

# Jingzhang Warp & Weft • Framework

Eight wefts weave life and green; four meridians carry innovation through

Master plan (provisional)

## 01 Concept

Translating the railway's survey-by-warp-and-weft engineering legacy into an urban design method:

Eight wefts run south to north weaving life and green—the SA Wenhuiyuan retail belt, weft corridors r1, park-south SB, Yuandadu green weft p1, Zhichun culture belt SC, corridor

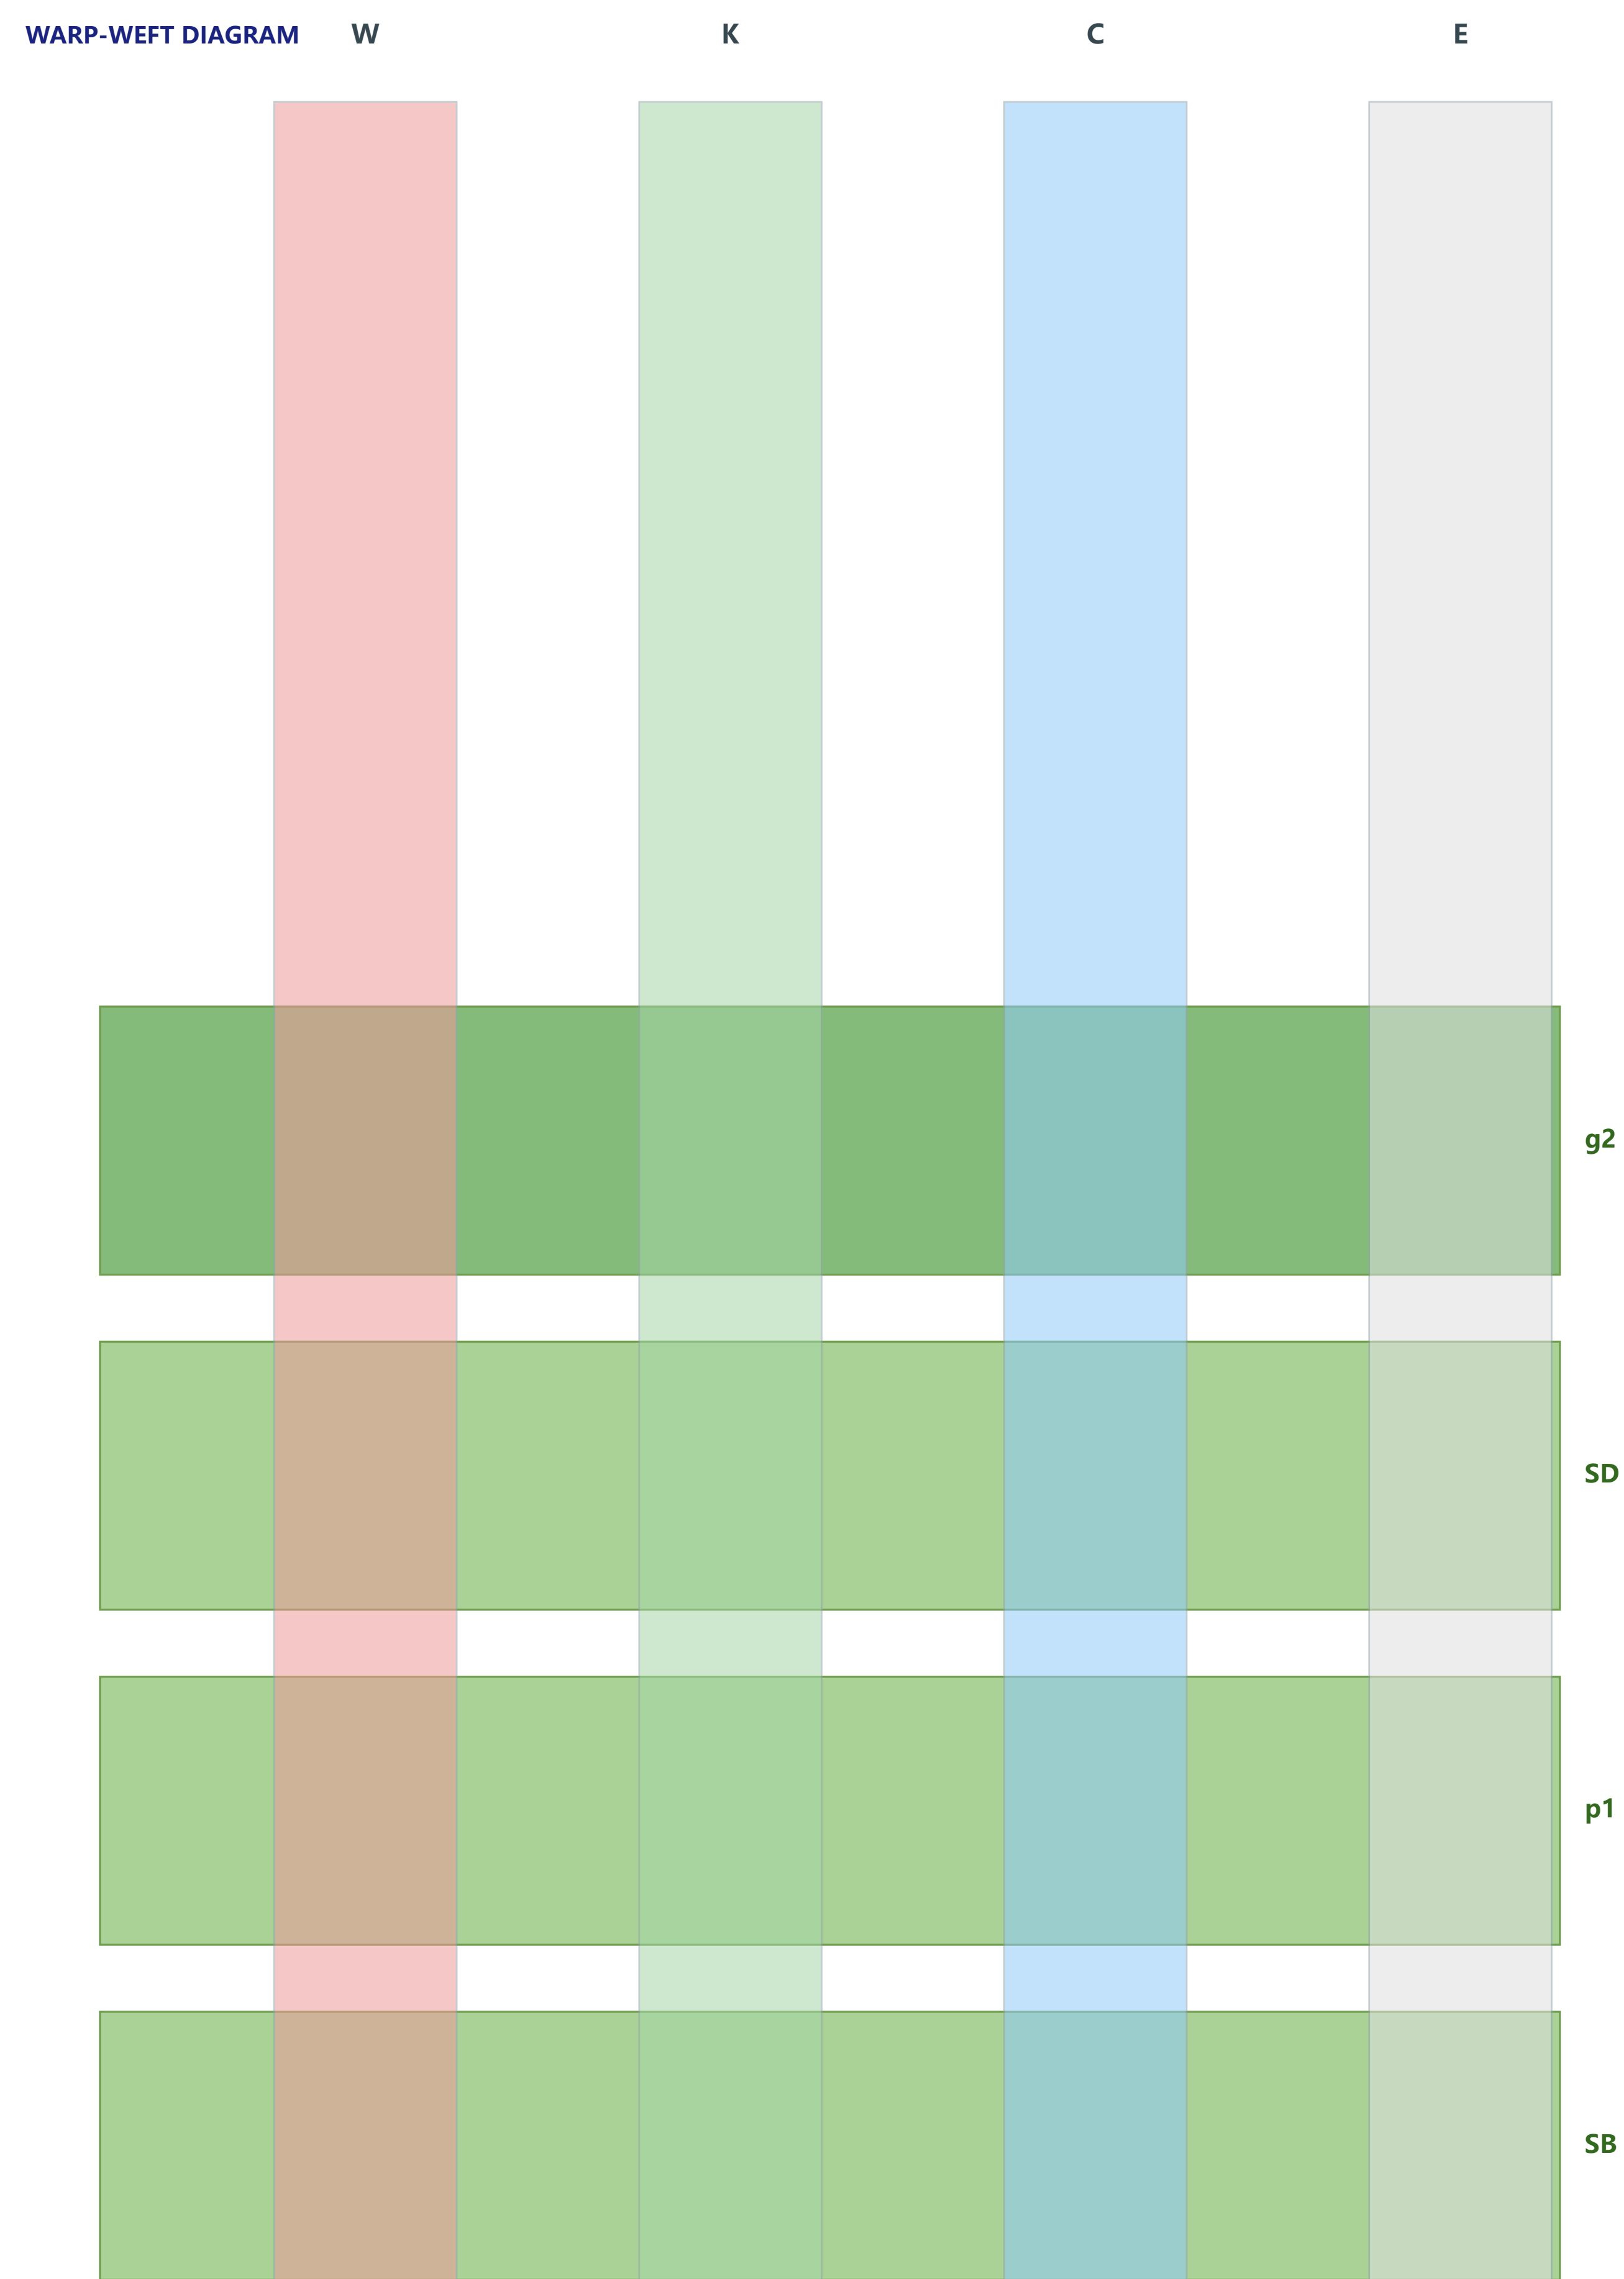

Four meridians slice functions into the western renewal wing W, the Jingzhang green axis K, the central innovation column C and the eastern reserve wing E; column K is carrying

## 02 Structure

Three knot-areas: Dazhongsi = SA/SB x C (consumption knot); Beijing AI Origin Community = SD x K/C (campus incubation knot); Zhizhiyuan = SD/g2 x W at the Qinghe (full

'Warp and weft' adds no new red lines—it translates the three-level working method: wefts stitch horizontal life and blue-green systems; meridians organise vertical industry

The boundary is a provisional constraint (not red lines); once official boundaries publish, all layers and metrics are recalculated.

