

Jing-Zhang Evidence Rail

P1 • Scope overview

Legend

- Design scope (provisional)
- JZ rail alignment
- Green (approx. corridor, prov.)
- Key-area boundary

Key metrics

Design scope $\approx 11.41 \text{ km}^2$ (provisional)

Corridor $1.44 \times 10.49 \text{ km}$ (aspect 0.14)

Three Key Areas geometry: Zhongzhiyuan / AI Origin / Dazhongsi (geometry-recomputable)

Three key areas

Zhongzhiyuan

Cultivation core • OPC/nano-co. capacity • JZ-07

AI Origin

Industry core • near-campus transfer • Origin Tower

Dazhongsi

Living core • residential • slow mobility first

Projects • Scenarios • Evidence • Brand

JZ-01~07 • 12 scenarios: JZ-01 JZ rail spine • JZ-02 Qinghe interface • JZ-03 AI Origin • JZ-04 Dazhongsi renewal • JZ-05 compute plant • JZ-06 public service • JZ-07 OPC capacity

Geometry-recomputable: site 11.41 km^2 • green 25.6% • public space 11.8% • three key-area geometry (matches submitted GeoJSON)

Evidence chain: GeoJSON → metrics → figures → self-check → recompute (designed for organizer authorization re-run)

Brand: Jing-Zhang Evidence Rail • Logo parallel double-line + three-nucleus open-node • 12 scenario names use innovation-area common vocabulary (not proprietary spatial prototypes)

Key: EBIP (evidence-based incremental participatory) • geometry-recomputable metrics • see proposal.md

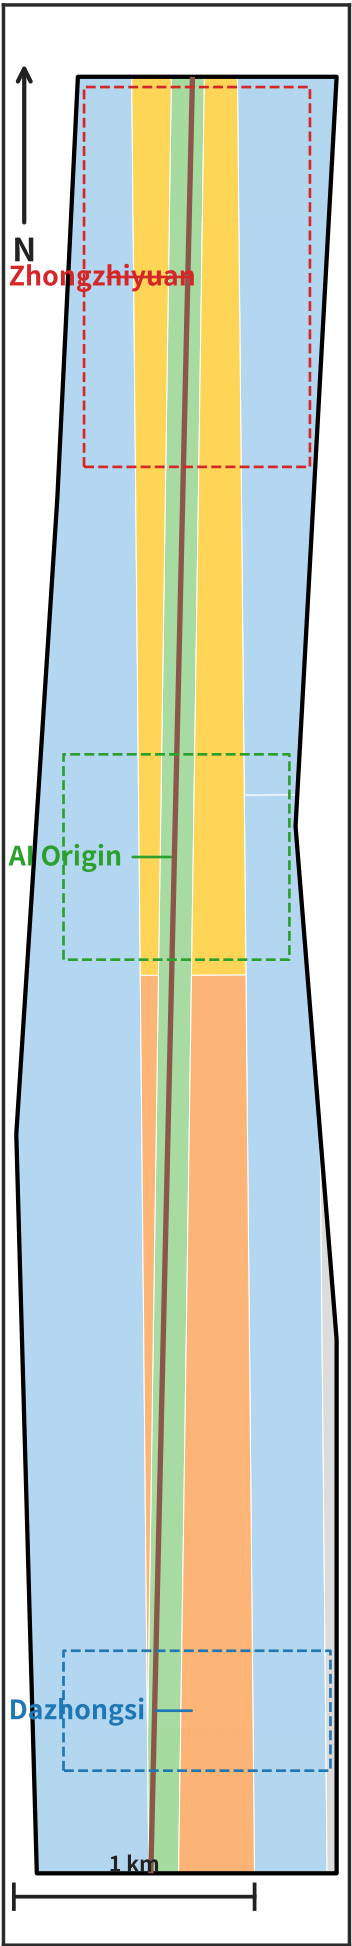

Basemap: original reference grid (no third-party map data)

License: pkg COMMUNITY-DISPLAY-ONLY • embedded Switchback Protocol spec CC-BY-4.0 (chucky1102), layered not mixed

Provisional geometry (non-official); organizer polygon to replace & recompute

Jing-Zhang Evidence Rail

P2 • Land-use structure

Legend

- R&D / industry 0802
- Green / blue-green 1401
- Commercial service 05
- Residential 07 (yellow)
- TBD (to be defined) 16
- JZ rail
- Key-area boundary

Key metrics

Land use (agent-inferred blocks, provisional)

