

Jing-Zhang AI Spine - Centennial Jing-Zhang AI Innovation Belt

A0 Synthesis Board - conceptual proposal - provisional boundary, not an official redline

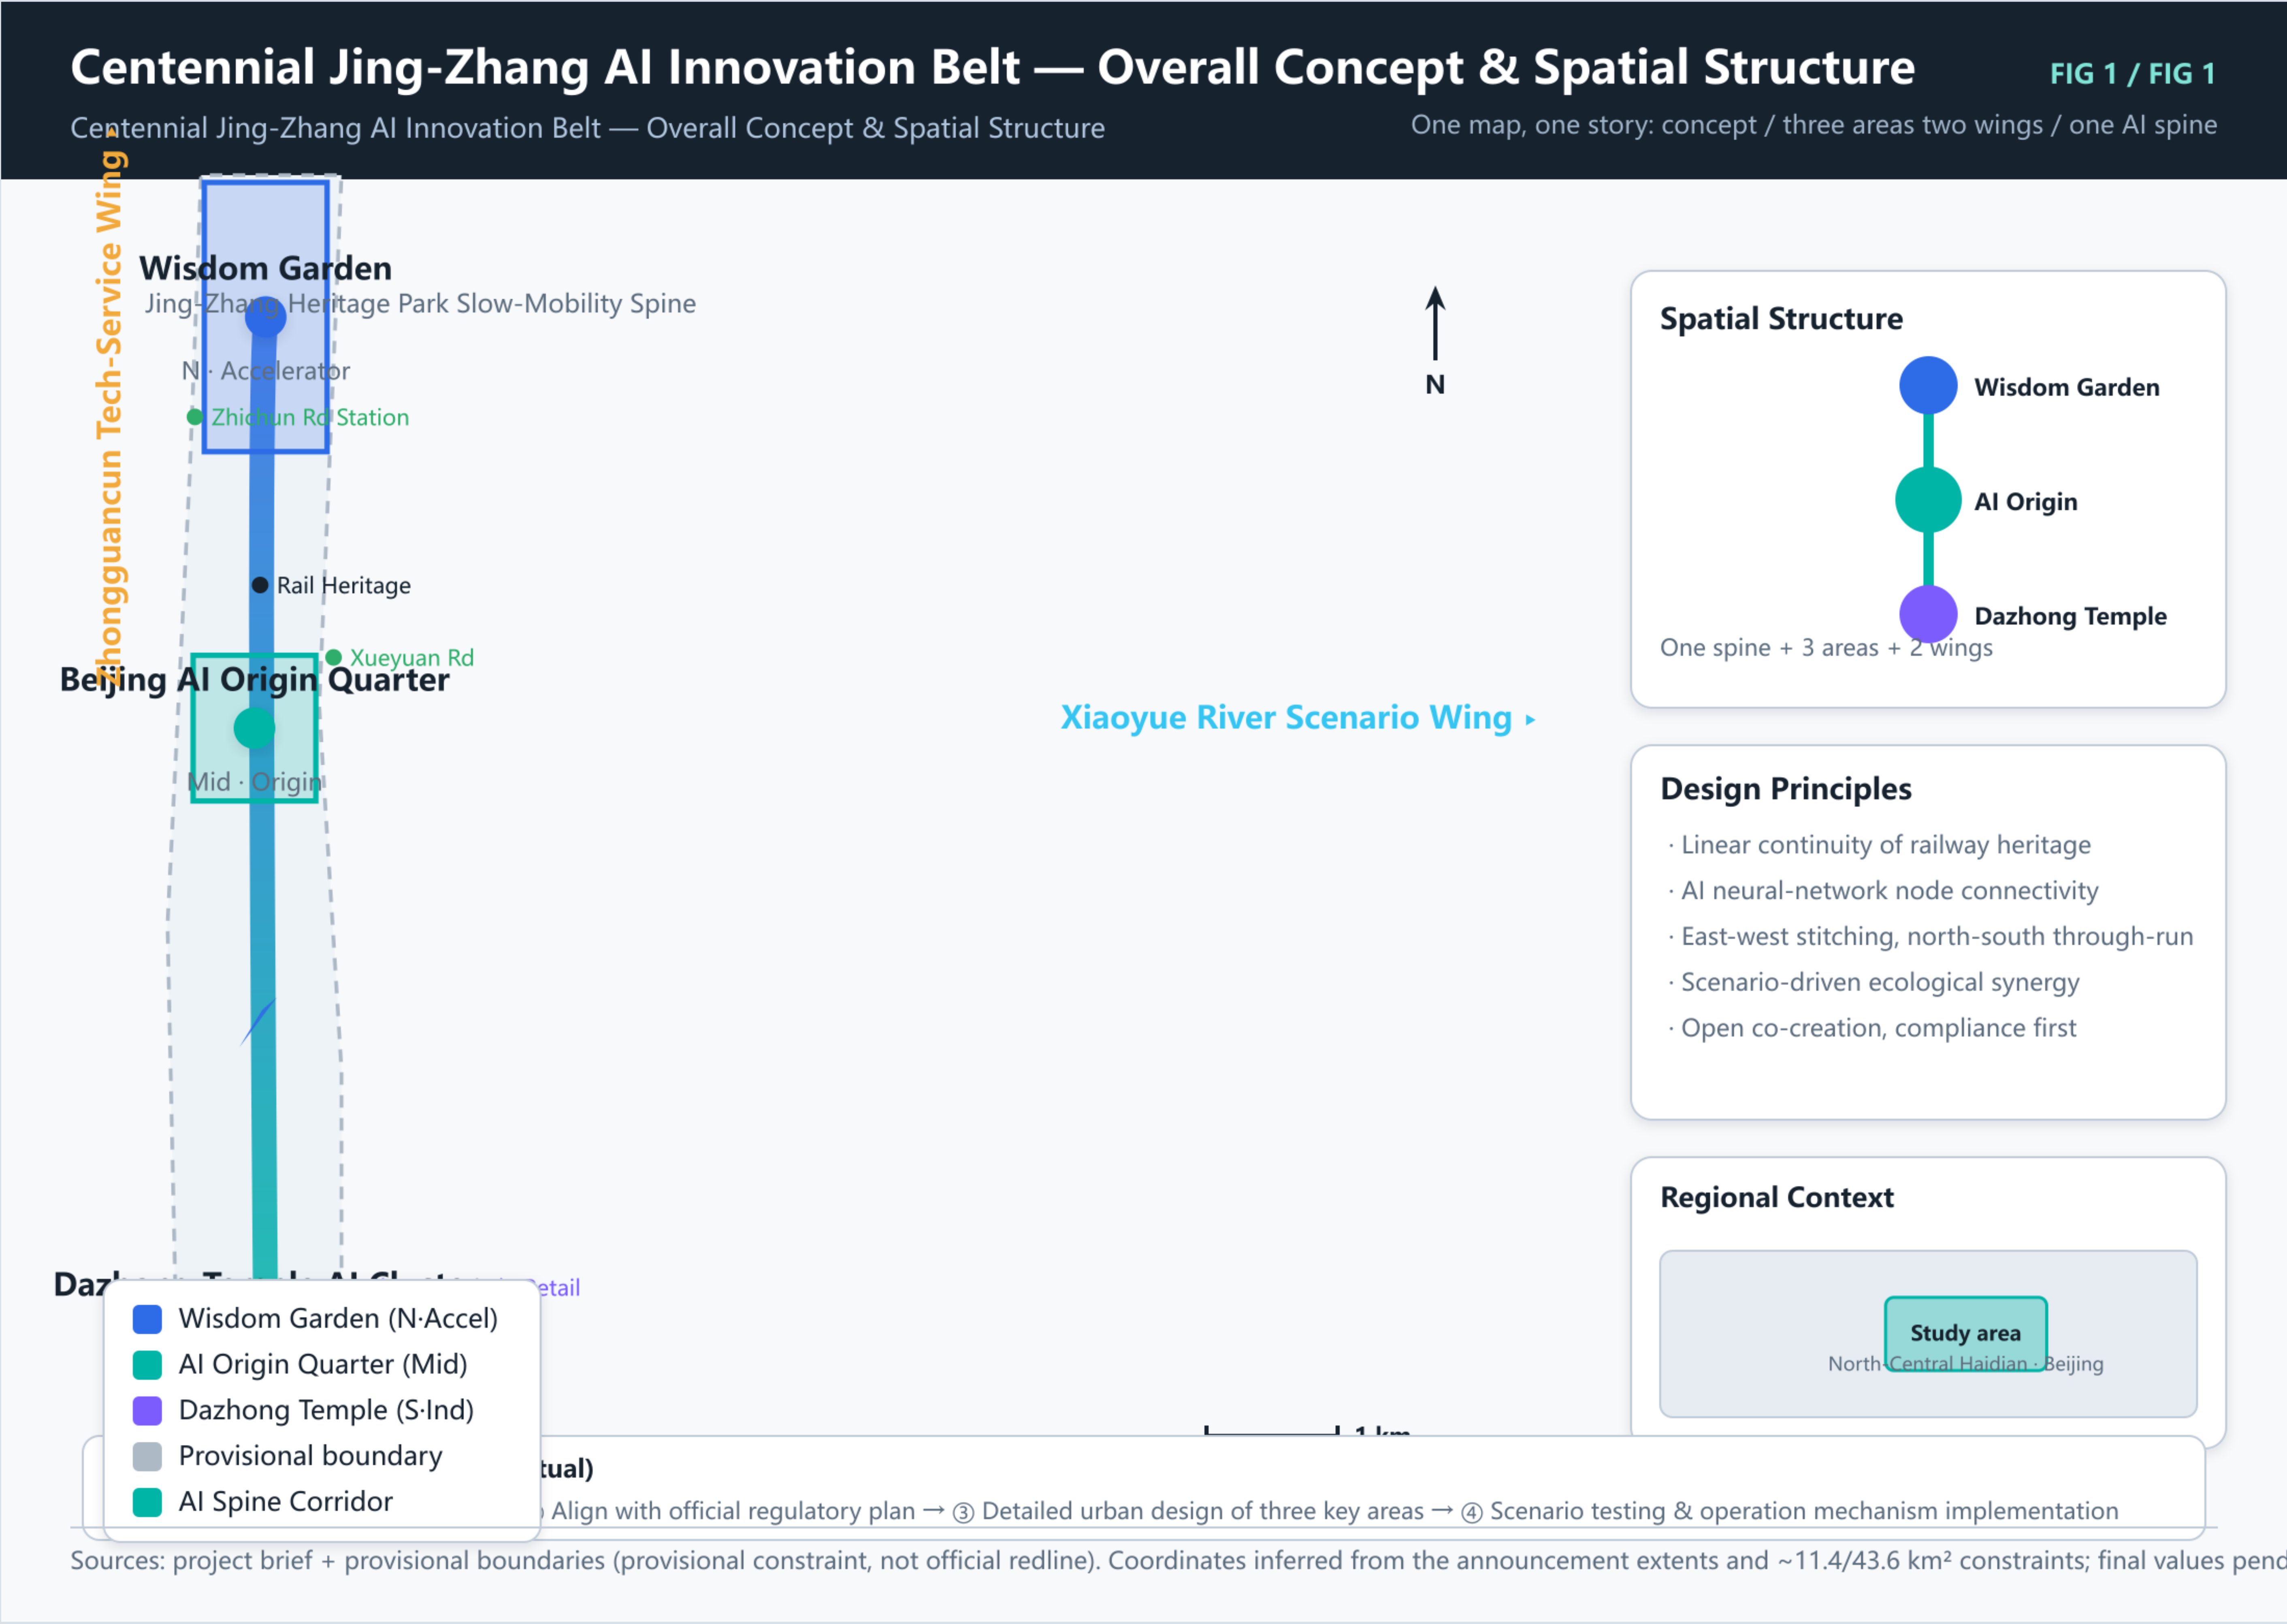

Fig 1 Overall design scope and the