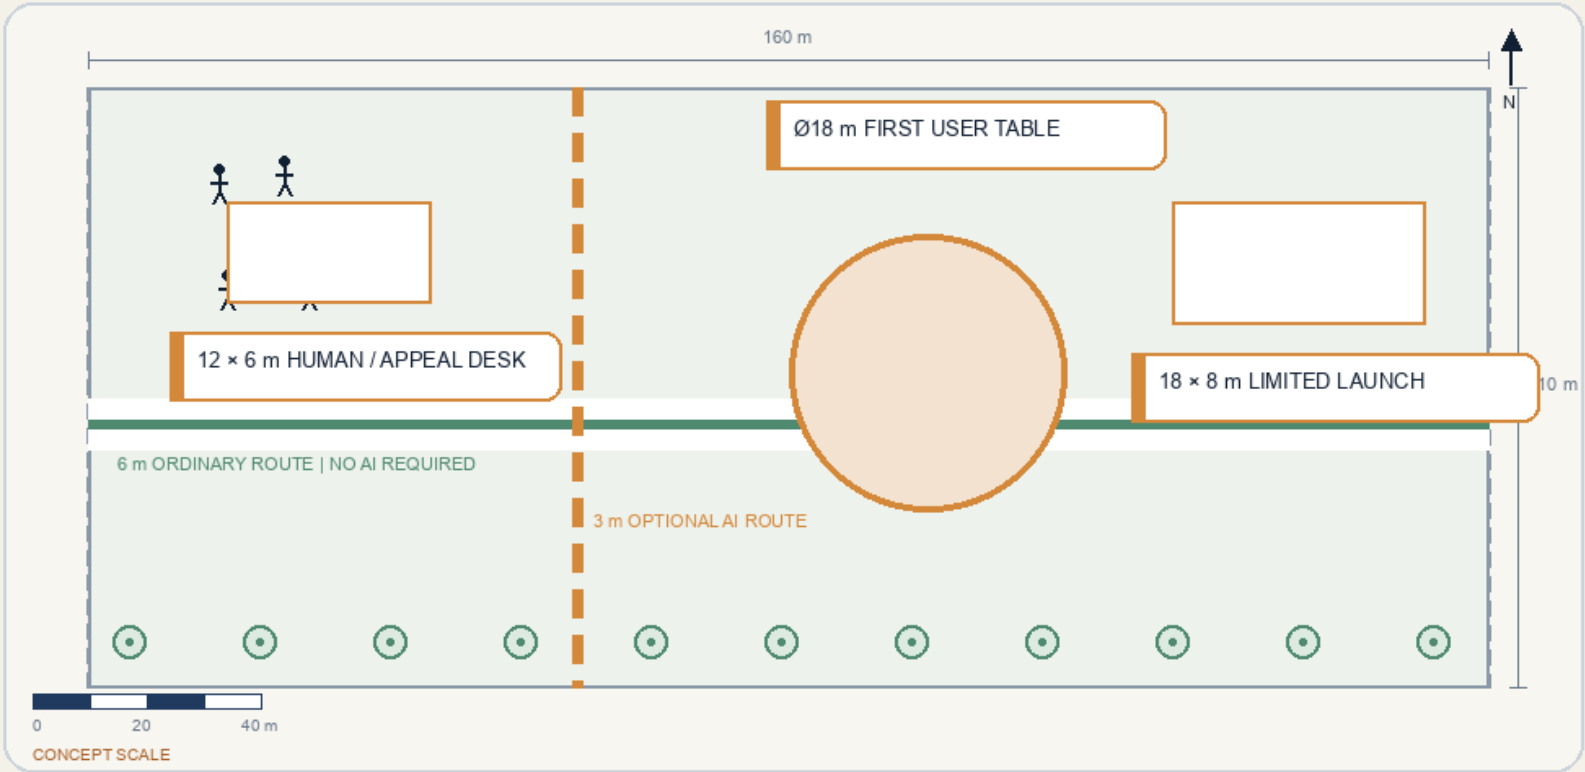

Zhongzhiyuan: no human handoff and maintenance plan, no G1

Move from Regional Concept to Scale, Section, Quantity and Stop Conditions

Three concept study modules support spatial review and minimum provision; they are not legal parcels, surveys or construction drawings.

AI ORIGIN | FIRST-USE COMMONS

ORDINARY ROUTE FIRST; AI OPTIONAL; HUMAN CORRECTION VISIBLE

CONCEPT STUDY MODULE

160 × 110 m / 1.76 ha

- Ordinary public path 6 m
- Optional AI route 3 m
- First User Table Ø18 m
- Human/appeal desk 12 × 6 m
- Limited launch window 18 × 8 m

KEY SECTION | PUBLIC BASE WORKS FIRST

STOP CONDITION | PAUSE AUTHORITY BEFORE BUILD-OUT

If any of three real tasks lacks ordinary-user exit or human escalation:
pause first use.

BEFORE DESIGN: VERIFY REDLINE, TITLE, UTILITIES, TREES, FIRE AND ACCESSIBILITY

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang × Codex Urban Agent · 2026-08