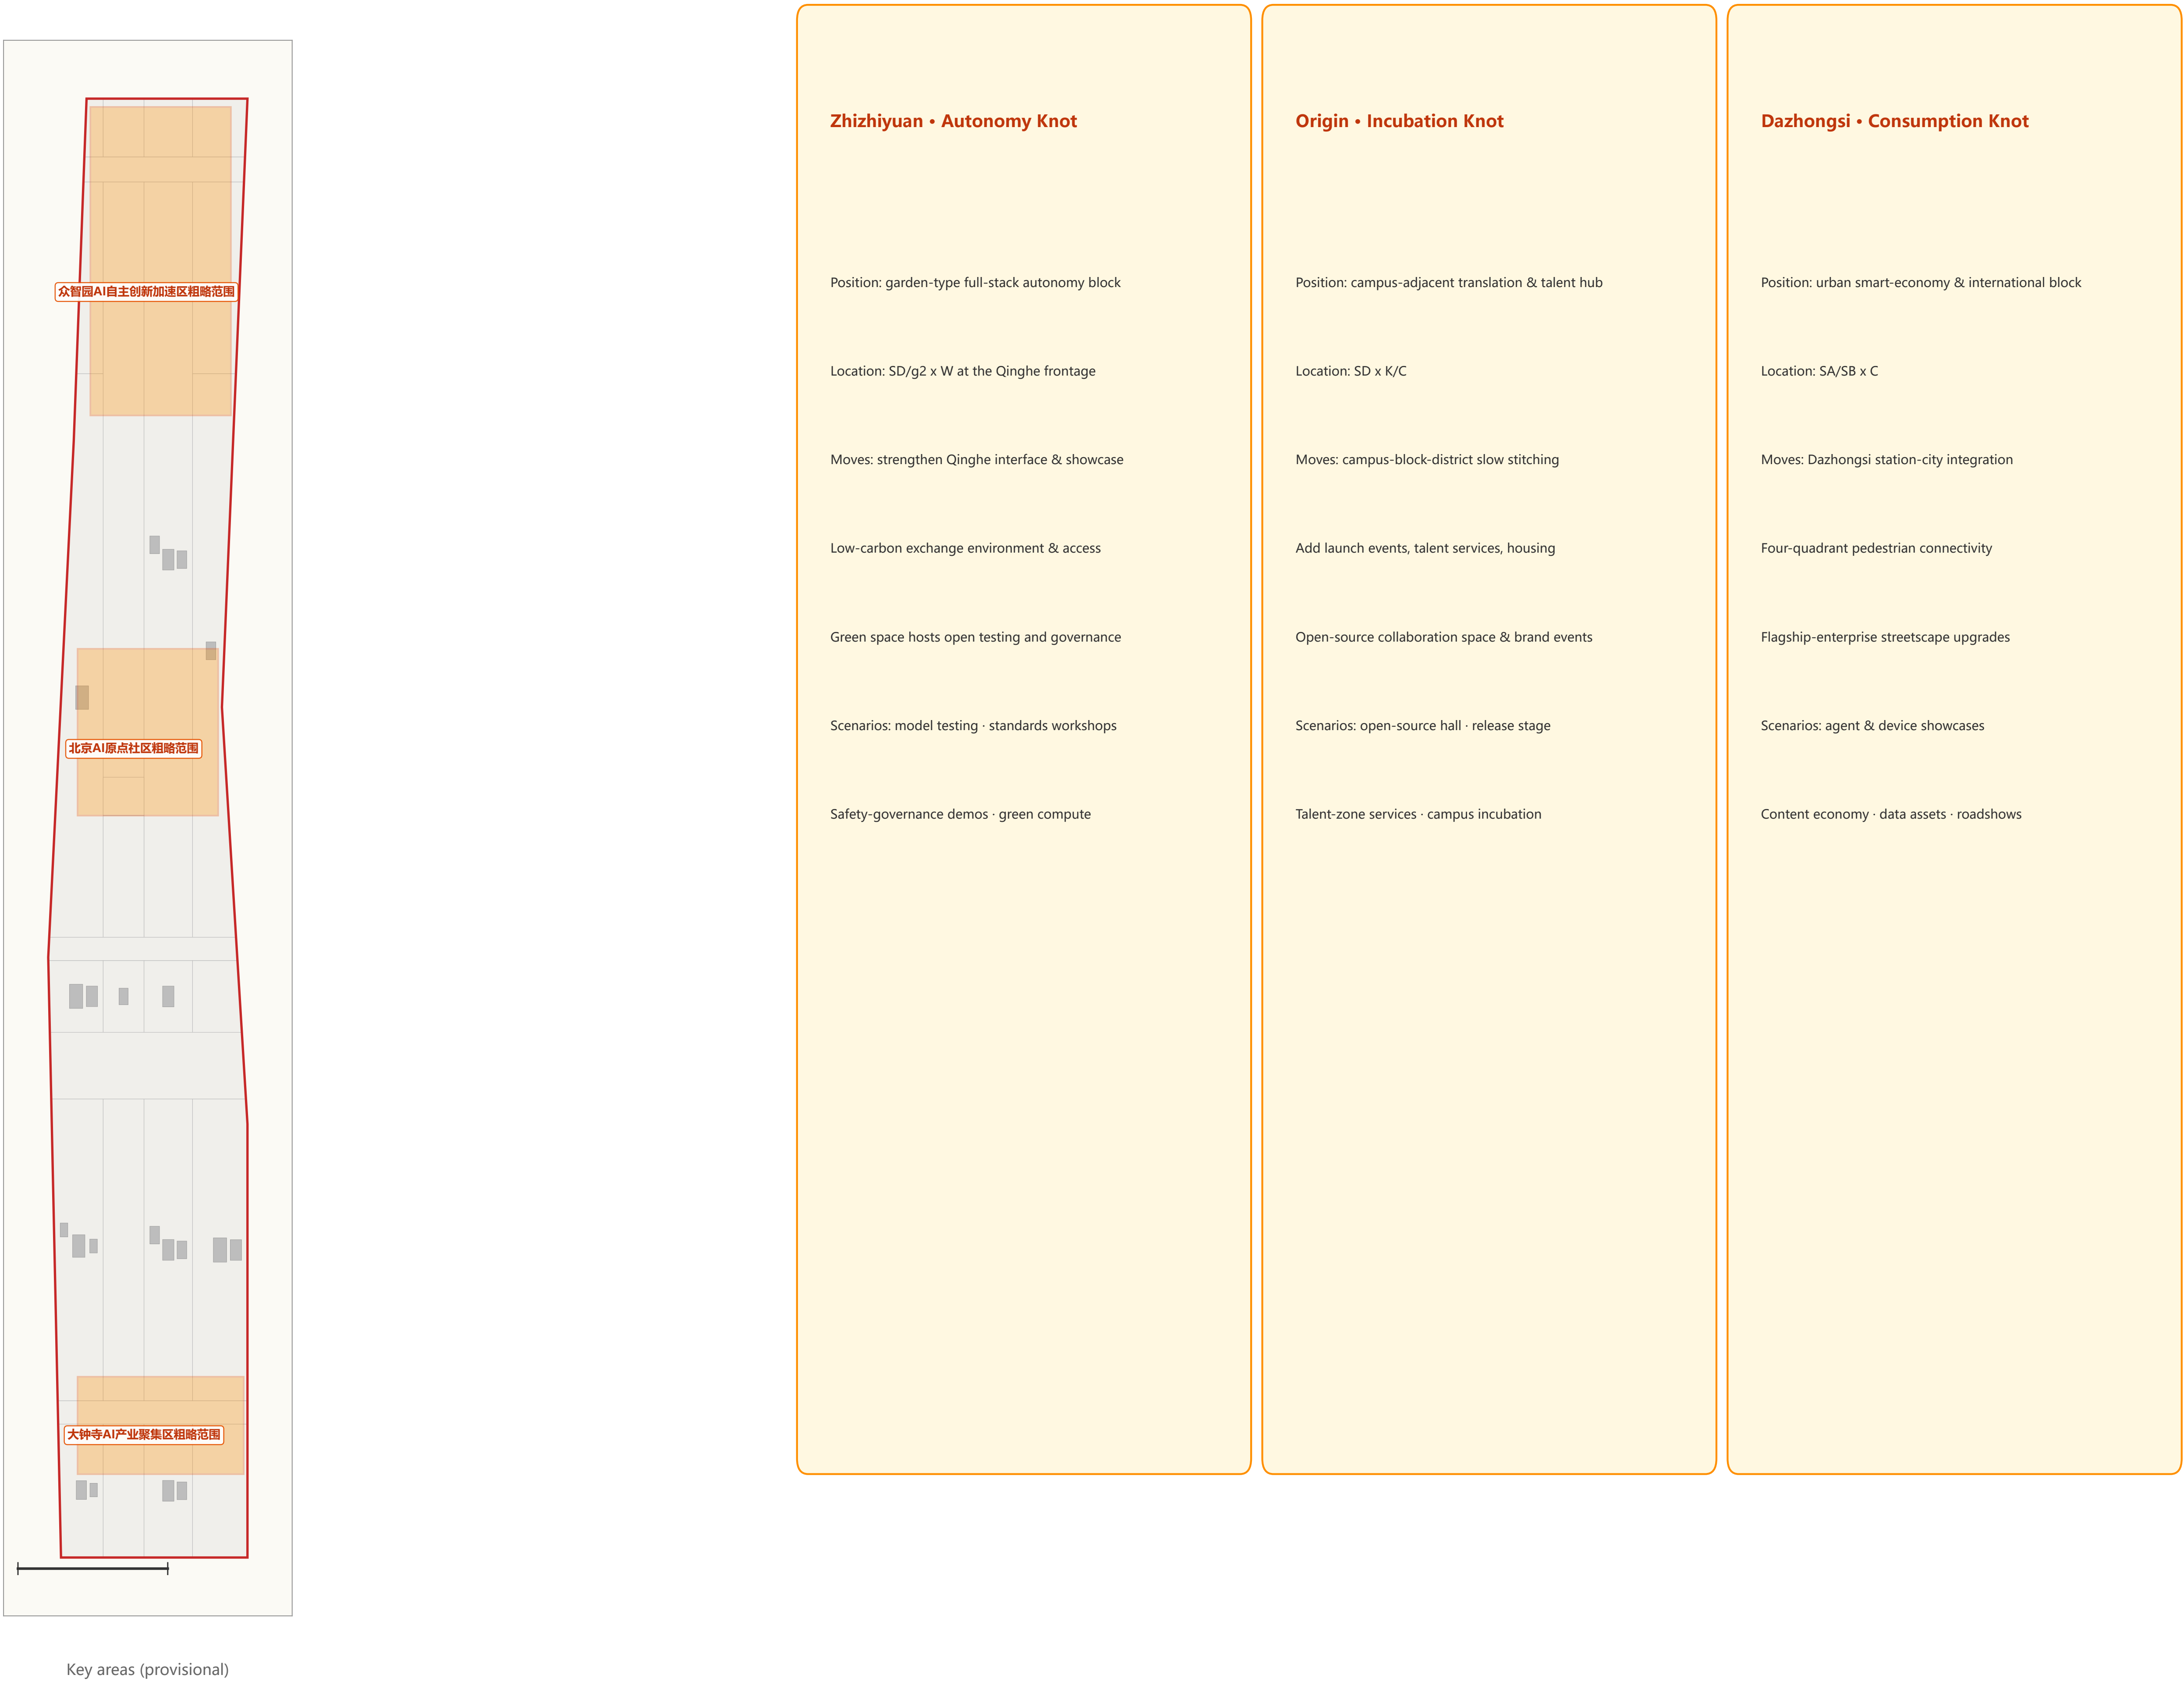

Representative wefts SB / p1 / SD / g2 x columns W/K/C/E—knots are priority delivery cells

