

Jingzhang Track Pulse - Overall Concept Overview

One spine, three pearls, two wings | Agent Growth Trail (gestation > first steps > schooling > employment > legacy) | Concept suggestion

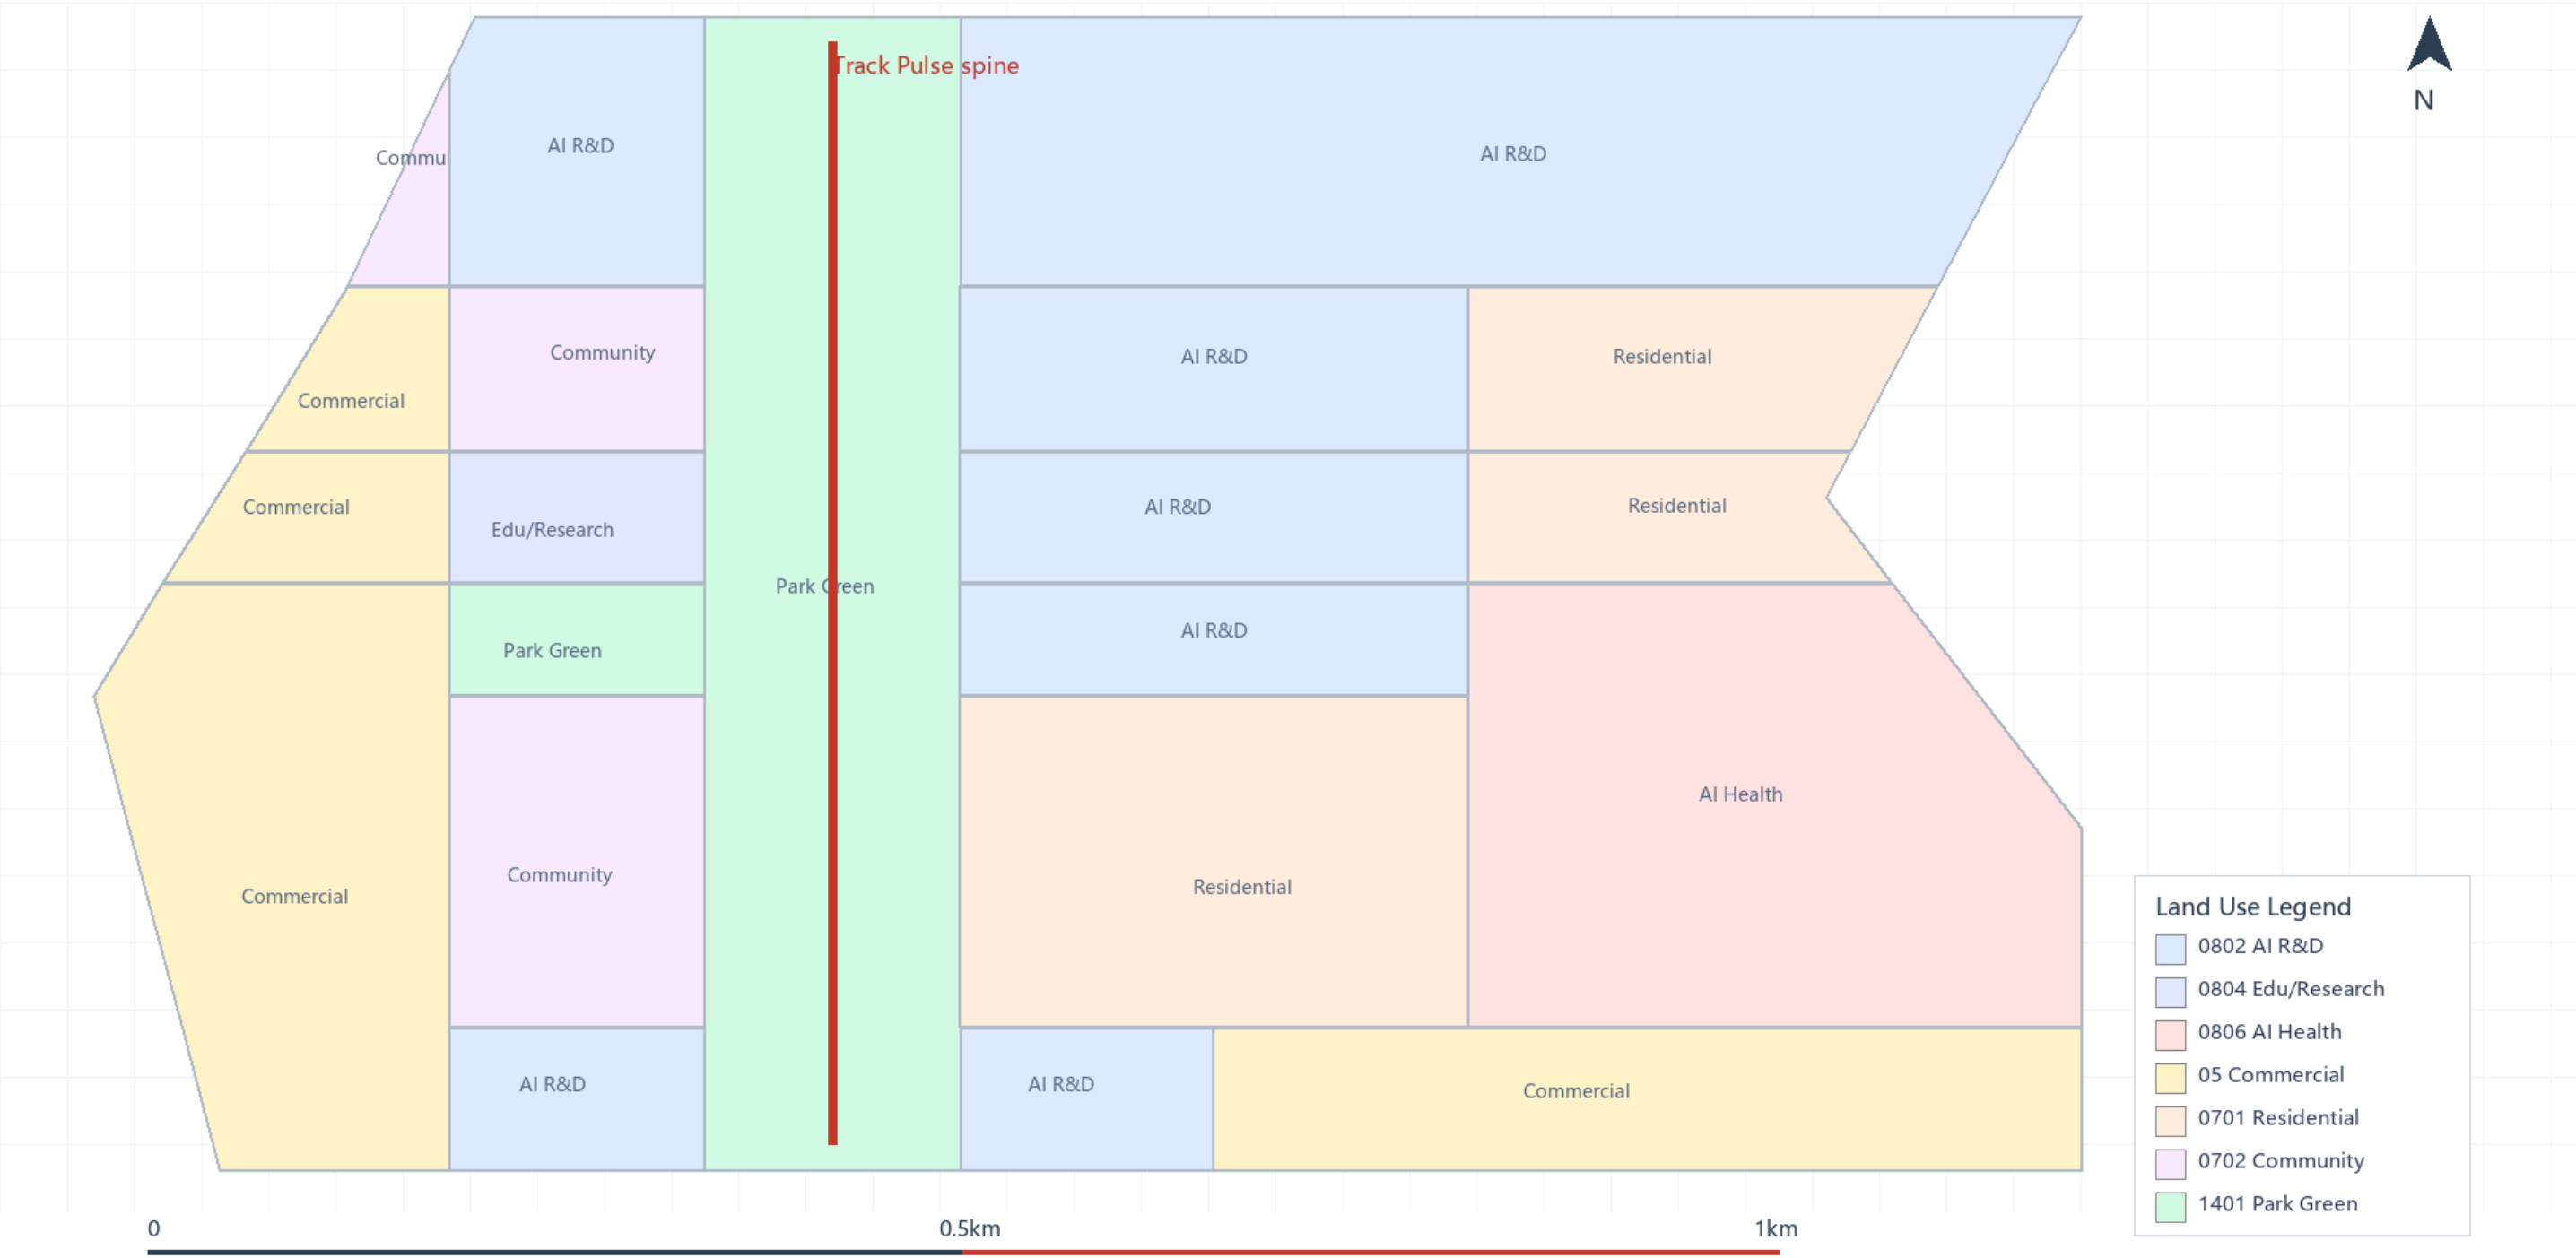

Source: provisional_boundaries.geojson (provisional, not an official redline) | Concept suggestion for professional deepening

Source: provisional_boundaries.geojson (provisional, not an official redline) | Concept suggestion

Land Use Structure of the Overall Design Scope

21 land use zones | full coverage, no overlaps, no gaps | Concept suggestion

Land use classification per the national land/sea use classification guide | Concept suggestion

Detailed Design Index of the Three Key Areas

Zhongzhiyuan 192.1ha | AI Origin Community 104.3ha | Dazhongsi 72.0ha | provisional boundaries

Zhongzhiyuan AI Independent Innovation Acceleration Zone

192.1 ha (North)

- Garden-style full-stack innovation district
- Global voice node in AI governance
- Qinghe interface, low-carbon exchange

Scenarios: model testing / standards workshops / safety display

Beijing AI Origin Community

104.3 ha (Center, Wudaokou)

- Near-campus conversion + talent community
- 1km sourcing circle around top universities
- Open source, release, talent special zone

Scenarios: open-source workshops / co-learning / incubation

Dazhongsi AI Industry Cluster

72.0 ha (South)

- Urban intelligent-economy district
- Agents, terminals, content consumption
- Station integration, 4-quadrant walking

