

# Jingzhang AI Symbiotic Corridor

A Future City Where Century-Old Railway Meets AI Innovation

Proposal: Jingzhang AI Symbiotic Corridor

Submission: haidian-agent · Jingzhang AI Vision

Date: 2026-08-11

Tracks: AI Traffic · Enterprise Ecosystem · Civic Governance

Beijing Municipal Planning and Natural Resources Commission · Haidian Branch

# Table of Contents

1

总图 / Design Overview

2

三级范围框架 / Three-Level Scope Framework

3

整体空间结构 / Overall Spatial Structure

4

重点片区·中智公园 / Key Area 1 · Zhongzhi Park

5

重点片区·AI原点社区 / Key Area 2 · AI Origin Community

6

重点片区·大智虹寺 / Key Area 3 · Dazhongsi

7

AI创新生态 / AI Innovation Ecosystem

8

AI+场景 / AI+ Scenarios

9

交通与蓝绿网络 / Transport & Blue-Green Network

10

公共空间与地标 / Public Spaces & Landmarks

11

分期与实施 / Phasing & Implementation

12

指标与合规 / Metrics & Compliance

13

风险与附录 / Risk & Appendix

# Design Overview

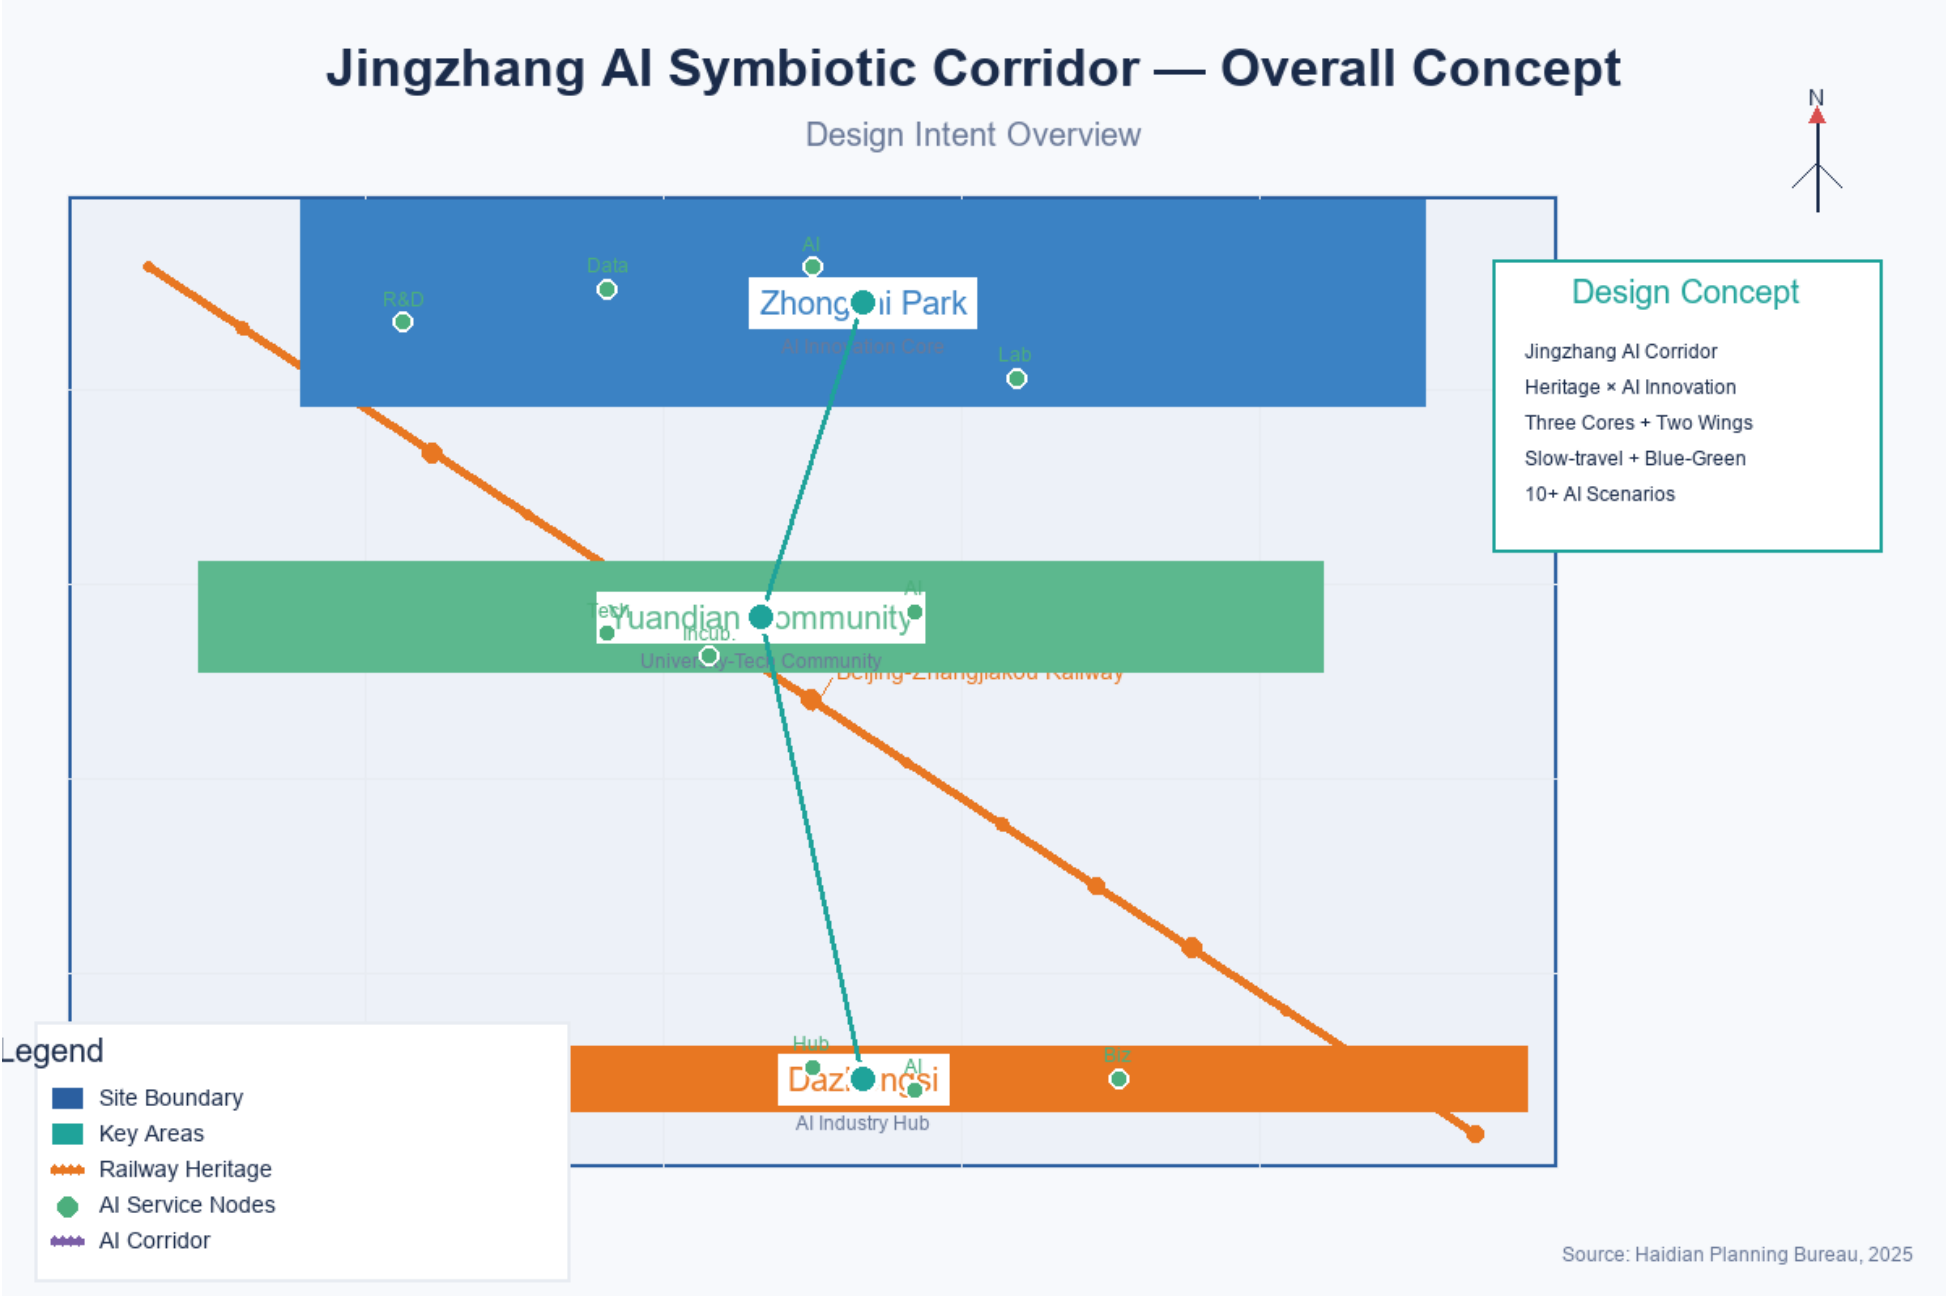

Figure 1 | Site Overview and Location Analysis

## Key Metrics

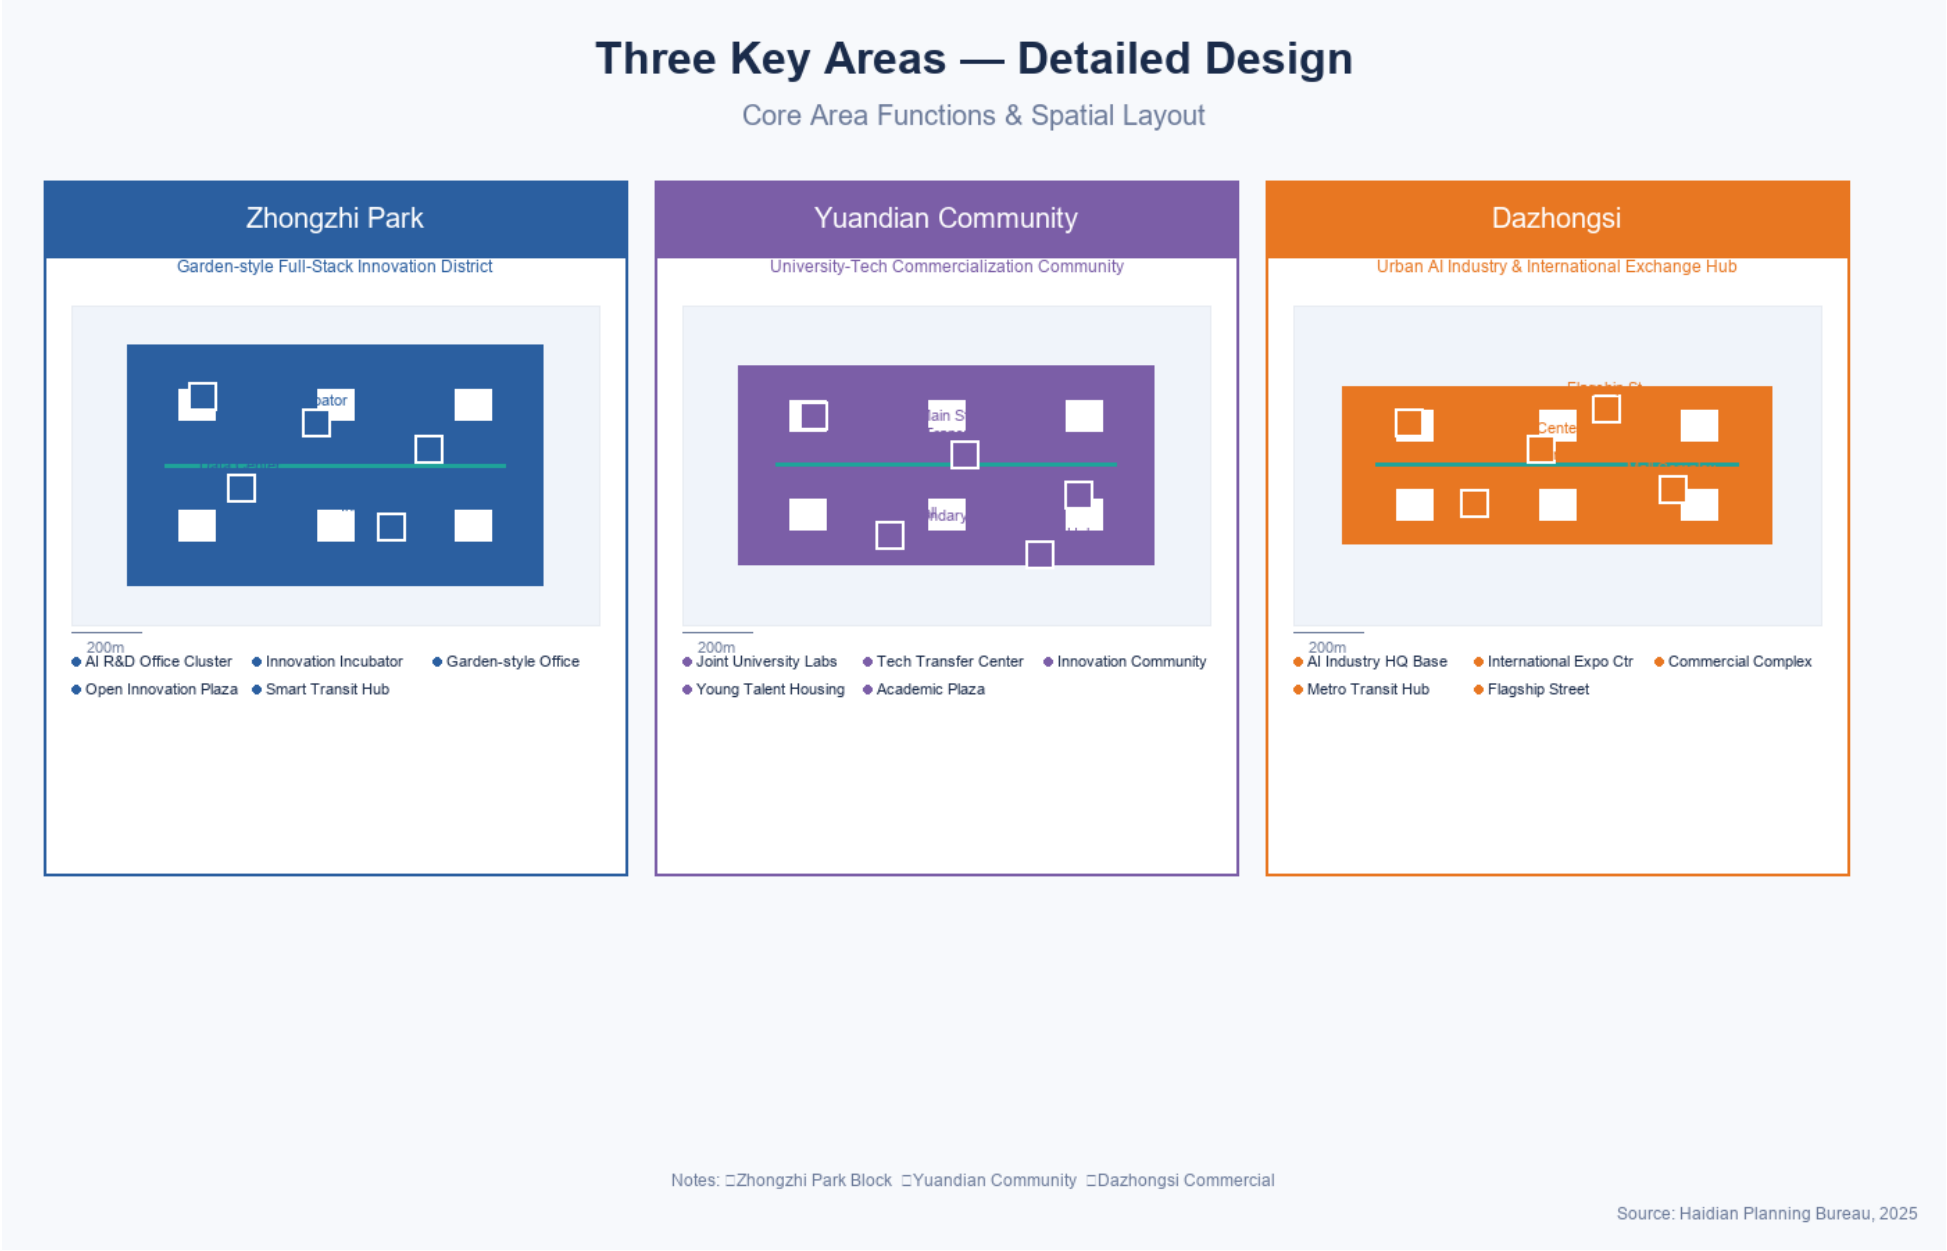

| Design Scope          | Key Areas | Green Ratio | Public Space |
|-----------------------|-----------|-------------|--------------|
| ~11.4 km <sup>2</sup> | ~368.4 ha | ≥25%        | ≥15%         |

## Core Concept

Centered on the 'Jingzhang AI Symbiotic Corridor' concept, deeply integrating century-old Jingzhang Railway heritage, Zhongguancun innovation DNA, and cutting-edge AI technology into a world-class AI innovation ecosystem corridor.

Three pillars: □ National AI autonomous strategy core; □ China's AI open-source origin; □ Beijing HQ base for global AI enterprises.

