

Xiuchunlai Suture Line — stitching the fractured city and its social life back together

Centennial Beijing–Zhangjiakou AI Innovation Belt • Life is tattered; AI stitches it up

Important note • Conceptual proposal: boundary is provisional (official_boundary=false, not an official redline); pure green 64.3 ha / 5.63% | green + public space 66.5 ha (5.8% of SITE) | 9.5 m²/person public activity space (assumed 70k population) are design-layer EPSG:4548 recomputations or concept targets, not field measurements; full recomputation after official redlines. This board is not a statutory planning or approval basis.

Three headline numbers

150 m (concept)

Needle spacing: ≈2-min walk; design hypothesis for pilots

71.7% (illustrative)

750 m Euclidean-buffer coverage around meeting nodes

9.5 m²/person

Public activity space per person (green + public space 66.5 ha, incl. public space)

Four stitch techniques • four layers

Running stitch: 4.03 km Suture Line spine (heritage / under-viaduct / below-ground sections)

Whip stitch: 29 needle lanes + companion lanes (each ≤250 m)

Back stitch: three key areas interlock with old-city fabric (open walls / station-city integration)

Hidden stitch: AI hidden in everyday furniture (lamps / benches / bins speak)

Four layers: Encounter → Shared activity → Healing → Warmth (fallback throughout)

Three highlight installations

200 LLM chat furniture terminals (SOS links straight to 120; AI never decides)

Token-generating Embroider Bikes (symbolic; contributions light the star wall)

Embroidered Phrase Garden Transformer landmark (the black box walked as a readable line)

