

THE FIRST URBAN CELL

城市生命种子如何进入真实海淀

一张Reality Map说明现实关系；一个空间剖面说明CELL-001如何把公共性、人工照护、有限AI与可退役治理装进同一最小单元。

C1 / CHENGFU ROAD — WUDAOKOU REALITY MAP

SCHEMATIC · SOURCE-REGISTERED

REALITY RELATIONS

官方公开来源登记AI原点、产业园、社区一校区一园区、AI小巷、五道口站、成府路启动区与京张公园关系；位置仅为关系性重绘，不是测绘底图。

CELL-001 / SPATIAL ANATOMY

CONCEPTUAL

NOT A SMART BUILDING

SPACE + STEWARD + LIMITED AI + CIVIC LICENSE

可暂停 · 可申诉 · 可撤销 · 可恢复

THREE MVPs / ONE FIRST CELL

MVP-01

→ S04 ONE-WAY ACCESSIBLE JOURNEY

MVP-02

→ S02 ADAPTIVE BAY

MVP-03

→ S03 CIVIC INFORMATION / MAINTENANCE LOOP

ALL SITES: CONCEPTUAL / PROVISIONAL

TIME × SPACE EVOLUTION

从1909铁路到2126 AI Living City

2126不是突然出现的未来城，而是2026 Urban Seed经过复制、验证、连接、失败修正与治理许可后形成的后果。

ONE RULE: EACH SCALE MUST EARN THE NEXT

2026 → 2030 / MOST DETAILED IMPLEMENTATION WINDOW

SPACE CONSEQUENCE

AI-GENERATED CONCEPT VISUALIZATION

THREE ORGANS / ONE LEARNING LOOP

不是三个AI园区，而是一座城市的学习循环

三个角色保持不变；每区只显示一个空间原型、两个代表场景和一项退出条件。

THE CITY ADAPTS TO A PERSON

68岁附近居民的一次站外接力旅程

这不是交通效率图。它证明一个不愿走太远、也不必交出身份的人，仍能用人工可接管的方式到达五道口站外。

68岁

附近居民

DESIGN PERSONA

NOT DEMOGRAPHIC CLAIM

“我要去五道口站，
但走不了太远。”

NEED
短距离 · 可休息 · 可询问
不靠手机 · 随时取消

HUMAN INTENT → COORDINATED JOURNEY → HUMAN OUTCOME

AI KNOWS

- requested destination
- current accessibility status
- requested rest / help
- current system mode

AI DOES NOT NEED TO KNOW

- name or ID
- face / voiceprint
- income or diagnosis
- social / travel history

HUMAN OVERRIDE

- choose a rest point
- call the Steward
- cancel the journey
- ignore digital advice

FAIL-SAFE

- static signs remain
- route never controls traffic
- station-exterior handoff
- incident → pause + review

A CITY THAT CAN SAY STOP

一个能够停止AI实验的城市

DECIDE之后有四条真实路径；只有RETIRE进入撤权、删除验证与实体恢复。

DESIGN PERSONAS

具体人物用于压力测试，不用于人口推断

Design personas are design-testing constructs, not demographic claims. 每个Persona只用于检验空间、服务与治理是否让真实的人保有选择。

P01  68岁附近居民 DESIGN TEST short walk · seat · ask no smartphone required NO IDENTITY PROFILE · NO DEMOGRAPHIC CLAIM	P02  22岁大学生 DESIGN TEST stable study · booked collaboration clear public/controlled boundary NO IDENTITY PROFILE · NO DEMOGRAPHIC CLAIM	P03  32岁AI创业者 DESIGN TEST credible validation · public translation explicit failure threshold NO IDENTITY PROFILE · NO DEMOGRAPHIC CLAIM
P04  35岁带孩子家长 DESIGN TEST low cognitive load · quiet right easy opt-out NO IDENTITY PROFILE · NO DEMOGRAPHIC CLAIM	P05  48岁城市维护人员 DESIGN TEST diagnose · stop · repair verify physical recovery NO IDENTITY PROFILE · NO DEMOGRAPHIC CLAIM	P06  管理 / 独立评估角色 DESIGN TEST audit trail · complaint closure permission revocation evidence NO IDENTITY PROFILE · NO DEMOGRAPHIC CLAIM

ONE ID / ONE MEANING

MVP映射 + Urban Cell Protocol

编号冻结；协议示意只解释既有三个MVP如何在治理与人工接管下运行。

EVIDENCE STATUS

证据状态不是概念强弱，而是实施责任边界

已登记事实、暂定空间与实施前核验事项分栏表达；pending不等于submission failure。

VERIFIED / REGISTERED

- 17 formal source records
9 authority-backed Reality Map records
- 3 MVPs · 3 industry validation scenarios
11 scenarios · 10 governance stage types
- MVP-01→S04 · MVP-02→S02 · MVP-03→S03
- AI-generated 2126 asset provenance
registered in sources + metadata

PROVISIONAL

- Overall boundary + three key-area polygons
- ZONE-01 conceptual candidate
CELL-001 carrier relationship
- C1 route and draft geometry diagnostics
- Concept buildings, land-use partition
and public-space geometry
- 2126 Vision / not implementation proposal

PENDING IMPLEMENTATION VERIFICATION

- Official redlines, land use, surveyed buildings
and ownership / publicness
- Carrier and operator agreements
- Accessibility, fire, structure, MEP, utilities
and station-exterior handoff audit
- Data impact, safety, fail-safe, maintenance
and emergency responsibility plans

PENDING ≠ SUBMISSION FAILURE

Pending identifies the evidence and professional checks that must close before implementation; it does not erase a clearly labelled conceptual submission.
