

JINGZHANG GROWTH MESH

An AI talent and
enterprise community
from park to city to
network

Falsifiable delivery brief

Location interfaces form a multi-anchor network; six agents compile problems into projects while four human gates control release and exit.

Health check

Action: seven checks and problem/resource lists
Evidence: E0 public sources + E3 field tasks
Stop: no baseline, survey only; no project

Planning

Action: locate 15 projects in axis/cores/wings
Evidence: shared GeoJSON, plan and sections
Stop: no works before boundary/fire sign-off

Operation

Action: 12 scenarios + WP0-WP6 + 90 days
Evidence: contracts, logs, reproducible sheets
Stop: step back without owner/demand/cost

Originality

Difference: occupancy/dashboards do not replace projects
Kernel: six agents + four human gates + local adapters
Falsify: any F1-F4 failure steps back/exits

Public interest

Action: resident co-sign and affordable service
Evidence: ≥2 residents, ≥20% hours, appeals
Stop: veto if the non-AI route closes

Limit

Output: continue/adjust/step-back/exit advice
Duty: human sign-off with dissent retained
Deny: AI replacing professional/government acts

Operating scheme and project-contract map

A five-level duty chain binds service catalogues, public duties, accounts, acceptance evidence and stop gates to three first contracts.

OPS-A1 OPERATIONS AND PROJECT CONTRACTS

Space is governed by who provides what, who pays, what counts as completion and when a service stops.

A | ANNUAL SERVICE CATALOGUE AND SEPARATE ACCOUNTS

SERVICE	PUBLIC DUTY	OPERATING INCOME	COST ACCOUNT	MINIMUM EVIDENCE / STOP GATE
Shared verification lab	inclusive hours / safety	equipment + task service	equipment / sign-off / insurance	structure and fire sign-off; suspend until incident closure
Open-source lounge / night school	non-purchase seats / community time	membership + course + F&B share	curation / tutor / noise	repeat projects and sessions; reduce hours after nuisance
First-order enterprise service	problem catalogue / transparent fee	professional + event service	compliance / match / venue	dual-signed demand; delist undisclosed conflicts

B | MINIMUM PROJECT CONTRACT FIELDS — APPLIES TO ALL 15 PROJECTS

Operating account = space + equipment + professional services + events – staff – energy – maintenance – insurance – public-service floor.

Non-binding operating model; legal entities, amounts, rent, investment and procurement require formal authority and market inquiry.

PROVISIONAL CONSTRAINT | CONCEPT PLAN | PROFESSIONAL VERIFICATION REQUIRE

District-health evidence grades

Grade evidence before survey, design or stop decisions; inference never impersonates field fact.

E0 | 已公开

Jingzhang planning: about 9 km, complex crossings and multiple actors; AI belt: about 37 km², three zones/two wings and a 1-2 km interface. Sources: official planning records

E1 | 临时派生

Provisional GeoJSON and public records derive the three-core service chain, six seams and 15 located projects for option comparison only—not rights, works, capacity or cost.

E3 | 现场待核

Measure buildings, structure/fire, rights, flows, access, user demand, operating cost and maintenance. Each needs a raw record, owner, date and sign-off state.

Problem → task

Structure/fire create professional surveys; mobility creates walks/counts; service gaps create interviews; rights conflicts create negotiation registers. None directly creates works.

Task → project

Only a named problem owner, spatial object, cause, resource, operator, acceptance evidence and stop condition permit reserve status; otherwise return.

Deny / stop

Incomplete E3 cannot generate permanent works, totals, field outcomes or government conclusions; conflict, uncontrolled risk, no demand or no public value triggers step-back/exit.

Multi-agent urban-renewal control plane

AI planning value is not faster imagery; it makes evidence, project contracts, public safeguards and exit decisions traceable.

Location, innovation anchors and regional interfaces

The location dividend comes from interface density among research, transit, services and public realm—not a larger footprint.

MAP-A1

REGIONAL POSITION AND INNOVATION ANCHORS

A continuous innovation belt linking universities, institutes, transit and three differentiated cores.

Base map © OpenStreetMap contributors, ODbL; anchors checked against official public sources; provisional constraint.