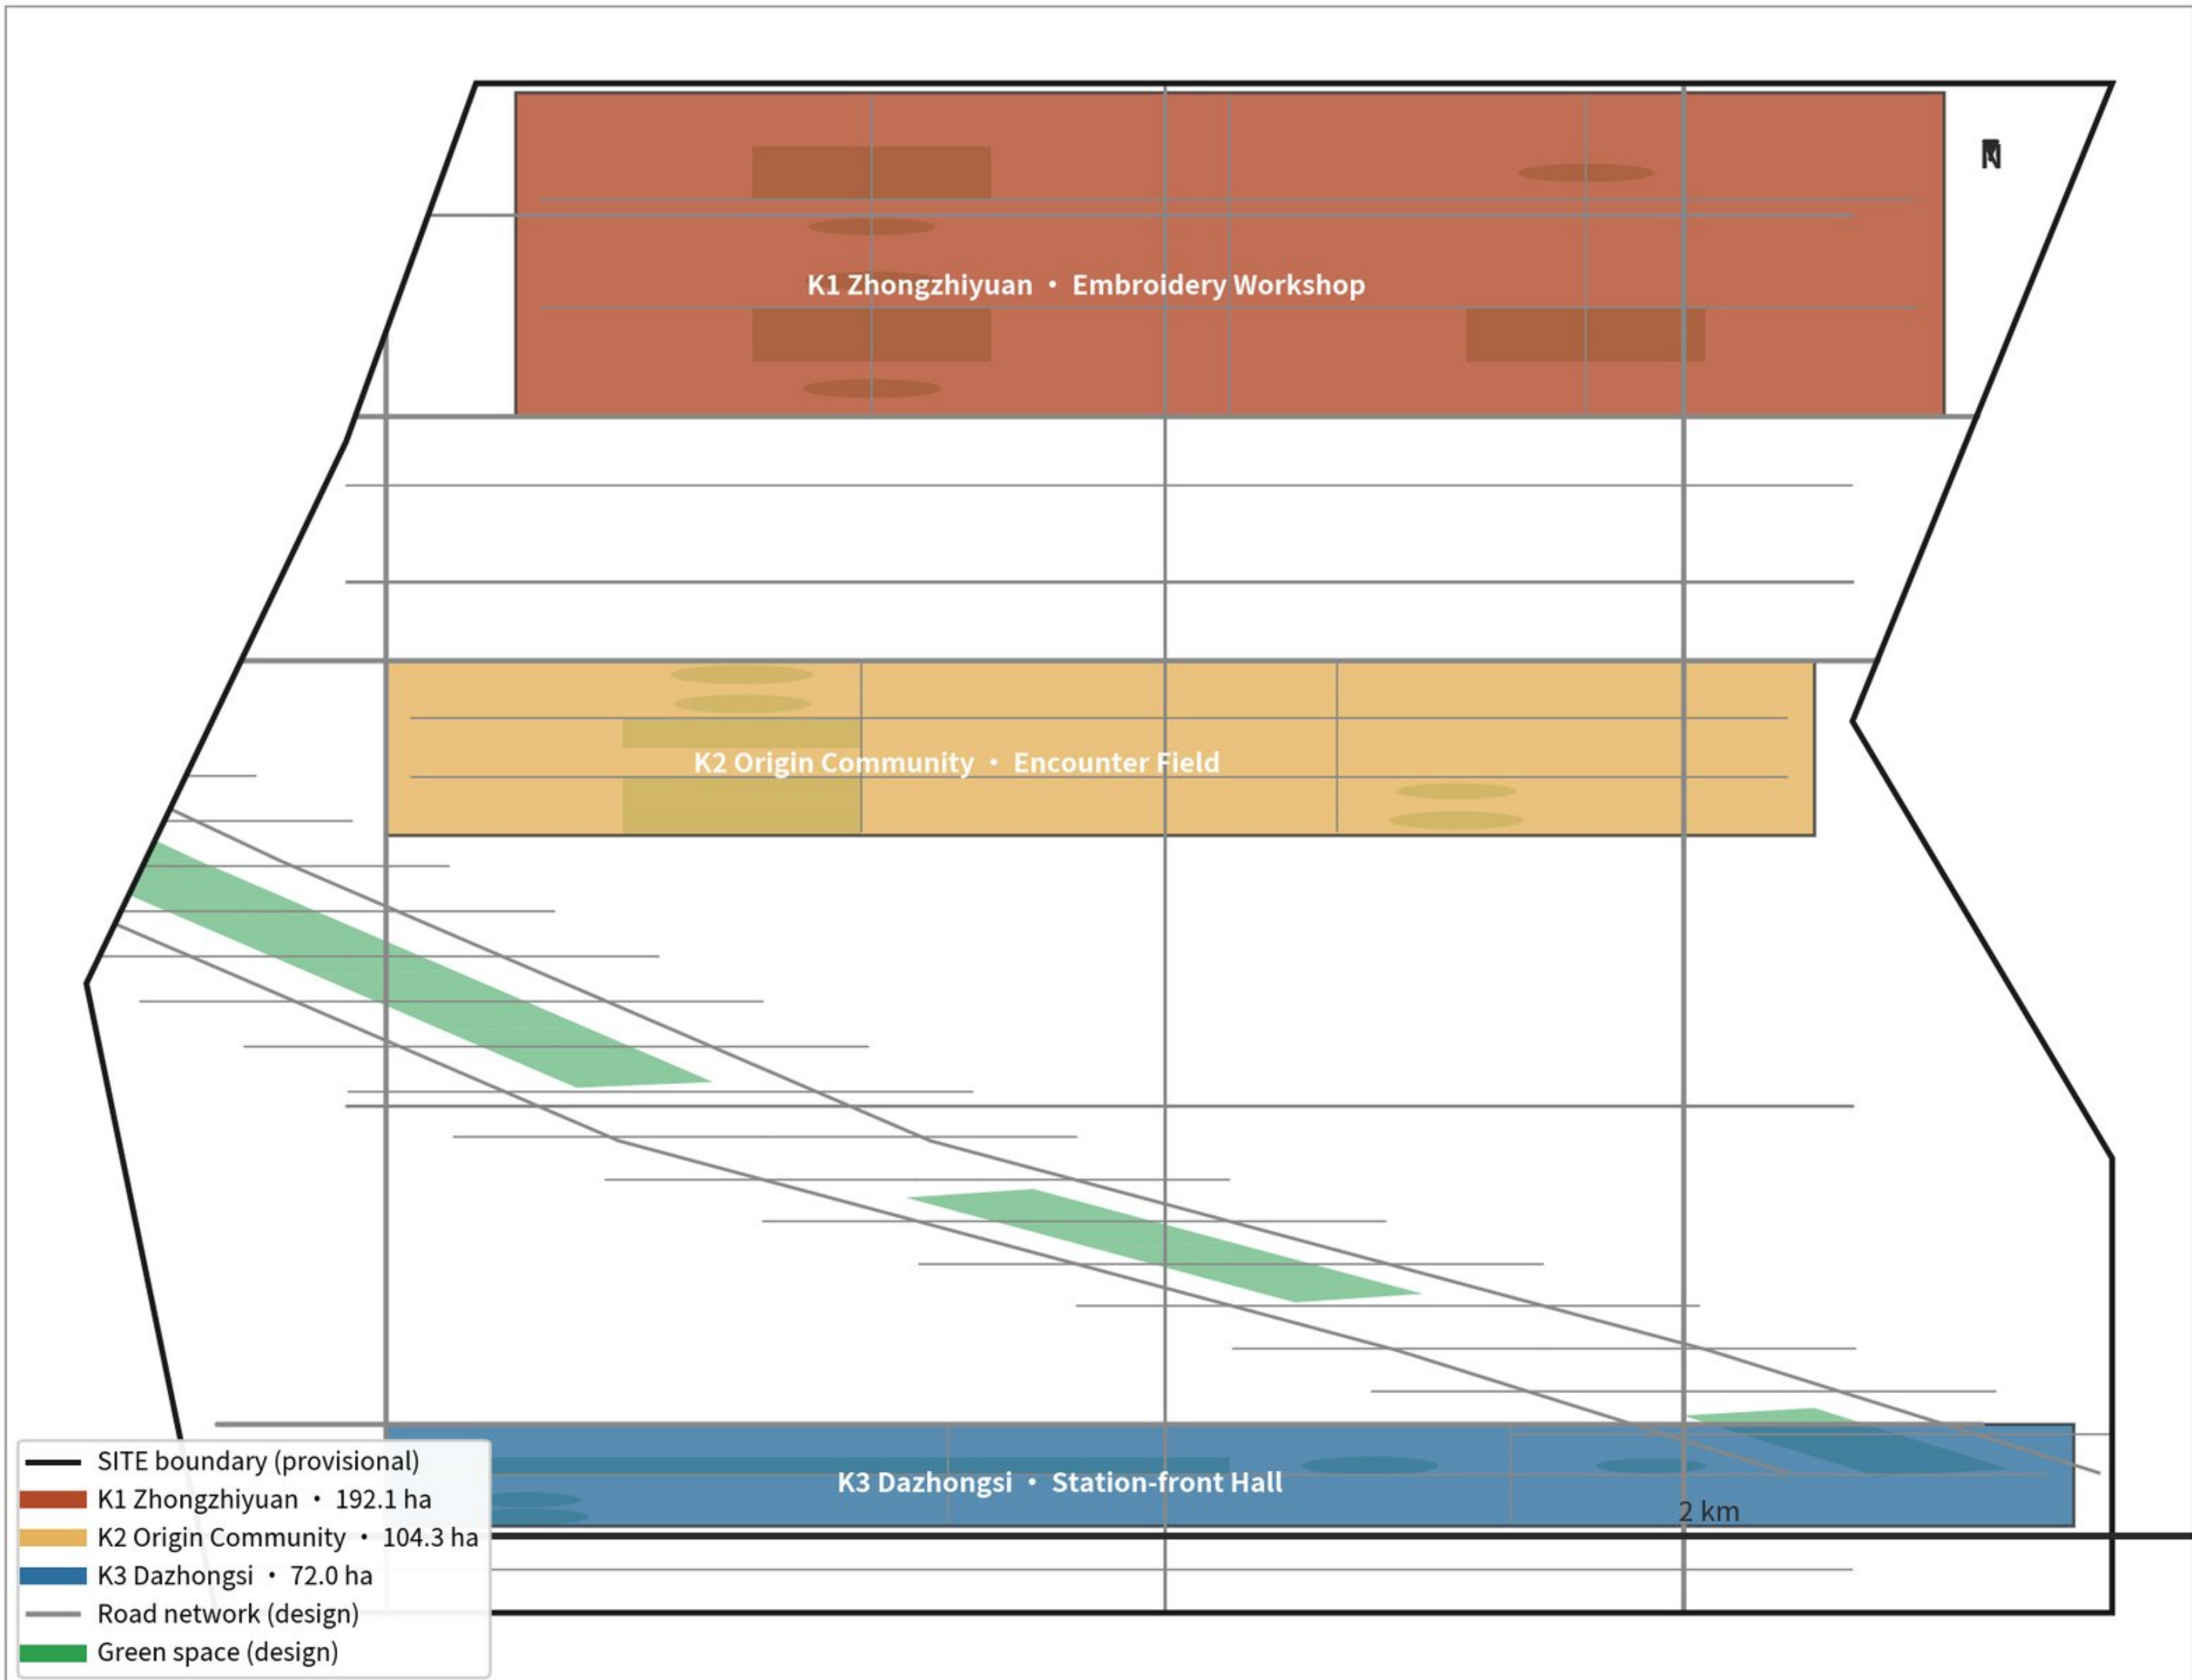

AI as planning logic: node layout = concept design target (≈2-min walk)

Data loop: sense (anonymous heatmap) → decide (quarterly re-stitch) → feedback (before/after)

Caliber: E29 green + public space 66.5 ha (pure green 64.29 ha, pure green ratio 5.6331% as derived key green_ratio; public-space nodes 2.24 ha); E30 5.8% of SITE; E33 key-area green ratios 10.0/11.4/16.4% (geometry intersection, machine-readable sub_metrics); land_use 1403 plaza land is a land-use-classification caliber and is excluded from public-space indicators

Suture Line — Overall Structure & Three-Level Scope

Provisional boundary PROV-SITE-001 (EPSG:4548 recomputed) • official red line pending

Overall spatial structure (site-overview.en)

Legend & caliber: red=4.03 km Suture Line spine | deep green=pure green (1401, 29 sites) | wood/light green=public-space nodes | grey=roads | dashed=three key areas; all areas recomputed in EPSG:4548 from design layers

Credibility statement (compliance bottom line)

52 entries (46 numbered + 6 derived visual) each register source file & formula (EPSG:4548); recomputed vs declared vs to-be-verified values distinguished

16 geometric validations all PASS (2026-08-30)

