

Jingzhang Smart Vein Innovation Belt

Where Iron Rails Meet Neural Networks — Urban Design Proposal

Core Indicators (Recalculated from Submitted Geometry)

Indicator	Value	Source
Overall Design Area	11,412,825.39 m² (11.41 km²)	EPSG:4548 polygon_area
Green Coverage Ratio	29.5733% (rounded: 29.57%)	EPSG:4548 unary_union
Public Space Ratio	3.0377% (rounded: 3.04%)	EPSG:4548 unary_union
Building Footprint	76,972.95 m² (101 buildings)	sum(polygon_area)
Road Centerlines	16	count(road_features)
Land Use Parcels	31 (seamless, zero overlap)	count(land_use_features)

Note: All area metrics derived from provisional geometry. Recalculation required when official boundaries are provided by organizer.

Three Wings Synergy & Flow Loops

Three key areas (Zhongzhiyuan 192.1 ha, AI Origin Community 104.3 ha, Dazhongsi 72.0 ha) connected by talent/computing, capital/ecosystem, and scenario/data flow loops. South Wing provides comprehensive services; North Wing focuses on eco innovation. Beijing-Zhangjiakou HSR (47 min) extends collaboration to Beijing-Tianjin-Hebei region.

Three Key Areas — Concept

Zhongzhiyuan AI Self-Innovation Accelerator (192.1 ha, provisional): Garden-style innovation block along Qing River. R&D; on west bank, services on east, Zhongzhi Innovation Loop connecting AI R&D; centers, labs, incubators and AI Innovation Plaza.

Beijing AI Origin Community (104.3 ha, provisional): School-adjacent transformation community (10-min walk to Tsinghua/PKU). Origin Community Loop brings east-west flow into the community. Smart Hub Plaza is the heart.

Dazhongsi AI Industry Cluster (72.0 ha, provisional): Urban-style industry blocks with Subway Line 13 Dazhongsi Station as four-quadrant connection point. AI Era Plaza hosts intelligent agent showcases and international enterprise services.

10 AI Scenario Cards

S1 Open-source Collaboration Showcase, S2 AI Safety Sandbox, S3 Edge Computing Nodes, S4 AI Slow-Mobility Navigation, S5 Intelligent Agent International Showcase, S6 Qing River Low-Carbon Innovation, S7 School-Adjacent AI Education, S8 Global AI Activity Week, S9 AI Health Management Station, S10 AI Legal & Government Services. Each scenario passes technical security assessment → privacy impact assessment → test plan filing three-gate review.

Source Registry Compliance

This submission's sources.json strictly aligns with organizer's data/source_registry.json: 5 entries approved_formal (OFFICIAL-ANNOUNCEMENT, AGENT-TASKBOOK, MOHURD-URBAN-DESIGN-MEASURES, MOHURD-CONTROL-DETAILED-PLANNING, MNR-LAND-USE-CLASSIFICATION) + 1 entry provisional_only (PROVISIONAL-BOUNDARIES). No unilateral source level expansion.