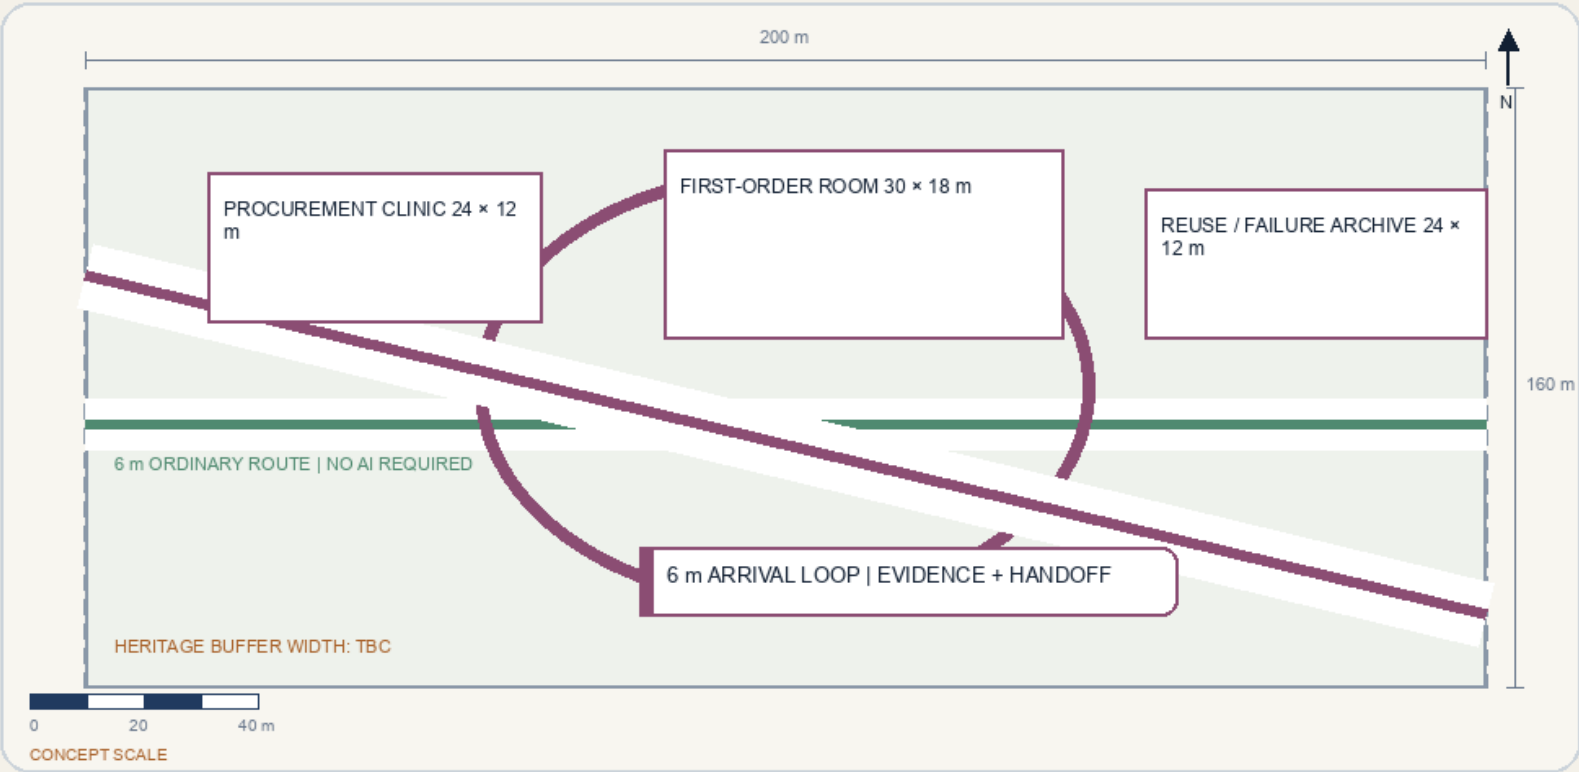

AI Origin: ordinary route, human desk and no-loss exit remain primary

Move from Regional Concept to Scale, Section, Quantity and Stop Conditions

Three concept study modules support spatial review and minimum provision; they are not legal parcels, surveys or construction drawings.

DAZHONGSI | FIRST-ORDER ROOM

TURN PILOT EVIDENCE INTO COST, LIABILITY, PROCUREMENT AND REUSE TERMS

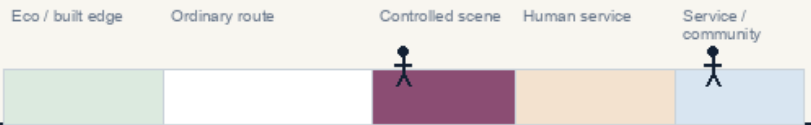

CONCEPT STUDY MODULE

200 × 160 m / 3.20 ha

- Slow-mobility seam 8 m (concept)
- Arrival loop 6 m
- Procurement clinic 24 × 12 m
- First-order room 30 × 18 m
- Reuse/failure archive 24 × 12 m

KEY SECTION | PUBLIC BASE WORKS FIRST

STOP CONDITION | PAUSE AUTHORITY BEFORE BUILD-OUT

If acceptance, cost, liability or exit terms are blank: do not call the pilot a first order.

BEFORE DESIGN: VERIFY REDLINE, TITLE, UTILITIES, TREES, FIRE AND ACCESSIBILITY

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang × Codex Urban Agent · 2026-08

Dazhongsi: no acceptance, cost, liability and exit terms, no first order

First-Use Commons: Ordinary Route First, AI Route Optional

The concept visualization is not existing or built evidence; human service is visible, non-digital service remains and every user can exit without loss.

CONCEPT VISUALIZATION / NON-BUILT

The image is not an existing condition, approved design, built space or completed co-design. Formal evidence comes from field validation, the human baseline, handoff records and the G0–G4 ledger.

- 6 m ordinary route
- AI route optional
- Human/appeal desk visible
- No face or continuous trajectory
- Exit without service loss

The image communicates spatial intent, not user-research results; before G0 run the 12-question interview, human baseline and no-loss exit test.

90-Day Delivery Ledger: Accountability, Cost and Evidence Release

RMB 0.98–1.84M is an order-of-magnitude control for one first pilot, not a quote, fiscal budget or investment commitment.

90-DAY DELIVERY LEDGER | MONEY, DUTY, EVIDENCE

ORDER-OF-MAGNITUDE CONTROL, NOT A QUOTE | EACH GATE CAN PAUSE, RETURN OR EXIT

GATE	TIME	ACCOUNTABLE	MANDATORY OUTPUT	RELEASE	COST RMB 10K	ACCEPT / STOP
G0	D1–15	Problem owner	3 real tasks + human baseline	10%	15–25	Unobservable task / no exit → stop
G1	D16–35	Product + data owner	Rights, refusal, escalation, maintenance	25%	12–25	No data duty / safety fail → return
G2	D36–55	Site operator	Human roster + reversible kit + use record	25%	43–80	Ordinary route blocked / no handoff → stop
G3	D56–75	Independent operator	Takeover drill + unit cost + correction closure	25%	15–30	Takeover fail / complaint open → return
G4	D76–90	Reuser + buyer	Acceptance, fee, liability, exit + reuse pack	15%	13–24*	No real reuse intent → archive; no build-out

DESIGN-CONTROL ENVELOPE | RMB 0.98–1.84M

- Research/co-design 15–25
 - Access/wayfinding 15–30
- Human desk/training 18–30
 - Testing/data security 12–25
- Reversible kit/furniture 25–50
 - Contingency 15%: 13–24

THREE PROCUREMENT GUARDRAILS

1. No problem owner, no hardware
2. At least 2 quotes + site survey
3. Release follows evidence, not publicity

* G4 cost is the 15% contingency. Total is a concept control range; verify after official scope, quantities, procurement route and 2+ quotes.