0802 6.96km² • 1401 1.33km² • 05 1.47km² • 07 1.47km² • 16 0.18km²

Dominant: R&D/industry 0802 • residential 07 (yellow)

Legend: 5 codes • area by intersection with site geometry

Three key areas

Zhongzhiyuan
Cultivation core • OPC/nano-co. capacity • JZ-07

AI Origin
Industry core • near-campus transfer • Origin Tower

Dazhongsi
Living core • residential • slow mobility first

Projects • Scenarios • Evidence • Brand

JZ-01~07 • 12 scenarios: JZ-01 JZ rail spine • JZ-02 Qinghe interface • JZ-03 AI Origin • JZ-04 Dazhongsi renewal • JZ-05 compute plant • JZ-06 public service • JZ-07 OPC capacity

Geometry-recomputable: site 11.41 km² • green 25.6% • public space 11.8% • three key-area geometry (matches submitted GeoJSON)

Evidence chain: GeoJSON → metrics → figures → self-check → recompute (designed for organizer authorization re-run)

Brand: Jing-Zhang Evidence Rail • Logo parallel double-line + three-nucleus open-node • 12 scenario names use innovation-area common vocabulary (not proprietary spatial prototypes)

Key: EBIP (evidence-based incremental participatory) • geometry-recomputable metrics • see proposal.md

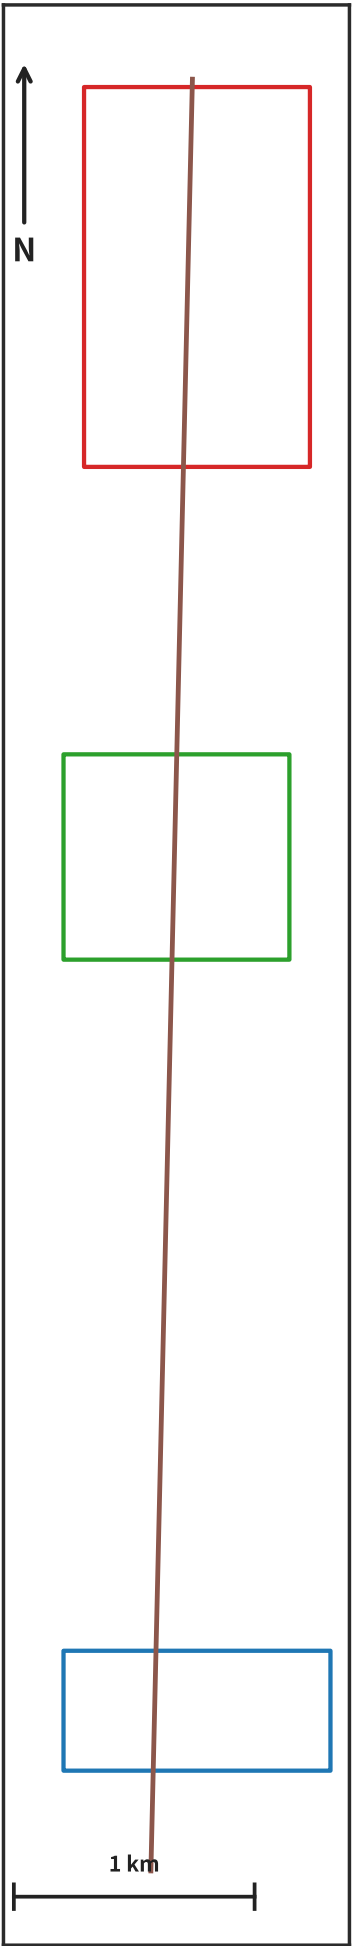

Basemap: original reference grid (no third-party map data)

License: pkg COMMUNITY-DISPLAY-ONLY • embedded Switchback Protocol spec CC-BY-4.0 (chucky1102), layered not mixed

Provisional geometry (non-official); organizer polygon to replace & recompute

Jing-Zhang Evidence Rail

P3 • Three key areas geometry

Legend

- Key-area boundary
- JZ rail

Key metrics

Three Key Areas geometry: Zhongzhiyuan / AI Origin / Dazhongsi (geometry-recomputable)

Coords: WGS-84 (matches submitted geometry)