# Three-Level Scope Framework

# Overall Spatial Structure

## "One Belt, Three Cores, Multiple Scenarios, Blue-Green Loop"

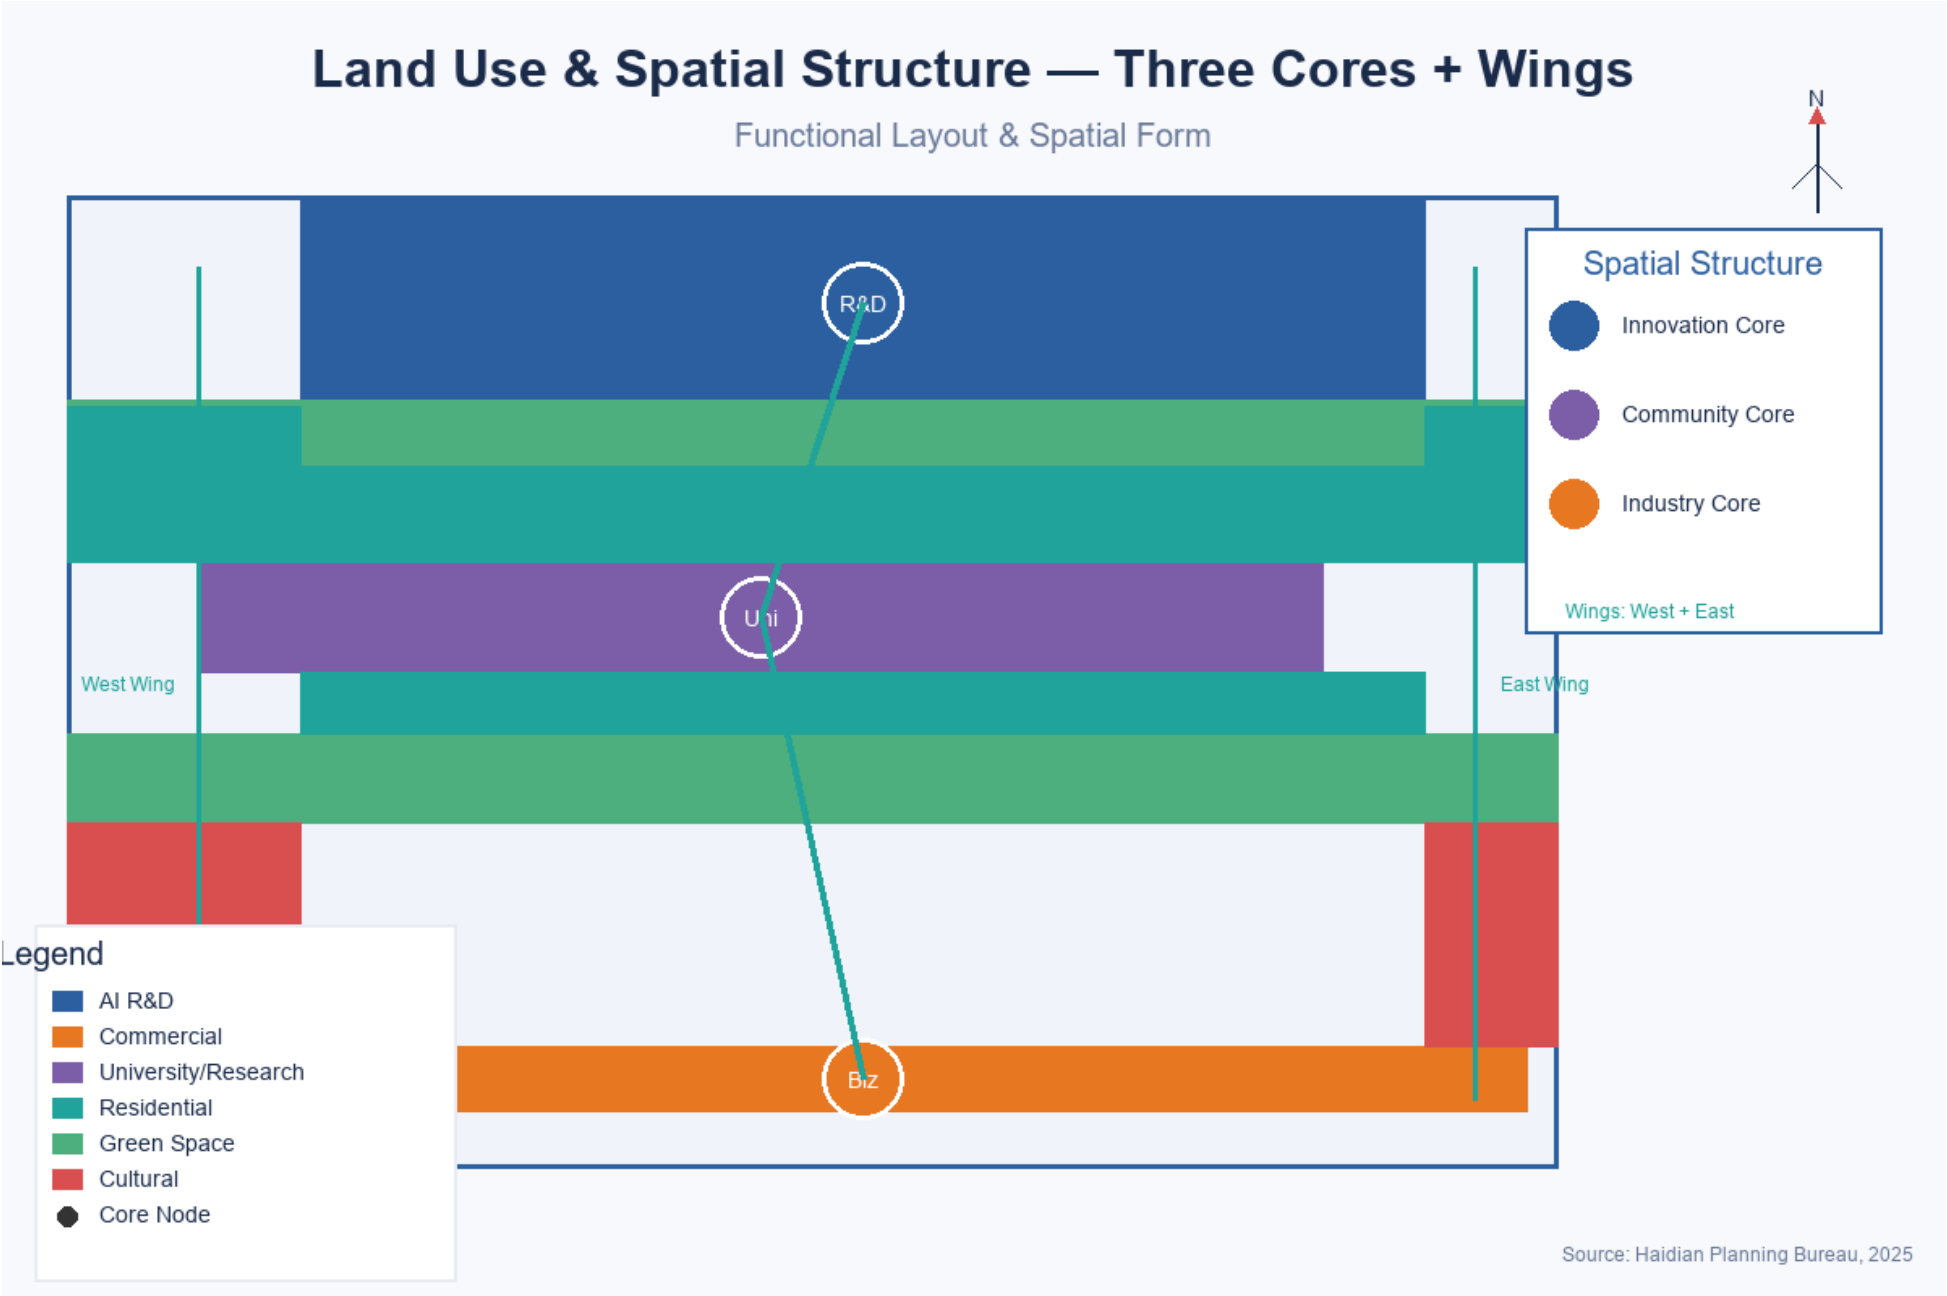

Figure 3 | Land Use and Spatial Structure

### Structure Description

One Belt: Heritage Park Vitality Belt (~140.9ha), north-south public space framework.

Three Cores: Zhongzhi Park (192.1ha) garden innovation; Origin Community (104.3ha) talent community; Dazhongsi (72.0ha) international exchange.

Multiple Scenarios: 12 AI service nodes.

Composite Loop: ~15km blue-green slow-travel system.

# Key Area 1 — Zhongzhi Park

## Garden-Style Full-Stack Autonomous Innovation Block

### Positioning

Core zone for national AI autonomous strategy, focusing on model testing, safety governance, low-carbon computing, and standard formulation.

### Spatial Actions

- Qinghe Interface: 1.2km innovation belt;
- Industry Spine: national AI testing platform;
- Low-Carbon Env: PV + geothermal;
- Transport: west cross-river bridge, east to North 5th Ring.

### Building Strategy

~60% retained, ~30% renovated, ~10% new. New buildings 24-36m.

### AI Scenarios

Autonomous model testing · AI safety governance · Low-carbon computing · Standard workshops

# Key Area 2 — AI Origin Community

## University-Near Incubation & Talent Community

### Positioning

Spiritual origin of China's AI open-source culture, focusing on open-source collaboration, achievement release, and university tech transfer.

### Spatial Actions

- Campus Connection: 800m corridor to Tsinghua;
- Release Core: Honor Wall + AI Hall;
- Talent Zone: apartments, school, clinic;
- Transformation Street: one-stop service.

### Building Strategy

~70% renovated, ~30% new. Retained modern buildings as commemorative spaces. New 18-24m.

### AI Scenarios

Open-source collaboration · Achievement release · Tech transfer · AI education · International residency

# Key Area 3 — Dazhongsi

## Urban Intelligent Economy & International Exchange Block

### Positioning

Beijing HQ base for global AI enterprises, focusing on agent display, AIGC, data elements, and international roadshows.

### Spatial Actions

- Station Integration: 4-quadrant connection ≤300m;
- Roadshow Living Room: NE quadrant;
- Data Elements Living Room: SW quadrant;
- Green space composite use.

### Building Strategy

~50% renovated, ~30% retained, ~20% new. 36-60m modern style.

### AI Scenarios

Agent & terminal display · AIGC experience · Data element circulation · International roadshows