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Why This Proposal Should Be Selected: Five Judgments, One Adoption Chain

Originality, site specificity, public value, executability and auditability are compressed into one reviewable page.

ONE-PAGE EXECUTIVE BRIEF | WHY THIS LINE MATTERS

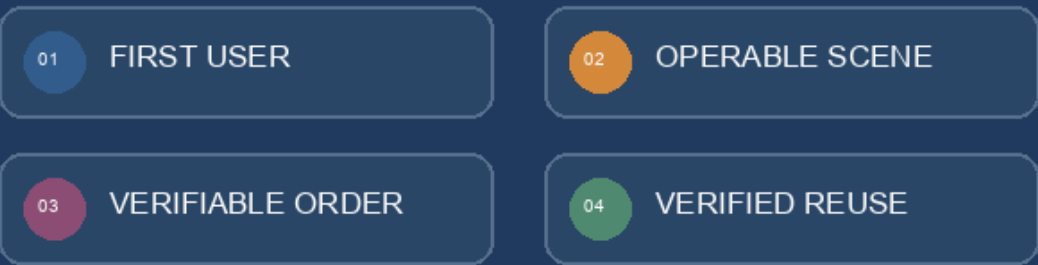

NOT ANOTHER AI SHOWCASE: THE MISSING URBAN INFRASTRUCTURE FROM LAB TO ADOPTION

THE GAP

HAIDIAN HAS MODELS, TALENT AND LAUNCHES.
IT LACKS A CONTINUOUS HANDOFF TO THE
FIRST REAL USER, OPERABLE SCENARIO,
VERIFIABLE ORDER AND VERIFIED REUSE.

ONE ADOPTION CHAIN

MINIMUM PROMISE

REMOVE AI: THE ORDINARY ROUTE, HUMAN SERVICE AND COMMONS
STILL WORK.

FIVE REVIEWABLE JUDGMENTS IN 60 SECONDS

ORIGINAL	Adoption, not display, is the design object
SITE-SPECIFIC	Zhongzhiyuan–Origin–Dazhongsi deliver ready–use–order
PUBLIC	Ordinary route first; human appeal visible; no-loss exit
EXECUTABLE	90 days, five gates, RMB 0.98–1.84M control
AUDITABLE	Journey, passport, quantities and failures are inspectable
FIRST MOVE AFTER SELECTION: NAME THE PROBLEM OWNER AND RUN G0 FIELD VALIDATION.	

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang x Codex Urban Agent · 2026-08

The First User Is Not a Slogan: Six Steps, Four Synchronized Lanes

User, front-line, AI and evidence move together; every step keeps human handoff, no-loss exit and minimum required evidence.

FIRST-USER JOURNEY | TURN USE INTO REVIEWABLE ADOPTION EVIDENCE

SIX STEPS, FOUR SWIMLANES | PAUSE IF HUMAN ESCALATION OR NO-LOSS EXIT FAILS

	01 ARRIVE & CHOOSE	02 DEFINE REAL TASK	03 HUMAN BASELINE	04 LIMITED AI USE	05 CORRECT & HANDOFF	06 EXIT, REUSE OR STOP
FIRST USER	See 6m ordinary route; choose human or AI	State today's decision; 'experience' is not a task	Run current process once; time errors and material	Rights-cleared public info only; stop anytime	Flag error; transfer without losing progress	Receive recoverable record; end or reuse
FRONT-LINE STAFF	Explain boundary and non-digital entry	Confirm owner, done state and harm	Record human steps and waiting	Stay visible; may overturn the answer	Take over, correct and close the loop	Confirm no-loss service; explain appeal/deletion
AI ASSISTANCE	Off by default; no face/trajectory	Help decompose, never decide	Read de-identified baseline only	Show source, confidence, refusal and handoff	Export context; stop automation	No departure tracking; delete on schedule
EVIDENCE & GATE	G0: choice visible	Task card: owner / done / harm	Baseline: time / error / handoff	G2: source / refusal / consent	G3: handoff / correction / complaint	G4: outcome / unit cost / reuse / exit

SUCCESS IS NOT SATISFACTION: RECORD COMPLETION, HUMAN CORRECTION, INDEPENDENT HANDOFF, UNIT COST, NO-LOSS EXIT AND CONDITIONAL REUSE.

Centennial Jing-Zhang: From Engineering Autonomy to Urban Adoption

Line, sleepers, platform, formation and timetable become adoption institutions

THE CENTENNIAL FIRST MILE | FROM ENGINEERING AUTONOMY TO URBAN AI ADOPTION

RAIL IS NOT DECORATION: LINE, STATION, MILEPOST, SIGNAL AND MAINTENANCE BECOME PUBLIC ADOPTION DISCIPLINE

1909 → 2026 → NEXT

A CENTURY AGO, THE JING-ZHANG RAILWAY
MARKED A FIRST MILE OF ENGINEERING AUTONOMY.
TODAY, JING-ZHANG FIRST MILE TAKES AI
FROM MODEL TO REAL CITY ADOPTION.

FIRST-MILE GATE

The five sleepers are operational: every gate needs evidence and allows pause, return and exit.

THE JING-ZHANG +1: turn engineering autonomy into adoption discipline for public AI services.

FIVE RAILWAY GRAMMARS, FIVE URBAN MECHANISMS

LINE	LINE	From isolated showcases to one handoff chain
STATION	STATION	Each station completes one adoption task
MILEPOST	MILEPOST	The passport records how far adoption travelled
SIGNAL	SIGNAL	G0-G4 publish proceed, pause and exit
MAINTAIN	MAINTENANCE	It becomes city service only after unfamiliar handoff

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang x Codex Urban Agent · 2026-08

Real-Place Atlas

Presentation-only OSM orientation; provisional extents are not survey, redline, engineering or approval evidence