Official scope facts

Approx. 37 km² coordination area; about 9 km heritage corridor; 1–2 km urban interface.

Innovation density

Public sources identify 2,000+ AI enterprises and a dense university–research–enterprise talent network.

密集网络。

Public-realm base

Underground high-speed rail releases ground space for a north–south green and heritage corridor.

Planning response

Z: verification; O: incubation; D: first orders; west service wing and east testbed wing.

Legend: □ university/research ○ transit • three cores □ Jingshang axis

PROVISIONAL CONSTRAINT | CONCEPT PLAN | PROFESSIONAL VERIFICATION REQUIRE

Problem evidence and health-check grades

E0 public evidence, E1 inference and E3 field tasks remain separate; every problem has a survey and stop gate.

MAP-A2

URBAN HEALTH CHECK: PROBLEMS REQUIRE EVIDENCE

Official text, public imagery and provisional geometry are graded separately; unknowns remain field tasks.

E0 官方现状证据 | 轨道13号线与京张高铁多次变化竖向关系

规划解读明确指出：纵横交错、堵点断点、横向道路复杂交点、权属主体多，需要分段实施。

E0 公开实施图：横向慢行补链

E0 公开产业图：原点社区密集锚点

- P1

Complex horizontal and vertical movement
Official evidence: Line 13, cross streets, bottlenecks and breaks.
Action: surveyed node sections before dimensions.

E0
- P2

Multiple rights and delivery actors
Railway, universities, institutes, districts and communities.
Action: bind coordination, delivery, operation and acceptance.

E0
- P3

One solution cannot fit all segments
Official material confirms varied functions and demands.
Action: verification / incubation / conversion by segment.

E0
- P4

No continuous three-core service chain
Derived from separated provisional cores and distinct public functions.
Action: shared catalogue, first-order receipts and links.

E1
- P5

Dense talent needs everyday support
Public figures: 1,000+ scientists, 13k+ developers, 100k+ students, 400+ firms.
Action: affordable space, night community, family support.

E0
- P6

Interface quality and actual demand
No site photos, counts, accessibility audit or interviews yet.
Action: 24-hour observation, audit and stakeholder interviews.

E3

E0 official/primary public | E1 derived | E3 field verification required, E3 cannot trigger construction investment.

Evidence: Beijing planning authority (2021); Haidian public sources; geometry/" .geojson; OSM location base.

PROVISIONAL CONSTRAINT | CONCEPT PLAN | PROFESSIONAL VERIFICATION REQUIRE

One axis, three cores, two wings and 15 located projects

Validation north, incubation central, conversion south; wings add services and public scenarios, with projects located on the plan.

MAP-A3

MASTER PLAN: ONE AXIS, THREE CORES, TWO WINGS, 15 PROJECTS

The heritage axis supports walking, ecology and memory; the cores form verification-incubation-first-order conversion.

Z | Trusted verification

Z1 shared lab; Z2 domestic compute adaptation; Z3 robot test ring; Z4 standards; Z5 public interface.

O | Community incubation

O1 open-source lounge; O2 founder residence; O3 night school; O4 family support; O5 co-creation hall.

D | First-order conversion

D1 scenario orders; D2 enterprise hall; D3 compliance clinic; D4 capital demo; D5 developer exchange.

Six east-west stitches

Prioritise transit, universities, parks, communities and river; dimensions await survey.

Three nested scopes

37 km² coordination fact → provisional design area → three focus areas.

Derived from the official three-zone/two-wing brief and provisional GeoJSON; not statutory planning or title boundary.

PROVISIONAL CONSTRAINT | CONCEPT PLAN | PROFESSIONAL VERIFICATION REQUIRE

Three scopes and site evidence

Coordinated study, overall design and key areas form one strategy-to-delivery chain.

MAP-A1

REGIONAL POSITION AND INNOVATION ANCHORS

A continuous innovation belt linking universities, institutes, transit and three differentiated cores.

Base map © OpenStreetMap contributors, ODbL; anchors checked against official public sources; provisional constraint.

Official scope facts

Approx. 37 km² coordination area; about 9 km heritage corridor; 1–2 km urban interface.

Innovation density

Public sources identify 2,000+ AI enterprises and a dense university–research–enterprise talent network.