Three key areas

Zhongzhiyuan

Cultivation core • OPC/nano-co. capacity • JZ-07

AI Origin

Industry core • near-campus transfer • Origin Tower

Dazhongsi

Living core • residential • slow mobility first

Projects • Scenarios • Evidence • Brand

JZ-01~07 • 12 scenarios: JZ-01 JZ rail spine • JZ-02 Qinghe interface • JZ-03 AI Origin • JZ-04 Dazhongsi renewal • JZ-05 compute plant • JZ-06 public service • JZ-07 OPC capacity

Geometry-recomputable: site 11.41 km² • green 25.6% • public space 11.8% • three key-area geometry (matches submitted GeoJSON)

Evidence chain: GeoJSON → metrics → figures → self-check → recompute (designed for organizer authorization re-run)

Brand: Jing-Zhang Evidence Rail • Logo parallel double-line + three-nucleus open-node • 12 scenario names use innovation-area common vocabulary (not proprietary spatial prototypes)

Key: EBIP (evidence-based incremental participatory) • geometry-recomputable metrics • see proposal.md

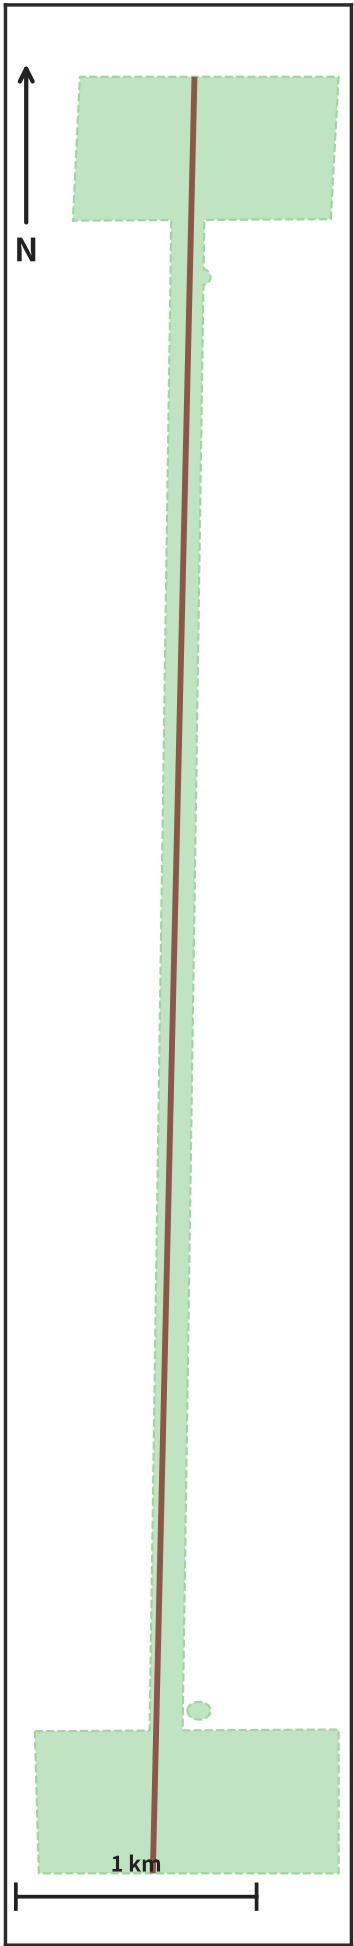

Basemap: original reference grid (no third-party map data)

License: pkg COMMUNITY-DISPLAY-ONLY • embedded Switchback Protocol spec CC-BY-4.0 (chucky1102), layered not mixed

Provisional geometry (non-official); organizer polygon to replace & recompute

Jing-Zhang Evidence Rail

P4 • Slow mobility blue-green (geometry-recomputable)

Legend

- Public space / green
- JZ rail

Key metrics

Blue-green network (geometry-recomputable): green / public / heritage-rail corridor

Walk-first + rail-anchored + bike network + shared feeder

Complete-street principle • continuous accessibility

Three key areas

Zhongzhiyuan

Cultivation core • OPC/nano-co. capacity • JZ-07

AI Origin

Industry core • near-campus transfer • Origin Tower

Dazhongsi

Living core • residential • slow mobility first

Projects • Scenarios • Evidence • Brand

JZ-01~07 • 12 scenarios: JZ-01 JZ rail spine • JZ-02 Qinghe interface • JZ-03 AI Origin • JZ-04 Dazhongsi renewal • JZ-05 compute plant • JZ-06 public service • JZ-07 OPC capacity

Geometry-recomputable: site 11.41 km² • green 25.6% • public space 11.8% • three key-area geometry (matches submitted GeoJSON)

