

BOUNDED SKY | Public Airspace Protocol

Bound public cost before releasing aerial capability

FIVE PUBLIC BUDGETS

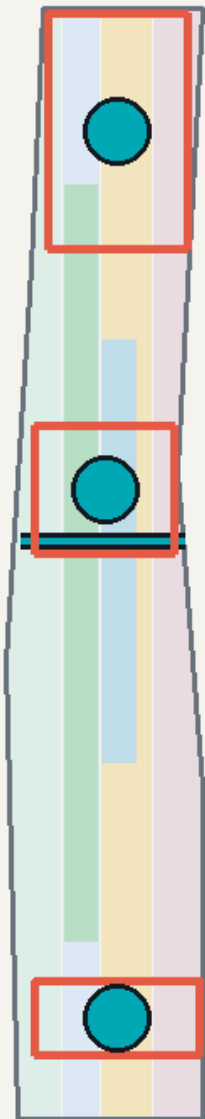

- Safety risk
- Quiet exposure
- Energy and carbon
- Ground occupation
- Public time

NOT A ROUTE | PERMIT | FIELD RESULT

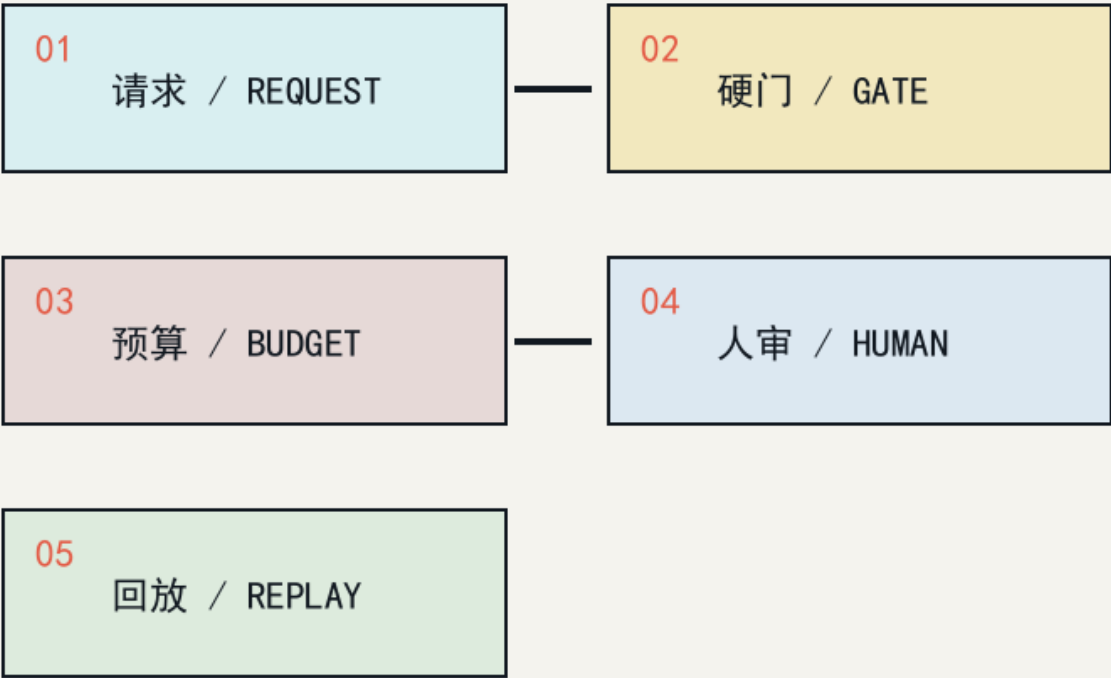

Provisional locator only; every yard can close, fall back, hear appeals, and replay decisions