密集网络。

Public-realm base

Underground high-speed rail releases ground space for a north–south green and heritage corridor.

Planning response

Z: verification; O: incubation; D: first orders; west service wing and east testbed wing.

Legend: □ university/research ○ transit • three cores — Jingzhang axis

PROVISIONAL CONSTRAINT | CONCEPT PLAN | PROFESSIONAL VERIFICATION REQUIRE

Five-stage growth loop

Space release—scenario insertion—community aggregation—project generation—entity reproduction.

Anchor-community-enterprise network

Convert talent relations into projects and projects into durable entities.

Mobility, blue-green and public scenarios

The heritage park is the ecosystem's public living room; anonymous passage and accessibility come first.

CORE-04 MOBILITY-BLUE/GREEN, 12 SCENARIOS + 7-PERSONA JOURNEYS

Every scenario binds space, operator, data class, human release, failure exit and public value

DATA-DERIVED

CONCEPT

PENDING VERIFICATION

A | HERITAGE SPINE, BLUE-GREEN REALM + 12 SCENARIO NODES

SCENARIO TYPE

- Industrial
- Communi
- Human se
- Commerc

ACCESS

Professional check before opening

CO-GOV

Proposed ≥2 resident seats

AFFORDABLE

Proposed ≥20% free/low-cost hours

APPEAL

Proposed 2-day ack / 10-day closure

EXIT

Independent exit for vulnerable users

Scenarios are bounded tests or operating proposals, not proof of maturity, approval or permission to collect personal data; named humans release high-risk actions.

CORE-04 | PROVISIONAL / CONCEPT / NTS | dingle2001 • COMPLETED USING AGENT

Industry-space fit

No health check, no renewal: unknowns become investigation and sign-off tasks, never invented scores.

Problem-evidence grade E0: the official AI belt defines three zones, two wings and a 1-2 km interface; E1: validation-incubation-first-order gap; E3: firm, talent and service interviews	Required baseline Enterprise lifecycle, spatial demand, equipment, service gaps, affordability and alternatives
Current diagnosis Haidian has strong innovation sources but weak validation-incubation-first-order interfaces; office supply is not industry service.	Problem list Pending real demand, spatial thresholds, service breaks and alternatives
Resource list Universities, leading firms, open-source communities, test facilities and professional services	Project trigger Triggers Z1-Z4, O1-O3 and D1-D5
Stop gate No construction investment without a problem owner, real users and operating brief	
No baseline, no score • named owner • acceptance evidence • continue / adjust / step back / exit	

Access and continuity

No health check, no renewal: unknowns become investigation and sign-off tasks, never invented scores.

Problem-evidence grade

E0: official planning reports complex longitudinal/cross and vertical relations; E1: six priority seams; E3: flow, break, detour, access and emergency survey

Required baseline

Transit exits, walking/cycling, crossings, accessibility, loading, emergency and time conflicts

Current diagnosis

The north-south spine has continuity potential; east-west links, portals, accessibility and test flows need field checks.

Problem list

Pending breaks, conflicts, detours, service gaps and time windows

Resource list

Linear park, transit portals, two wings and time-shared routes

Project trigger

Triggers Z3, SCN-08, Xiaoyuehe wing and WP1 public base

Stop gate

Tests and events may not occupy anonymous passage, accessible or emergency routes

Public realm, ecology and inclusion

No health check, no renewal: unknowns become investigation and sign-off tasks, never invented scores.

Problem-evidence grade E0: official planning establishes the linear park and urban interfaces; E1: public realm as innovation infrastructure; E3: comfort, drainage, stay, inclusion and maintenance survey	Required baseline Green-blue systems, comfort, stormwater, lighting, stay, all-age use, opening and maintenance survey
Current diagnosis Public space can be innovation infrastructure, but comfort, inclusion, maintenance and tech opt-out lack baselines.	Problem list Pending ecological gaps, use conflicts, service deficits and maintenance duties
Resource list Heritage park, Xiaoyuehe, families, open ground floors and public programs	Project trigger Triggers Z5, O4, O5, SCN-07-09 and the component library
Stop gate Public service cannot depend on data consent; no facility expansion without maintenance funding	
No baseline, no score • named owner • acceptance evidence • continue / adjust / step back / exit	

Zhongzhiyuan | concept view

Shared validation city: lab spine, test loop, standards court and public science edge.

