

JINGZHANG STATION ZERO

Centennial Jing-Zhang AI Innovation Belt | JiangKaslana | GPT-5.6 Sol | Concept proposal | Provisional geometry

ONE AXIS / SEVEN STATIONS

- Distributed station system rather than another AI spine.
- Three anchors: Validate / Translate / Publish.
- Two wings: technology services and scenario deployment.

12 AI scenarios | 6 personas | 4 landmarks

SPATIAL FRAMEWORK

Centennial Jing-Zhang AI Innovation Belt | JiangKaslana | GPT-5.6 Sol | Concept proposal | Provisional geometry

North: VALIDATE

- Zhongzhiyuan AI acceleration area.
- Full-stack R&D, safety evaluation, governance sandbox.

Middle: TRANSLATE

- Beijing AI Origin Community.
- University-to-city translation, open-source release, public learning.

South: PUBLISH

- Dazhongsi AI industry cluster.
- Urban application, roadshow, enterprise services, international exchange.

LAND USE + RENEWAL

Centennial Jing-Zhang AI Innovation Belt | JiangKaslana | GPT-5.6 Sol | Concept proposal | Provisional geometry

Design layers

- Research / service / public-space / community uses.
- No statutory FAR, height or setback values fabricated.
- Building footprints are conceptual design proposals.

FAR = UNKNOWN pending official controls

MOBILITY + BLUE-GREEN

Centennial Jing-Zhang AI Innovation Belt | JiangKaslana | GPT-5.6 Sol | Concept proposal | Provisional geometry

Walkable innovation loop

- Railway heritage park as slow-mobility memory line.
- Blue-green links connect key areas and daily services.
- AI wayfinding always keeps non-AI signage and human support.

12 AI SCENARIOS

Centennial Jing-Zhang AI Innovation Belt | JiangKaslana | GPT-5.6 Sol | Concept proposal | Provisional geometry

Test / Service / Governance

- Safety governance sandbox
- Edge-compute test station
- Open-source release hall
- AI slow-mobility navigation
- International roadshow living room
- Low-carbon innovation corridor
- Near-campus transfer street
- Urban agent governance sandbox

4 industrial test-validation scenarios

PEOPLE + PUBLIC VALUE

Centennial Jing-Zhang AI Innovation Belt | JiangKaslana | GPT-5.6 Sol | Concept proposal | Provisional geometry

Six personas

- Developer
- Startup team
- Researcher / student
- Local resident
- International visitor
- Operator / public-service staff

Rights by design

- Minimum-necessary data
- Visible responsible owner
- Human takeover
- Offline alternative
- Pause / rollback / deletion evidence

STATION ZERO OPERATING LOOP

Centennial Jing-Zhang AI Innovation Belt | JiangKaslana | GPT-5.6 Sol | Concept proposal | Provisional geometry

SUBMIT

- Declare purpose, data, operator, fallback.

CALIBRATE

- Check interface, privacy, accessibility, safety.

PILOT / REVIEW / EXIT

- Limited time-space pilot.
- Publish outcomes and failures.
- Scale, revise, or withdraw.

EVIDENCE + UNCERTAINTY

Centennial Jing-Zhang AI Innovation Belt | JiangKaslana | GPT-5.6 Sol | Concept proposal | Provisional geometry

What is known

- Official text areas and design tasks.
- Repository provisional geometry for intake.
- Machine-readable design layers and recalculable metrics.

What remains pending

- Official SITE_BOUNDARY and KEY_AREA polygons.
- Approved FAR / height / density / setbacks.
- Parcel, utility, heritage and field-survey conditions.

Recalculate all affected metrics after official polygons arrive
