

Jingzhang Warp & Weft

Urban Design Concept for the Centenary Jingzhang AI Innovation Belt · Formal Package

Eight wefts weave daily life and green veins; four meridians run innovation through—one centenary belt stitched around the Jingzhang railway park spine

Master plan (based on the provisional boundary)

11,412,825 m²

Site area

25.52 %

Green ratio

2.74 %

Plaza ratio

28

LU patches

21

Buildings

3

Key areas

Boundary is a provisional constraint (not red lines) · All metrics recalculated once official data lands · Does not block content scoring

Joeluther12138 / jingzhang-warp-weft · 2026-09-03 · license: COMMUNITY-DISPLAY-ONLY

Design Basis & Three-Level Scope Framework

Formal package organised around the official announcement and the agent taskbook

Evidence chain

Primary basis: the pre-qualification announcement plus registered materials under brief/site-package/: design_brief, allowed_design_space, enums, ranges, sche

The agent fact pack is a reading-navigation layer only; every judgement returns to registered primary sources, with [source:] [data:] [metric:] markers kept inline.

Boundary basis

Both site_boundary and key_areas carry provisional_constraint and official_boundary=false; usable only for generation, self-checks, visualisation and discussion.

Scoring status

Provisional boundary · precision warnings retained, recalculation due once official data publishes · the organiser-side data gap does not block content scoring.

Level	Design question	Answer	Data anchor
Coordinated research	How are the AI ecosystem and future urban form organised?	Organised innovation chain: source-collaborate-transform-experiment-share	compliance_is_sane
Overall design scope	How do renewal, industry, traffic and character land use map?	Six layers: land use / buildings / roads / green / land use / building	land_use_data_layers
Key areas	How do three districts reach implementation depth?	Positioning + spatial moves + AI scenarios + dependencies	key_area_pos (x3)

