

Site Overview and Open-Innovation Structure

Jing-Zhang Open Innovation Commons

Complete legend

- Provisional overall boundary
- Jing-Zhang active-mobility spine
- Design green / blue-green commons
- Public-space nodes
- Submitted roads and cross-links
- Three provisional key-area extents
- Concept building footprints

Provisional overall area

11.413 km²

PROVISIONAL CONCEPT: overall boundary, key-area extents, road widths and design land use are not official redlines or statutory controls.

Jing-Zhang Open Innovation Comm

One spine · three hubs · six east-west stitches · twelve reversible scenarios

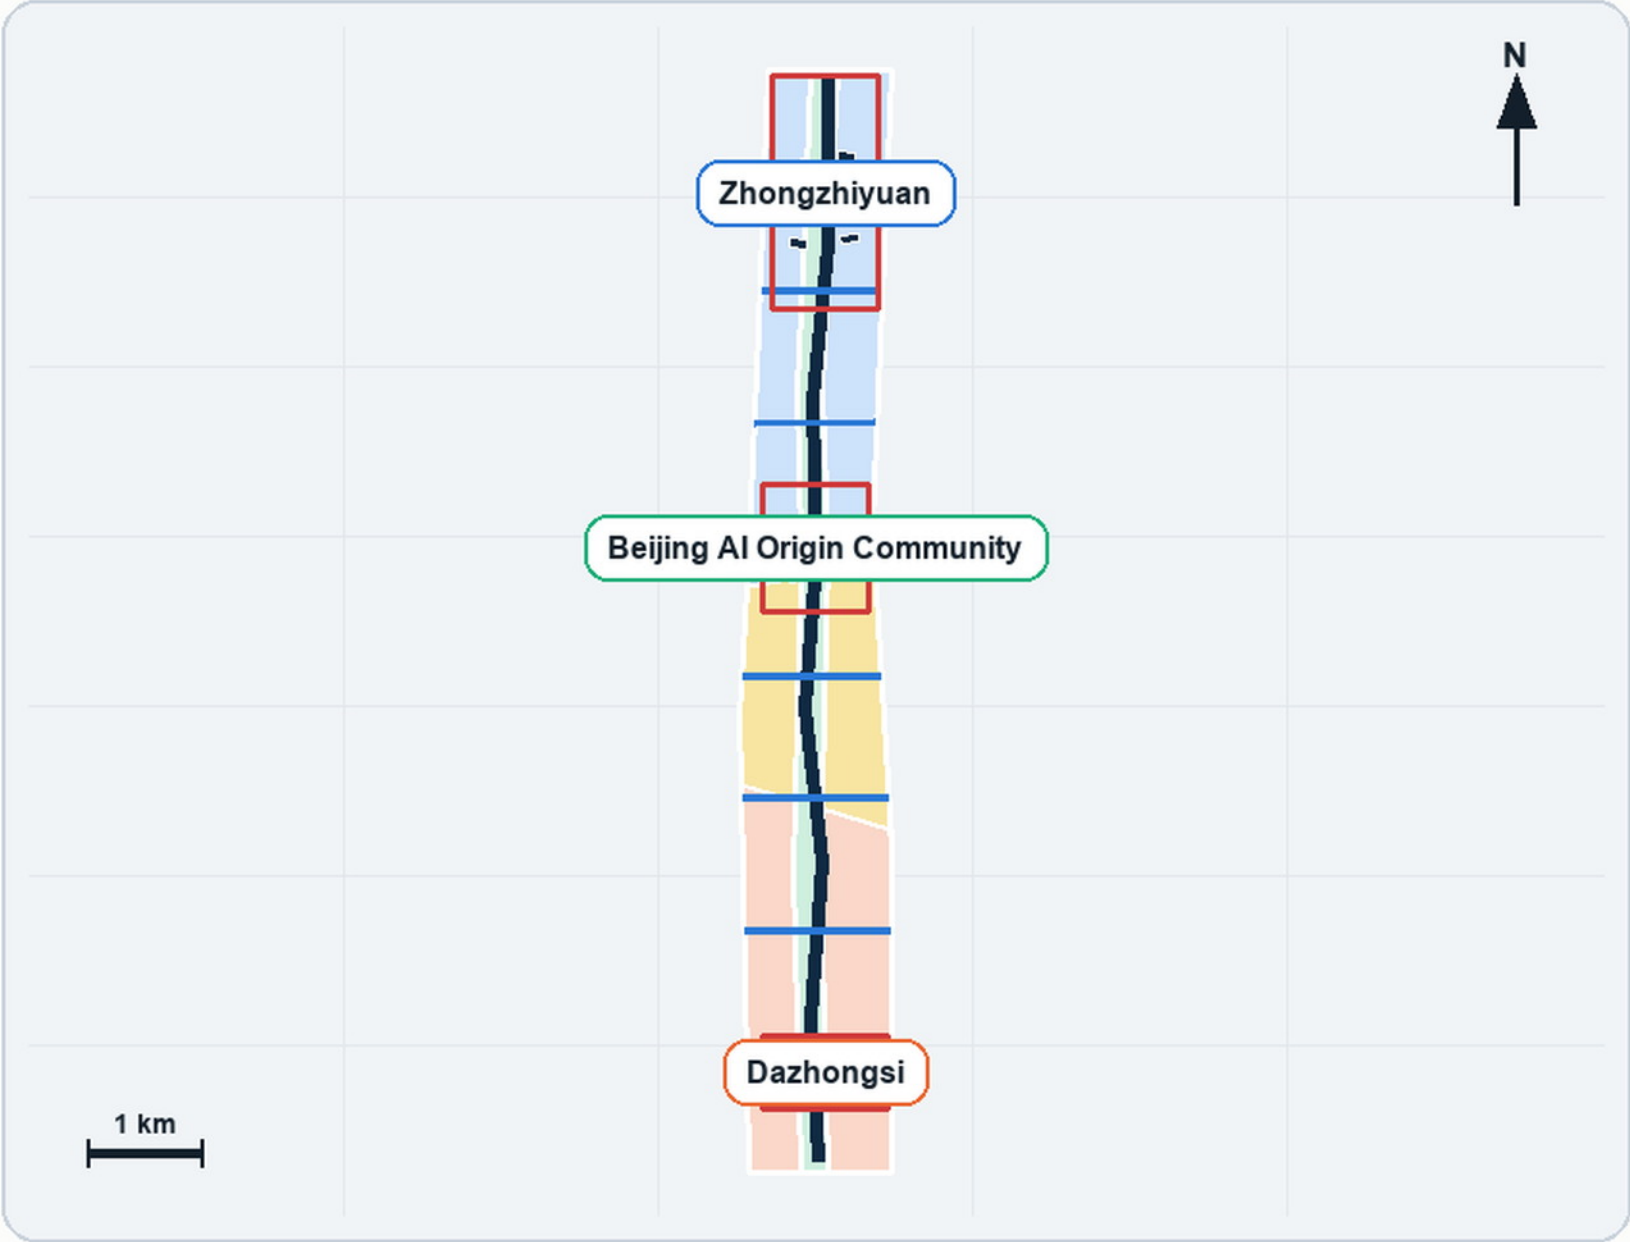

- 1 The Jing-Zhang Heritage Park forms a continuous north-south civic armature.
- 2 Zhongzhiyuan, the Origin Community and Dazhongsi provide three complementary innovation hubs.
- 3 Six lateral interfaces reconnect campuses, parks, neighbourhoods, transit and waterways.
- 4 Public space hosts testable, auditable and reversible AI services.

PROVISIONAL CONCEPT: overall boundary, key-area extents, road widths and design land use are not official redlines or statutory controls.