Evidence chain: GeoJSON → metrics → figures → self-check → recompute (designed for organizer authorization re-run)

Brand: Jing-Zhang Evidence Rail • Logo parallel double-line + three-nucleus open-node • 12 scenario names use innovation-area common vocabulary (not proprietary spatial prototypes)

Key: EBIP (evidence-based incremental participatory) • geometry-recomputable metrics • see proposal.md

Basemap: original reference grid (no third-party map data)

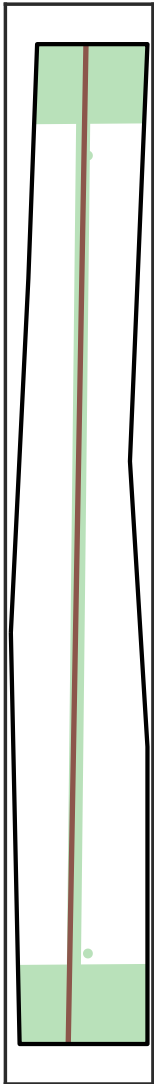

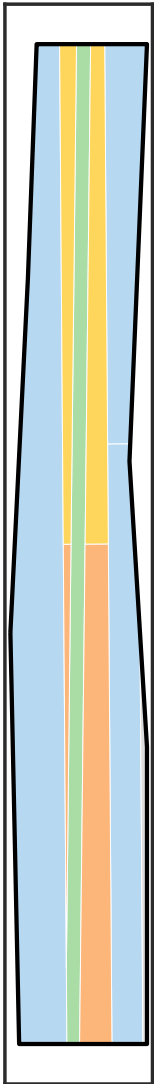

License: pkg COMMUNITY-DISPLAY-ONLY • embedded Switchback Protocol spec CC-BY-4.0 (chucky1102), layered not mixed

Provisional geometry (non-official); organizer polygon to replace & recompute

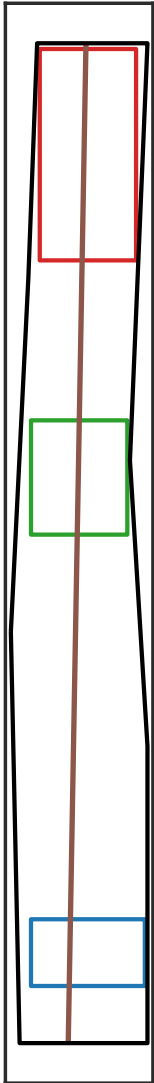

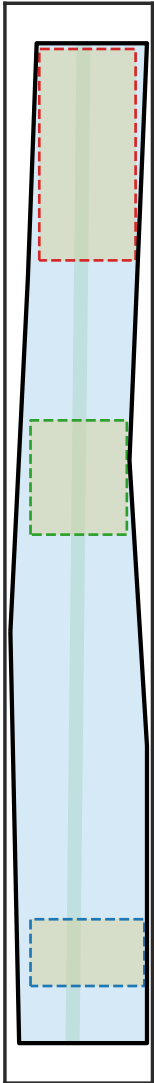

Jing-Zhang Evidence Rail

P5 • Evidence panel (geometry-recomputable • EBIP)

use structure (national codes, geometry-recomputable) • blue-green network (green/public/rail)

Phasing PHASE-1/2/3 (geometry-recomputable) • Three key areas geometry (retain/renovate/pending = design contract)

Evidence notes

Land-use structure

National land-use codes (0802/1401/05/07/16) area share, recomputed by intersection with site geometry; R&D/industry 0802 and residential 07 dominate.

Blue-green network

Union of green 1401 and public-space geometry + heritage-rail corridor; green ratio / public-space ratio are geometry-recomputable.

Three key areas

Zhongzhiyuan/AI Origin/Dazhongsi boundaries as design contract: retain / renovate / pending (recompute after organizer polygon released).

Phasing

PHASE-1 near-term / PHASE-2 mid-term / PHASE-3 long-term, pilot-first small-scale to avoid large demolition.

