

Jing-Zhang AI Axis / OPENLINE 100

Make the heritage park the public display layer of the innovation chain.
Tested · Translated · Adopted · Seen throughout. Provisional geometry only.

Conceptual alignment & provisional boundary / NOT A STATUTORY PLAN

A Century of Jing-Zhang · AI Axis

OPENLINE 100

A Century of Jing-Zhang.
The Next Century of Public Intelligence
Is Co-Created Here.
Heritage park as the public display layer of the innovation chain:
Seven axis spaces expand and contract; research enters everyday city life.

7	3	5	3
Axis spaces	Innovation engines	Landmark destinations	Three station forms

Spatial Structure

Seven spaces, three engines, two wings, three station forms.

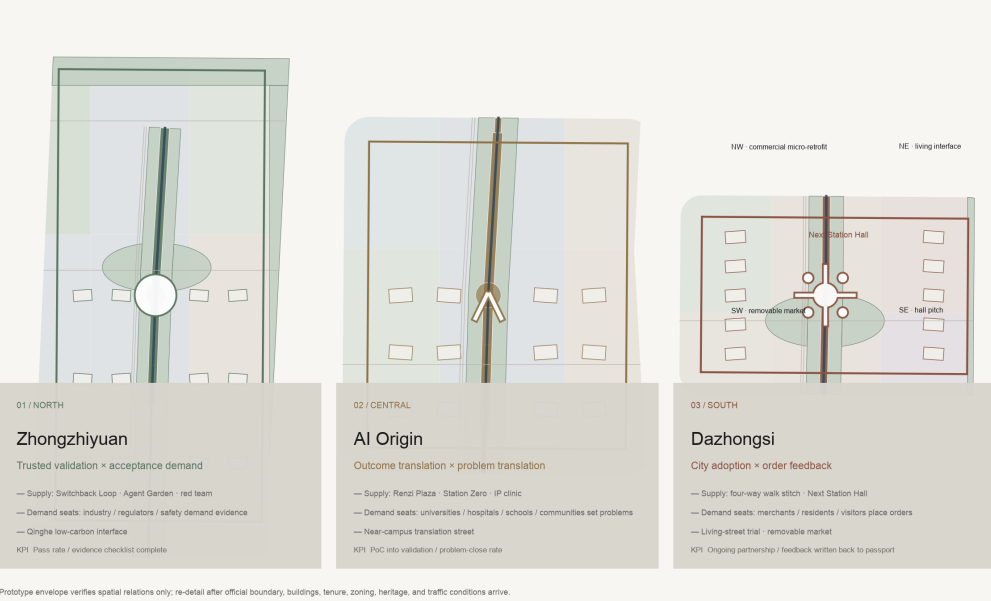

One axis · two wings · three engines · seven spaces

AXIS × WINGS × ENGINES × SPACES

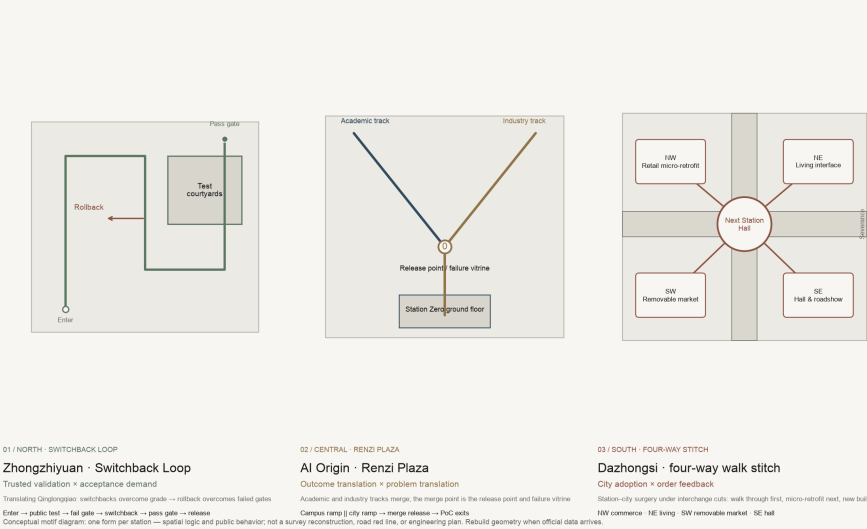

Three stations · three gates: supply + demand

SUPPLY GATE × DEMAND GATE / ONE FORM EACH STATION

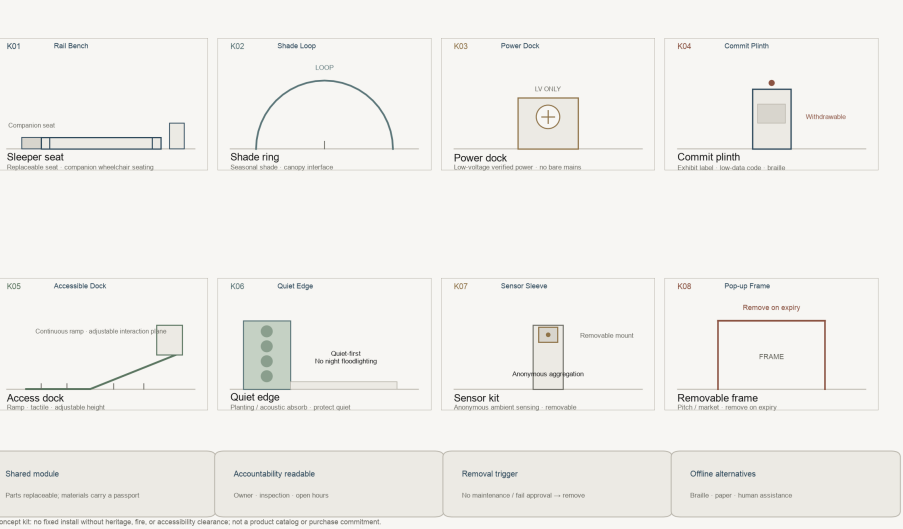

Three station forms: one form per station — not all Renzi

THREE STATION FORMS / CONCEPT MOTIFS, NOT ENGINEERED PLANS