REAL-PLACE ATLAS | AN ADOPTION CHAIN ANCHORED IN ROADS, RIVERS, RAIL, CAMPUSES AND HERITAGE

PRESENTATION-ONLY OSM CONTEXT + PROVISIONAL DESIGN BOUNDARY; NOT SURVEY OR STATUTORY CONTROL

SIX REAL-PLACE JUDGMENTS

- 01 The heritage park is an existing everyday spine, not a future green-axis invention
- 02 The north meets Qinghe and tech campuses: fit for readiness and safe handoff
- 03 The middle meets Wudaokou, Qinghuayuan heritage and transit: fit for first users
- 04 The south meets Dazhongsi heritage, transit and commerce: fit for first order and reuse
- 05 Cross streets, campuses and communities define launch ports, not just a north-south promenade
- 06 Every AI service is removable; routes, shade, seats and human entry remain

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang x Codex Urban Agent · 2026-08

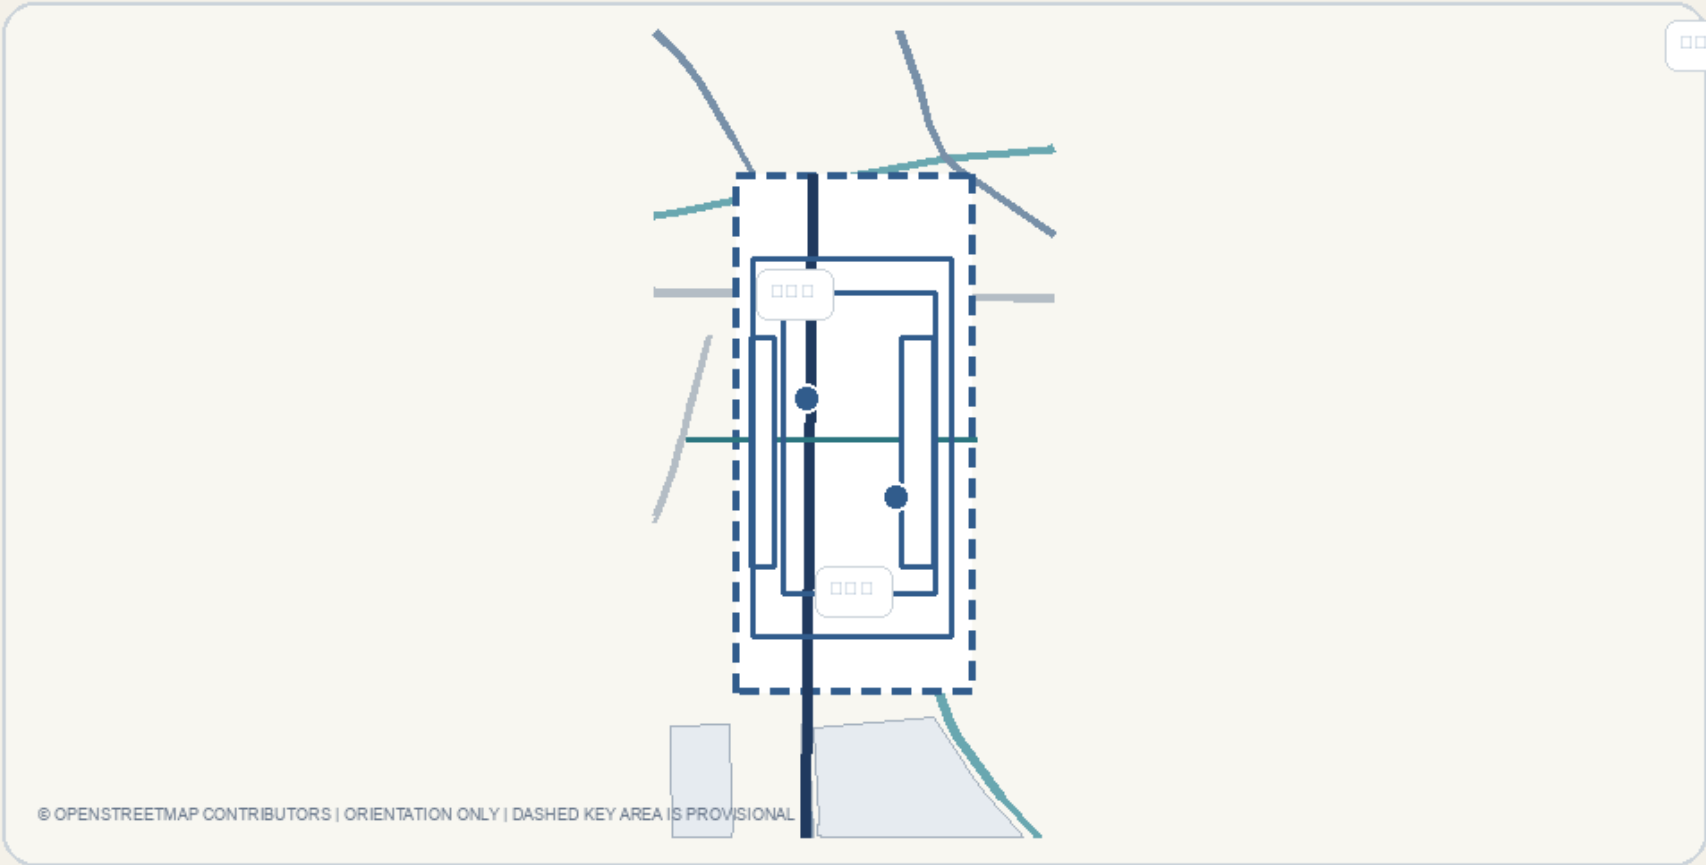

Zhongzhiyuan: Product Readiness and Safe Handoff

Real orientation, spatial moves, first-mile sequence and hard stop

ZHONGZHIYUAN | PRODUCT READINESS AS A HANDOFF-READY URBAN FORECOURT

QINGHE-FIFTH RING-XUEQING ROAD TECH/CAMPUS EDGE | REAL ORIENTATION + PROVISIONAL KEY AREA

THE QUESTION THIS PLACE MUST ANSWER

How does a demo become a city service an unfamiliar operator can actually take over?

THREE SPATIAL MOVES

- 1 Place safety review between public forecourt and R&D back-of-house
- 2 Keep the ordinary route continuous; tests are bounded in place and time
- 3 Name data duty, human handoff, maintenance and exit before G1

FIRST-MILE ACTION SEQUENCE

HARD STOP

No unfamiliar-operator handoff and maintenance plan: buy no equipment and do not enter first use.