Zhongzhiyuan | spatial prototype

The plan and functional zoning derive from the shared provisional geometry.

Zhongzhiyuan | sections and flows

Grids, datums, dimensions, lineweights and safety zoning remain concept/NTS/pending verification.

AI Origin | concept view

A time-shared talent community: transfer by day, co-creation at night, public weekends.

VP-03 Origin night co-creation living room

AI CONCEPT VIEW | VIEW-MAP | NOT BOUNDARY / FABRIC / ENGINEERING / INVESTMENT EVIDENCE

Completed using Agent

AI Origin | spatial prototype

Open-source room, residency, night school and family support form a courtyard network.

AI Origin | sections and time sharing

Open ground floor, acoustics, fire and live-work limits require professional sign-off.

Dazhongsi | concept view

First order, enterprise services, compliance and capital form an open civic interface.

VP-04 Dazhongsi first-order street

AI CONCEPT VIEW | VIEW-MAP | NOT BOUNDARY / FABRIC / ENGINEERING / INVESTMENT EVIDENCE

Completed using Agent

Dazhongsi | spatial prototype

The gateway sequence respects the heritage axis and keeps its passage open.

Dazhongshi | sections and first-order flow

Display—service—milestone—professional support form a flexible civic sequence.

Model safety evaluation sandbox

The scenario contract defines service, technology, human duty and exit together.

Problem No independent reproducible safety check before release	Journey Register— isolate —two-person review—sign-off—review
Data D3 restricted; minimum authorization	No-AI Offline test sheet and human panel
Human release Safety lead releases high-risk results	Stop Seal on privilege breach, irreproducibility or isolation failure
Acceptance Complete version, permission, test and review record	Users Research and startup teams

Bounded robotics field loop

The scenario contract defines service, technology, human duty and exit together.

Problem Urban testing conflicts with public safety	Journey Opening check—bounded run—takeover—review
Data D2 device and incident	No-AI Physical barrier, safety staff and manual testing
Human release Daily human opening and remote takeover	Stop E-stop on breach or takeover failure
Acceptance No unhandled breach; all events logged	Users Robotics firms and public

Open-source project clinic

The scenario contract defines service, technology, human duty and exit together.

Problem Contributions fail to become stable roadmaps	Journey License check—diagnosis—roadmap—ownership
Data D1 project record	No-AI In-person code review and paper checklist
Human release Maintainer confirms license and merge	Stop Pause on license or attribution dispute
Acceptance License, roadmap and owner list per case	Users Researchers and independent developers

Intergenerational AI living lab

The scenario contract defines service, technology, human duty and exit together.

Problem Life needs miss R&D while vulnerable users risk passive participation	Journey Co-create—consent—small test—human service—exit/delete
Data D2 sensitive personal	No-AI Fully equivalent offline service
Human release Participant/guardian consent + ethics review	Stop Exit and delete on distress or withdrawal
Acceptance 100% reversible; basic service not conditional	Users Families and developers

First-order scenario exchange

The scenario contract defines service, technology, human duty and exit together.

Problem Technology is disconnected from real demand and procurement	Journey Publish—conflict disclose—validate—co-sign—procurement review
Data D2 procurement/business	No-AI Public problem session, human panel and offline matching
Human release Demand owner and compliance co-sign	Stop Remove false demand or conflict
Acceptance Complete problem-validation-procurement evidence	Users Startups and demand owners

Urban-agent operations desk

The scenario contract defines service, technology, human duty and exit together.

Problem Cross-scenario operations lack audit, appeal and takeover	Journey Read—recommend—human authorize—act—audit—appeal
Data D1 operations + D2 complaints	No-AI Manual register, phone and in-person service
Human release Human authorization for each high-risk action	Stop Read-only on breach, drift or appeal backlog
Acceptance Least privilege, full logs, sampling and takeover	Users Operators and public

Twelve-scenario governance matrix

D0-D3, M1-M3, human release, failure modes and evidence.

Xiaoyuehe scenario-empowerment wing

Public problems become test orders and results return to public-space improvement.