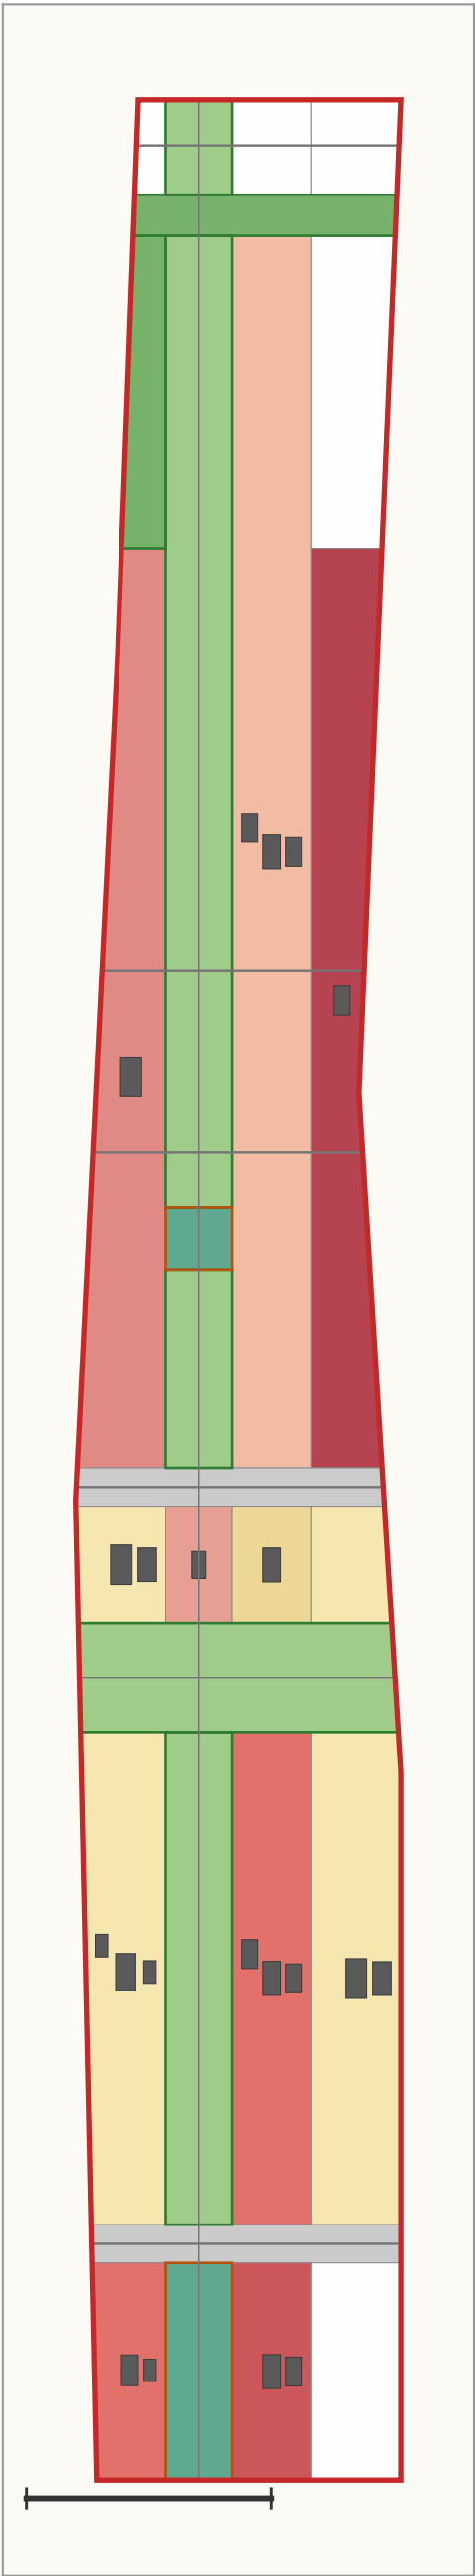

Three-level working method

Coordinated research sets the chain-and-form judgement -> overall design grounds it in structure and carrying capacity -> key-area design verifies deliverability

Lock boundary constraints first, generate layers second, recalculate metrics from layers last; numbers that cannot be recomputed never enter conclusions.

Overall Structure • Plan Overview

Eight wefts, four meridians and three key areas

Reading the structure

Eight wefts weave life and green northward, SA -> SE.

Four meridians run innovation: W renewal wing / K green axis / C

Three key areas sit exactly on the densest warp-weft knots.

