

THE NIGHT SHIFT

Let innovation work late and the city sleep well

JING-ZHANG NIGHT SHIFT: ONE SPINE, THREE HUBS, TWO WINGS

Dashed boundary is provisional; every spatial move is conceptual

1 NIGHT SPINE

3 STAFFED HUBS

6 TIME STATES

12 AI SCENARIOS

ONE SPINE

Continuous public passage through railway heritage, transit and three night hubs.

PROVISIONAL

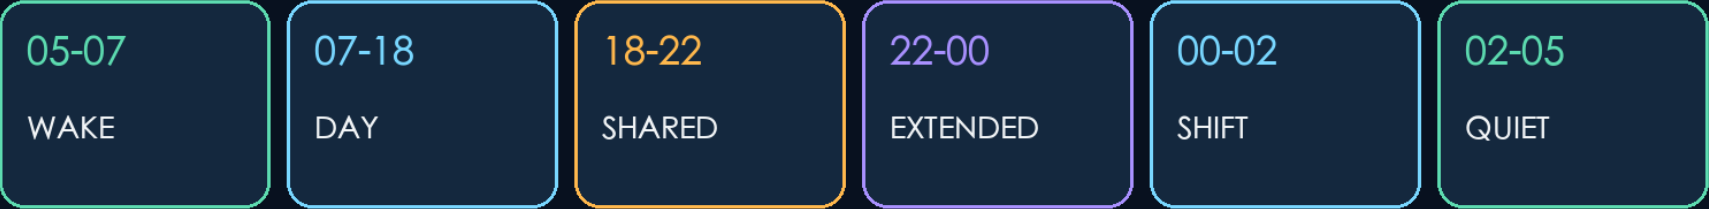

Official geometry triggers full recalculation of layers, metrics and drawings.

TIME AS URBAN DESIGN

Six operating states instead of all-night brightness

SPACE x TIME: SIX-PERIOD OPERATING TIMETABLE

Dashed boundary is provisional; every spatial move is conceptual

CONCEPTUAL LAND-USE ROLES

Not all-night brightness: the city changes state by time.

SHARED 18—22

Culture and public life with zoned sound and light.