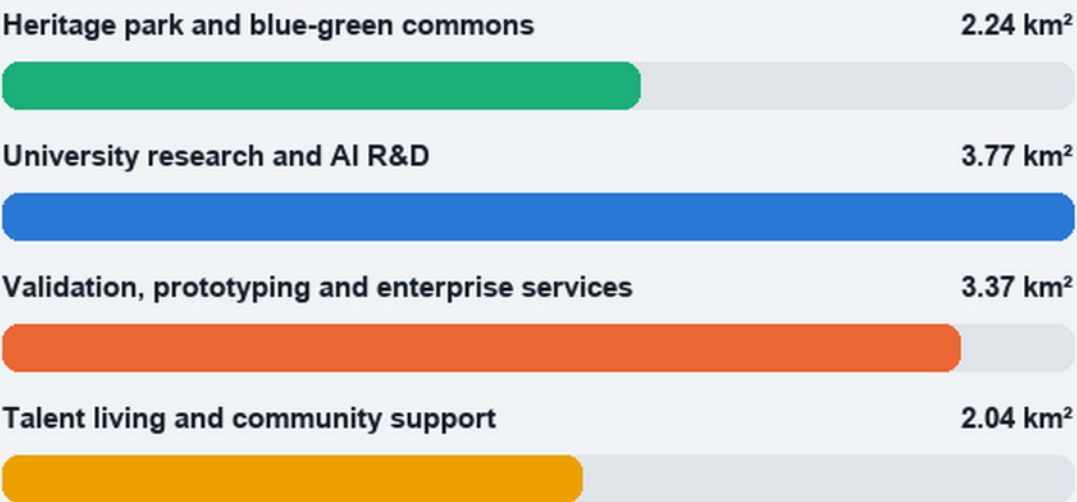

PROVISIONAL CONCEPT: overall boundary, key-area extents, road widths and design land use are not official redlines or statutory controls. Sources: official call announcement; submitted geometry/" .geojson, metrics.json, assumptions.json and sources.json.

Land-Use Structure and Open-Innovation Chain

Jing-Zhang Open Innovation Commons

Four design land-use families

Six-stage open-innovation chain

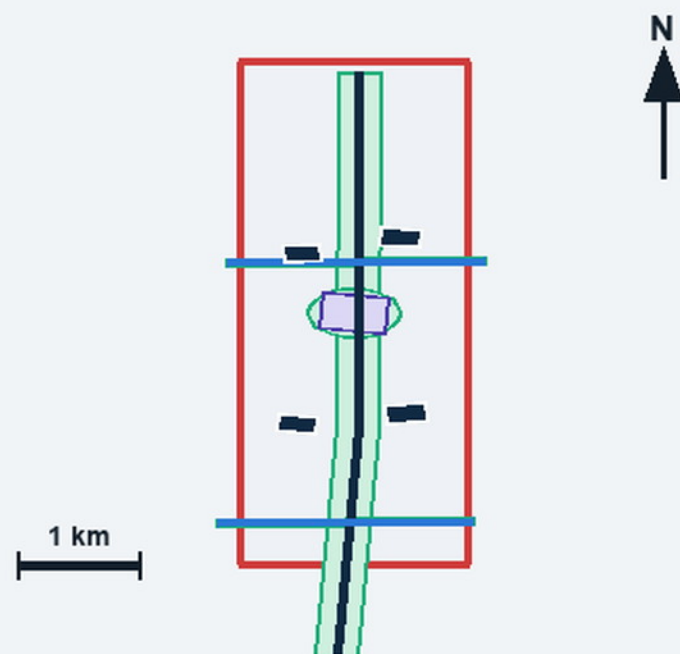

PROVISIONAL CONCEPT: overall boundary, key-area extents, road widths and design land use are not official redlines or statutory controls. Sources: official call announcement; submitted geometry/*.geojson, metrics.json, assumptions.json and sources.json.

