

# JING-ZHANG CIVIC FOUNDRY

A CULTURAL PRODUCTION BELT FOR CIVIC AI ADOPTION

01 / CATEGORY-MAKING PROPOSITION

## JING-ZHANG CIVIC FOUNDRY

A CULTURAL PRODUCTION BELT FOR CIVIC AI ADOPTION

The city is not an AI showcase. It is a co-author.

Cultural production moves AI from technical capability to civic meaning, public trust, and sustained adoption.

02 / URBAN MASTERPLAN

## Not a landscape axis: Nine Transverse Urban Rooms

The sinuous Civic Production Floor widens at nine rooms. Eighteen courtyard hosts use an "existing frame, new insert, reversible layer" rule for cultural production, daily services, and controlled validation.

|                                                                    |                                                                            |                                                               |                                |

All geometries are clipped to a provisional rough boundary. Ratios are conceptual recalculations, not statutory RDP controls. Recompile after official boundary, building, ownership, heritage, and road data arrive.

The city is not an AI showcase. It is a co-author. Cultural production turns technical capability into civic meaning, public trust, and sustained adoption.

### 1 CORE

#### Culture Drives Adoption

Technology-to-society conversion.

### 1 LOOP

#### Seven Adoption Stages

Brief, calibrate, co-produce, validate, premiere, adopt, reinvest.

### 3 AREAS

#### Risk Gradients

Safe Validation, Co-Author Foundry, Civic Premiere.

### 3 PRODUCTS

#### Sustainable Outcomes

Content packs, experience modules, urban services.

### 5 LEDGERS

#### Linked Evidence

Public, culture, rights, safety, operations.

# THREE FLAGSHIP AREAS

SAFE VALIDATION YARD - CO-AUTHOR FOUNDRY - CIVIC PREMIERE GROUND

03 / THREE RISK GRADIENTS

## One adoption loop, three levels of public exposure and technical threshold

LOW EXPOSURE - HIGH THRESHOLD

Safe Validation Yard

Observation -> Green Buffer -> Test Yard -> Takeover Core

- Physical AI, public-AI red team, renewal simulation
- Public observation and equipment logistics are separated
- Failure is reviewable; boundary breach triggers shutdown

MULTI-PARTY - MEDIUM THRESHOLD

Co-Author Foundry

Brief Hall -> Long Table -> Provenance Lab -> Life Baseline

- Open briefs, cultural calibration, human-AI co-production
- Visible making and staffed services at ground level
- Resident and creator participation is not free labour

HIGH EXPOSURE - LOW RISK

Civic Premiere Ground

Transit Court -> Premiere Hall -> Culture Market -> Quiet Bypass

- Problem, status, owner, and exit are explained first
- Micro-enterprise services meet public cultural experience
- Twelve-month reuse replaces opening-day footfall

Key-area polygons are provisional rough constraints. Building forms are conceptual hosts, not a demolition decision or approved construction capacity.

PROVISIONAL BOUNDARY · NOT A STATUTORY PLAN

### Zhongzhiyuan Safe Validation Yard

LOW EXPOSURE / HIGH THRESHOLD

Observation -> safety buffer -> controlled yard -> human-takeover core. SC-07 renewal simulation, SC-08 public-AI red team, SC-09 Physical AI validation.

### Beijing AI Origin Co-Author Foundry

CALIBRATION AND CO-PRODUCTION

Open commission hall -> co-author long table -> Provenance Lab -> learning, creator life, and staffed services.

### Dazhongsi Civic Premiere Ground

HIGH EXPOSURE / LOW-RISK PREMIERE

Transit forecourt -> Premiere Hall -> culture and micro-enterprise market -> quiet bypass. Twelve-month evidence replaces opening-day footfall.