QUIET 02—05

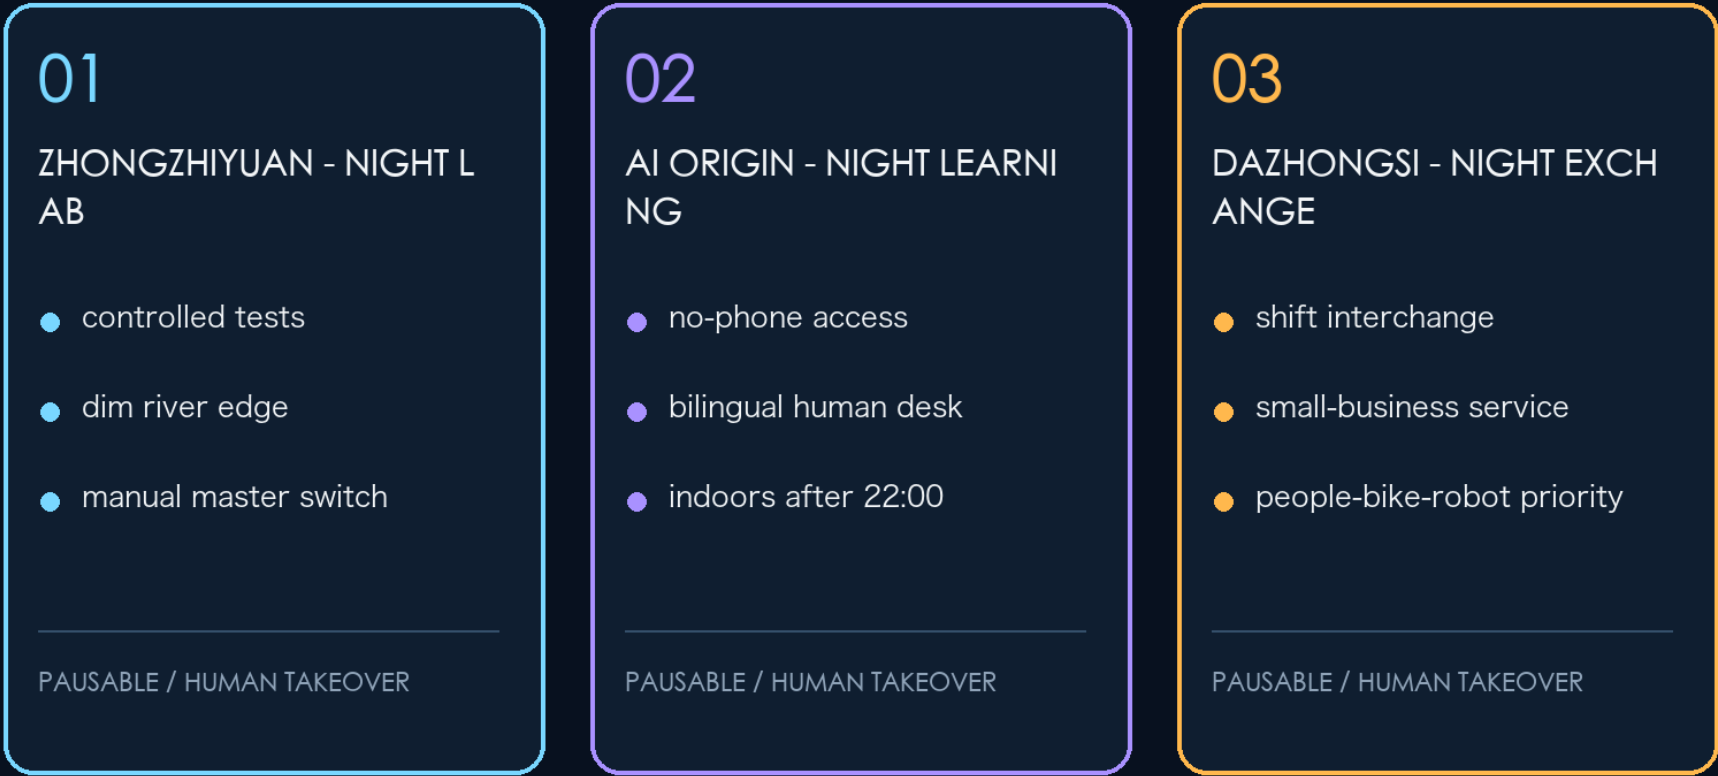

Sleep and dark ecology take priority while basic passage remains.

THREE NIGHT HUBS

Different responsibilities in each key area

THREE KEY AREAS: DISTINCT NIGHT RESPONSIBILITIES

Dashed boundary is provisional; every spatial move is conceptual

NIGHT LAB

Controlled tests, a dim river edge and a manual master switch.

NIGHT LEARNING

No-phone access, bilingual human service and open-source night school.