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

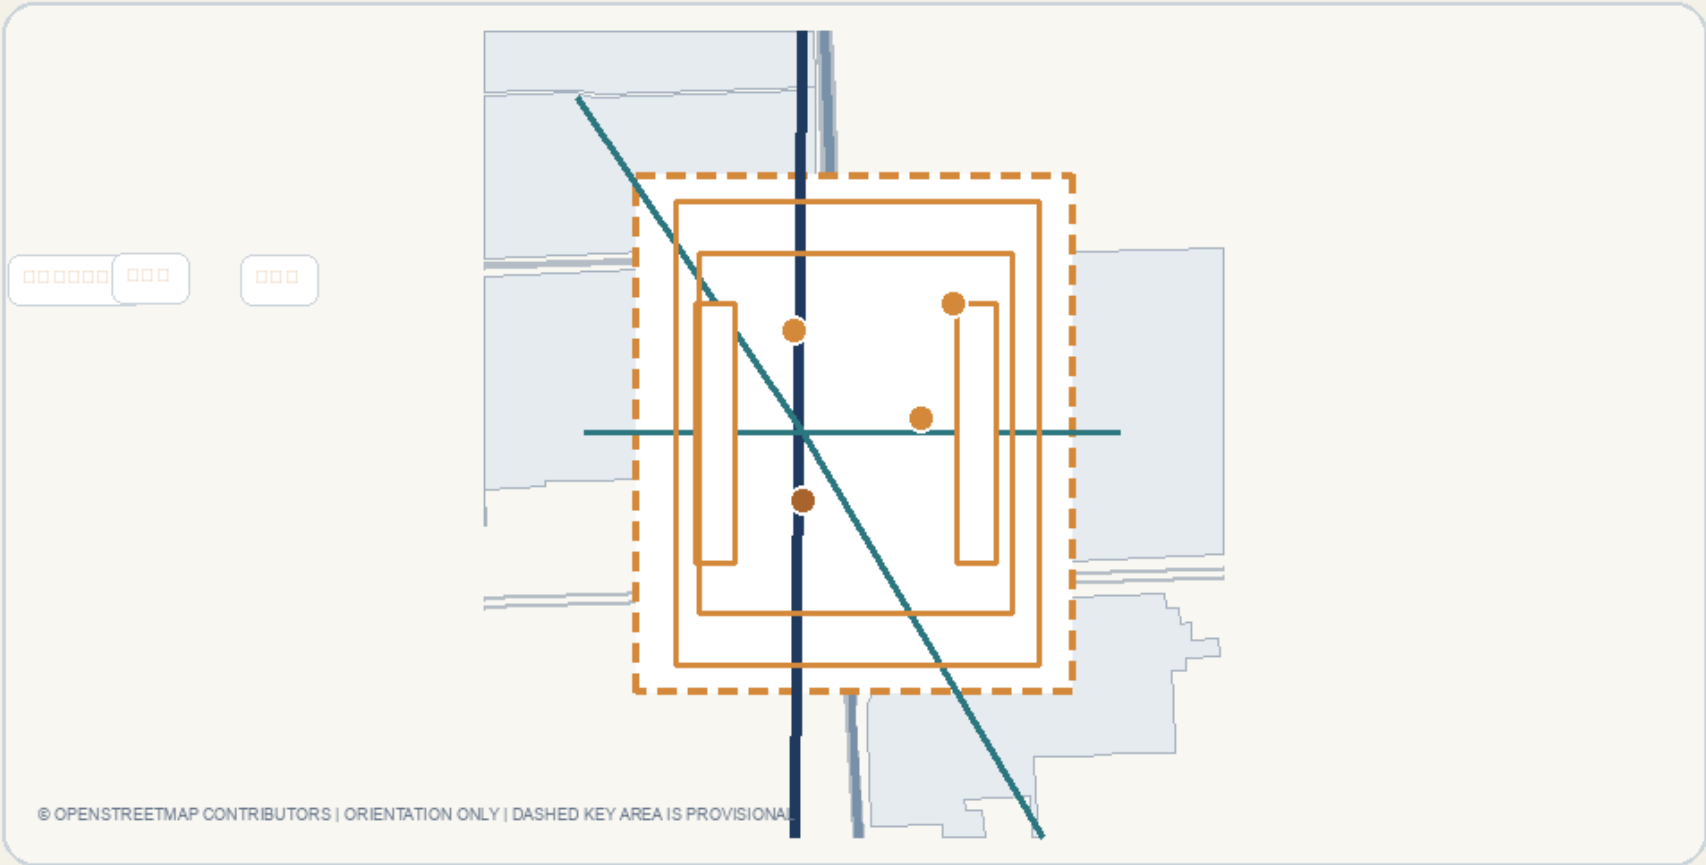

Xiaokang x Codex Urban Agent · 2026-08

AI Origin: First User and No-Loss Exit

Ordinary route first, human service visible, AI route optional

AI ORIGIN | TURN THE EVERYDAY ROUTE BETWEEN WUDAOKOU AND QINGHUAYUAN HERITAGE INTO A FIRST-USE COMMONS

WUDAOKOU-CHENGFU ROAD-QINGHUAYUAN HERITAGE-LINE 13 | REAL ORIENTATION + PROVISIONAL KEY AREA

THE QUESTION THIS PLACE MUST ANSWER

Can an ordinary person complete a real task and transfer to a human without loss when AI fails?

THREE SPATIAL MOVES

- 1 Keep the 6 m ordinary route primary; AI is optional
- 2 Make the human/appeal desk visible and directly reachable
- 3 Use the First User Table to connect founders, residents and front-line staff

FIRST-MILE ACTION SEQUENCE

HARD STOP

If any of three real tasks cannot hand off or exit without loss, pause G2 immediately.