Population assumed (K1≈20k/K2≈30k/K3≈20k); recompute after official redlines

K1 Zhongzhiyuan • Embroidery Workshop

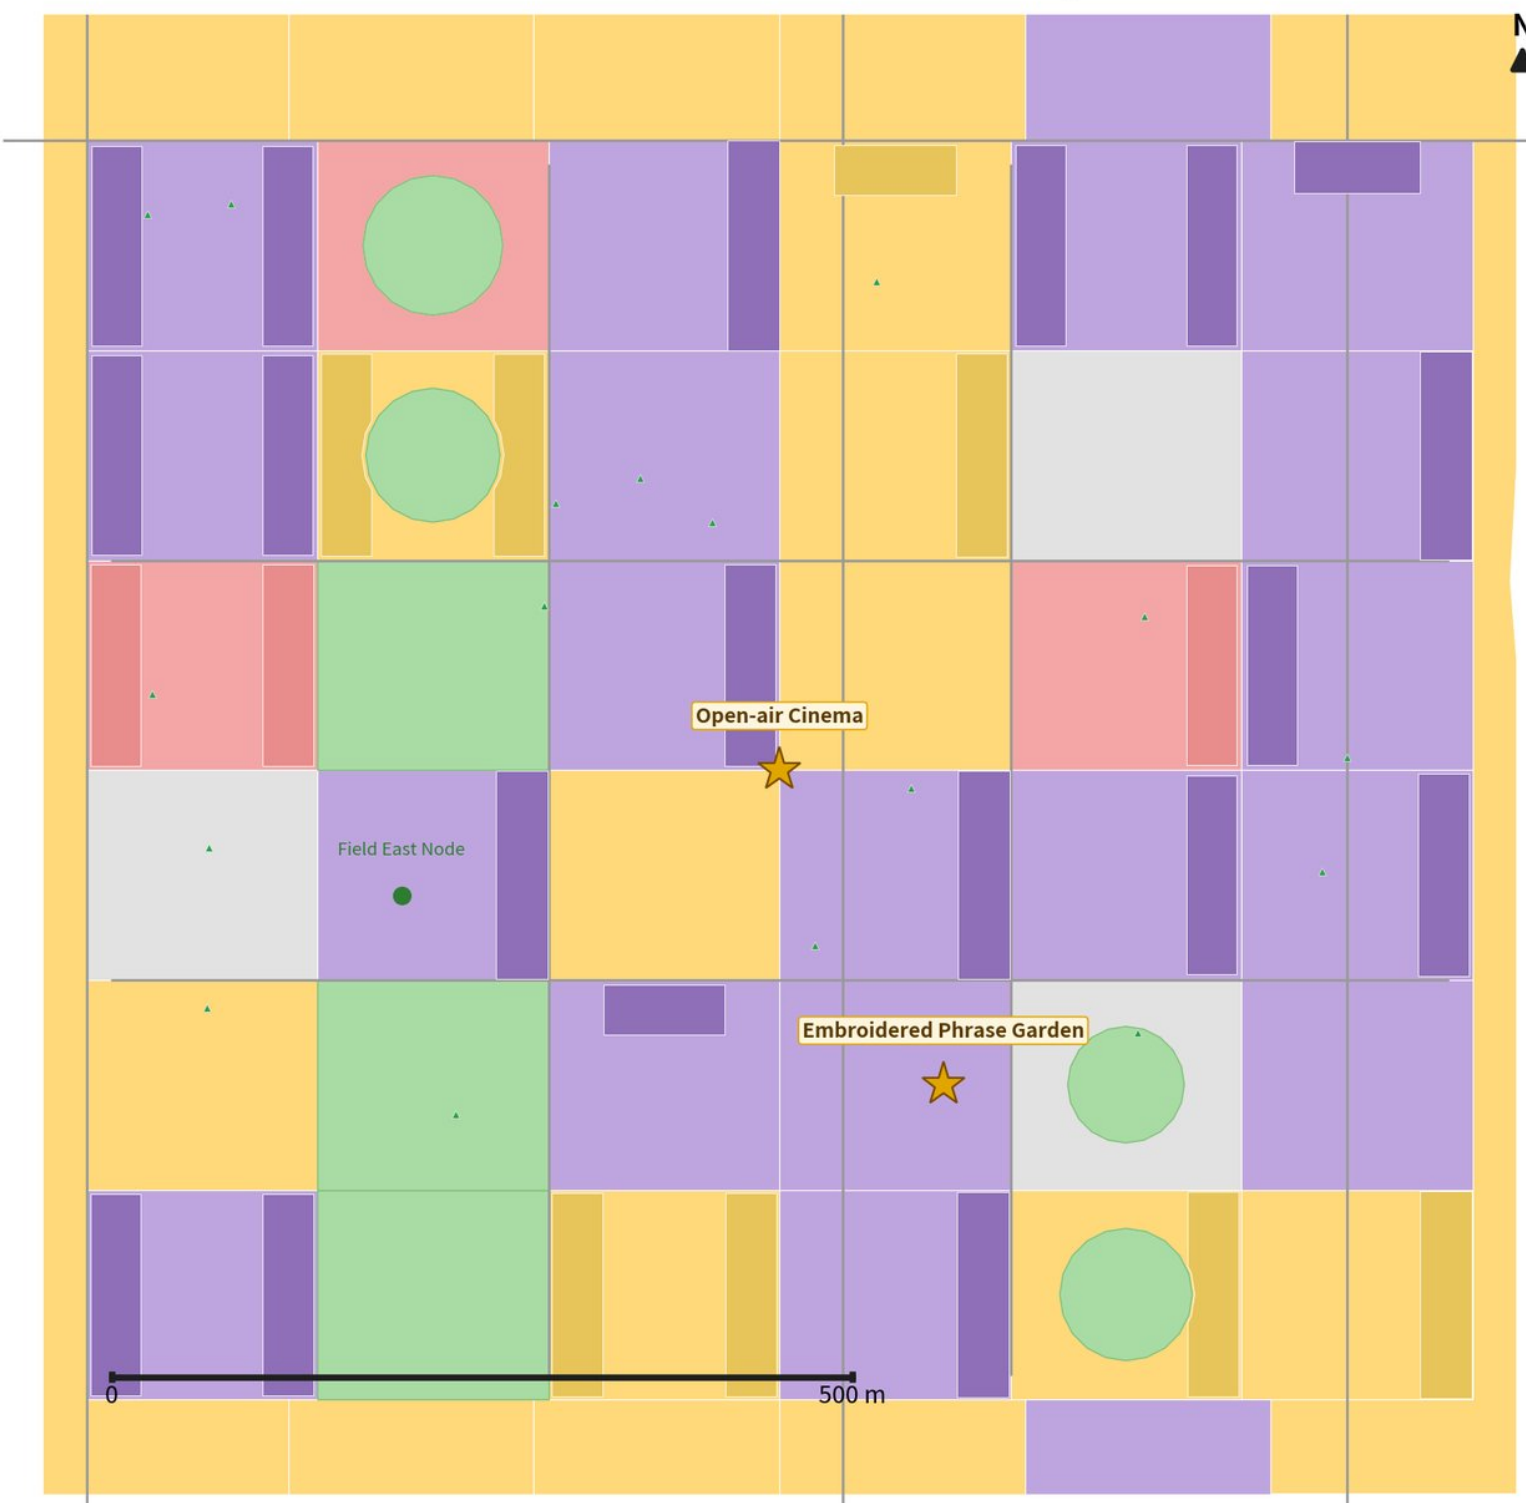

AI R&D cluster + community park + chat-furniture pilot

Highlights are scenario illustrations (see scenario cards), not engineering drawings; encounter-node spacing ≈ 150 m (about a 2-min walk); Extent is the provisional boundary (official_boundary=false); recompute after red lines; no commercial basemap used.