NIGHT EXCHANGE

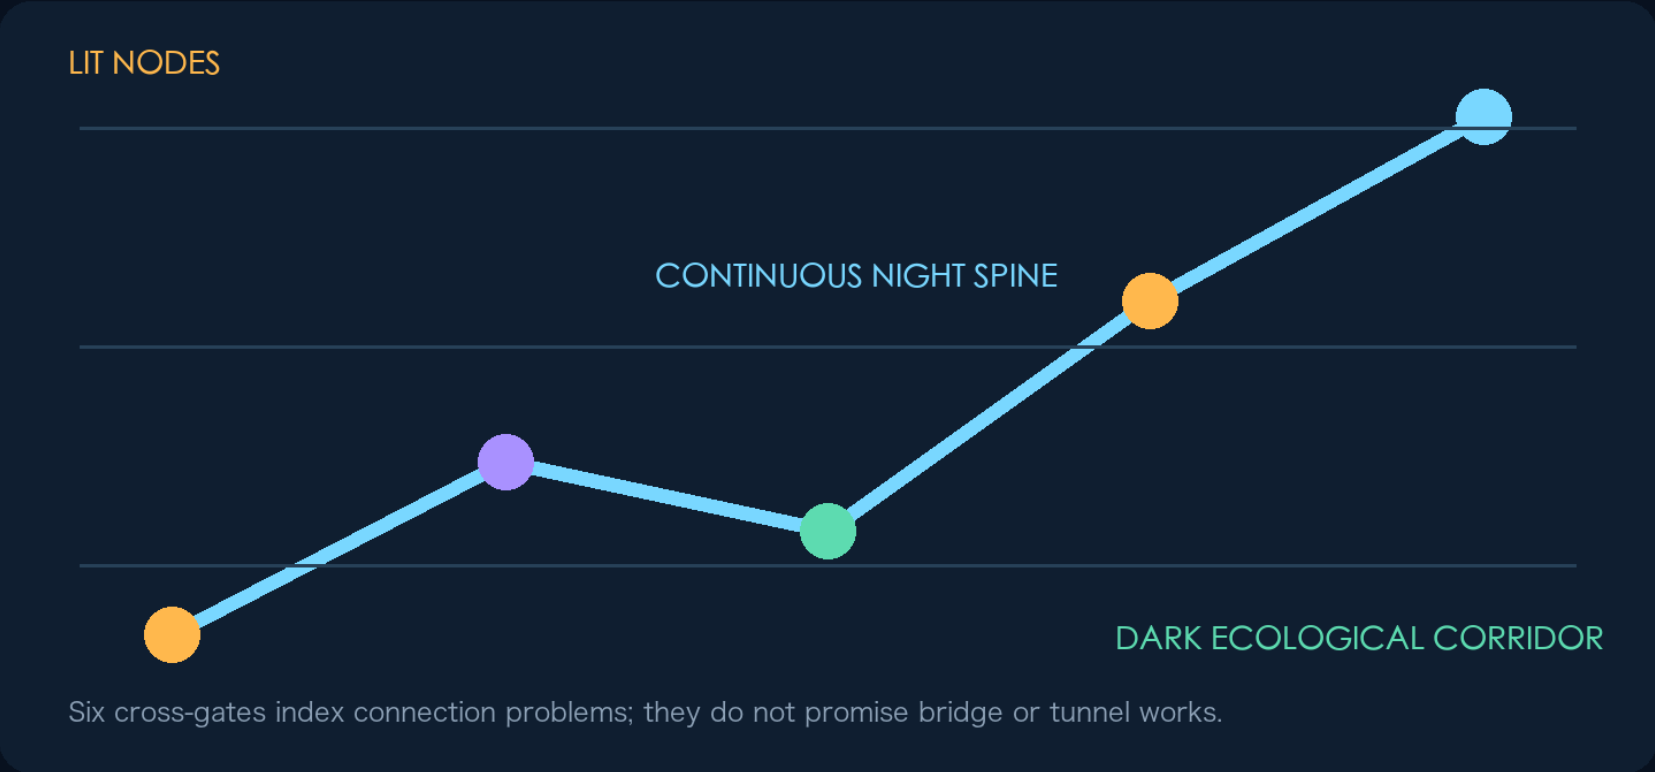

Shift interchange, small-business service and people-first mobility.

MOBILITY AND DARK ECOLOGY

Lit nodes, dark corridors and quiet edges

LIT NODES - DARK CORRIDORS - QUIET EDGES

Dashed boundary is provisional; every spatial move is conceptual

NO FACE RECOGNITION

Safety comes from legible routes, staffed nodes, clear exits and human takeover.

DARK IS A FUNCTION

Water and green edges protect resident sleep and nocturnal ecology.