ONE LINE · THREE CHAMBERS · FIVE LEDGERS · TWO WINGS

Space follows protocol; airspace yields to ground life

PUBLIC ALLOCATION LOOP

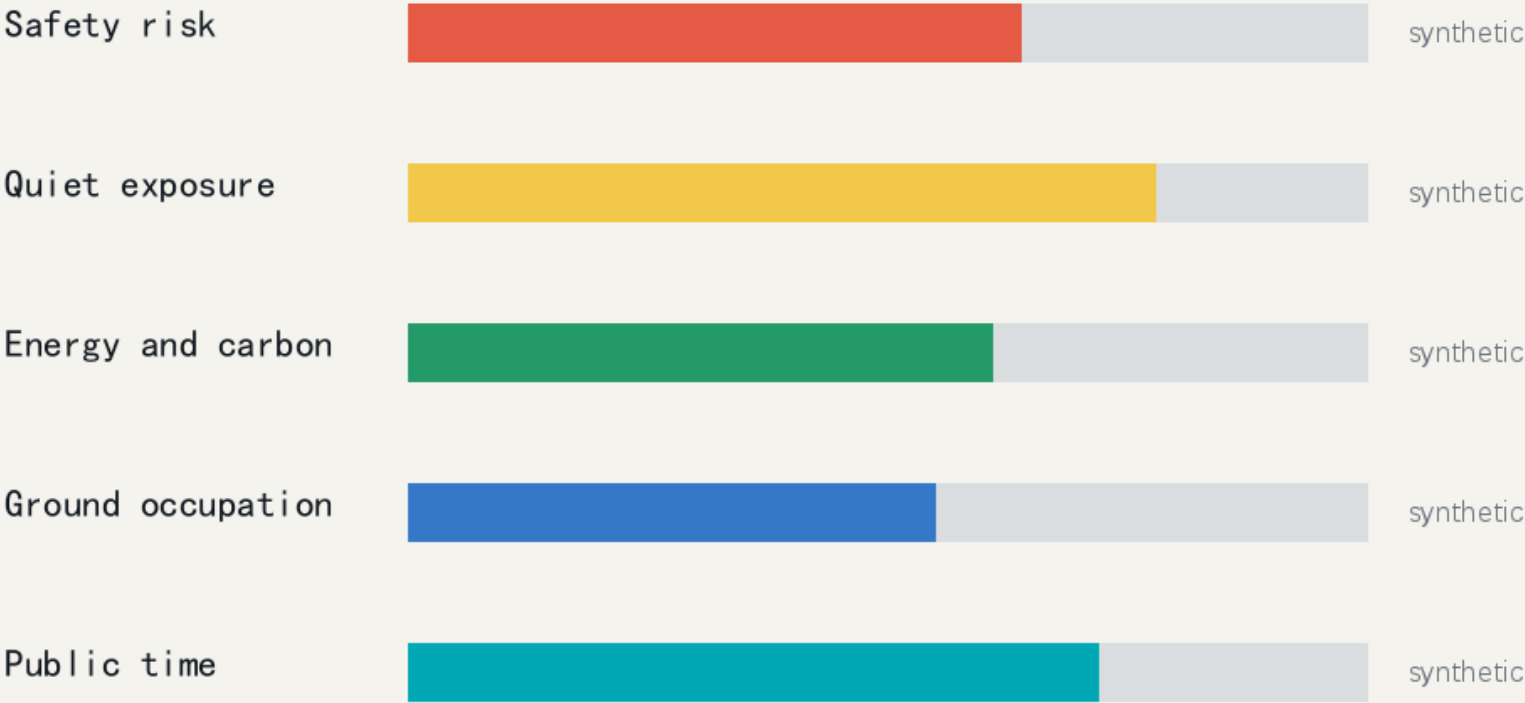

STOP > SCALE

East wing: research review | West wing: community, enterprise, and public service