Strategies for the Three Key Areas

Jing-Zhang Open Innovation Commons

01 Zhongzhiyuan

Autonomous Innovation and Validation Hub

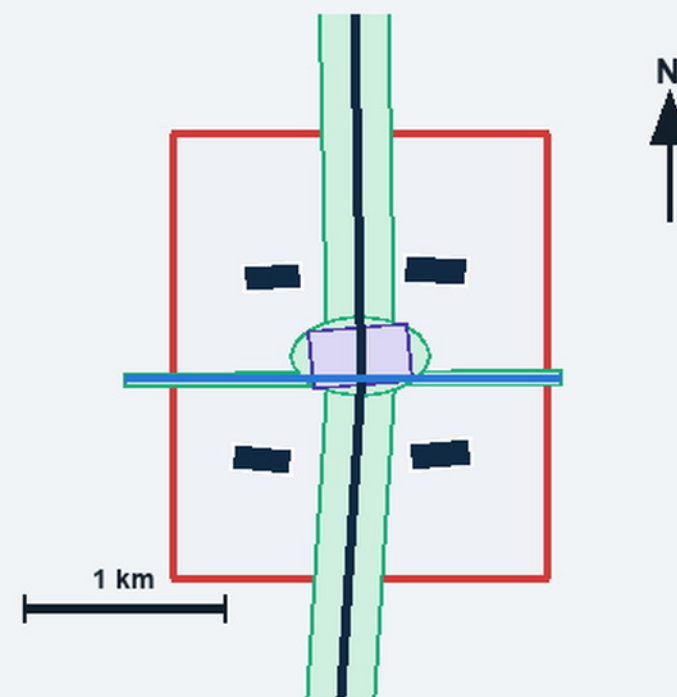

- Qing River ecological forecourt and low-carbon compute interpretation
- Shared proving loop, governance street and research courtyards
- Separate visitors and logistics; controlled G3 testing

Provisional area 192.9 ha

02 Beijing AI Origin Community

University Translation and Talent Hub

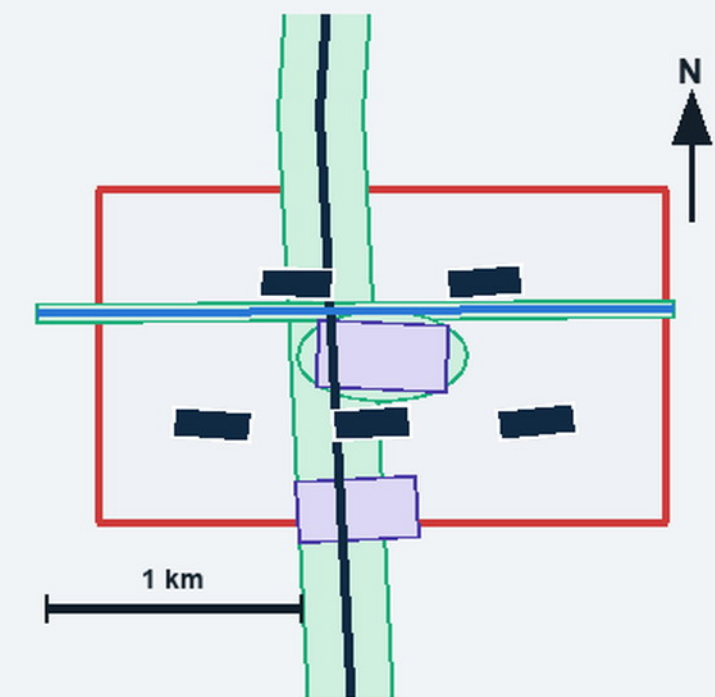

- Campus gate–open-source street–park short chain
- Release, talent services and shared courtyards
- Open ground floors and reversible low-carbon upgrades