Shared validation laboratory

Project contract: works trace to problems; results trace to evidence and ownership.

Problem Small teams lack trusted test facilities	Cause High equipment thresholds and missing sharing/accountability rules	Measure Verify large spans, then operate shared equipment through booking, tiered access and professional sign-off
Output Equipment catalogue, booking protocol, test sheet and incident log	Result Validation moves from endorsement to reproducible evidence	Metric Equipment use, reproducible-test share and major incidents
Operation Professional test operator; account by equipment hour and task service	Phase 0-1 year protocol and small pilot	Funding Quasi-public: public guidance plus equipment service; amount pending
Stop gate No move-in without structure, fire and load sign-off		

Bounded robotics test loop

Project contract: works trace to problems; results trace to evidence and ownership.

Problem Robotics firms lack a low-risk urban test setting	Cause Public walking conflicts with test flows; insurance and takeover duties are unclear	Measure Use physical limits, time windows, speed caps, e-stop, remote takeover and on-site safety staff
Output Test-window plan, opening checklist, incident and review logs	Result Create a governable pre-deployment urban test	Metric Unhandled boundary breach, e-stop response and incident closure
Operation Site operator plus accountable safety entity; charge by test window	Phase 0-1 year closed tests	Funding Quasi-public: site input plus test fees
Stop gate E-stop on public-lane intrusion or takeover failure		

Origin open-source living room

Project contract: works trace to problems; results trace to evidence and ownership.

Problem Developers attend events but lack durable project collaboration	Cause Contribution licenses, diagnosis and persistent maintainers are missing	Measure Run weekly clinics, maintainer hours and contribution records
Output License list, roadmap, responsibility allocation and review	Result Convert visitor relations into durable projects	Metric Persistent teams, merged contributions and dispute closure
Operation Community operator plus maintainers; membership and public subsidy	Phase 0-1 year operate before works	Funding Quasi-public: public subsidy, sponsorship and services
Stop gate Adjust if license disputes persist or footfall produces no projects		

Talent family support station

Project contract: works trace to problems; results trace to evidence and ownership.

Problem Talent families face high childcare, eldercare and emergency referral cost	Cause Service information is fragmented and privacy/duty boundaries are weak	Measure Provide a human desk, authorized referral, receipt and withdrawal
Output Service catalogue, referral, receipt and complaint closure	Result Reduce everyday friction that drives talent away	Metric Effective referrals, response time, withdrawals and complaints
Operation Community service institution; public-service procurement	Phase 0-1 year needs register, then recurring service	Funding Public-benefit: public and community-service funding
Stop gate Stop the interface on unconfirmed referral or privacy linkage		

First-order scenario center

Project contract: works trace to problems; results trace to evidence and ownership.

Problem Early projects struggle to secure a first real customer	Cause Demand publication, validation and procurement judgment are disconnected	Measure Use a problem catalogue, validation sheet, co-sign and procurement review
Output Problem sheet, validation report, conflict declaration and procurement review	Result Give technology a verifiable first application opportunity	Metric Complete evidence chains, procurement-review conversion and false demand
Operation Industry operating platform; service fee and procurement support	Phase 0-1 year problem catalogue, then recurring	Funding Quasi-public: operating income plus service fees
Stop gate Remove false demand or undisclosed conflicts immediately		

Pre-compliance clinic

Project contract: works trace to problems; results trace to evidence and ownership.

Problem AI firms lack compliance judgment before opening and scenario launch	Cause AI advice may replace professional judgment and cross-discipline issues lack sign-off	Measure AI only organizes material; qualified professionals review, sign and record limits
Output Opening checklist, signed advice, referral and version record	Result Move correction from post-event enforcement to pre-launch	Metric Professional sign-off, correction closure and out-of-scope refusal
Operation Registration, legal and IP professionals; per-case service	Phase 0-1 year checklist pilot	Funding Commercial: professional service fees
Stop gate Refuse unsigned, out-of-scope or obsolete advice		

Six implementation loops

Diagnosis, policy, actors, funding, build-operation and review all must close.

Project library and mainline

Library—renewal plan—implementation plan—joint review—parallel approval.

One map, two tables, six lists

Place planning, rights, works, funding, operation and risk on one work surface.