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang x Codex Urban Agent · 2026-08

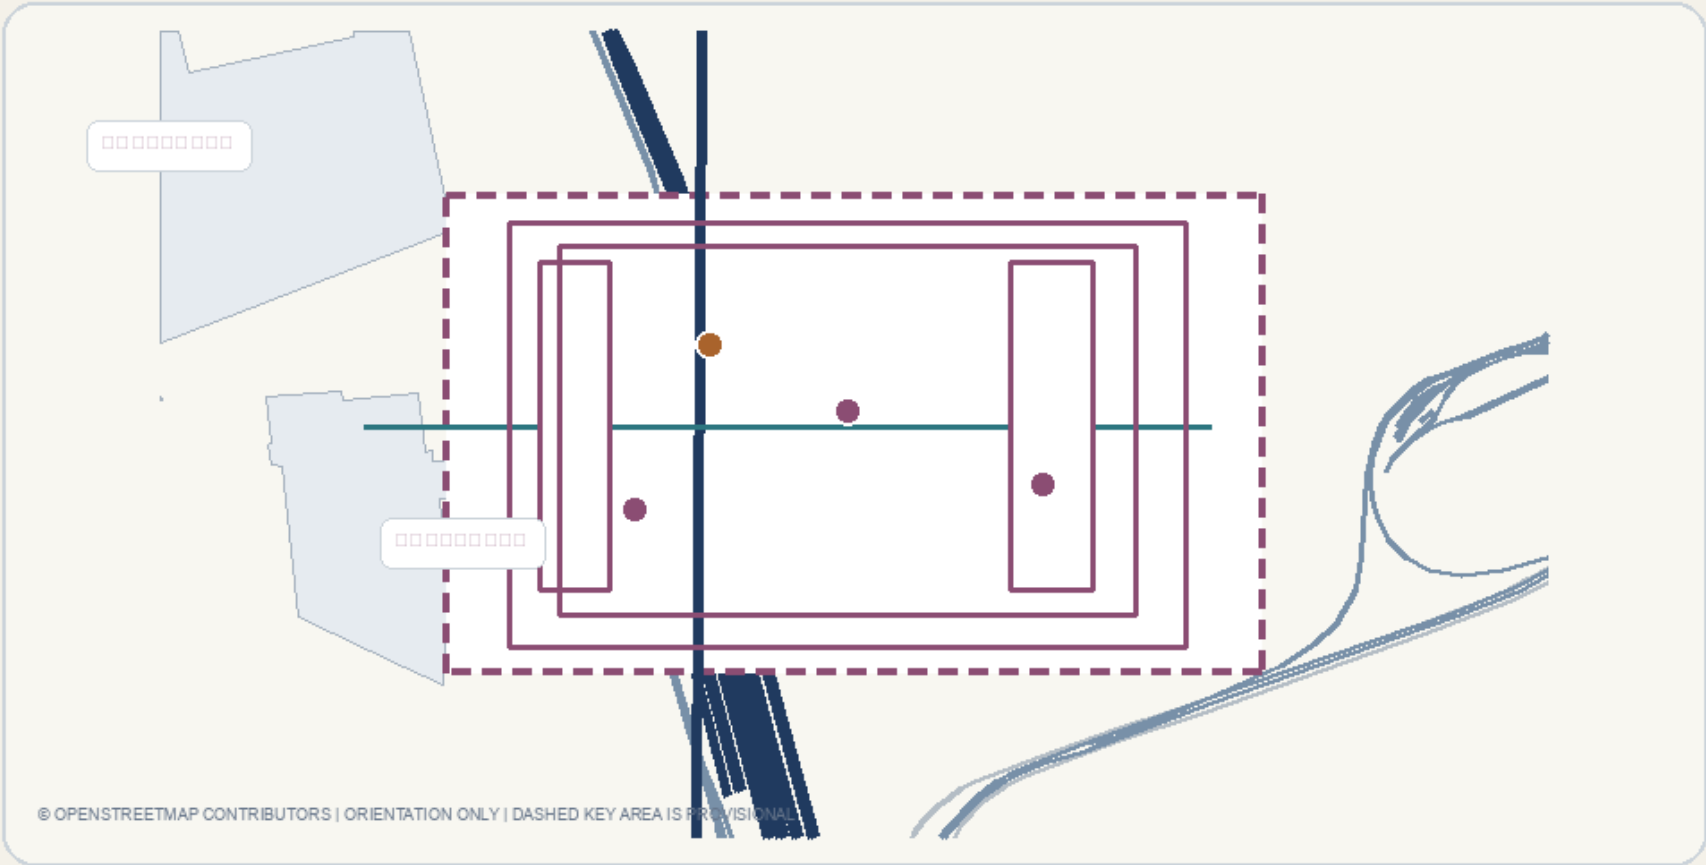

Dazhongsi: Verifiable First Order and Reuse

Acceptance, fee, liability, procurement state, training and exit enter one reuse pack

DAZHONGSI | LINK TRANSIT ARRIVAL, HERITAGE AND EVERYDAY COMMERCE INTO A VERIFIABLE FIRST-ORDER ROOM

DAZHONGSI STATION-NORTH THIRD RING-HERITAGE-BEIJING JIAOTONG UNIVERSITY | REAL ORIENTATION + PROVISIONAL KEY AREA

THE QUESTION THIS PLACE MUST ANSWER

How does one pilot become reusable terms with acceptance, fee, liability, training and exit?

THREE SPATIAL MOVES

- 1 Link station, public room and daily commerce in one arrival loop
- 2 Let procurement clinic and ordinary public stay coexist, not become a showroom
- 3 Address reuse/failure records to the next operator, not media traffic

FIRST-MILE ACTION SEQUENCE

HARD STOP

If acceptance, fee, liability, procurement state, training or exit is blank, do not call it a first order.

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Three Flagship Experiences

AI-generated concept image: human scale, everyday use, accessibility and staffed presence only; not site evidence

Long-Term Operation and Global Public Brand Asset

Six-party accountability, dual ledgers, four-season rhythm and three-year reuse roadmap

LONG-TERM OPERATIONS | MAINTAIN AN ADOPTION LINE, NOT A ONE-OFF EVENT

ROLES, ANNUAL RHYTHM, DUAL LEDGER AND THREE-YEAR ROADMAP; ORGANIZATIONS AND FUNDING REQUIRE FORMAL CO-CREATION

SIX-PARTY STEWARDSHIP: SEPARATE DELIVERY POWER AND STOP RIGHTS

ANNUAL RHYTHM

THREE-YEAR ROADMAP: SCALE ONLY AFTER REUSE EVIDENCE

PROVISIONAL BOUNDARY · CONCEPT DESIGN · RECALCULATE AFTER OFFICIAL POLYGONS

Xiaokang x Codex Urban Agent · 2026-08

Three Positionings × Five Functions × First-Mile Evidence

Official task - mechanism - spatial anchor - review evidence; eight requirements on one page

P1

Centennial Jing-Zhang Cultural Belt

Translate engineering autonomy, truth-seeking and public learning into urban-adoption discipline

PLACE Heritage-park public realm + First-Mile Gate + three handoff landmarks

P2

Urban AI Life Experience Belt

Test AI through everyday work, living, social and learning tasks

PLACE Ordinary route first + optional AI route + visible human desk + day/night operation