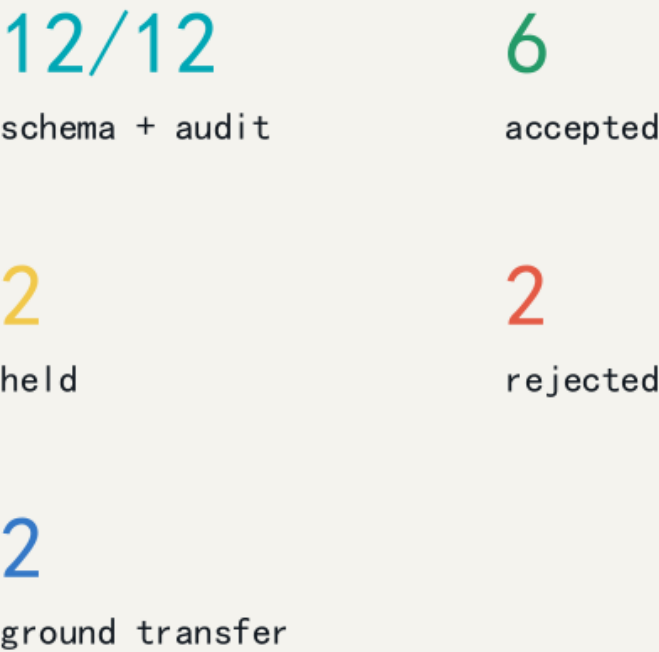

FIVE BUDGETS AND OFFLINE STRESS TEST

Success means the control branch worked, not that a flight succeeded

BUDGET LEDGER

12 TASK REPLAY

0 budget violations

4 in synthetic first-come counterfactual

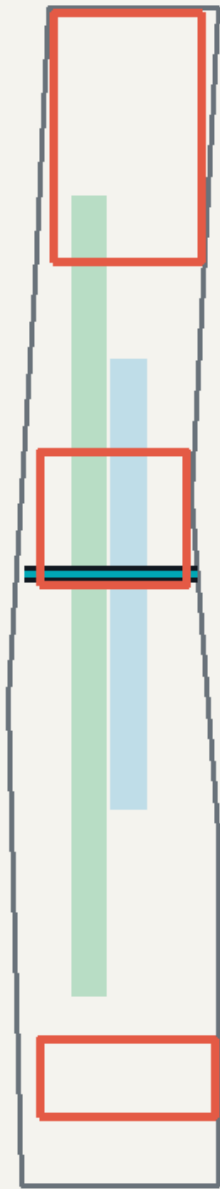

Normalized design-test units | not dB, incident rate, measured carbon, or authorized capacity

THREE KEY AREAS

Verification at Zhongzhiyuan, negotiation at AI Origin, city service at Dazhongsi; each chamber can close independently

THREE TEST YARDS, NOT AN OPEN CORRIDOR

Each chamber has its own gate, human owner, and exit condition

01	ZHONGZHIYUAN VERIFY	closed test · identity · takeover · removal	STOP_IF
02	AI ORIGIN NEGOTIATE	quiet time · fairness · appeal · replay	STOP_IF
03	DAZHONGSI SERVE	transit · staffed handover · ground fallback	STOP_IF

