

JING-ZHANG ONE MILLIMETER

Making each millimeter of rain an observable, learnable, and reversible civic space

THREE WATER-LEARNING COURTS • COMPLETE CONCEPT PARTITION

JING-ZHANG ONE MILLIMETER / 03

THREE COURTS • ONE PROTOCOL • THREE VALIDATIONS

01

QINGHE WATER-LEARNING COURT

porous materials · safety validation · low-carbon exchange
announced approx. 192.1 ha · displayed geometry is provisional

02

ORIGIN OPEN-SOURCE WATER COURT

university transfer · open release · talent services
announced approx. 104.3 ha · displayed geometry is provisional

03

DAZHONGSI POROUS CIVIC ROOM

station-city links · global demo · dry/wet stage
announced approx. 72.0 ha · displayed geometry is provisional

PROVISIONAL ROUGH GEOMETRY • NOT A STATUTORY REDLINE OR CAPACITY CLAIM

JING-ZHANG ONE MILLIMETER / 02

COMPLETE PARTITION, NOT STATUTORY ZONING

AI R&D and environmental testbed
1.51 km²

Rain gardens and continuous parkland
2.33 km²

Industry services and public ground floors
2.85 km²

Talent community and public services
2.46 km²

Railway heritage interpretation and civic squares
2.26 km²

* provisional geometry calculation

Topology: complete cover / no overlap

PROVISIONAL ROUGH GEOMETRY • NOT A STATUTORY REDLINE OR CAPACITY CLAIM

12 AI+ SCENARIOS

rain bulletin · post-rain work order · porous-material A/B · tree-pit care · accessible reporting ·
comfort route · heritage rain sound · robot stop rule · event risk · open-test credential · community
review · open-source festival

THREE STATES • HONEST METRICS • REVERSIBLE DELIVERY

JING-ZHANG ONE MILLIMETER / 04

USEFUL WHEN DRY • LEGIBLE IN RAIN • RECOVERABLE AFTER

01 DRY

walk · cycle · learn · gather

AI suggests + humans decide

02 RAIN

show runoff path and risk level

AI suggests + humans decide

03 AFTER

human review · work order · repair · publish

AI suggests + humans decide

slow mobility → aggregated environmental data → authorised review → reversible spatial action

PROVISIONAL ROUGH GEOMETRY • NOT A STATUTORY REDLINE OR CAPACITY CLAIM

JING-ZHANG ONE MILLIMETER / 05

METRICS WITHOUT PRETENCE: KNOWN, PROVISIONAL, PROPOSED, UNKNOWN

overall design area	approx. 11.4 km²	official text
key areas	3 / approx. 368.4 ha	official text + provisional geometry
rain stations	12	design commitment
FAR / height	UNKNOWN	pending official controls
stormwater capacity	UNKNOWN	pending survey, soil, network, and model

EPSG:4548 recalculation • manifest hashes • four validation gates

PROVISIONAL ROUGH GEOMETRY • NOT A STATUTORY REDLINE OR CAPACITY CLAIM

SIX DELIVERY GATES

evidence · authority · public benefit · safety/privacy · life-cycle cost · exit/restoration
