

CENTENNIAL JINGZHANG AI INNOVATION BELT

Urban Design Proposal

□□□□AI□□□□□□□

Location:	Haidian District, Beijing
Research Scope:	43.6 km ²
Overall Design Scope:	11.4 km ²
Key Areas:	368.4 ha (3 Key Areas)
Three Positionings:	Centennial Jingzhang Cultural Belt Urban AI Living Experience Belt AI Integration Innovation Belt
Three Zones:	Zhongzhiyuan AI Acceleration Area Beijing AI Origin Community Dazhongsi AI Industry Cluster
Two Wings:	Zhongguancun Technology Service Wing Xiaoyuehe Scenario Empowerment Wing

□ **PROVISIONAL BOUNDARY**
Pending Official Data Release

Overall Concept Plan

One Belt · Three Cores · Multi-Point Scenarios · Blue-Green Composite Ring

SPATIAL ORGANIZATION: JINGZHANG AI VITALITY CO-EVOLUTION BELT

Zhongzhiyuan AI Acceleration Area

192.1 ha | 52.0% of key areas

Garden-type full-stack autonomous
innovation block

KEY DESIGN FEATURES

- 5 AI R&D HQ Buildings (80-160m)
- Qinghe Waterfront Innovation Corridor
- National AI Platform & Standards Hub
- Security Governance Sandbox Display
- Low-Carbon Green Innovation Environment

Beijing AI Origin Community

104.3 ha | 28.3% of key areas

Near-university achievement
transformation & talent community

KEY DESIGN FEATURES

- 7 Incubator Buildings (25-55m)
- Open Source Release Hall & Code Wall
- Campus-Park-Block Slow Mobility
- Near-University Achievement Street
- Talent Services & Residence

Dazhongsi AI Industry Cluster

72.0 ha | 19.5% of key areas

Urban-type intelligent economy
& international exchange block

KEY DESIGN FEATURES

- 5 Industry Complex Buildings (60-120m)
- Dazhongsi Station 4-Quadrant Integration
- International Road Show Living Room
- Intelligent Agent & Terminal Display
- Data Element & Digital Asset Hub

TWO WINGS:

Zhongguancun Technology Service Wing

Xiaoyuehe Scenario Empowerment Wing

Key Metrics & Indicator Table

Recalculation from Provisional Geometry · Source: metrics.json

11.4 km²

Overall Design Scope

3,692,893 m²

Total Key Areas

18

Buildings

12

AI Scenario Cards

25%

Green Ratio (Target)

8%

Public Space Ratio (Target)

Metric Name	Value	Unit	Confidence	Source File
site_area_sqm	11,412,825	sqm	medium	site_boundary.geojson
key_areas_total_sqm	3,692,893	sqm	medium	key_areas.geojson
zhongzhiyuan_area_sqm	1,921,000	sqm	medium	key_areas.geojson
ai_origin_community_sqm	1,043,000	sqm	medium	key_areas.geojson
dazhongsi_sqm	720,000	sqm	medium	key_areas.geojson
green_ratio_current	0.1234	ratio	medium	green_space.geojson
green_ratio_target	0.25	ratio	low	Design target
public_space_ratio	0.0733	ratio	medium	public_space.geojson
building_footprint_sqm	310,807	sqm	medium	buildings.geojson
building_count	18	count	high	buildings.geojson
max_building_height_m	160	m	medium	buildings.geojson
retain_ratio	35%	%	estimated	Design estimate
renovate_ratio	40%	%	estimated	Design estimate
demolish_ratio	25%	%	estimated	Design estimate
scenario_count	12	count	high	proposal.md
persona_count	6	count	high	proposal.md
industry_test_scenarios	4	count	high	proposal.md
landmark_count	3	count	high	proposal.md
phasing_phases	3 (2026-2040)	periods	high	phasing.geojson

Confidence levels: high = directly from geometry/proposal; medium = provisional geometry estimate; low/estimated = design target pending official data. All metrics pending recalculation upon official boundary release.

