

COMMONS LINE Spatial Evidence Overview

One civic innovation spine, three validation districts

1 / 3 / 5 / 10

One spine
Three civic rooms
Five personas
Ten AI scenarios

GeoJSON is authoritative.
Figures support reading but
do not replace geometry,
metrics or matrices.

Provisional geometry for design discussion. Recalculate the full package when official polygons arrive.

- 01 One civic innovation spine
- 02 Three civic validation districts
- 03 Five everyday user groups
- 04 Ten human-reviewed scenarios

Provisional extents do not represent official redlines. Recalculate every layer, metric, figure and drawing when official polygons arrive.

Five Land–Use Zones and Civic Innovation Spine

Complete partition with blue–green and public–space overlays

- Open research and validation
- Jing–Zhang heritage park spine
- Public culture and open–source exchange
- Industry services and AI–native commerce
- Community and talent services

Provisional geometry for design discussion. Recalculate the full package when official polygons arrive.

Three Key Areas and Validation Protocol

Three Distinct Key–Area Concepts

Validation garden, open–source district, station–city living room

Provisional geometry for design discussion. Recalculate the full package when official polygons arrive.

- 01
- One civic innovation spine
- 02
- Three civic validation districts
- 03
- Five everyday user groups
- 04
- Ten human-reviewed scenarios

Provisional extents do not represent official redlines. Recalculate every layer, metric, figure and drawing when official polygons arrive.

Mobility, Blue–Green and Public–Service Network

One north–south spine, three transverse stitches, one micro–loop

Provisional geometry for design discussion. Recalculate the full package when official polygons arrive.