K2 Origin Community • Encounter Field

Embroidered Phrase Garden (Transformer landmark) + bikes + open-air cinema

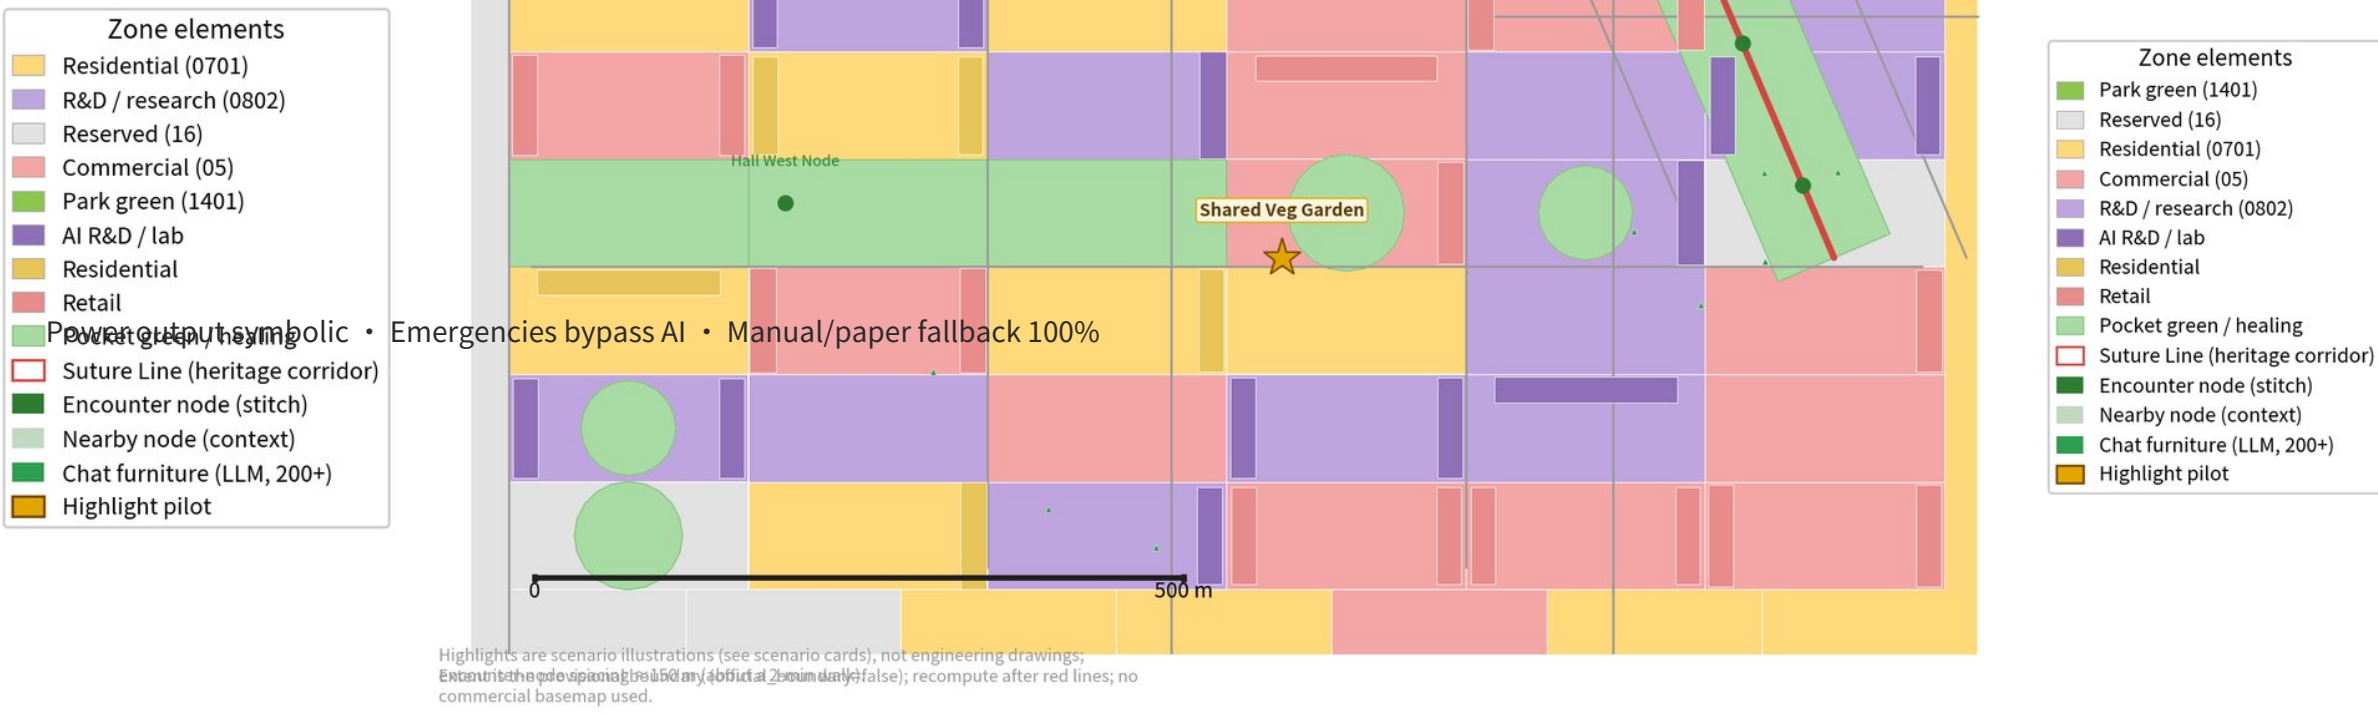

Highlights are scenario illustrations (see scenario cards), not engineering drawings; encounter-node spacing ≈ 150 m (about a 2-min walk); Extent is the provisional boundary (official_boundary=false); recompute after red lines; no commercial basemap used.

K3 Dazhongsi • Station-front Hall

Station-front plaza + shared vegetable garden + chat-furniture pilot

Provisional boundary: official_boundary=false; recompute & version after official redlines

Highlights are scenario illustrations (see scenario cards), not engineering drawings; encounter-node spacing ≈ 150 m (about a 2-min walk); Extent is the provisional boundary (official_boundary=false); recompute after red lines; no commercial basemap used.

8 Q&A: hallucination / false alarm / offline / privacy / children / maintenance / cost / copy

"Wherever AI can answer wrong, a human can answer right; wherever AI can fail, paper fallback catches it."

Cultural narrative • Suture storyline: 1905 construction → 1909 "ren" alignment → today's cut → 2026 Xiuchunlai → long-term stitching

Four-layer scenario cards (12) landing on three spaces

Encounter → 200 chat-furniture terminals (lamps / benches / bins speak)

K3 Station Hall (16.4%)

Shared activity → token-generating Embroider Bikes • community garden • plaza Q&A screen

Healing → 29 healing-green sites • healing paths (guided by 150 m needle spacing)

