

JING-ZHANG CIVIC AI LOOP

Evidence → assumption → design → metric → review

PUBLIC SPINE

- Free everyday access
- Railway heritage narrative
- Non-digital service

VERIFICATION LOOP

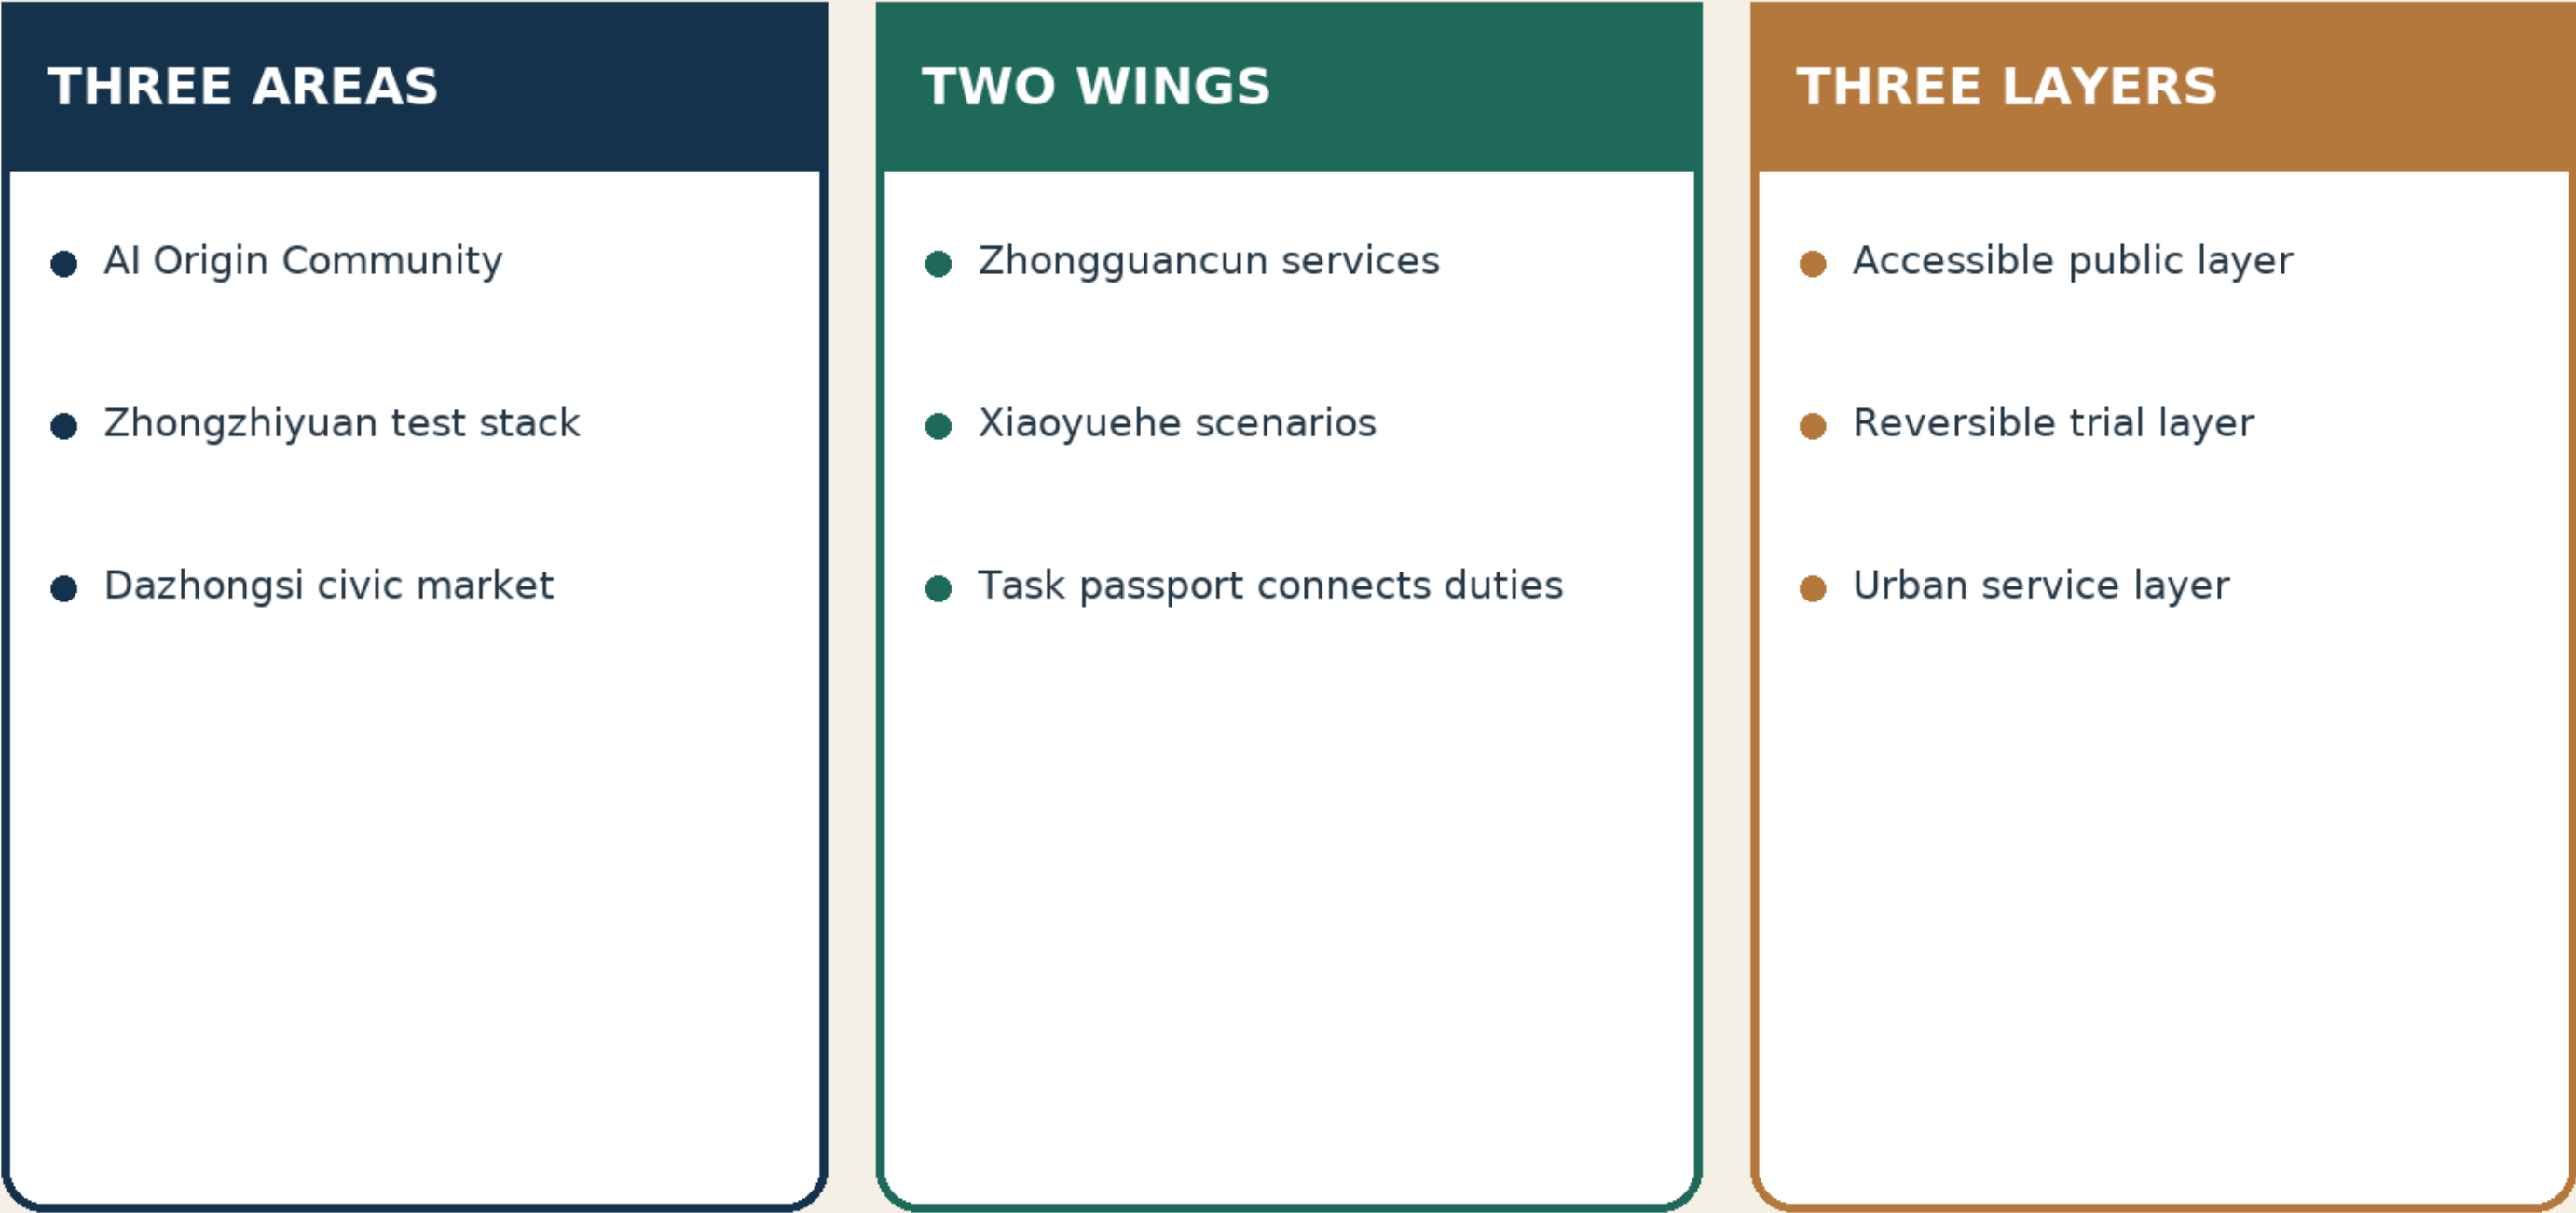

- Problem discovery
- Bounded sandbox
- Public experience
- Evidence deliberation

TRUST BOUNDARY

- Minimal data
- Human appeal
- Independent evaluation
- Safe exit

ONE BELT · THREE AREAS · TWO WINGS

A spatial operating model, not a branding diagram

THREE KEY AREAS

Place, project and daily operation

ORIGIN

- Problem Bank
- Open research courtyard
- Accessible co-testing

ZHONGZHIYUAN

- Transparent test gallery
- Safety sandbox
- Public defect review

DAZHONGSI

- Comparable service street
- Staffed civic room
- Algorithmic Receipt

PUBLIC ACCESS + BLUE-GREEN SAFETY

Trials never displace movement, ecology or basic service

WALK

- Continuous accessible chain
- Shade, seating and water
- Verified crossings

ECOLOGY

- Ecological buffer first
- No trial in sensitive space
- Environment data only

ROBOT

- Bounded route and time
- Field safety officer
- Takeover + emergency stop

PUBLIC EVIDENCE LOOP

Baselines, subgroup results and stop rules travel with every claim

MEASURE

- Locked baseline + control
- Task completion
- Severe errors + near misses

CHECK

- Worst-group gap
- Accessibility QA
- Independent sign-off

DECIDE

- Scale, repair, pause or exit
- Publish limits + minority views
- Sunset and deletion proof