# Key Areas & AI Scenarios

Detailed designs for three districts + ten scenario cards

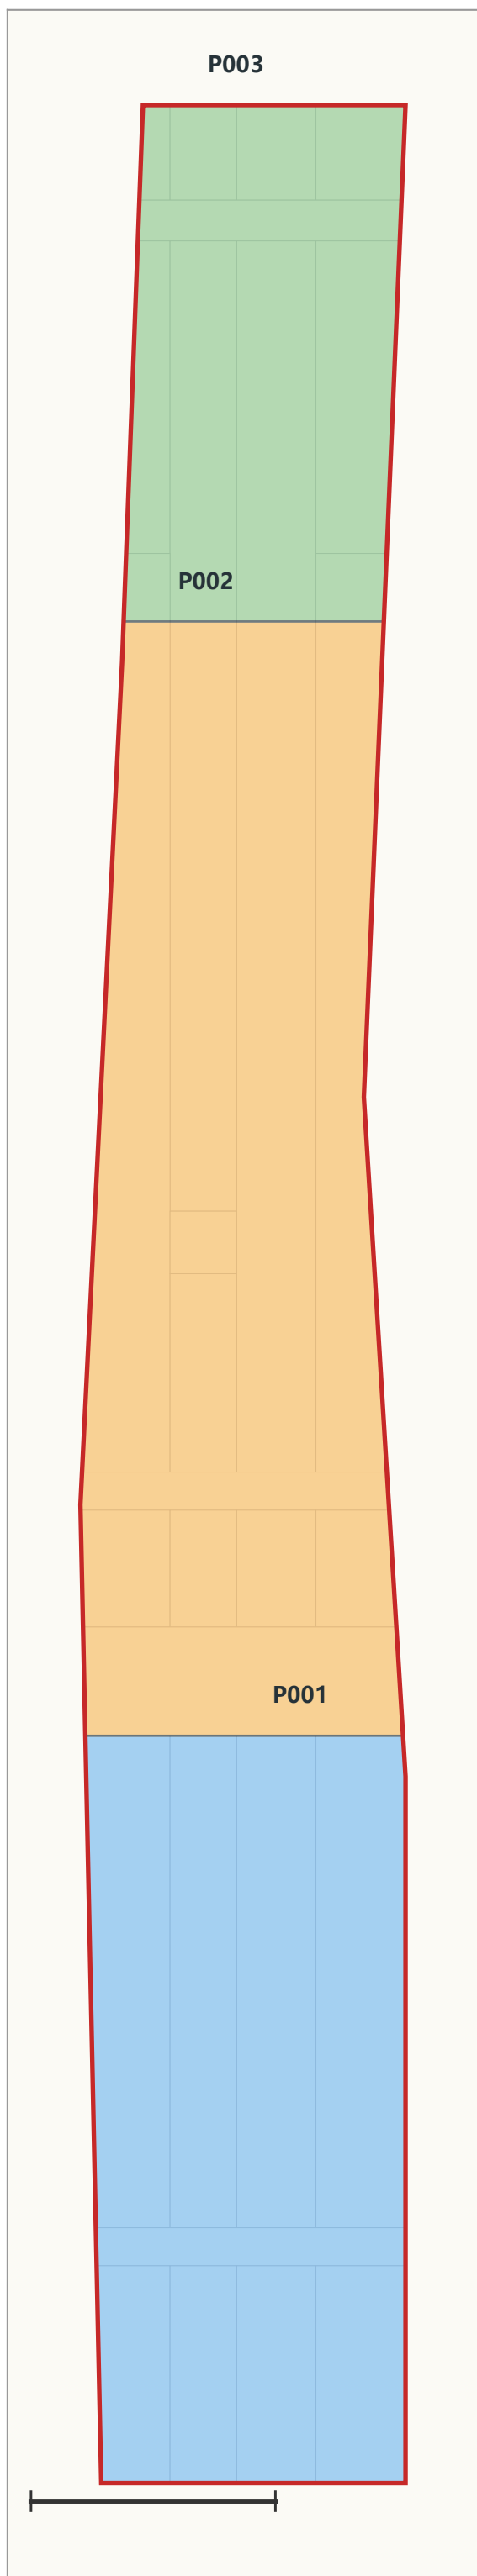

## AI Scenario Cards x10

| #                                                                                                                                                                                                       |                                         |                                                                                                                          |   |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------|--------------------------------------------------------------------------------------------------------------------------|---|
| S                                                                                                                                                                                                       | c                                       | e                                                                                                                        | b |