Warmth → star-wall data lighting • before/after feedback (sense → re-stitch → feedback)

Indicator Evidence Chain — 46 numbered metrics (A1–H45) + 6 derived visual metrics, item-by-item source files

Every metric in metrics.json registers its method, source file and formula; recalculated values, declared values and targets awaiting verification are distinguished; counting convention is package-wide (46 + 6 = 52 entries).

Geometry recalculated (EPSG:4548)

A1	SITE area	1,141.3 ha	site_boundary.geojson
A5	Chat furniture (count)	200 处	constraints.geojson
B6	Total road length	63.42 km	roads.geojson
B7	Road density	5.56 km/km²	roads.geojson
B12	Land-use mix (Shannon)	1.47	land_use.geojson
E30	Belt-wide green ratio	5.8%	green_space.geojson
F37	Building coverage	7.2%	buildings.geojson
F39	Building volume in key areas	93.8%	buildings.geojson

Declared / target values (to verify)

C14	Stitch spacing (concept target)	150 m	assumption • pilot
C15	Encounter coverage (750 m buffer)	71.7%	schematic, Euclid...
C16	Public space per person	9.5 m²/p	66.5 ha ÷ 70k
D25	Chat furniture density	17.5 ↑/km²	constraints.geojson
D26	AI scenario cards	12	constraints.geojson
D28	Pilot landmarks	5 处	constraints.geojson
D29	Industry test scenarios	3 ↑	design_depth_matrix.json

Population is an assumption (K1≈20k / K2≈30k / K3≈20k, total 70k); all area and density values are recalculated under the design-layer caliber and do not constitute statutory planning indicators; official red line release triggers full recalculation.
