

Jingzhang AI Pulse Belt

智脉创新带 · Concept Board

A Jingzhang AI Pulse symbiosis belt — one belt, three cores, pulse symbiosis. The Jingzhang Railway Heritage Park is the historic and public-space spine; Zhongzhiyuan, Beijing AI Origin Community and Dazhongsi are the innovation anchors; the Zhongguancun tech-service wing and Xiaoyuehe scenario wing wrap the cores, forming a 'source → convert → experience → feedback' innovation loop.

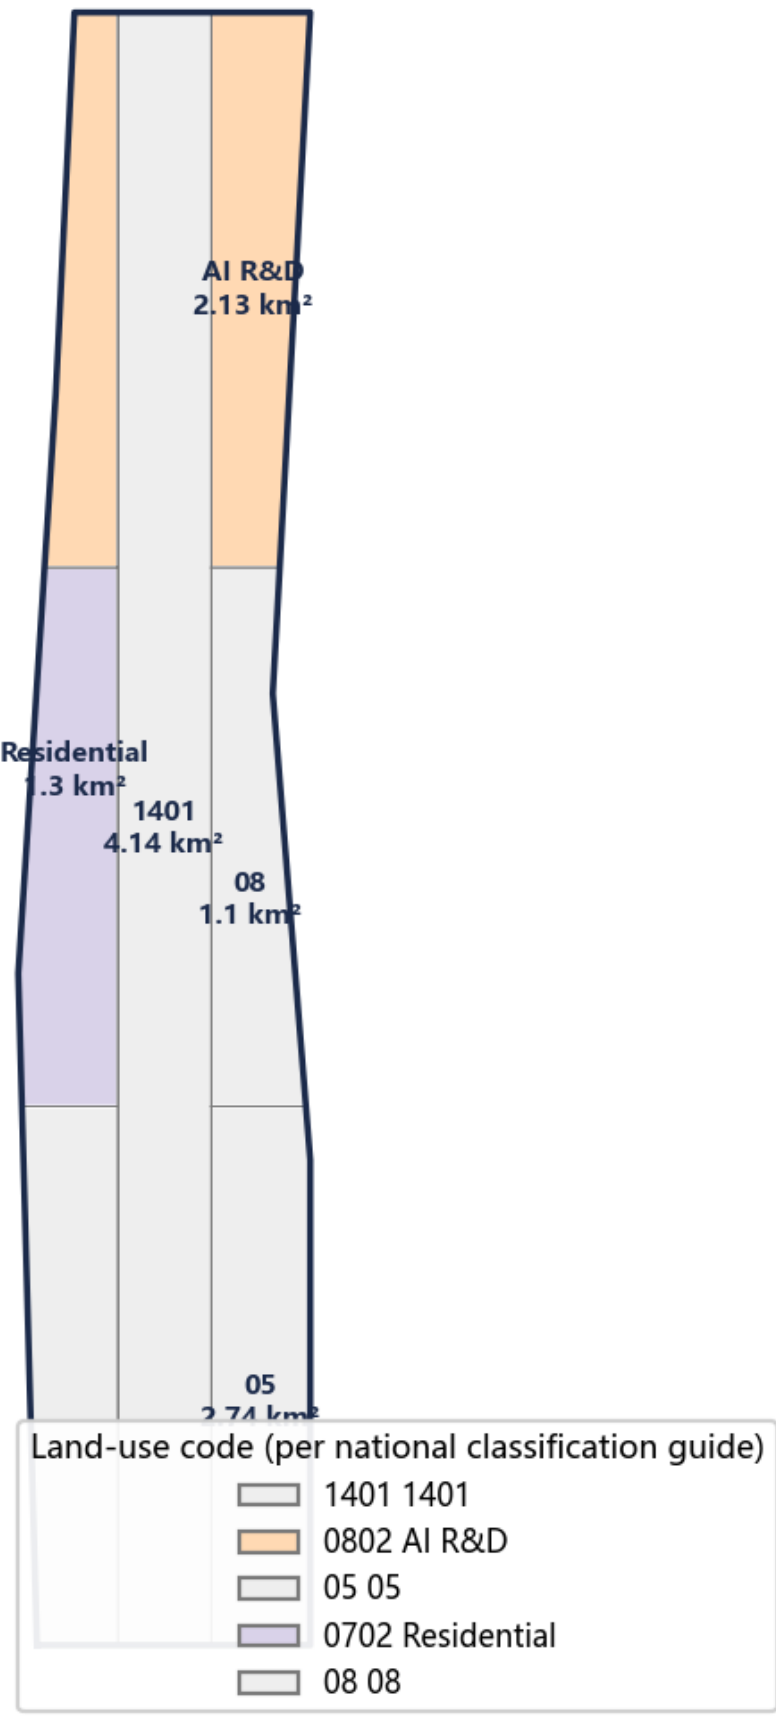

Fig.01 · Site Overview & Three-Level Scope

Jingzhang AI Pulse Belt · provisional boundary, not a statutory redline; recompute after official data is released · Source: qualification pre-announcement area constraints + provisional_boundaries.geojson