Three-Areas + Two-Wings structure (provisional boundary, not an official redline)

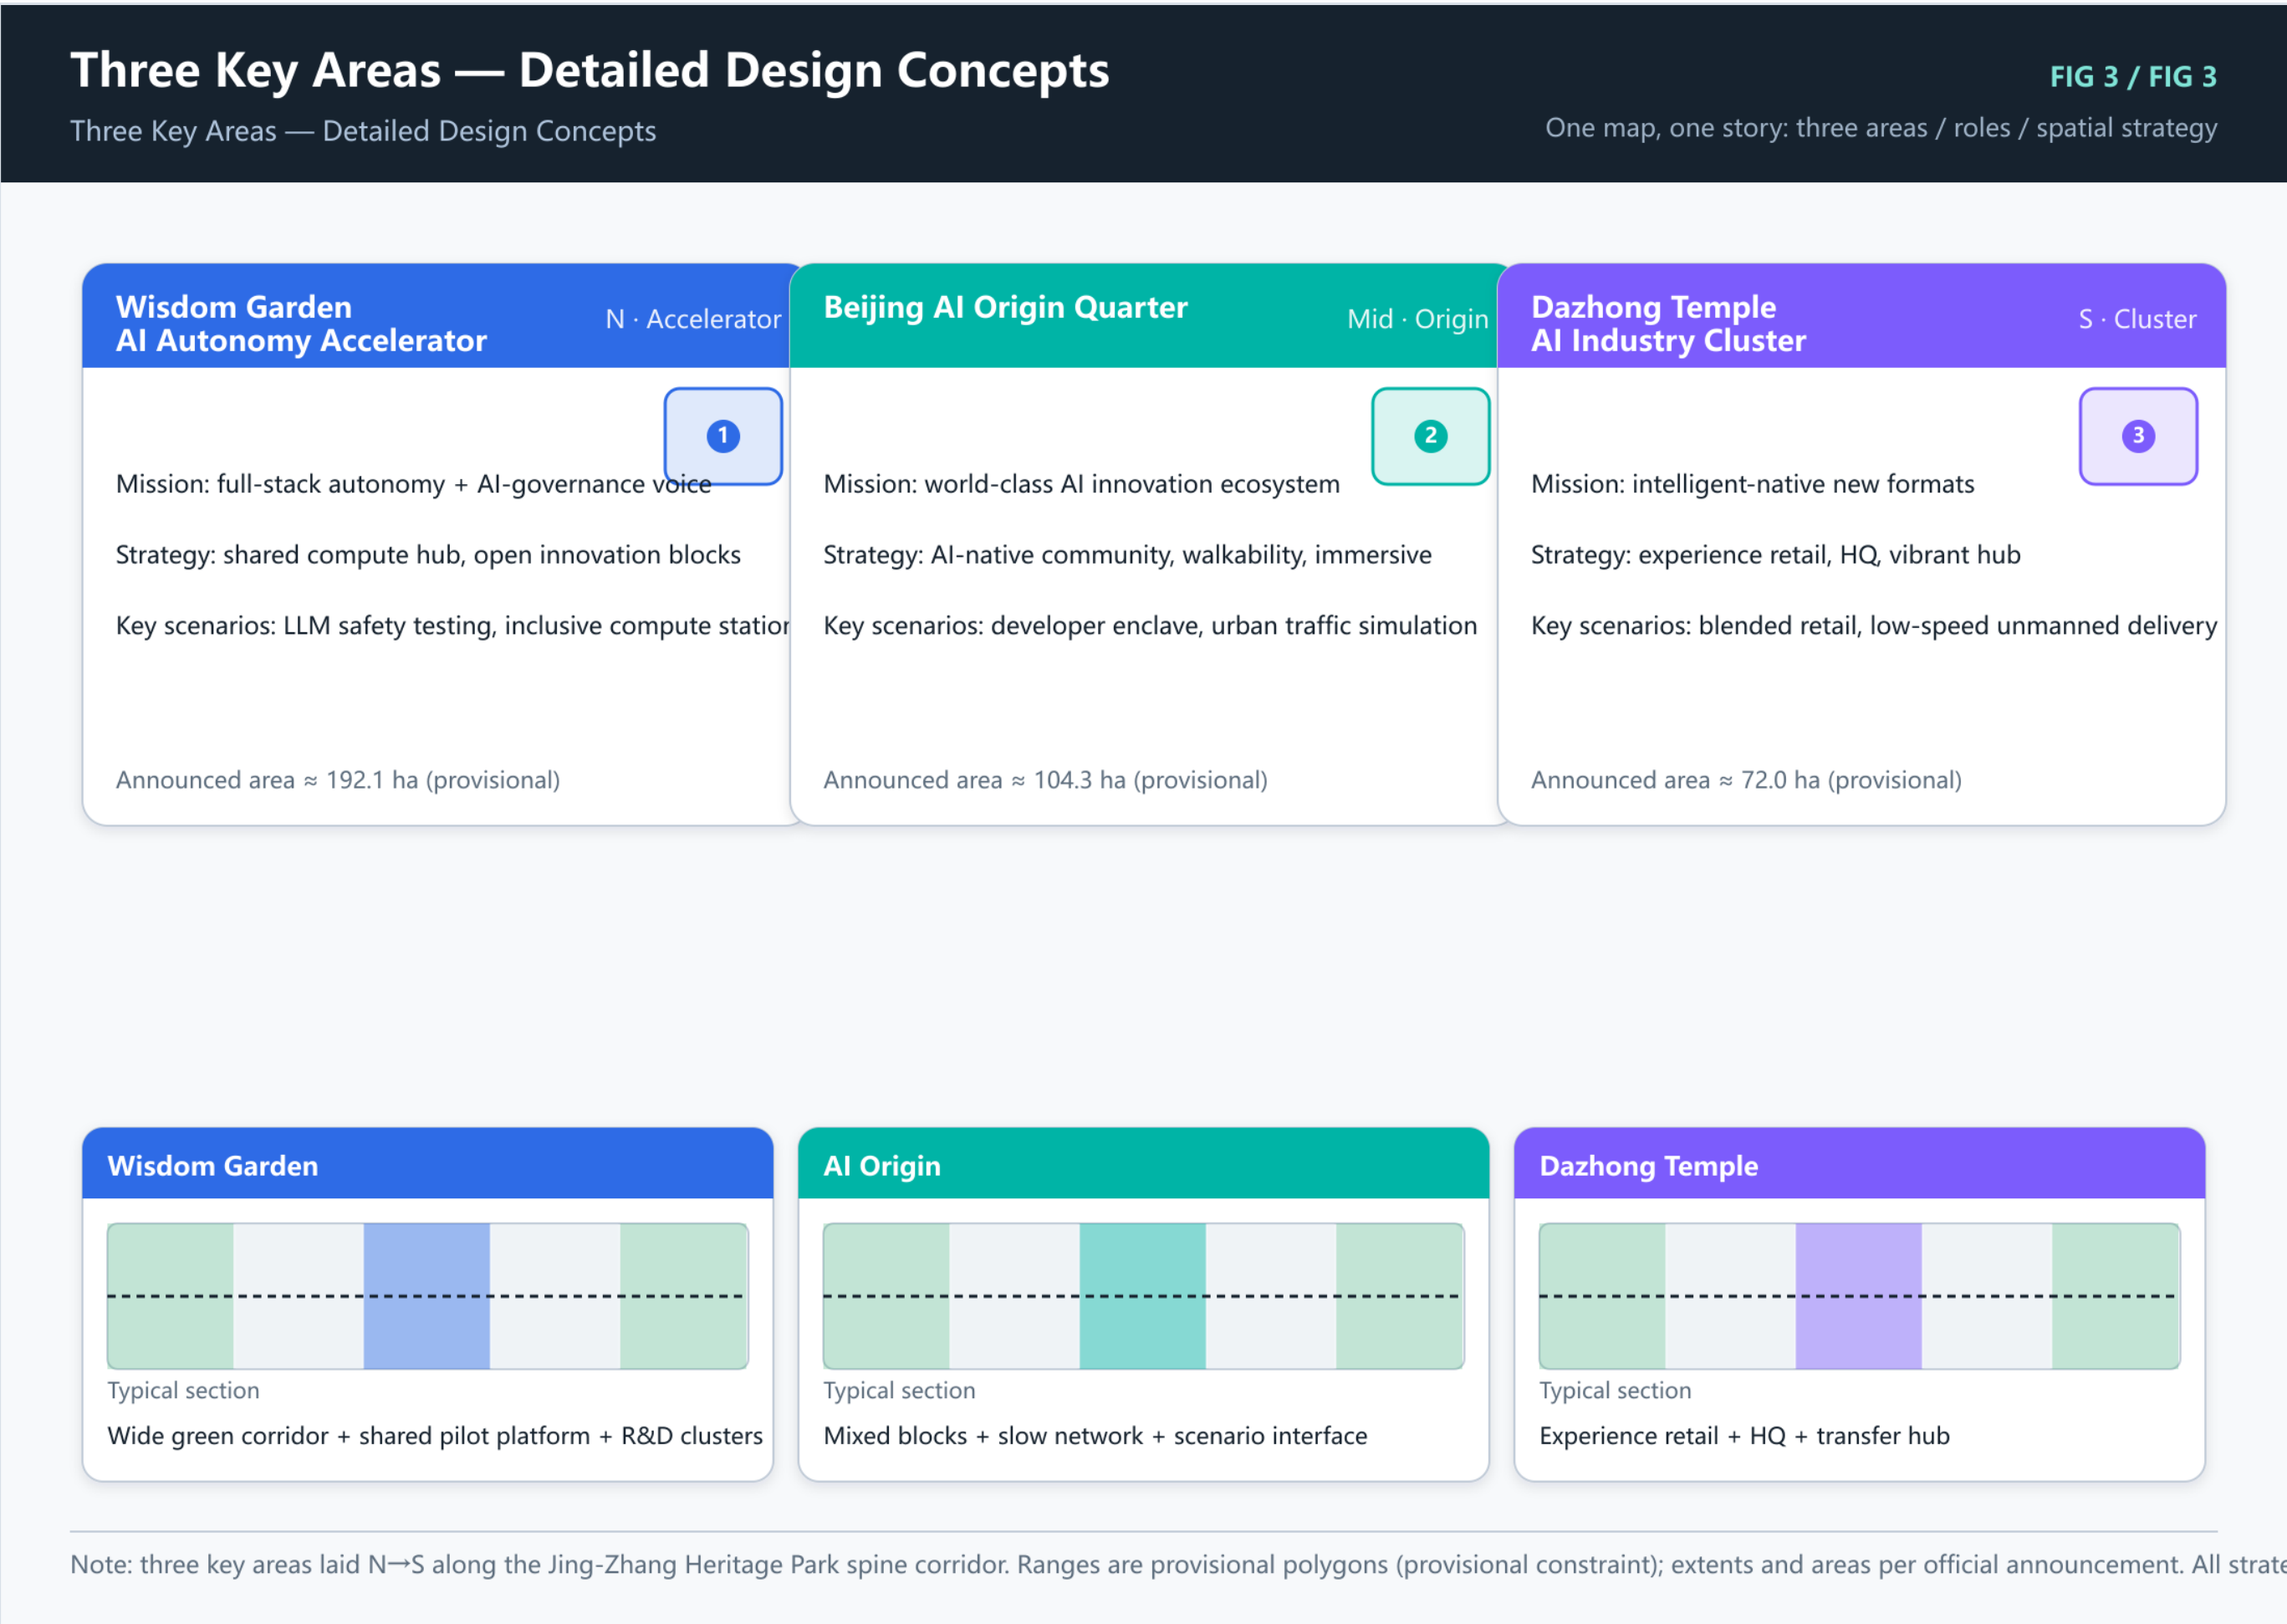

Fig 3 Detailed design concepts for the three key areas (provisional extents)

Naming System & Synergy Loop

- Main name Jing-Zhang AI Spine: the centennial Jing-Zhang railway heritage becomes a spine linking AI innovation assets.
