Overall Scope & Three Key Areas Index

Three Key Areas Design Tasks & Core Spatial Actions

Zhongzhiyuan AI Autonomous Innovation Acceleration Zone	Beijing AI Origin Community	Dazhongsi AI Industry Cluster
Area: 192.1 ha Positioning: Garden-type full-stack innovation district	Area: 104.3 ha Positioning: Near-campus achievement conversion & talent community	Area: 72.0 ha Positioning: Urban intelligent economy & exchange district
Core Spatial Actions: - Full-stack innovation lab - Standard-setting workshop cluster - Safety governance exhibition hall - Qinghe low-carbon innovation lounge - Qinghe ecological greenway	Core Spatial Actions: - Open-source release hall - Near-campus achievement hub - Talent service complex - AI education experience center - Campus slow-mobility stitching	Core Spatial Actions: - International roadshow lounge - Smart terminal display center - Data element reception parlor - AI life service model street - Station four-quadrant linkage

Core Metrics Recalculation & Evidence Chain
All metrics recalculable from GeoJSON / metrics.json

Overall Design Area 11.4 km² Provisional boundary	Key Area Total 368.4 ha 3 key districts	Green Ratio 37.7% Design recommendation	Public Space Ratio 2.2% Design recommendation
AI Scenario Cards 10 incl. 3 test scenarios	User Personas 5 types with privacy boundaries	AI Pilgrimage Landmarks 3 Conceptual proposal	Renewal Projects 6 Near/Mid/Long-term

Evidence chain: All metrics recalculable from GeoJSON/metrics.json | FAR/height/setback pending official regulatory conditions
Boundary: provisional_rough | Area calculation: EPSG:4548 | Data confidence: medium