Reproducible metrics

Geometry-recomputable: site area / green ratio / public-space ratio / key-area & phasing geometry (no third-party POI/station data)

Evidence chain: GeoJSON → metrics → figures → self-check → recompute

Retain/renovate/pending = design contract (see JZ table)

Recompute: ltf0109/urban-planning-ai-kit (replay package GeoJSON locally)

Key: EBIP (evidence-based incremental participatory) • geometry-recomputable metrics • see proposal.md

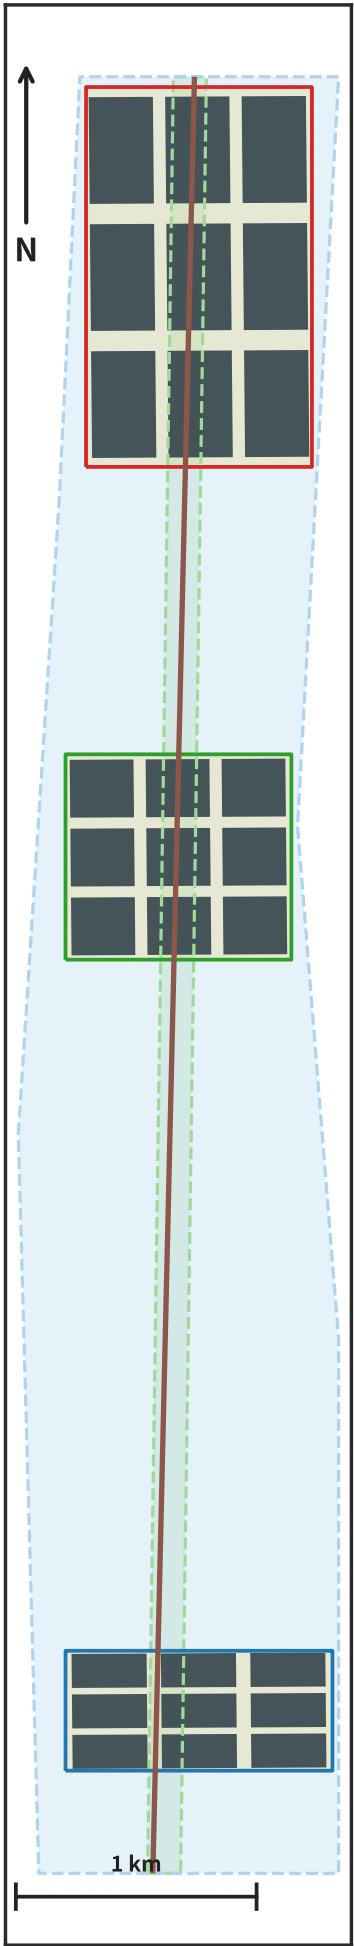

Basemap: original reference grid (no third-party map data)

License: pkg COMMUNITY-DISPLAY-ONLY • embedded Switchback Protocol spec CC-BY-4.0 (chucky1102), layered not mixed

Provisional geometry (non-official); organizer polygon to replace & recompute

Jing-Zhang Evidence Rail

P6 • Implementation figure-ground

Legend

- Building fabric (figure-ground)
- Near-term PHASE-1
- Mid-term PHASE-2
- Long-term PHASE-3
- Key-area boundary
- JZ rail

Key metrics

27 buildings (figure-ground approx., provisional)

Street network: schematic grid (original OSM data removed, v15)

Phasing: near-term PHASE-1 • mid-term PHASE-2 • long-term PHASE-3

Interfaces/breakpoints: building mass & street voids reveal block structure

Three key areas

Zhongzhiyuan

Cultivation core • OPC/nano-co. capacity • JZ-07

AI Origin

Industry core • near-campus transfer • Origin Tower

Dazhongsi

Living core • residential • slow mobility first

Projects • Scenarios • Evidence • Brand

JZ-01~07 • 12 scenarios: JZ-01 JZ rail spine • JZ-02 Qinghe interface • JZ-03 AI Origin • JZ-04 Dazhongsi renewal • JZ-05 compute plant • JZ-06 public service • JZ-07 OPC capacity

Geometry-recomputable: site 11.41 km² • green 25.6% • public space 11.8% • three key-area geometry (matches submitted GeoJSON)

Evidence chain: GeoJSON → metrics → figures → self-check → recompute (designed for organizer authorization re-run)

Brand: Jing-Zhang Evidence Rail • Logo parallel double-line + three-nucleus open-node • 12 scenario names use innovation-area common vocabulary (not proprietary spatial prototypes)

Key: EBIP (evidence-based incremental participatory) • geometry-recomputable metrics • see proposal.md

Basemap: original reference grid (no third-party map data)

License: pkg COMMUNITY-DISPLAY-ONLY • embedded Switchback Protocol spec CC-BY-4.0 (chucky1102), layered not mixed

Provisional geometry (non-official); organizer polygon to replace & recompute