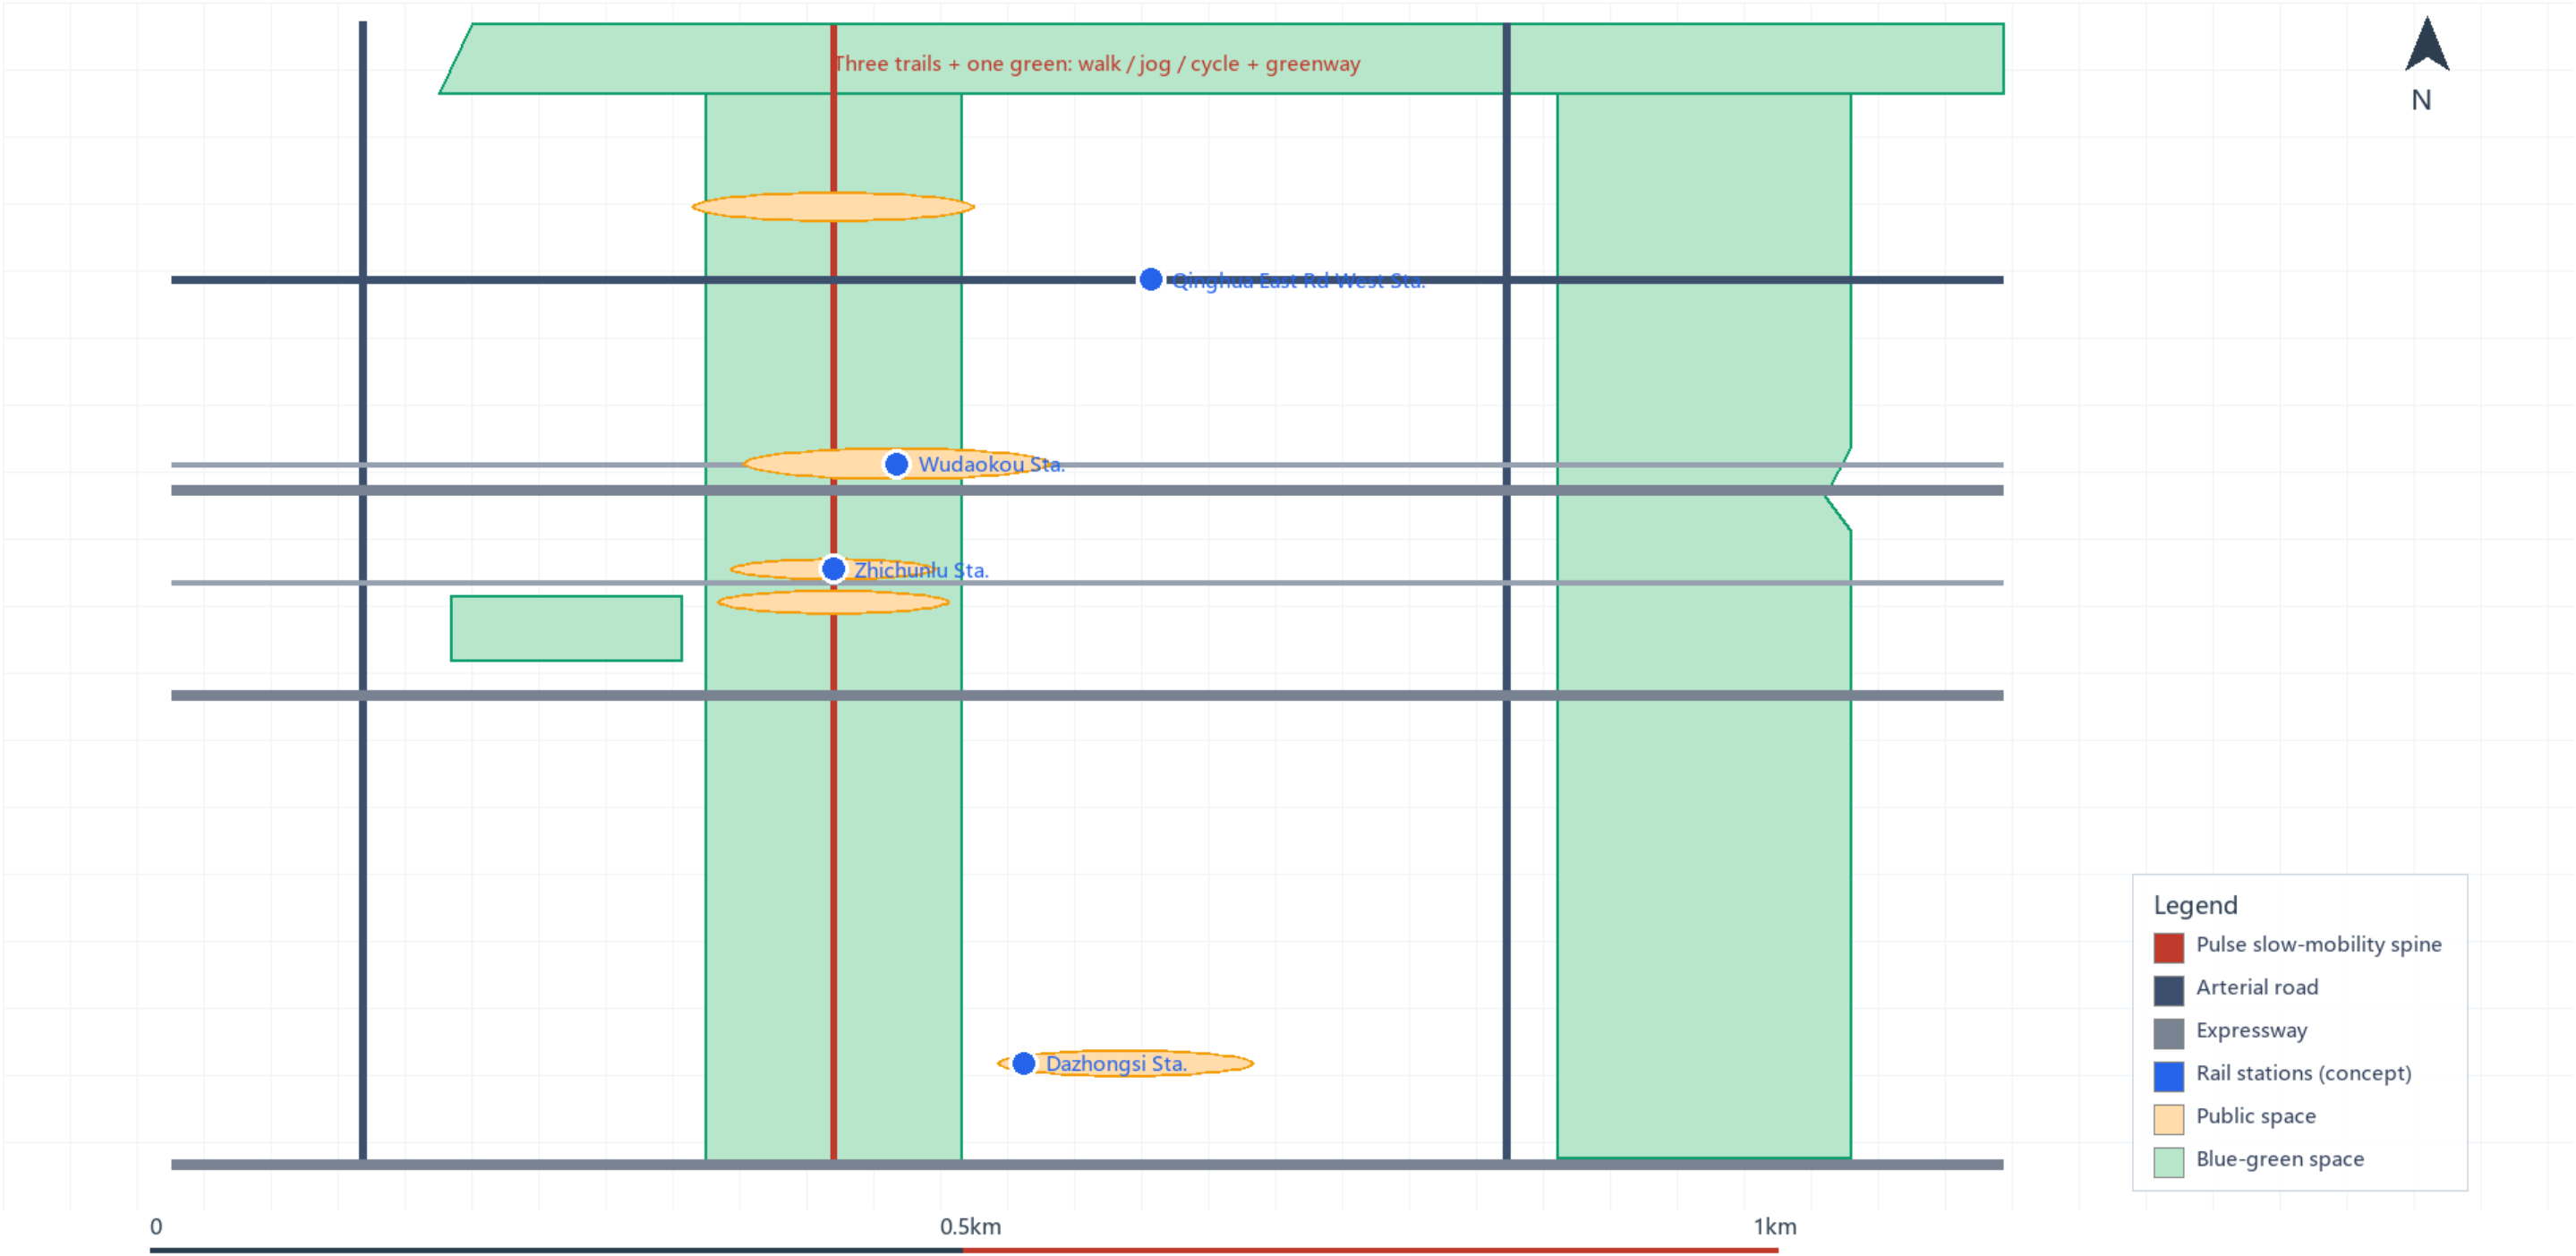

Scenarios: agent showcase / data-element lounge / roadshows

Three districts = three states of the Agent Growth Trail
Gestation (Zhongzhiyuan) > Schooling (AI Origin Community) > Employment (Dazhongsi)
Two wings: Zhongguancun Tech Services Wing (capital/IP) + Xiaoyue River Scenario Wing (AI+health/film)

Areas from the official announcement; polygons are provisional constraints | [data:geometry/key_areas.geojson]

Composite System of Slow Mobility and Blue-Green Public Space

One spine, three trails plus one green | station-city integration | break-point stitching (concept)

Roads are designed centerline concepts; stations are concept locations; break points and TOD integration await traffic review | Concept suggestion

Core Metrics Recalculation and Evidence Chain

All metrics recomputed from GeoJSON (EPSG:4548) | provisional areas for display only

Design scope area

11,412,825

sqm

Source: site_boundary.geojson

Building footprint

484,130

sqm

Source: buildings.geojson

Green ratio

35

%

Source: green_space.geojson

Public space share

1

%

Source: public_space.geojson

Road design length

36,106

m

Source: roads.geojson

Land use zones

21

zones

Source: land_use.geojson

Key areas

3

areas

Metric evidence chain

Missing regulatory indicators: FAR / height / density / setback are not officially available; listed as unknown/pending_control, to be deepened by professional teams once regulatory conditions are confirmed.

Metrics can be recomputed item by item from geometry/*.geojson; [metric:...] evidence chain complete