OPENKIT: maintainable public components — not one-off set dressing

KIT OF PARTS / MODULAR · REPLACEABLE · REVERSIBLE

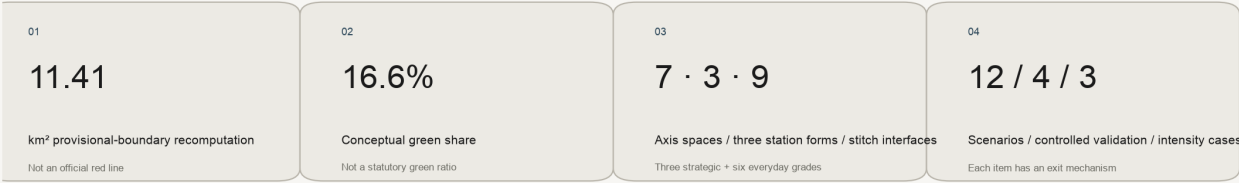

Evidence & Everyday AI

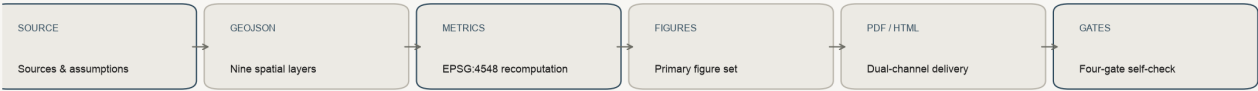

Metrics recomputed in EPSG:4548. Twelve scenario cards with stop conditions.

A blueprint that can be recalculated, stopped, and continued

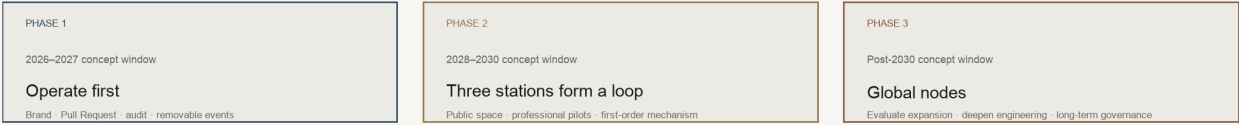

METRICS × EVIDENCE × DELIVERY

One evidence chain / ONE SOURCE OF TRUTH

Three-phase roadmap / START LIGHT, LEARN IN PUBLIC

Success criteria	Not how many screens were built — whether research can be verified, public problems closed, and failure honestly recorded.
	Full recomputation after official boundaries and professional conditions arrive; high-risk decisions stay with accountable humans.

Safety baseline

No unnecessary data · humans remain responsible
Explainable · appealable · exitable
High-risk domains require professional review

Implementation posture

Phase 1 operate first
Phase 2 three-station loop
Phase 3 global nodes after evaluation
Every project needs owner, precondition, KPI and exit