Provisional area 104.3 ha

03 Dazhongsi

Intelligent Economy and International Exchange Hub

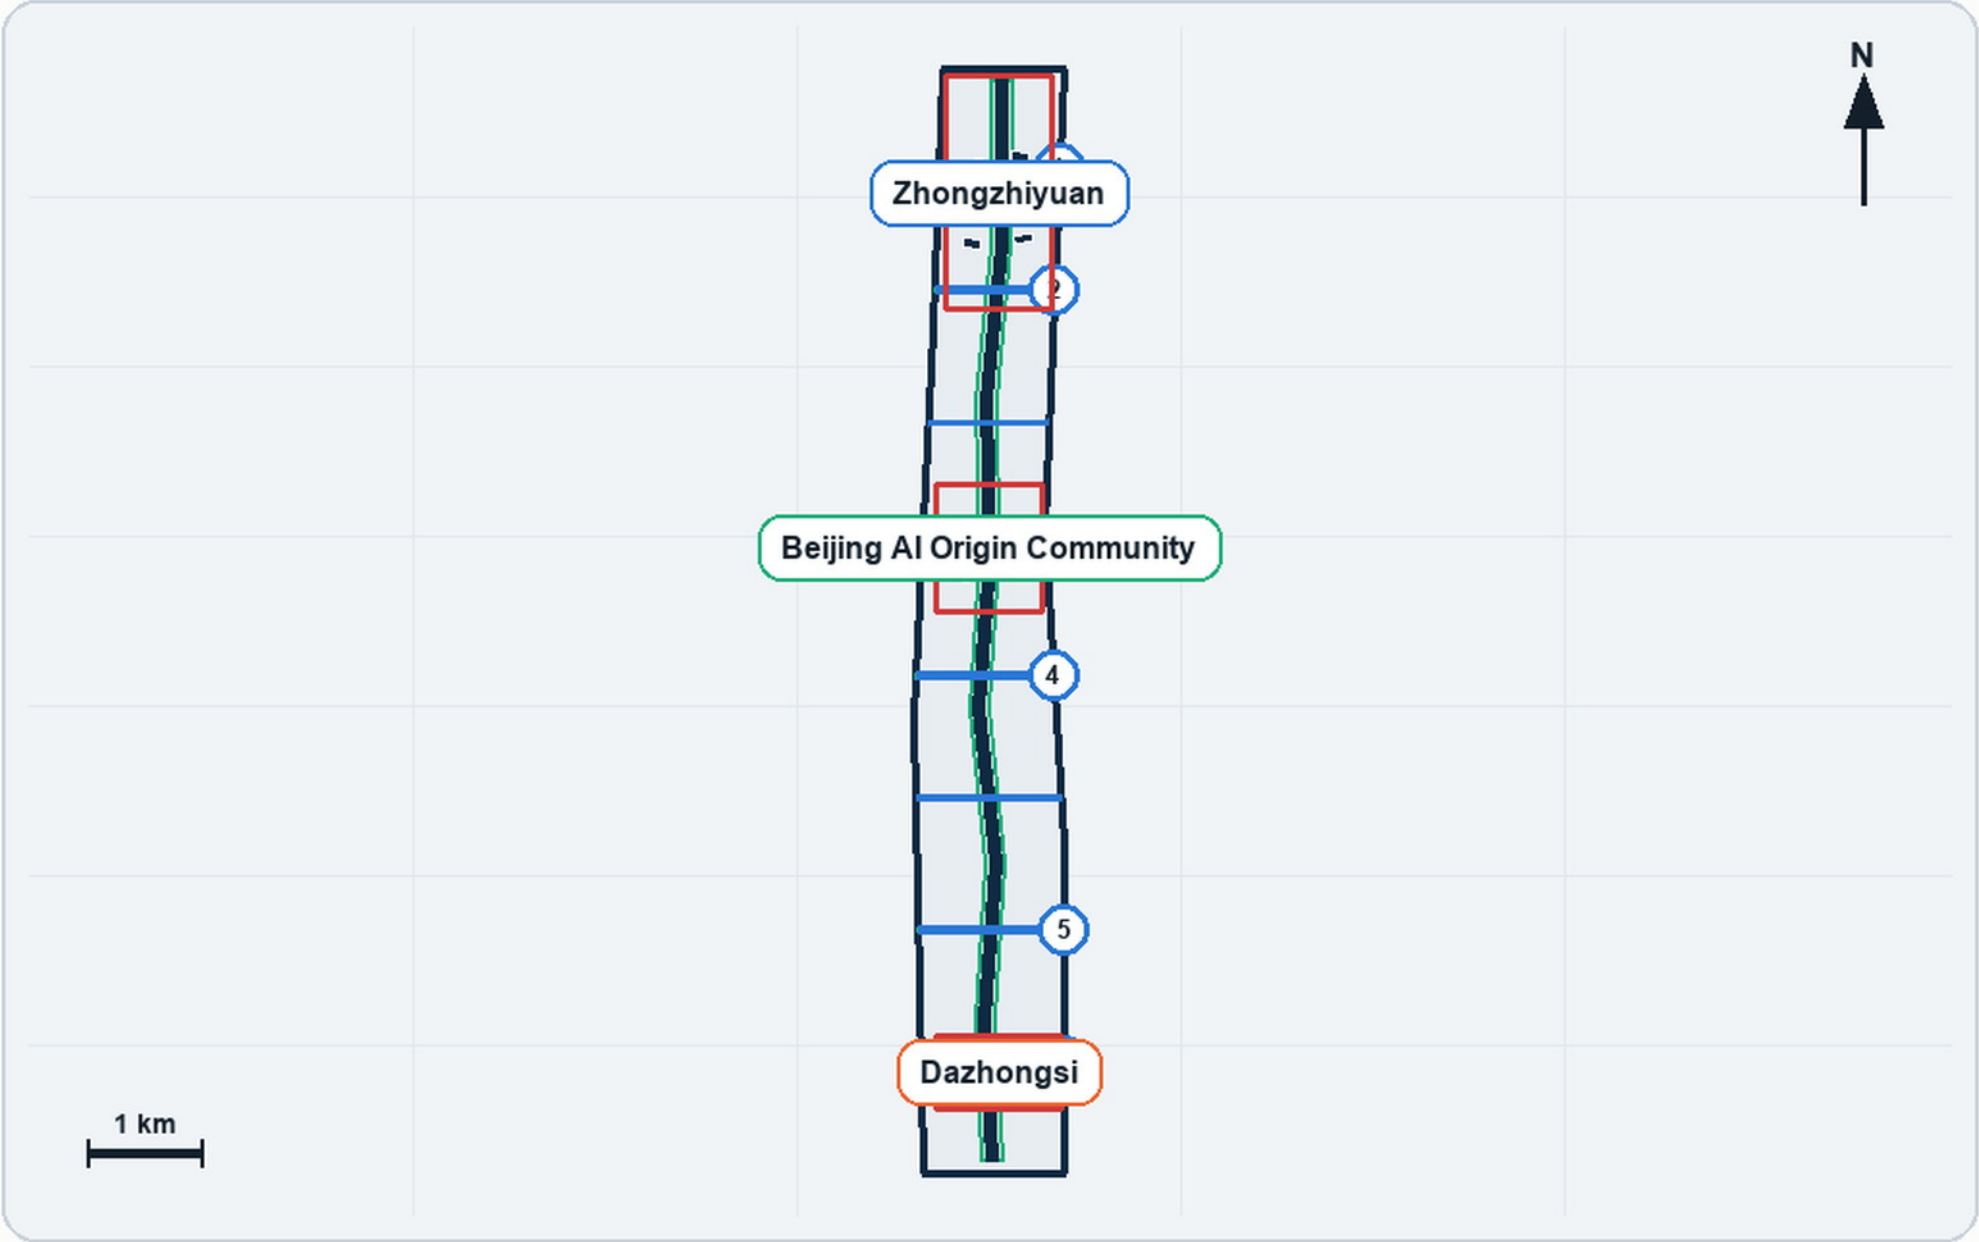

- Ground-level-first stitching of four station quadrants
- Device interoperability, international launch and daily services
- Launch park retains ecological and civic functions

Provisional area 72.0 ha

PROVISIONAL CONCEPT: overall boundary, key-area extents, road widths and design land use are not official redlines or statutory controls. Sources: official call announcement; submitted geometry/*.geojson, metrics.json, assumptions.json and sources.json.

Mobility Stitches, North-South Commons and Blue-Green Network

Jing-Zhang Open Innovation Commons

Three overlapping networks

- North-south commons spine**
Heritage narrative, active mobility and innovation services
- Six east-west stitches**
Six representative interfaces are numbered from the eight submitted links
- Blue-green public realm**
Qing River, Xiaoyue River, heritage park and three hubs

Stitch interface kit

- | | |
|--------------------|--------------------|
| Safe crossing | Continuous shade |
| Accessible ramps | Cycle parking |
| Civic ground floor | Legible wayfinding |

Six representative interfaces are numbered; all road centerlines are design proposals, not road redlines.

PROVISIONAL CONCEPT: overall boundary, key-area extents, road widths and design land use are not official redlines or statutory controls. Sources: official call announcement; submitted geometry/*.geojson, metrics.json, assumptions.json and sources.json.

Every scenario identifies user, location, data, privacy, human review and operator.

01 Open-source release

User	University teams and developers
Location	Origin Community
Data	Public or explicitly licensed content
Privacy	Anonymous and withdrawable; sensitive capability controlled
Human review	Foundation and university review
Operator	Professional venue operator

02 Trustworthy model evaluation

User	Model firms and researchers
Location	Zhongzhiyuan validation area
Data	Tiered test data and access logs
Privacy	Least privilege; no claim of government certification
Human review	Independent evaluator review
Operator	Shared proving-ground operator

03 Embodied-intelligence test loop

User	Robotics and sensing teams
Location	Controlled Zhongzhiyuan routes
Data	Edge-processed operating data
Privacy	De-identification by default; no unrelated face or voice retention
Human review	Site safety officer approval and emergency stop
Operator	Test-site safety operator