Altitude, route, equipment, and operation remain unauthorized

Aerial service must prove it does not displace ordinary city life

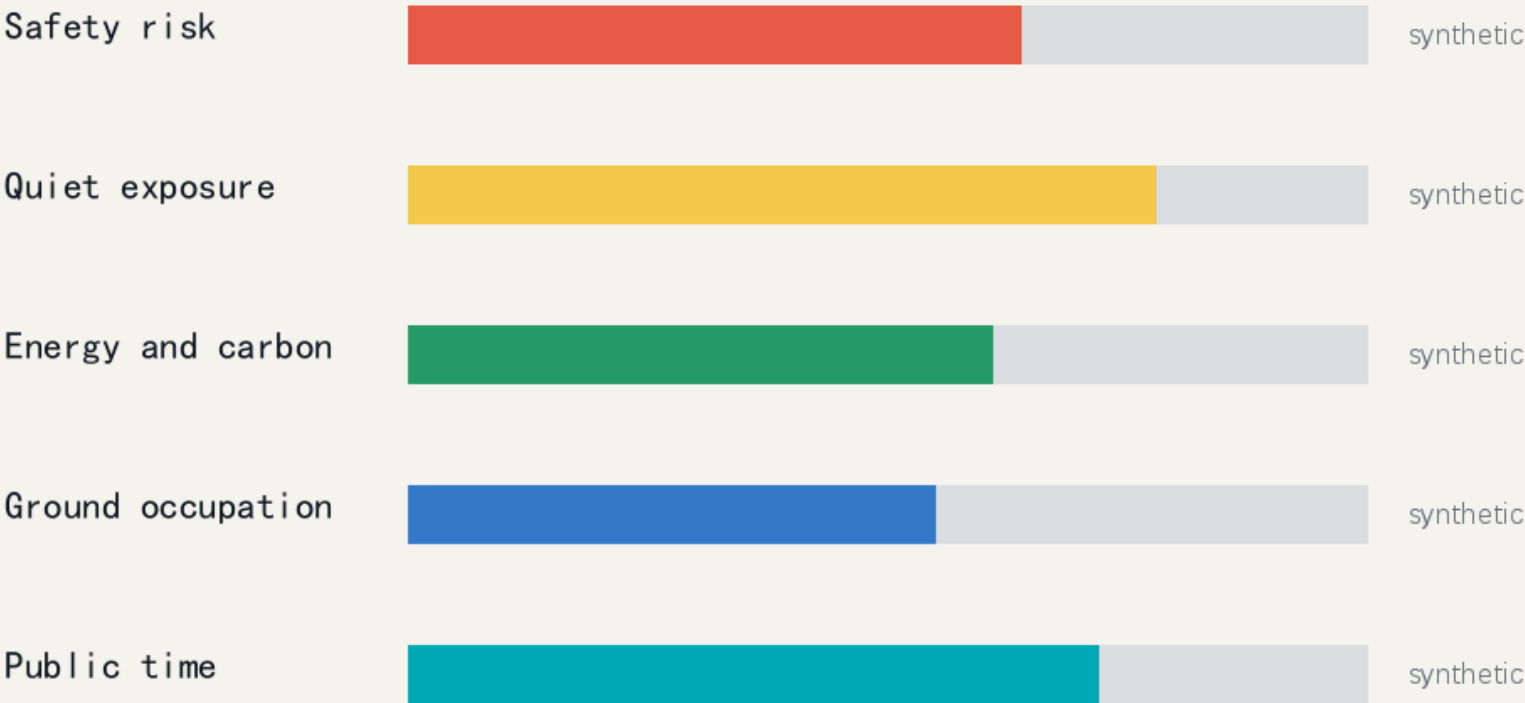

- NO GROUND FALLBACK = NO FLIGHT

Offline, closed interface, candidate authorized single-cell pilot, then cross-cell research; every phase may expand, narrow, or exit

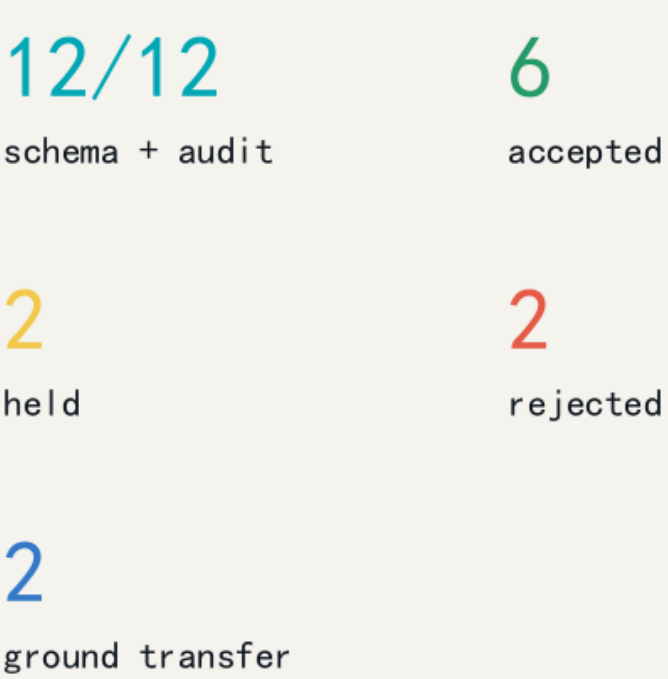

FIVE BUDGETS AND OFFLINE STRESS TEST

Success means the control branch worked, not that a flight succeeded

BUDGET LEDGER

12 TASK REPLAY

0 budget violations

4 in synthetic first-come counterfactual

Normalized design-test units | not dB, incident rate, measured carbon, or authorized capacity