P3

AI Convergence Innovation Belt

Connect R&D, first real use, first operational order and cross-district reuse

PLACE Zhongzhiyuan Build—AI Origin Use—Dazhongsi Operate—two wings

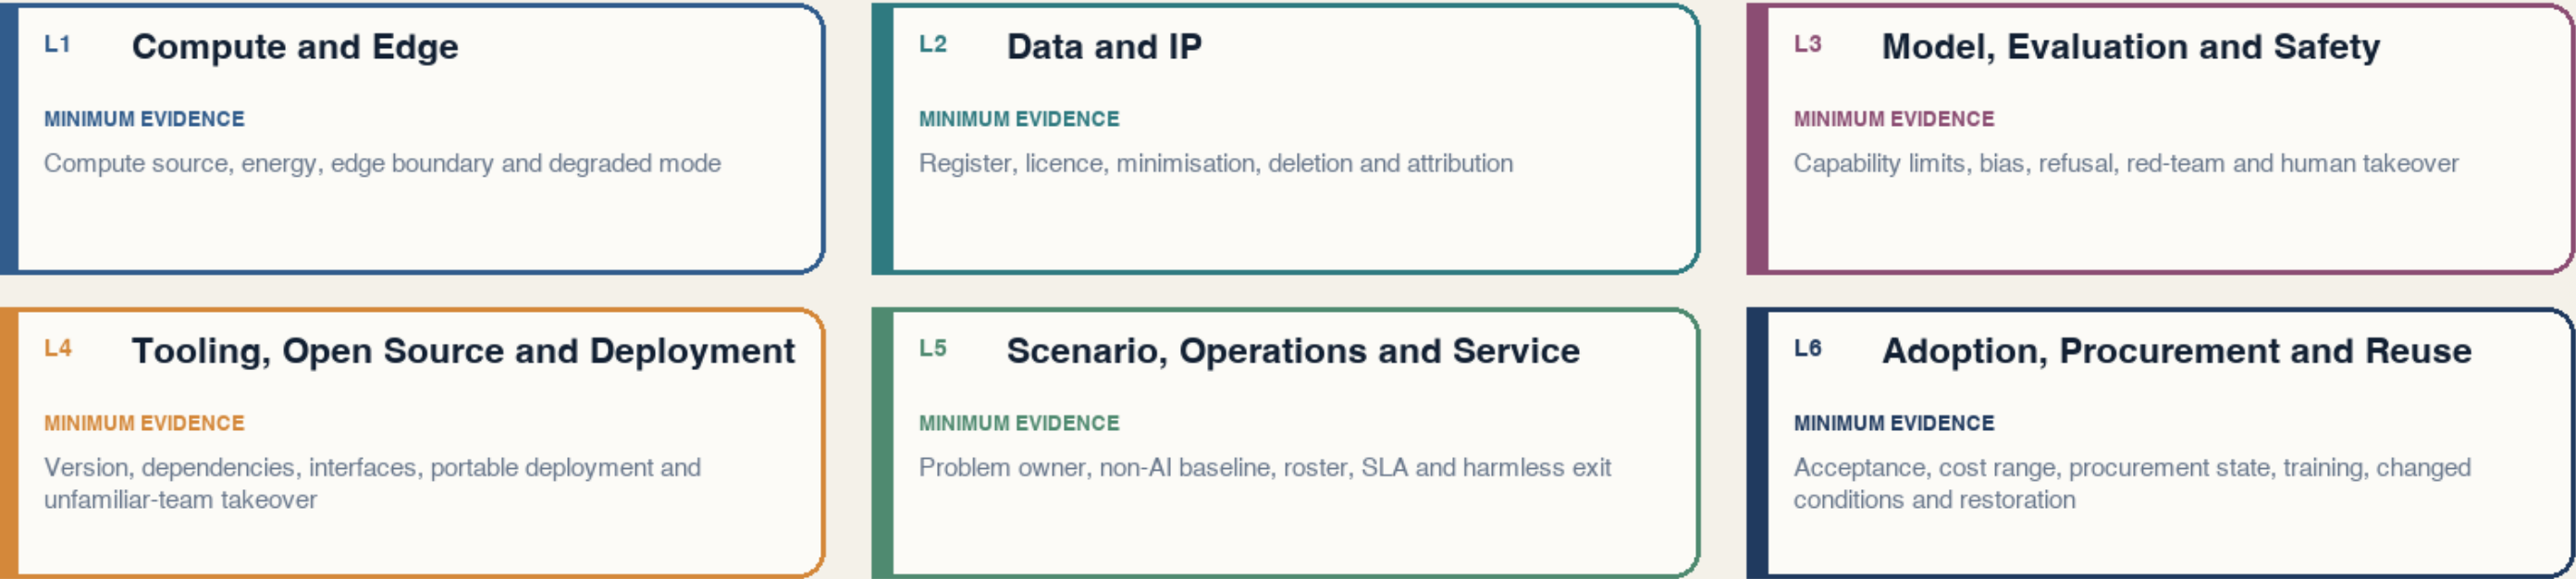

FIVE FUNCTIONS		FIRST-MILE MECHANISM	PRIMARY ANCHOR / EVIDENCE
F1	Full-Stack Independent AI Innovation System	Six-layer loop: compute/edge, data/IP, model evaluation, open tooling, scenario operations, adoption/reuse	Zhongzhiyuan Product-Ready Yard
F2	World-Class AI Innovation Ecosystem	Universities, firms, users, operators, professional services and regional nodes collaborate around reusable outcomes	Three Zones and Two Wings + seven global translations
F3	New Paradigm of AI-Enabled Scenarios	Each scenario card includes a problem owner, non-AI baseline, human takeover, cost state and stop condition	12 scenario cards + 3 testing settings
F4	Intelligent and Vibrant AI City	Ordinary routes, free stay, human service and public space still work after AI is removed	Day/night work—living—social—learning task chain
F5	Global Voice in AI Governance	Publish G0—G4, the First-Mile Passport, failure archive, dual ledgers and reuse pack as a versioned protocol	Jing-Zhang AI Urban Adoption Protocol, JZ-AUP v1.0

This is a proposal-authored task response and open-protocol draft, not official adoption, partnership, procurement, funding or implementation.