# Taskbook Response & Global Synergy

TASKBOOK RESPONSE & GLOBAL SYNERGY · agent.1–6 deliverables · six global cases · three AI landmarks

## 区域创新协同：近邻共振—科学城联动—区域走廊 Regional Innovation Synergy: Neighbour - Science-City - Corridor

**三层与四机制 Three circles, four mechanisms**

**近邻共振 Neighbour resonance**

- 中关村AI北纬社区（2025年3月推出，西北旺镇）与本方案南部AI原点社区形成“北孵化—南转化”错位互补
- North AI 39°N Community (2025) incubates; the Origin Community translates campus results — complementary roles

**科学城联动 Science-city linkage**

- 海淀策源—怀柔求源—昌平聚能—亦庄转化
- Haidian sources, Huairou probes, Changping stores energy, E-Town industrializes — a division of the chain

**区域走廊 Regional corridor**

- 依托京张高铁（2019年开通，时速350公里）构建“海淀策源—张家口算力承载”绿色算力协作设想
- HSR-based green-computing collaboration concept

**协同机制建议 Synergy mechanisms (concepts)**

- ① 联合实验室 Joint laboratories
- ② 场景互认清单 Mutual scenario-recognition list
- ③ 人才双聘 Dual talent appointments
- ④ 算力券跨区结算 Cross-district compute vouchers

**定位声明 Positioning note**

- 全部为概念建议，供专业团队结合能源与算力规划深化，不构成政府或机构承诺。
- All items are concept suggestions; no commitment implied.

|-----------------|----------------|--------------------------------------------------------|------------------------------------------------------|
| one-north       | Singapore 2001 | 200 ha; Biopolis · Fusionopolis · A*STAR               | Single-body long-horizon community → Zhizhiyuan      |
| King's Cross KQ | London 2014    | 35-institution alliance; Crick · UCL · British Library | Alliance governance → Origin community               |
| DMC             | Seoul 2002     | 570k m²; Samsung SDS · LG CNS · KBS                    | State land + firm clusters → Dazhongsi               |
| Station F       | Paris 2017     | 34k m² rail freight hall; ~1000 startups               | Rail heritage directly converted to a startup campus |
| Adlershof       | Berlin 1991    | 4.6 km²; Humboldt Univ. + 1300 firms                   | Science-city urban blend → study scope               |
| Bit Valley      | Tokyo 1990s    | Street-based startup ecology; CyberAgent · DeNA        | Urban innovation needs no campus wall                |

## 三区两翼“空间—产业—运营”协同回路 Three Zones, Two Wings: Space-Industry-Operation Loop

**五成员回路分工 Member roles in the loop**

**众智园AI自主创新加速区**

- 定位：AI全栈自主创新体系 + AI治理全球话语权
- 回路：研发—测试—标准—展示—招商转化
- Role: full-stack autonomy; feeds standards back to the belt and attracts investment

**北京AI原点社区**

- 定位：世界级AI创新生态（近郊孵化结）
- 回路：高校策源—孵化—开源发布—成长毕业
- Role: sources talent and projects; graduates flow to Zhizhiyuan or Dazhongsi

**大神寺AI产业集聚区**

- 定位：智能原生新业态（AI+消费/商务结）
- 回路：展示—交易—路演—国际传播—反哺品牌
- Role: showcases and trades; brand revenue feeds the open-source fund

**中关村科技服务翼（西）**

- 定位：要素全球化配置、IP与资本赋能
- 回路：IP服务—资本对接—国际要素引入—回流研发
- Role: imports global factors and services

**小月河场景赋能翼（东）**

- 定位：AI+场景赋能、智能化活力城市
- 回路：场景开放—试点验证—公众体验—反馈迭代
- Role: opens real-world scenarios for validation

**闭环逻辑 Closed loop**

- 毕业链条使企业与人才沿三区梯度成长；
- 反哺链条使成熟成果再投入社区与场景；
- 两翼分别供给要素与应用场景，五者互为供需。