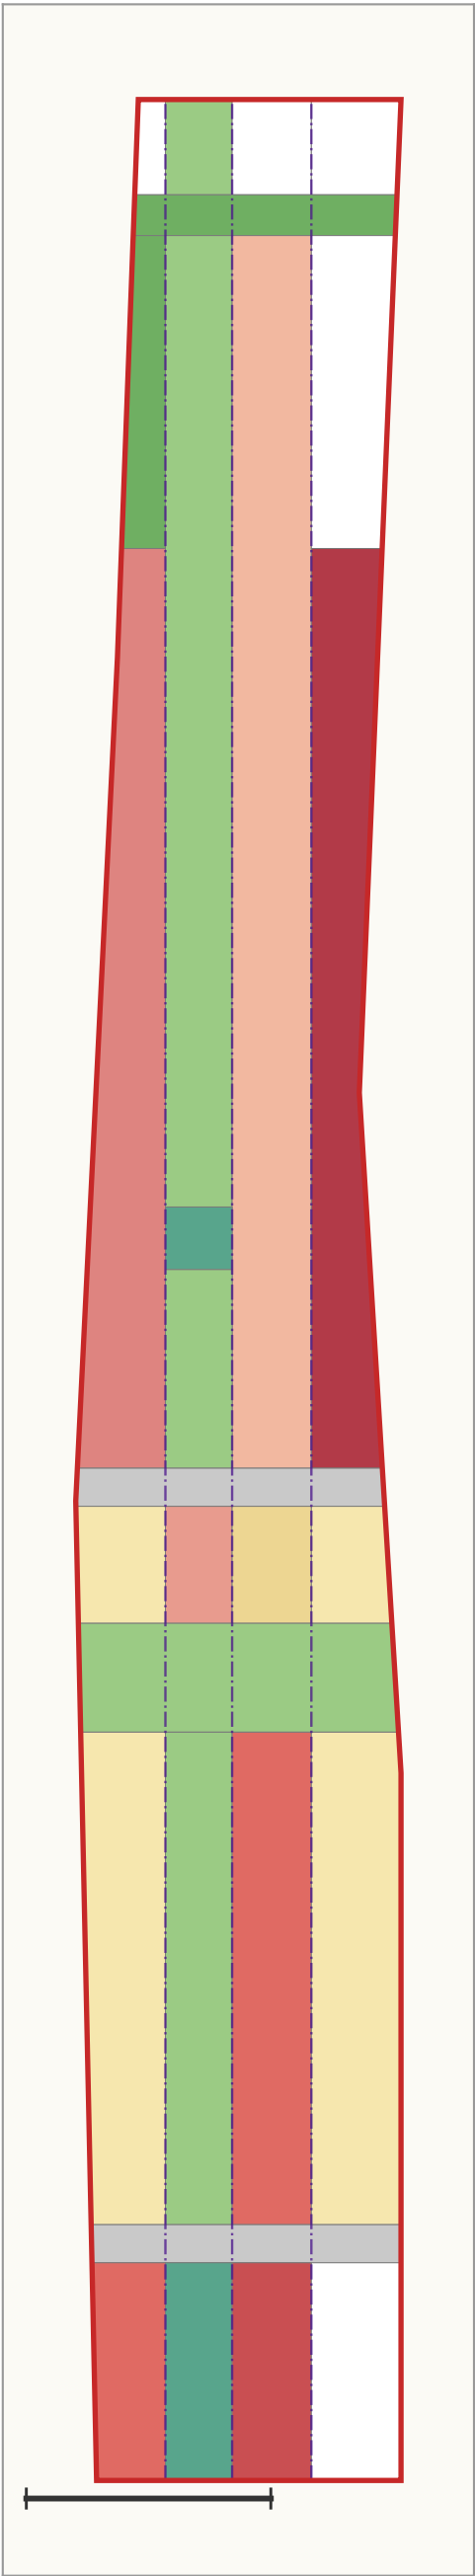

Basis reminder

Boundary is provisional_constraint (not red lines); areas computed

Once official polygons arrive, all layers and metrics are rebuilt.

Land Use • Regulatory-Depth Layout

28 seamless patches across 13 use codes, no gaps or overlaps

- 0701 Residential · 171.6
- 0702 Community svc. · 15.5
- 0802 Cultural · 163.2

Metric System & Area Recalculation

known metrics are recomputable / unknown ones state reasons and preconditions

Metric	Value	Status
Site area	11,412,825.386 m²	known
Green space area	2,912,701.748 m²	known
Green ratio	25.52 %	known
Plaza area	312,754.841 m²	known
Plaza ratio	2.74 %	known
Road corridor area	392,744.559 m²	known
Building footprint	191,159.987 m²	known
LU patch count	28	known
Proposed buildings	21	known
Key areas	3	known
PHASE-001 area	3,908,569.872 m²	known
PHASE-002 area	5,245,071.850 m²	known
PHASE-003 area	2,259,237.554 m²	known
Plot ratio FAR	unknown	unknown · pending official controls

Reading the metrics

Every known metric is recomputable from geometry/*.geojson; formulas live in metrics.json.

Controlled metrics such as FAR stay unknown: no official conditions yet—no pseudo-precision.

Three metric classes: spatially recomputed / control-pending / performance-calibrated.

Brand Identity & Taskbook Response

Brand & Taskbook Response · agent.1–6 dedicated deliverables (2026-09 revision)

Naming System

Level	Name	Meaning	Example
Master name	经纬京张 / Jingzhang Warp & Weft	Overall concept & brand name	One spelling across the package
Structure	Four meridians, eight wefts	Spatial structure grammar	W/K/C/E meridians, SA–SE wefts
Districts	Three areas, two wings	Key areas & wings	Zhizhiyuan · Origin · Dazhongsi + wings
Nodes	Warp-weft knots	Priority scenario/project units	Dazhongsi = SA/SB×C knot
Landmarks	Jingzhang Knot series	AI pilgrimage landmarks	Origin Knot · Bell & Byte · Qinghe Bank

Logo & VI Direction

Logo: The Jingzhang Knot

One vertical meridian and one horizontal weft interlace into a knot; the node enlarges into a diamond. Built on an 8x8 grid, with a rail I-section motif kept in the negative space. Three imagery sources: rail junctions (engineering memory), loom interlacing (spatial method), chip pin grids (AI industry).

Colour System

Steel grey #4A5568 base & text · Meridian blue #0D47A1 innovation · Weft green #2E7D32 ecology & life · Knot gold #C8891A honour.

Typography

Noto Sans SC for Chinese (SIL open licence, legally embeddable offline) · Inter / Source Sans for Latin · tabular numerals.

Applications cover seven carriers: wayfinding, railings, manholes, weft light bands, digital pages, event key visuals, plaques.