12 SCENARIOS / 4 TESTS

Every pilot passes five release gates

FROM CONCEPT TO EVIDENCE: RECOMPUTABLE AND STOPPABLE

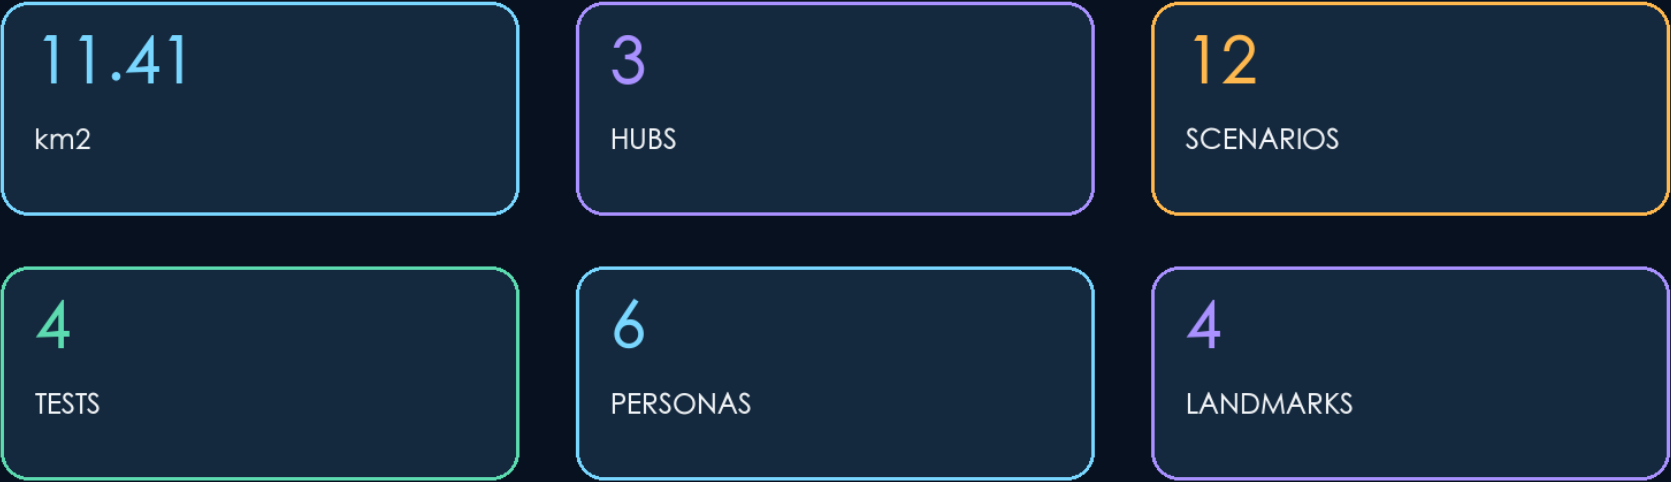

Dashed boundary is provisional; every spatial move is conceptual

FIVE GATES

Need, minimization, night impact, human takeover, exit and recovery.

SIX PERSONAS

Researchers, workers, residents, inclusive users, visitors and small businesses.