Concept / NTS / pending official boundary, survey and professional verification

Five stages of operations-first

Positioning, design, investment, construction and handover are tested by future use and operation.

Funding and unit accounts

Separate public, quasi-public and commercial accounts; invent no totals, rents or payback.

90-day minimum credible pilot

Validate rules, ownership, takeover, appeal and exit before scaling works.

D0-15

Baseline, rights, demand and risk; stop if unclear

D16-30

Charter, data class, acceptance and appeal

D31-60

Three industrial tests produce reproducible sheets

D61-75

Public test, accessibility, co-governance and first order

D76-90

Anonymous audit and continue/adjust/exit decision

Pre-opening completeness rehearsal

All 310 synthetic fixtures returned the expected block/review decision; this is not field performance or government acceptance.

7 health checks

7 complete contracts + 42 missing-field fixtures = 49 cases

12 scenario contracts

12 complete contracts + 84 missing-field fixtures = 96 cases

15 project contracts

15 complete contracts + 150 missing-field fixtures = 165 cases

Decision

310/310 expected matches; any missing field returns the item

Field result

0; remain null before operation and never impersonate field performance

Long-term operation and performance review

From property to industry operation, reviewed through output, use, benefit and sustainability.

Culture I | Railway: connection

Independent engineering, problem-solving and linear connection form the narrative base.

Space

Heritage axis, component index, dates and observation edges

Rule

Survey first; no fake reconstruction or over-commercialization

Program

Engineering walks, open-source milestone and public science

Public-node naming and wayfinding

A memorable hierarchy follows trace—origin—growth—exchange.

Jingzhang Trace

Heritage walk, engineering marks, open-source milestone

Origin Lanes

Co-creation hall, clinic, night school, family support

Growth Gateway

First-order hall, compliance station, milestone steps, growth rings

Exchange Nodes

Wing services, accessible wayfinding and global node wall

Honor display system

Display public contribution, not commercial ratings, investment advice or unauthorized co-branding.

Open-source milestone

Licensed, reviewable contributions with public return

Global node wall

Written-confirmed nodes and withdrawable content

Enterprise growth rings

Anonymous aggregate stages of test, first order, growth and return

Process

Authorize—verify—display—annual review—withdraw

Public-space component library

Components are composable, maintainable and removable; basic access precedes spectacle.

A Access

Continuous paving, ramps, tactile and physical signs

B Stay

Seats, shade, lighting, water and charging

C Heritage

Relic cases, date index and replaceable panels

D Scenario

Closable interfaces, visible collection status and offline fallback

E Operation

Maintenance ID, owner, inspection cycle and replacement log

Annual programs and developer community

Programs serve project generation; event count and footfall never replace outcomes.

Spring | Open Validation Week

Equipment catalogue, three tests and safety review

Summer | Origin Open-source Se

Clinics, residency outcomes and intergenerational work

Autumn | First-order and Stand

Demand, validation, procurement review and standards

Winter | Jingzhang Developer W

Rail curation, bilingual exchange and annual review

International attraction and conversion

Internationalization is not eventization; it completes bilingual problems, licenses, validation and follow-up duties.

Entry

Bilingual problem catalogue, accessibility and contact

Collaboration

Open-source license, data limit, mentor recusal and sign-off

Conversion

Validation report, first-order review, 90-day follow-up and exit

Limit

No institution name, mark or implied partnership without writing

Limits, responsibility and next step

The scheme is an investigation and pilot brief, not statutory planning, construction documentation, funding commitment or government approval.

Now

Replace polygons, run 7D survey, rights register, interviews and 90-day protocol

Professional sign-off

Planning, architecture, structure, fire, access, traffic, cost, law and data

Do not infer

Corporate participation, resource opening, investment, rent, schedule or government commitment

Review

Comparable review at handover, six months, one year and three years

An aerial, dusk-time photograph of a city street. The street is lined with modern, multi-story buildings featuring large glass windows. A tram is visible on the tracks running down the center of the street. Pedestrians are walking on the sidewalks, and trees are planted along the street. The overall atmosphere is urban and modern.

LET ENTITIES GROW

The first half of urban renewal makes space new; the second helps entities grow.

Completed using Agent • concept proposal only