# AI Innovation Ecosystem

## Benchmarking Eight Global AI Ecosystems

| Case                  | Core Features                        | Implications             |
|-----------------------|--------------------------------------|--------------------------|
| Silicon Valley        | University-industry-capital triangle | Embedded collaboration   |
| Tsukuba Science City  | Gov-led, research institutes         | Low-carbon AI community  |
| London Tech Quarter   | FinAI, sandbox                       | AI regulatory sandbox    |
| Station F Paris       | Startup campus                       | Ecosystem under one roof |
| Shenzhen AI Town      | Compute infrastructure first         | Edge computing nodes     |
| Zhongguancun AI       | Enterprise cluster                   | Dual-pole linkage        |
| Seattle AI Corridor   | MS/Amazon dual engines               | Blue-green AI corridor   |
| Singapore AI District | National strategy                    | AI-enabled city          |

**Key Insights:** □ **Physical proximity;** □ **Deep open-source culture;** □ **Balance of regulation;** □ **Branded operations.**

# AI+ Scenarios

## 12 AI Scenario Cards

### Scenario Card 01 · Open-Source Release Hall

Location: □□□□□□ / Origin Community core

### Scenario Card 02 · Safety Governance Sandbox

Location: □□□□ / Zhongzhi Park central

### Scenario Card 03 · Edge Computing Waystation

Location: □□□1□ / 1 per core + 500m nodes

### Scenario Card 04 · International Roadshow Living Room

Location: □□□□□□ / Dazhongsi NE quadrant

### Scenario Card 05 · AI Slow-Travel Navigation

Location: □□□□□□□ / Heritage Park full route

### Scenario Card 06 · Qinghe Low-Carbon Corridor

Location: □□□□□ / Zhongzhi Park west Qinghe

07 University-Near Transformation Street · 08 Data Elements Living Room · 09 AI Life Service Street · 10 Global AI Activity Week · 11 AI Public Security Center · 12 AI Heritage Digital Station

# AI+ Scenario Details

## Scenario Card 07 · University-Near Transformation Street

200m street along Qinghua East Road, 12 service types.

## Scenario Card 08 · Data Elements Living Room

SW Dazhongsi, compliant data circulation center.

## Scenario Card 09 · AI Life Service Street

Origin Community, AI health/education/legal services.

## Scenario Card 10 · Global AI Activity Week Route

~8km route, 10 interactive AI stations.

## Scenario Card 11 · AI Public Security Center

Underground Dazhongsi, safety monitoring and dispatch.

## Scenario Card 12 · AI Heritage Digital Station

Central Heritage Park, 3D digitization and restoration.