Source: metrics.json | Recalculation: scripts/spatial_review.py

[01] 01 Open Source Release Hall ▣ Beijing AI Origin Community Audience: Universities, open source comm Achievement release, code contribution display, small road show spaces; multilingual live broadcast; anonymized aggregated data	[02] 02 Security Governance Sandbox ▣ Zhongzhiyuan Audience: Regulatory agencies, enterpris Standard formulation, security evaluation, model red team testing as visitable nodes; all test data desensitized	[03] 03 Edge Computing Station ▣ Overall Design Scope Nodes Audience: Startups, developers, public s Combined with public services & low-carbon energy as new infrastructure prototype; computing power publicly auditable
[04] 04 AI Slow-Mobility Navigation ▣ Jingzhang Heritage Park Belt Audience: All citizens, tourists, person Explainable guidance & low-intrusion sensing for slow-mobility▣▣ identification; no individual trajectory tracking	[05] 05 Dazhongsi Int'l Road Show Living Room ▣ Dazhongsi AI Industry Cluster Audience: Intelligent agents, intelligen Display, negotiation, media release & international exchange; simultaneous interpretation & virtual exhibition halls	[06] 06 Qinghe Low-Carbon Innovation Corridor ▣ Zhongzhiyuan Qinghe Waterfront Audience: Park employees, citizens, stud Green space, rain flood management, cycling & AI display as public living room; water quality & carbon sink data display
[07] 07 Near-University Achievement Street ▣ Beijing AI Origin Community Audience: University students/faculty, e Incubation, display, legal affairs, IP & investment services; transaction data requires authorization	[08] 08 Data Element Living Room ▣ Dazhongsi Area Audience: Data traders, enterprises, reg Data element & digital asset circulation urban service interface; no raw data display; compliance & auditability	[09] 09 AI Life Service Model Street ▣ Community & Commercial Intersections Audience: Elderly, children, office work AI+ healthcare, education, legal & life services in small-scale block space; service records not for commercial recommendation
[10] 10 Global AI Activity Week Route ▣ One-Belt Public Space System Audience: Developers, enterprises, media Walkable experience route from heritage culture → open source community → industry display → international road shows	[11] 11 Smart Parking Guidance System ▣ Overall Design Scope Road Network Audience: Drivers, non-motor vehicle rid Real-time parking & charging pile status; no license plate or trajectory recording	[12] 12 AI Barrier-Free Guide ▣ Jingzhang Heritage Park & Rail Stations Audience: Persons with disabilities, eld Multimodal interactive guide (voice, tactile, visual); user preferences stored locally, not uploaded to cloud

NEAR-TERM PILOT

2026 – 2030

KEY PROJECTS

- JZ-01: Jingzhang Heritage Park Slow-Mobility Breakpoint Stitching
- JZ-03: Origin Community Near-University Achievement Transformation Street
- JZ-06: Global AI Activity Week Public Route (pilot events)
- Lightweight facilities & service platforms initiation
- Public space permits & safety review for pilot activities

FOCUS:
Focus: Quick-win public space improvements, pilot AI scenarios, and community engagement activities.

MID-TERM RENEWAL

2031 – 2035

KEY PROJECTS

- JZ-02: Zhongzhiyuan Qinghe Innovation Interface
- JZ-04: Dazhongsi Station Four-Quadrant Pedestrian Connectivity
- JZ-05: AI Public Service & Edge Computing Nodes
- Building renovation & selective new construction
- Rail transit station integration at 5 stations

FOCUS:
Focus: Major urban renewal projects, infrastructure build-out, and AI service node deployment.

LONG-TERM GOVERNANCE

2036 – 2040

KEY PROJECTS

- Full three-zone detailed design implementation
- Long-term AI governance & operation mechanisms
- Full blue-green system completion
- International communication & brand establishment
- Continuous recalibration with official regulatory plan

FOCUS:
Focus: Governance frameworks, long-term operation, and alignment with statutory planning.

❏ DEPENDENCY NOTICE: All projects require official regulatory plan, property rights survey, and municipal approvals before implementation.