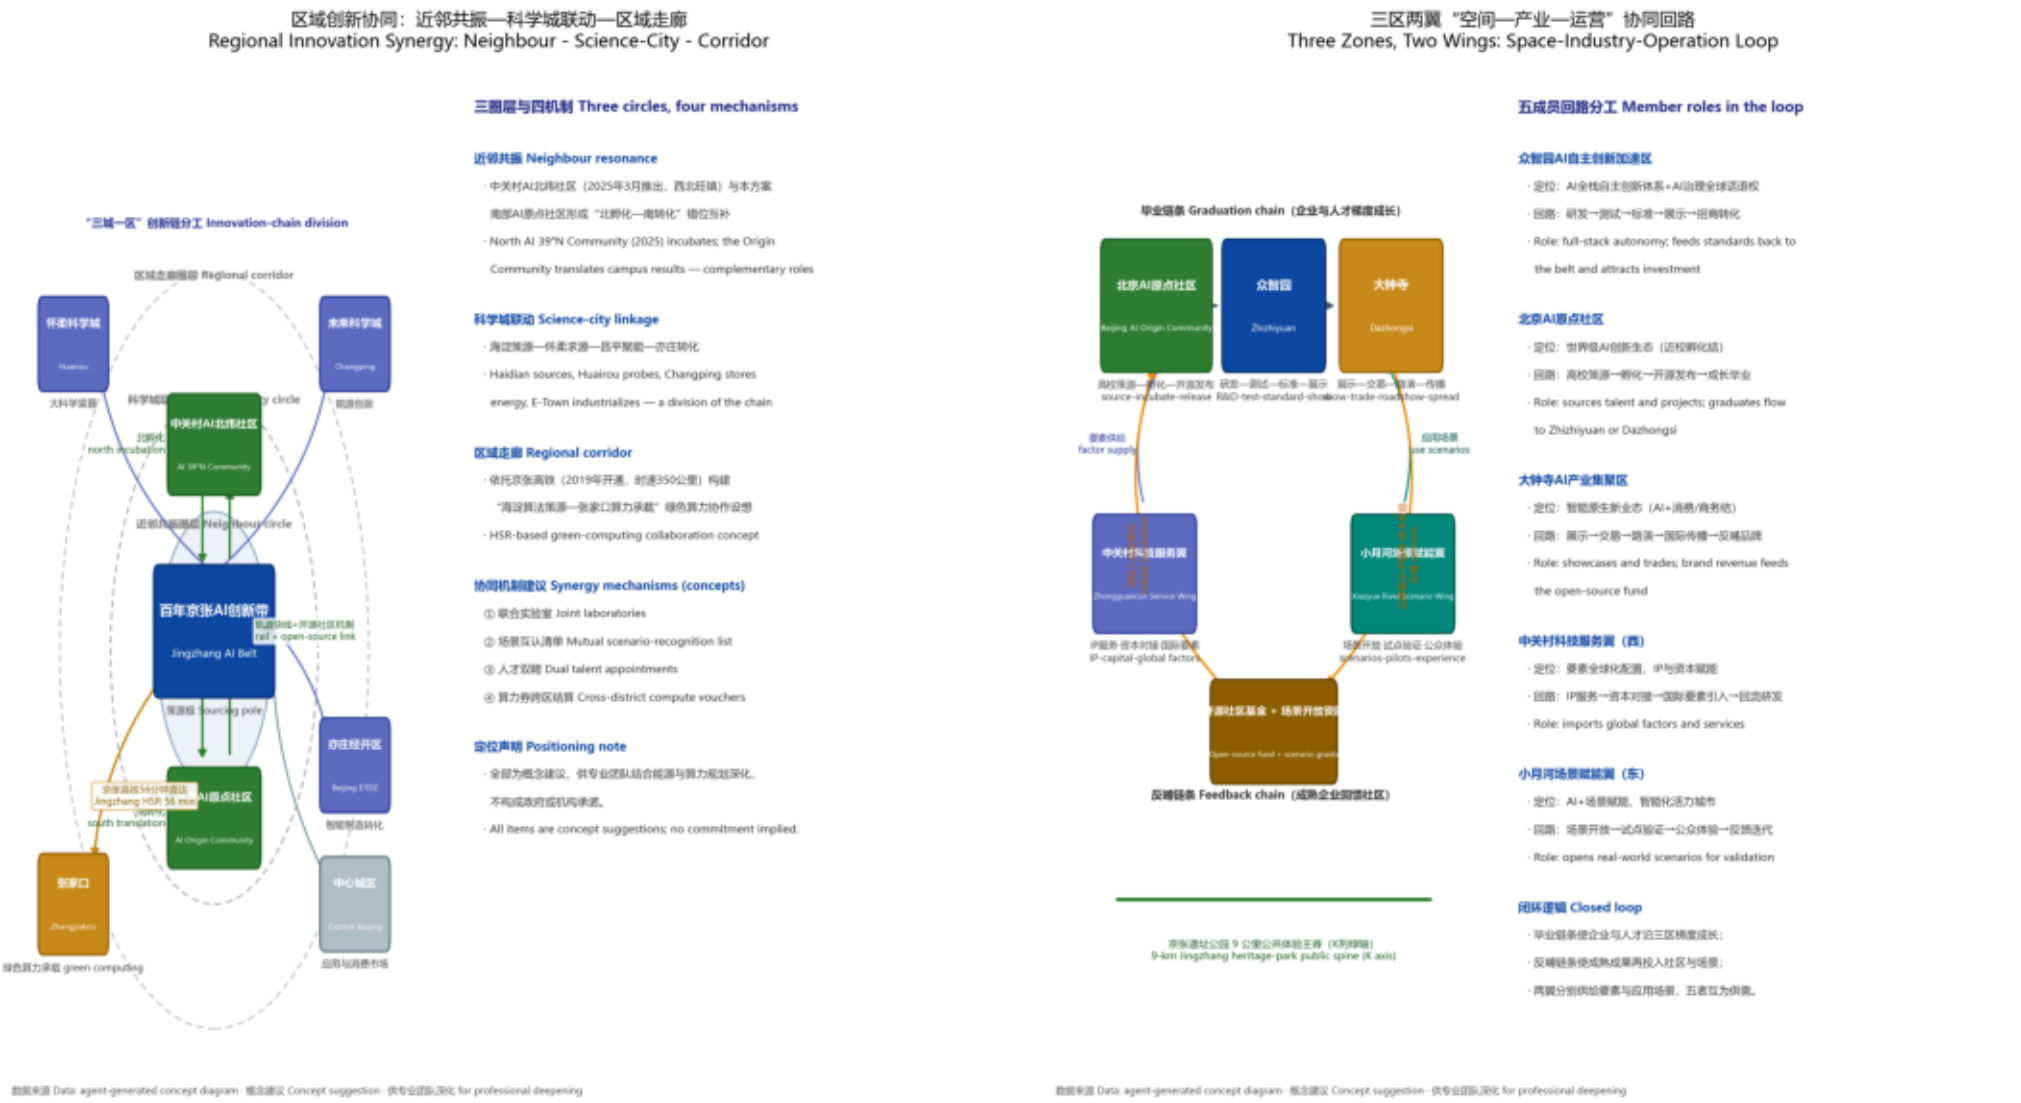

Steel	Meridian	Weft	Knot
-------	----------	------	------

Task Coverage (per-task dedicated mapping in compliance_matrix.json)

Task	Theme	Deliverables
agent.1	Overall concept & coordination	Naming · logo direction · synergy loop · structure & regional diagrams
agent.2	AI full-stack & ecosystem	Six global cases · AI ecosystem map · eight factor mechanisms
agent.3	AI+ scenario empowerment	Five personas · ten scenario cards with data-ops-review-test-metric loop
agent.4	Public space & landmarks	Three AI landmarks · honours system · public-space component library
agent.5	Centenary Jingzhang culture	Heritage resource system · wayfinding symbols · bilingual narrative
agent.6	Events & long-term operations	Annual event system · community governance · scenario & pipeline conversion

Regional Synergy & Global Cases

Regional Synergy & Global Cases · from science-city linkage to the Jing-Jin-Ji corridor (agent.1–2)

Landmarks, Culture & Events

Landmarks, Culture & Events · agent.4–6 core deliverables (2026-09 revision)

Three AI Landmarks (culture x AI function x public space)

Landmark	Location	Concept & Function
Origin Knot	Wudaokou Origin Plaza PUBLIC-002	Inlaid coordinate grid + AI time capsule + open-source honour wall