# Transport & Blue-Green Network

## Transit Integration · Slow-Travel · Blue-Green Corridors

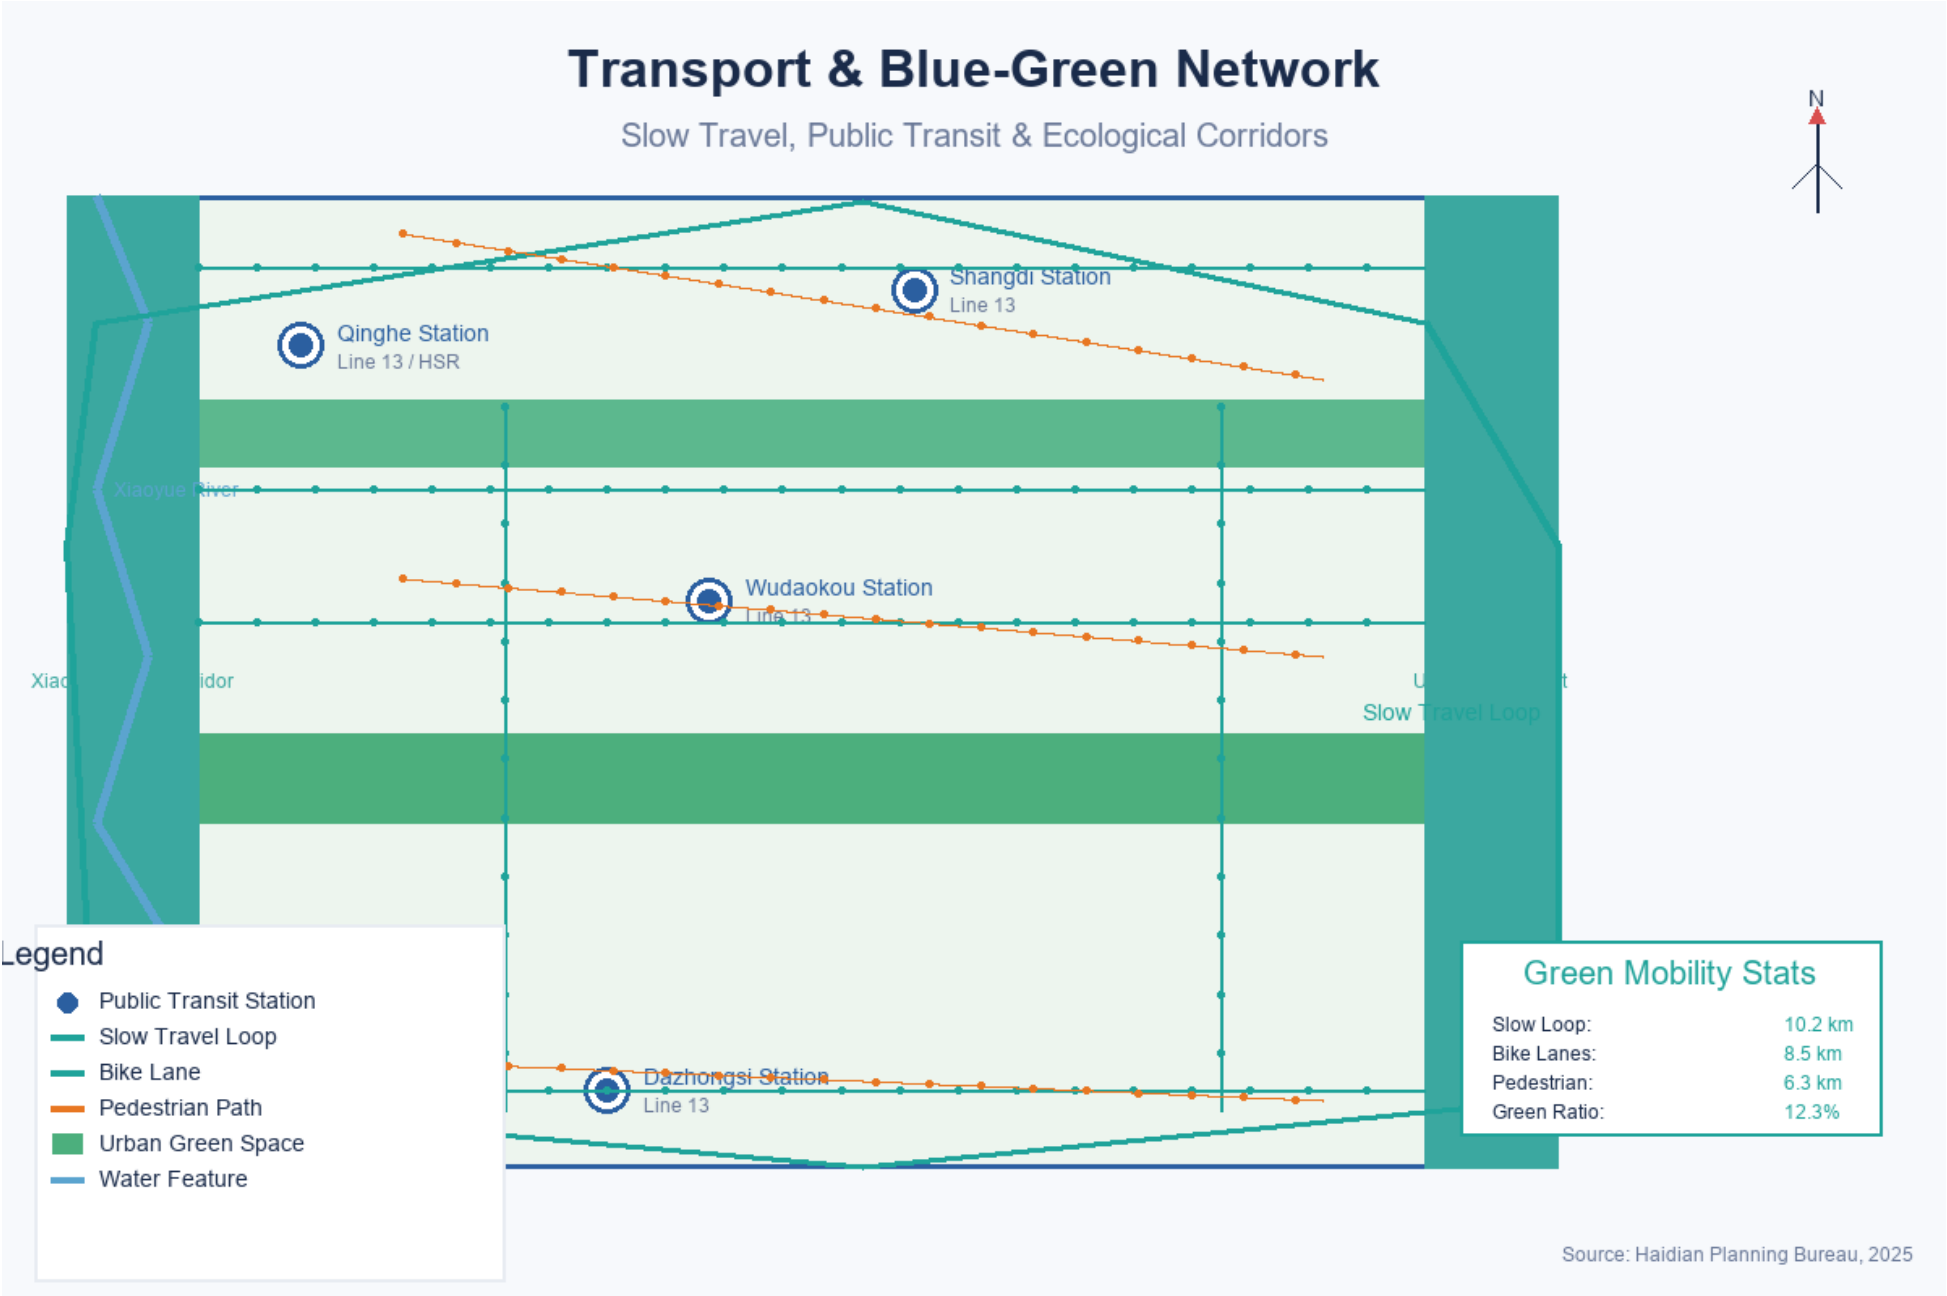

Figure 4 | Transport and Blue-Green Slow-Travel System

### Transport Organization

Transit Integration: Dazhongsi, Wudaokou, Qinghua East Road West as three hubs.  
Micro-Circulation: 20km/h slow-travel priority.  
Blue-Green Loop: ~15km continuous network.

### Blue-Green Space System

'One corridor, three parks, multiple points' system. Heritage Park (140.9ha) as framework, pocket parks (≤300m radius). Green ratio ≥25%, public space ≥15%.

# Public Spaces & AI Pilgrimage Landmarks

## Spiritual Landmarks for Global AI Developers

### Landmark 1 · Jingzhang AI Memorial Tower

38m metal tower, twisted rail form symbolizing leap from historical rails to neural networks.

### Landmark 2 · Open-Source Contribution Honor Wall

60m LED wall with 100k code bricks showing global contributions in real-time.

### Landmark 3 · Global AI Milestone Corridor

200m corridor with 24 milestone sculptures representing AI history events.

### Three-Segment Cultural Narrative

□ Railway · Industrial Origin → □ Zhongguancun · Innovation DNA → □ Jingzhang AI Symbiotic · AI Civilization Future

# Phasing, Implementation & Operations

## Three-Phase Roadmap

### Near-Term (0-2 yrs) · Pilot Launch

Edge computing, wayfinding, honor wall pilot; first AI Innovation Week.

### Mid-Term (2-5 yrs) · Core Construction

Memorial Tower, Milestone Corridor, Qinghe interface, Dazhongsi connection.

### Long-Term (5-10 yrs) · Ecosystem Maturity

Public security center, data elements living room, heritage station; Innovation Week global top.