Xiaokang × Codex Urban Agent · V6_TASKBOOK_CROSSWALK

FULL-STACK AI | FROM CAPABILITY TO ADOPTION

Independence is not isolation: every layer is replaceable, auditable, transferable and tested through real urban tasks

THREE STATIONS TURN A TECH STACK INTO AN ADOPTION CHAIN

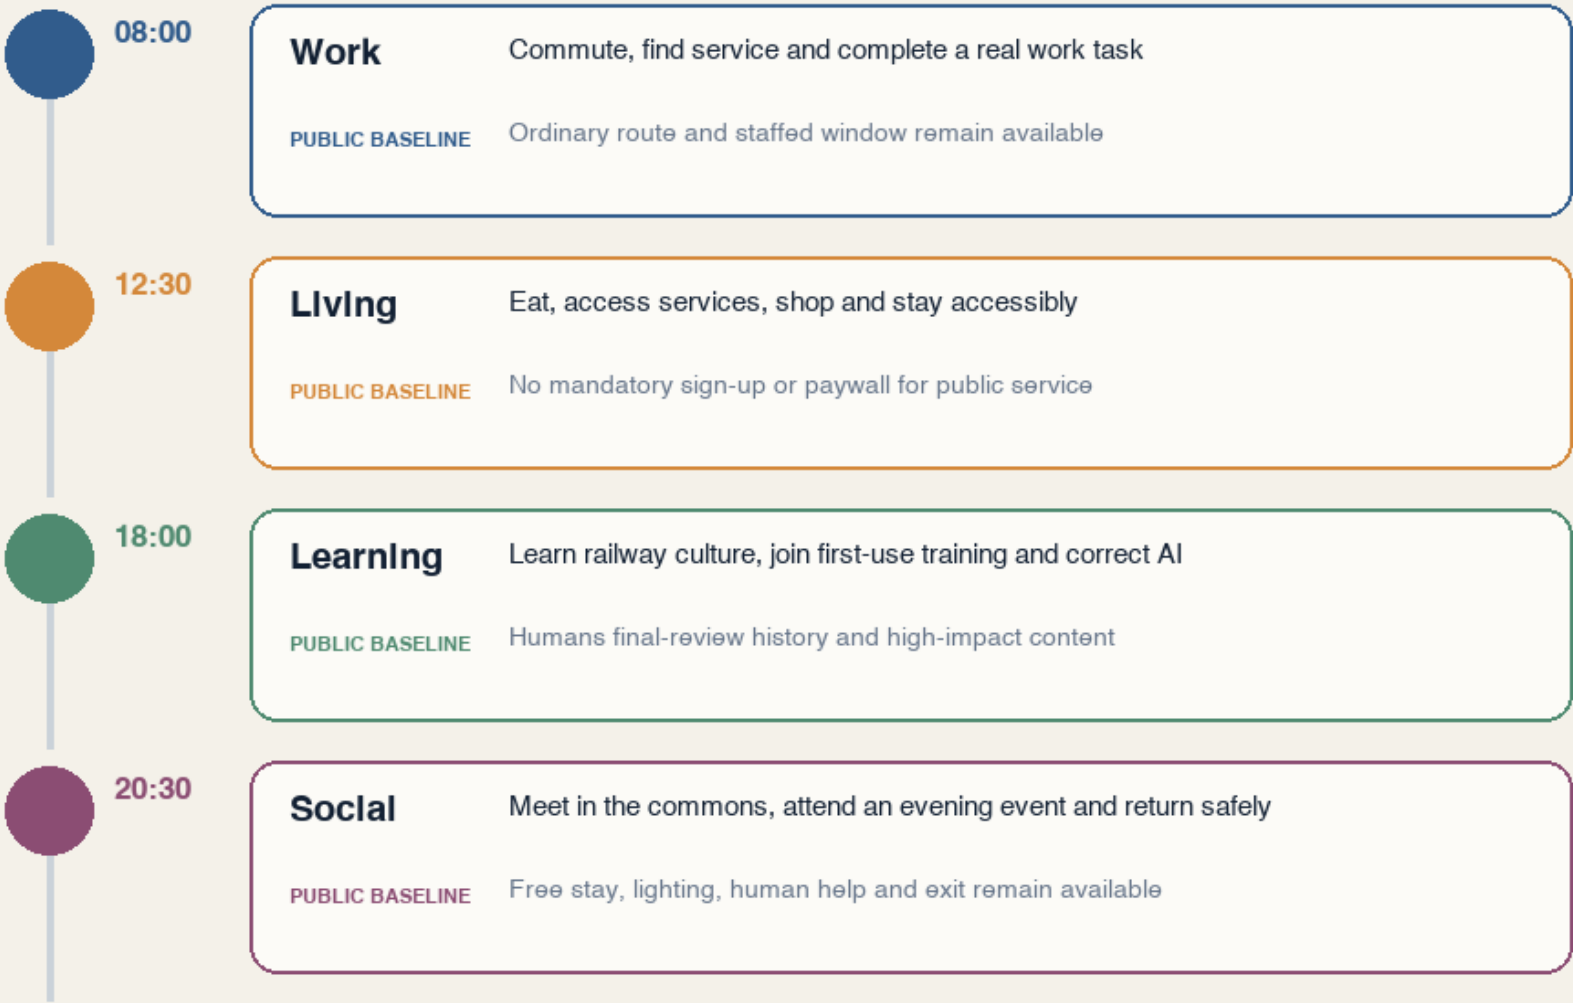

This is a proposal-authored task response and open-protocol draft, not official adoption, partnership, procurement, funding or implementation. Xiaokang × Codex Urban Agent · V6_FULL_STACK

URBAN AI LIFE EXPERIENCE + JING-ZHANG AI URBAN ADOPTION PROTOCOL

The left tests whether daily life improves; the right defines responsible urban adoption and global reuse

FOUR REAL TASK DOMAINS IN ONE DAY

JZ-AUP v1.0

Jing-Zhang AI Urban Adoption Protocol

FIVE OPEN OBJECTS

- First-Mile Task Order
- G0—G4 Gate Record
- First-Mile Passport
- Failure and Reuse Archive
- Public-Value + Operating-Economics Ledgers

RELEASE RULE

Annually publish problem orders, version changes, failures and bilingual reuse packs that pass G4; cities exchange authorised, de-identified structures, not personal data.

This is a proposal-authored task response and open-protocol draft, not official adoption, partnership, procurement, funding or implementation.

Xiaokang × Codex Urban Agent · V6_URBAN_PROTOCOL

Review path: test an ordinary day on the left and versioned, auditable global reuse on the right.