04 Device interoperability lab

User	Device, chip and application firms
Location	Dazhongsi industry space
Data	Participant-owned test data
Privacy	Only aggregate findings released publicly
Human review	Standards body and laboratory confirmation
Operator	Joint laboratory

05 Low-carbon compute and microgrid

User	Energy and compute firms
Location	Zhongzhiyuan–Qing River edge
Data	Tiered energy and equipment data
Privacy	Control and display networks isolated
Human review	Energy specialist verification
Operator	Facility operator

06 Accessible mobility navigation

User	Residents, commuters and disabled users
Location	Corridor-wide public realm
Data	Public routes, facility status and voluntary reports
Privacy	Location used only for active trip; no journey archive
Human review	Transport and park staff confirmation
Operator	Transport and park operators

07 Community-service copilot

User	Residents, staff and visitors
Location	Community service stations
Data	User-submitted service information
Privacy	No automated eligibility, penalty or benefit decision
Human review	Neighbourhood and licensed professional final answer
Operator	Community service institution

08 Heritage and urban-memory guide

User	Citizens, students and visitors
Location	Heritage nodes
Data	Sourced archives and interpretation
Privacy	Uncertainty cited; no synthetic material presented as archive
Human review	Historians, archives and community co-review
Operator	Cultural curation team

09 Blue-green resilience steward

User	Water, landscape, maintenance and public users
Location	Rivers and parks
Data	Environmental data and low-resolution aggregate flow
Privacy	Identity recognition prohibited
Human review	Water and landscape staff review work orders
Operator	Park and water operators

10 Talent-space matching

User	Young talent, visiting scholars and firms
Location	Three-hub service nodes
Data	Criteria actively provided by users
Privacy	No sensitive-attribute inference; personalization can be disabled
Human review	Talent and space agencies verify supply
Operator	Talent service agency

11 Urban event safety support

User	Producers, security, medical teams and public
Location	Dazhongsi and event nodes
Data	Ticket totals, capacity, weather and inspection
Privacy	No routine facial recognition
Human review	Event commander makes final decision
Operator	Event operations team

12 SME compliance and internationalization

User	Startup and growth firms
Location	Dazhongsi and online entry
Data	Encrypted business questions and files
Privacy	Minimum retention; information support only
Human review	Licensed professionals sign final advice
Operator	Professional-service consortium

G1 Open Experience

Exhibitions, heritage guidance and open-source events
Cited sources; no mandatory login; human service available

G2 Assisted Service

Navigation, community help, space matching and ecological work orders
Data minimization; explanation, appeal and human confirmation

G3 Controlled Testing

Model, robot, device and microgrid validation
Permit, isolation, logs, observer, emergency stop and exit

G4 No Automated Decision

Approvals, enforcement, benefits, medical, emergency and critical control
Authorized people decide; AI cannot directly create legal or bodily consequences

Metrics, Evidence and Statutory Unknowns

Jing-Zhang Open Innovation Commons

Keep statutory controls unknown rather than fabricate precision

Total floor area, FAR, height, statutory density, road redlines, parking, utility capacity, fire safety, flood control, heritage limits, ownership, investment and delivery entities.

PROVISIONAL CONCEPT: overall boundary, key-area extents, road widths and design land use are not official redlines or statutory controls. Sources: official call announcement; submitted geometry/* .geojson, metrics.json, assumptions.json and sources.json.

- Priority project portfolio
- JZ-01 Active-mobility gap stitching
 - JZ-02 Zhongzhiyuan shared proving ground
 - JZ-03 Origin Community open-source street
 - JZ-04 Qing River low-carbon innovation edge
 - JZ-05 Dazhongsi four-quadrant stitching
 - JZ-06 International launch and collaboration forum
 - JZ-07 Community public-service stations
 - JZ-08 Heritage timeline and education route

Required verification before delivery

Statutory land use, FAR, total floor area, height, density, setbacks, road redlines, parking, station engineering, utility capacity, fire safety, river blue lines, flood control, heritage, ownership, finance and approvals. Geometry, metrics, drawings, visual index, assumptions and matrices must be updated together when formal data arrives.

Sources: official call announcement; submitted geometry/* .geojson, metrics.json, assumptions.json and sources.json.
