B | THREE CURRENT FACTS: NO BLANK-SLATE ASSUMPTION

2026-07

Phase-2 support works completed; north section about 30.01 ha with a fishbone walking network

2026-08

Phase 2 opened and joined Phase 1 into about 9 km; this scheme shifts to interface operation

2026-08

Block-level plan approved: about 1,668.2 ha, nine blocks, one belt/axis, two centres and multiple nodes

PLAN RELATION | The approved block structure is statutory; one axis, three cores and two wings is only an industry-service operating overlay.

Z | 众智园

PROBLEM | Public walking/science edges may conflict with tests, loading and emergency routes

EVIDENCE | E3 field verification; no permanent works

ACTION | Count by time and map conflicts first; then use a closable test court and observation edge

FAILURE | Remove temporary works and restore the prior route/service; sunk cost never justifies expansion

O | AI原点

PROBLEM | Night co-creation, family support and residential quiet lack a shared field baseline

EVIDENCE | E3 field verification; no permanent works

ACTION | Interview and log time/noise first; then trial recoverable time-shared rooms

FAILURE | Remove temporary works and restore the prior route/service; sunk cost never justifies expansion

D | 大钟寺

PROBLEM | Transit, daily passage and launch/service flows may overlap

EVIDENCE | E3 field verification; no permanent works

ACTION | Verify exits, passage and egress first; then test open ground floors and booking

FAILURE | Remove temporary works and restore the prior route/service; sunk cost never justifies expansion

Public facts define background only; all three interface problems require field verification. Official drawings, rights, buildings and engineering inputs remain required.

FIVE PROJECTS

Z1 Shared validation laboratory

Publish the equipment catalogue and booking rules

RISK: Safety incidents and idle equipment

Z2 Domestic compute adaptation workshop

Release the first adaptation tasks

RISK: Resource availability misread as a commitment

Z3 Bounded robotics test loop

Mark low-speed windows and physical limits

RISK: Human-machine mixing risk

Z4 Standards co-creation room

Run quarterly standards workshops

RISK: Meeting activity without deliverables

Z5 Public science interface

Pilot weekend open-lab days

RISK: Promotion replacing public science

FIVE PROJECTS

01 Origin open-source living room

Pilot a weekly project clinic

RISK: Busy events but weak projects

02 Founder residency units

Start with a small short-stay cohort

RISK: Rent and selection exclusion

03 Geek cafe and night school

Pilot lightning talks and night classes

RISK: Resident disturbance and over-commercialization

04 Talent family support station

Open a needs registry and referral desk

RISK: Unclear duty boundaries

05 Intergenerational AI living lab

Run small co-creation tests

RISK: Vulnerable groups treated as passive test subject

Publish a problem catalogue

RISK: Implied orders or conflicts of interest

D2 Enterprise service hall

Publish a service catalogue and booking desk

RISK: Duplicate provision and low use

D3 Pre-compliance clinic

Issue a pre-opening compliance checklist

RISK: AI replacing professional judgment

D4 Capital milestone steps

Run evidence-based milestone sessions

RISK: Misleading financing promotion

D5 Global developer exchange

Connect online and physical nodes

RISK: One-off eventization

CORE-05 90-DAY PILOT, PROCUREMENT PACKAGES, GOVERNANCE + EVIDENCE LOOP

Translate urban design into a minimum system that can be procured, accepted, paused, appealed and replicated

DATA-DERIVED CONCEPT PENDING VERIFICATION

A | 90-DAY MINIMUM CREDIBLE PILOT: RULES + EVIDENCE BEFORE PERMANENT WORKS

B | WP0-WP6 PROCUREMENT + ACCEPTANCE

C | LEAST PRIVILEGE + HUMAN RELEASE

D | UNIT ACCOUNTS + STOP CONDITIONS

E | EVIDENCE REGISTER + CONTINUE-ADJUST-EXIT DECISION

The 90-day sequence and gates are procurement/operating proposals, not an adopted government program; no total investment, rent, payback or fiscal commitment is invented.

DIA-07 UNIT OPERATING ACCOUNT (NO INVENTED TOTALS)

Space • equipment • services accounted separately; public base costs isolated

CONCEPT

HARD LIMITS

- No invented total investment, rent, payback or yield
- Equity returns are not a base debt-service cash flow
- Milestone capital ties to first-order evidence; stage gates allow exit
- All price parameters calibrated by real pilot data

This figure expresses accounting structure only and contains no investment estimates.

This sheet defines a minimum governance protocol and does not claim deployment. The audit sample is a field template, not a live record.
High-risk actions are denied by default; named humans retain professional approval, public-service decisions and rights disposal.

OPERATIONS & CONTRACTS

OPS-A1 OPERATIONS AND PROJECT CONTRACTS

Space is governed by who provides what, who pays, what counts as completion and when a service stops.

A | ANNUAL SERVICE CATALOGUE AND SEPARATE ACCOUNTS

SERVICE	PUBLIC DUTY	OPERATING INCOME	COST ACCOUNT	MINIMUM EVIDENCE / STOP GATE
Shared verification lab	inclusive hours / safety	equipment • test service	equipment sign-off / insurance	structure and fire sign-off, suspended until incident closes
Open-source lounge / night school	non-purchase seats / community time	membership • course • F&B share	curator / tutor / noise	repeat projects and sessions, reduce hours after nuisance
First-order enterprise service	problem catalogue / transparent fee	professional • event service	compliance / match / venue	dual-signed demand, detail undisclosed conflicts

B | MINIMUM PROJECT CONTRACT FIELDS — APPLIES TO ALL 15 PROJECTS

Operating account = space + equipment + professional services + events + staff + energy + maintenance + insurance + public-service loss.

Non-binding operating model, legal entities, amounts, net investment and procurement require formal authority and market inquiry.