Bell & Byte Tower	Dazhongsi Bell Plaza PUBLIC-001	Digital bell: parametric light-sound of Jingzhang moments & daily innovation events
Qinghe AI Bank	Zhizhiyuan riverfront GREEN-001	Autonomy showcase loop: live benchmark boards and test-range visibility

Centenary Jingzhang Cultural Narrative (publicly verifiable facts)

Timeline

1905 construction starts (Zhan Tianyu chief engineer) → 1909 completion: China's first self-designed trunk railway

2019 Jingzhang HSR opens: world's first 350 km/h smart line → 2026 Haidian heritage park fully opens (9 km)

Wayfinding symbols

Warp-weft coordinate wayfinding: W/K/C/E columns x SA–SE bands as a unified address syntax for public space and stations.

International narrative

From Sleeper to Silicon — the centenary engineering spirit translated for today; bilingual narrative across the package.

Annual Events (mechanism proposals, not official commitments)

Event	Frequency	Venue	Conversion goal
Global AI Week	One week each autumn	Belt public space + three landmarks	Global reach, inbound leads
Open-source Month	Each spring	Origin community release hall	Contributor growth, incubation
Scenario Open Day	Quarterly	Test ranges & model streets	Scenario pilot applications
Developer Conference	Annual	Dazhongsi roadshow salon	Governance agenda, releases
Youth AI Season	Each summer	Park study points & play fields	Public literacy, talent pipeline