### Annual Operations

Spring · Open-Source | Summer · Innovation | Autumn · Culture | Winter · Future

# Metrics & Compliance

## Key Metrics Overview

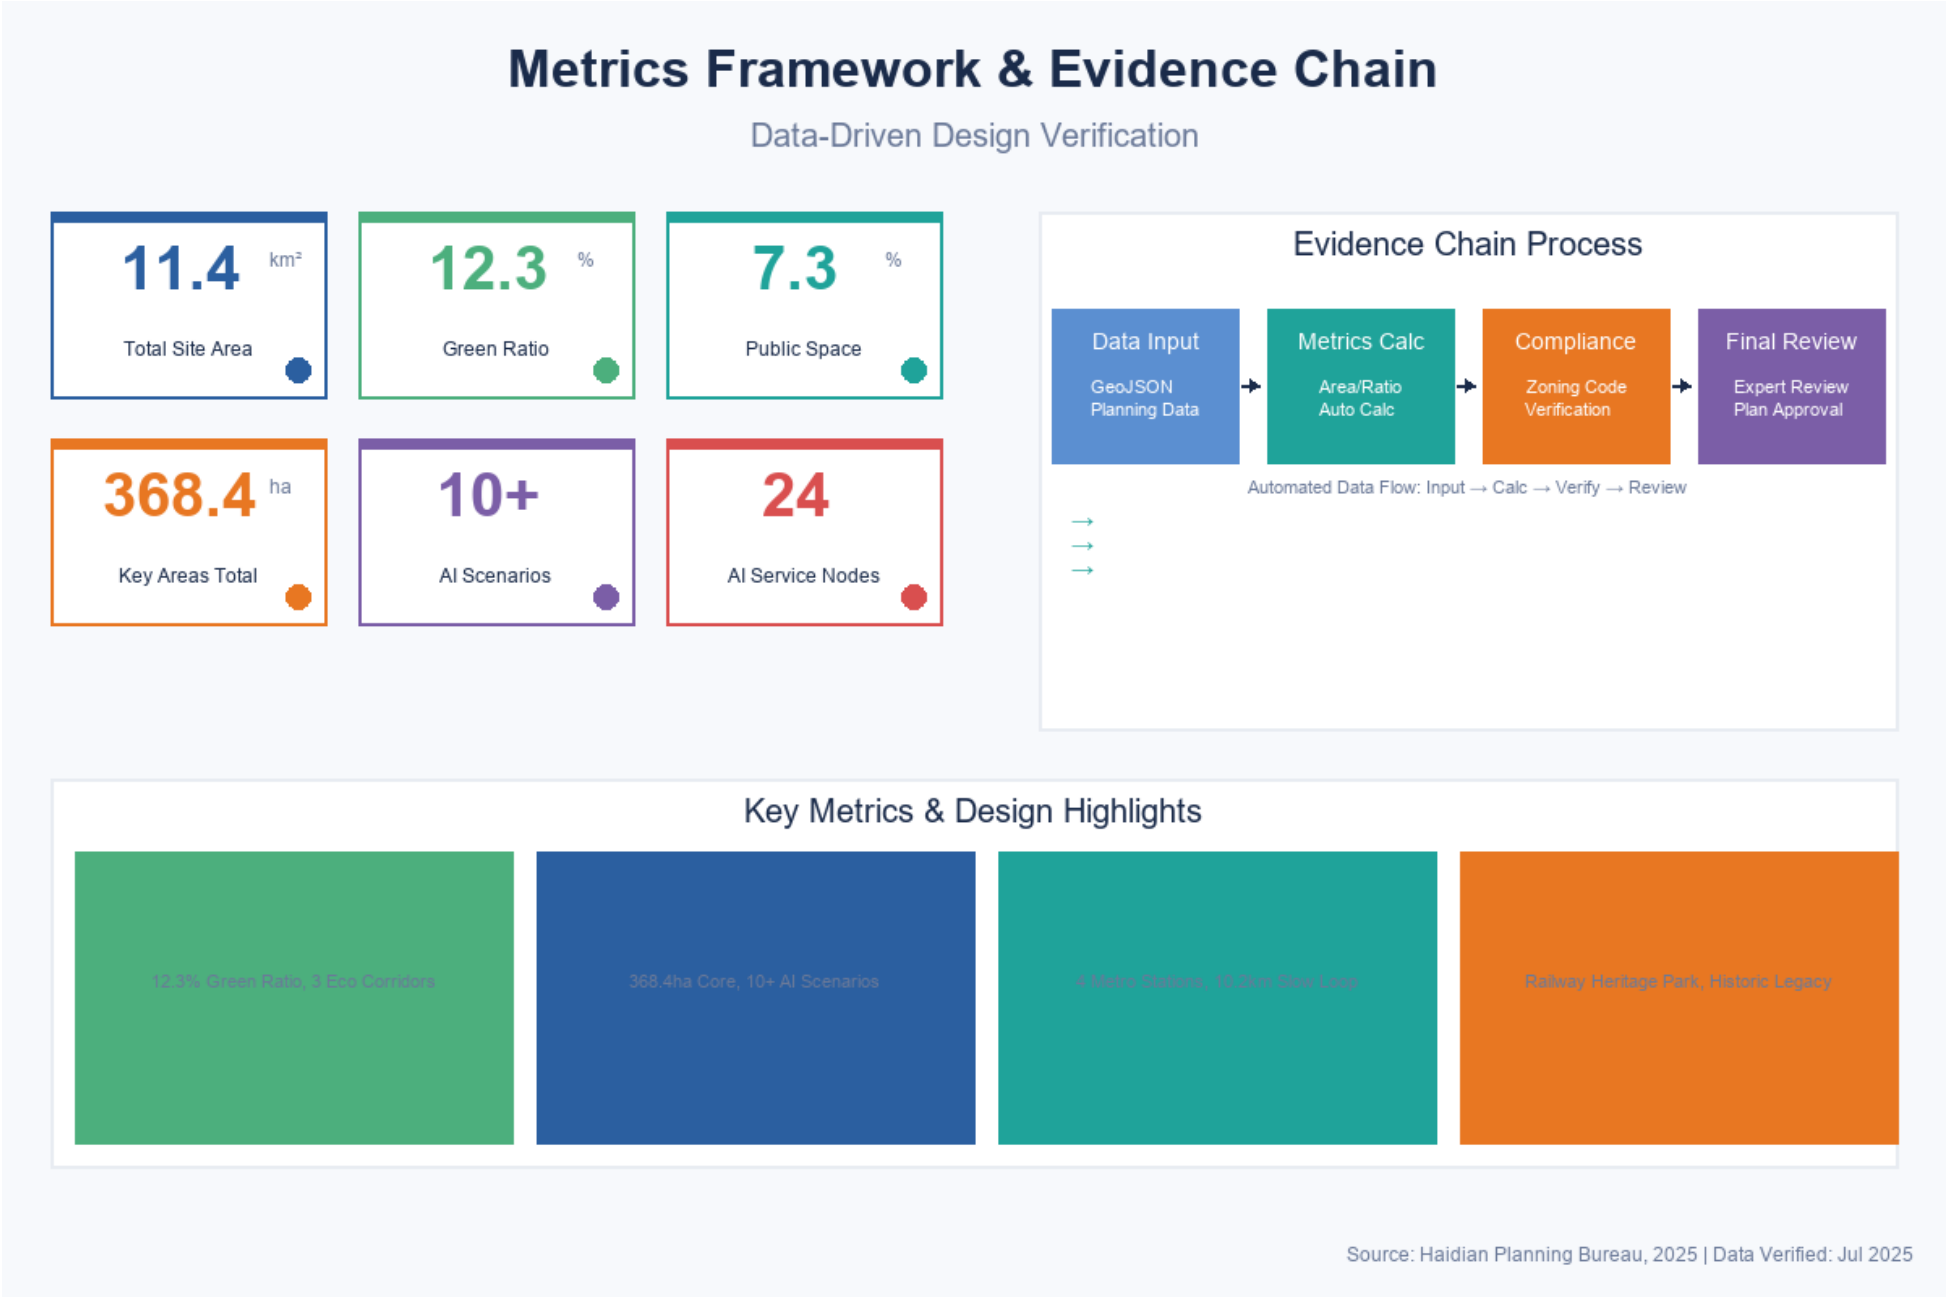

Figure 5 | Metrics Evidence Chain

| Category   | Metric                | Value          | Status   |
|------------|-----------------------|----------------|----------|
| Spatial    | Design scope          | ~11,412,825 m² | Known    |
| Spatial    | Key area total        | ~3,692,893 m²  | Known    |
| Spatial    | Green & open space    | ~2,589,339 m²  | Known    |
| Spatial    | Public activity space | ~836,346 m²    | Known    |
| Ratio      | Green ratio           | ≥25%           | Proposed |
| Ratio      | Public space ratio    | ≥15%           | Proposed |
| Operations | AI scenario nodes     | 12             | Designed |
| Operations | AI landmarks          | 3              | Designed |
| Operations | Annual events         | ~30            | Planned  |

# Risk, Appendix & Team Info

## Risks & Missing Data

Spatial data based on provisional boundary. Pending official confirmation: site boundary, FAR, building height, road redlines, building ownership, municipal utilities, heritage boundaries, traffic data.

## Copyright & Compliance

Main document in Chinese, translation in proposal.en.md. All image/data sources documented in sources.json.

## Non-Commitment Statement

This proposal is a design submission. No claim of official approval or guaranteed implementation.

## Team Info

Submission: haidian-agent (Trae AI Agent)

Model: Trae-Core-Ultra v1.0