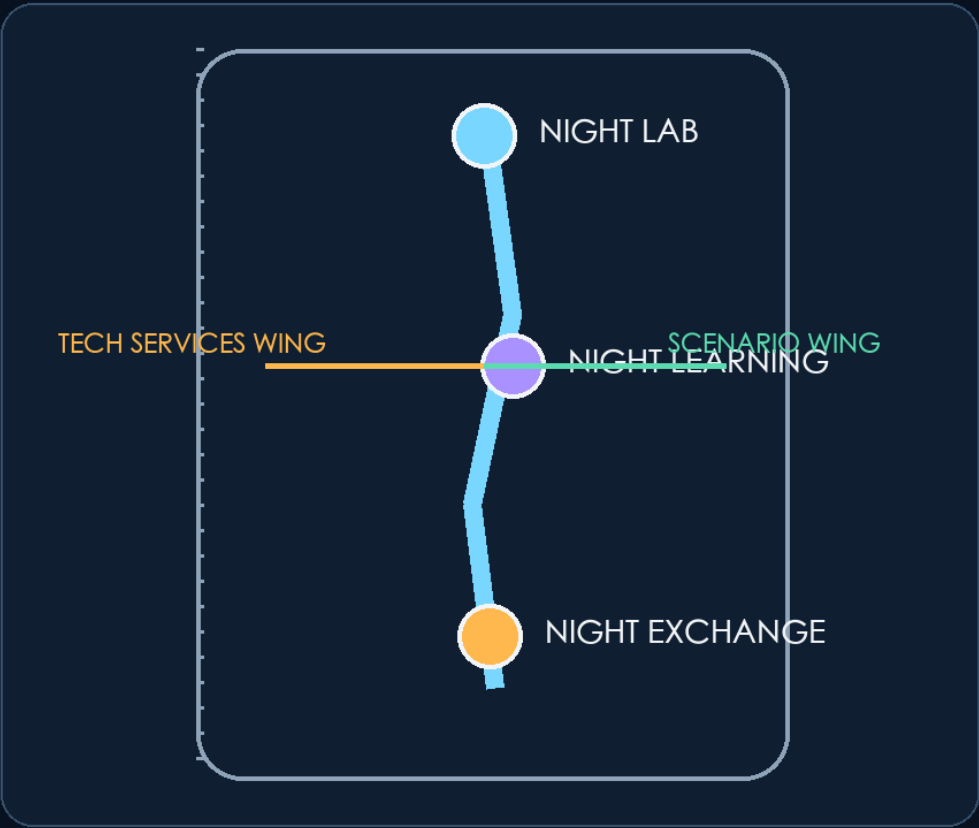

SOURCES -> PROVISIONAL CONSTRAINT -> DESIGN LAYERS -> EPSG:4548 -> BILINGUAL OUTPUT -> CHECKS

IMPLEMENTATION

Measure first, install lightly, build later

JING-ZHANG NIGHT SHIFT: ONE SPINE, THREE HUBS, TWO WINGS

Dashed boundary is provisional; every spatial move is conceptual

1 NIGHT SPINE

3 STAFFED HUBS

6 TIME STATES

12 AI SCENARIOS

NEAR TERM

Night audit, temporary guidance, worker stations and reversible trials.

LONG TERM

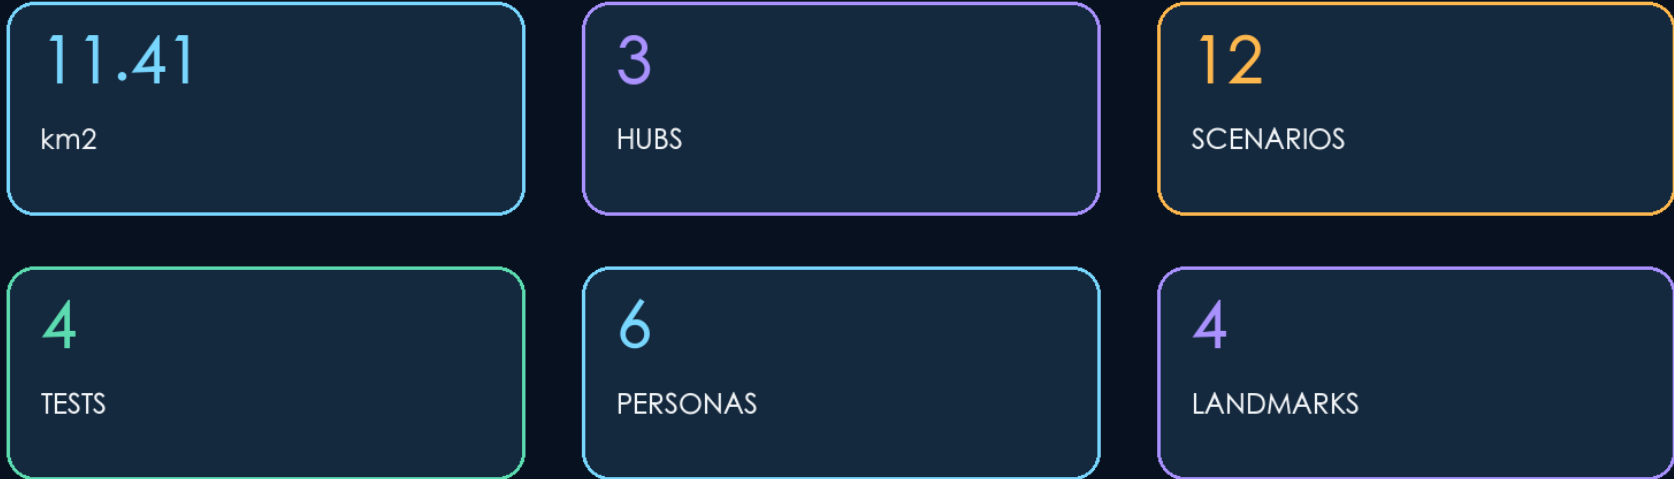

Annual review decides whether to retain, change or retire.

EVIDENCE AND LIMITS

Traceable does not mean approved

FROM CONCEPT TO EVIDENCE: RECOMPUTABLE AND STOPPABLE

Dashed boundary is provisional; every spatial move is conceptual

SOURCES -> PROVISIONAL CONSTRAINT -> DESIGN LAYERS -> EPSG:4548 -> BILINGUAL OUTPUT -> CHECKS

KNOWN

Geometry-derived internal metrics and auditable content counts.

PENDING

Official polygons, controls, roads, utilities, heritage, ownership and night baselines.