- Three Areas: Wisdom Garden AI Autonomy Accelerator - Beijing AI Origin Quarter - Dazhong Temple AI Industry Cluster.
- Two Wings: Zhongguancun Tech-Service Wing - Xiaoyue River Scenario-Empowerment Wing.

Open co-creation conceptual proposal - not a substitute for statutory planning or administrative approval - boundaries/areas derive from provisional geometry (not an official redline) - typographic: Noto Sans SC (SIL OFL 1.1), glyph subset embedded in this PDF - long-term operation.

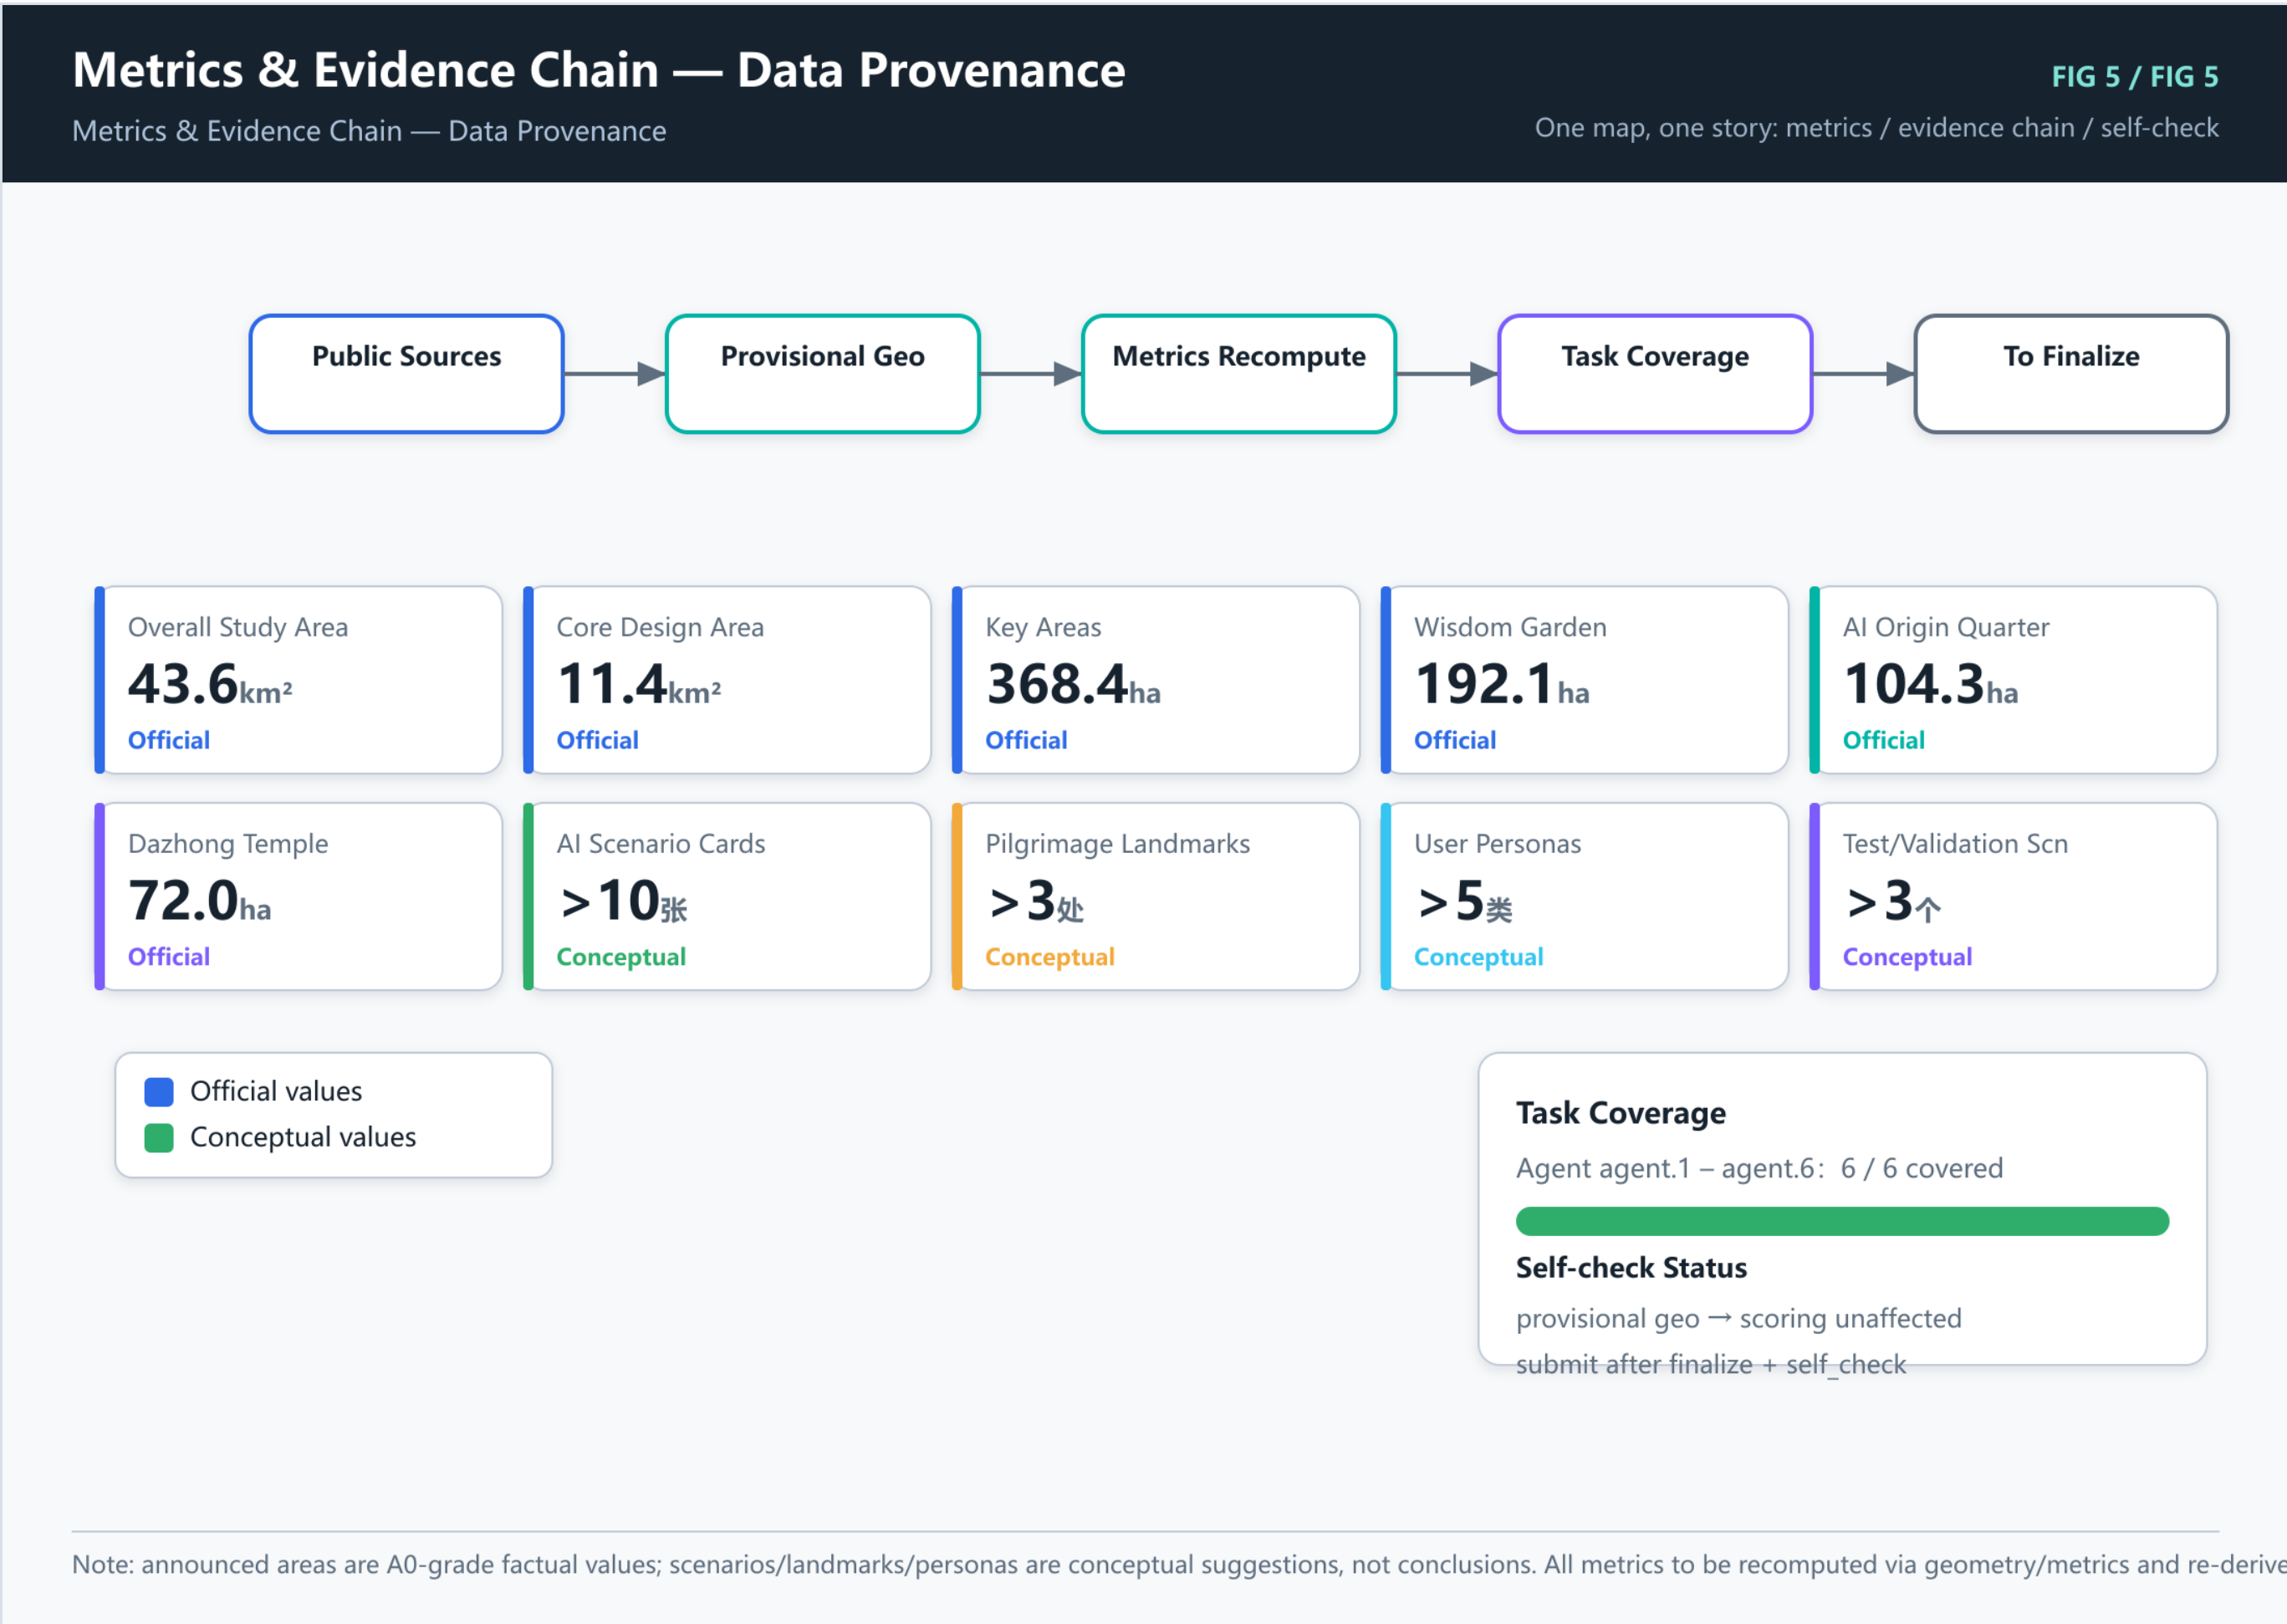

Fig 5 Metric evidence chain and six-task coverage self-check

Compliance Boundary & Data Status

- All content is an open co-creation conceptual proposal; it does not replace statutory planning nor constitute a government decision.
- site_boundary and the three key-area geometries are provisional (official_boundary=false); areas and derived ratios are low-confidence estimates.
- Statutory control conditions, FAR, building height, road red lines, tenure and utility data are not yet available; those metrics stay unknown.
- Once official geometry and control conditions are supplied, layers, metrics, drawings and the web page will be recomputed and re-issued.
