

JING-ZHANG COUNTERFACTUAL COMMONS

See another possibility before implementation.

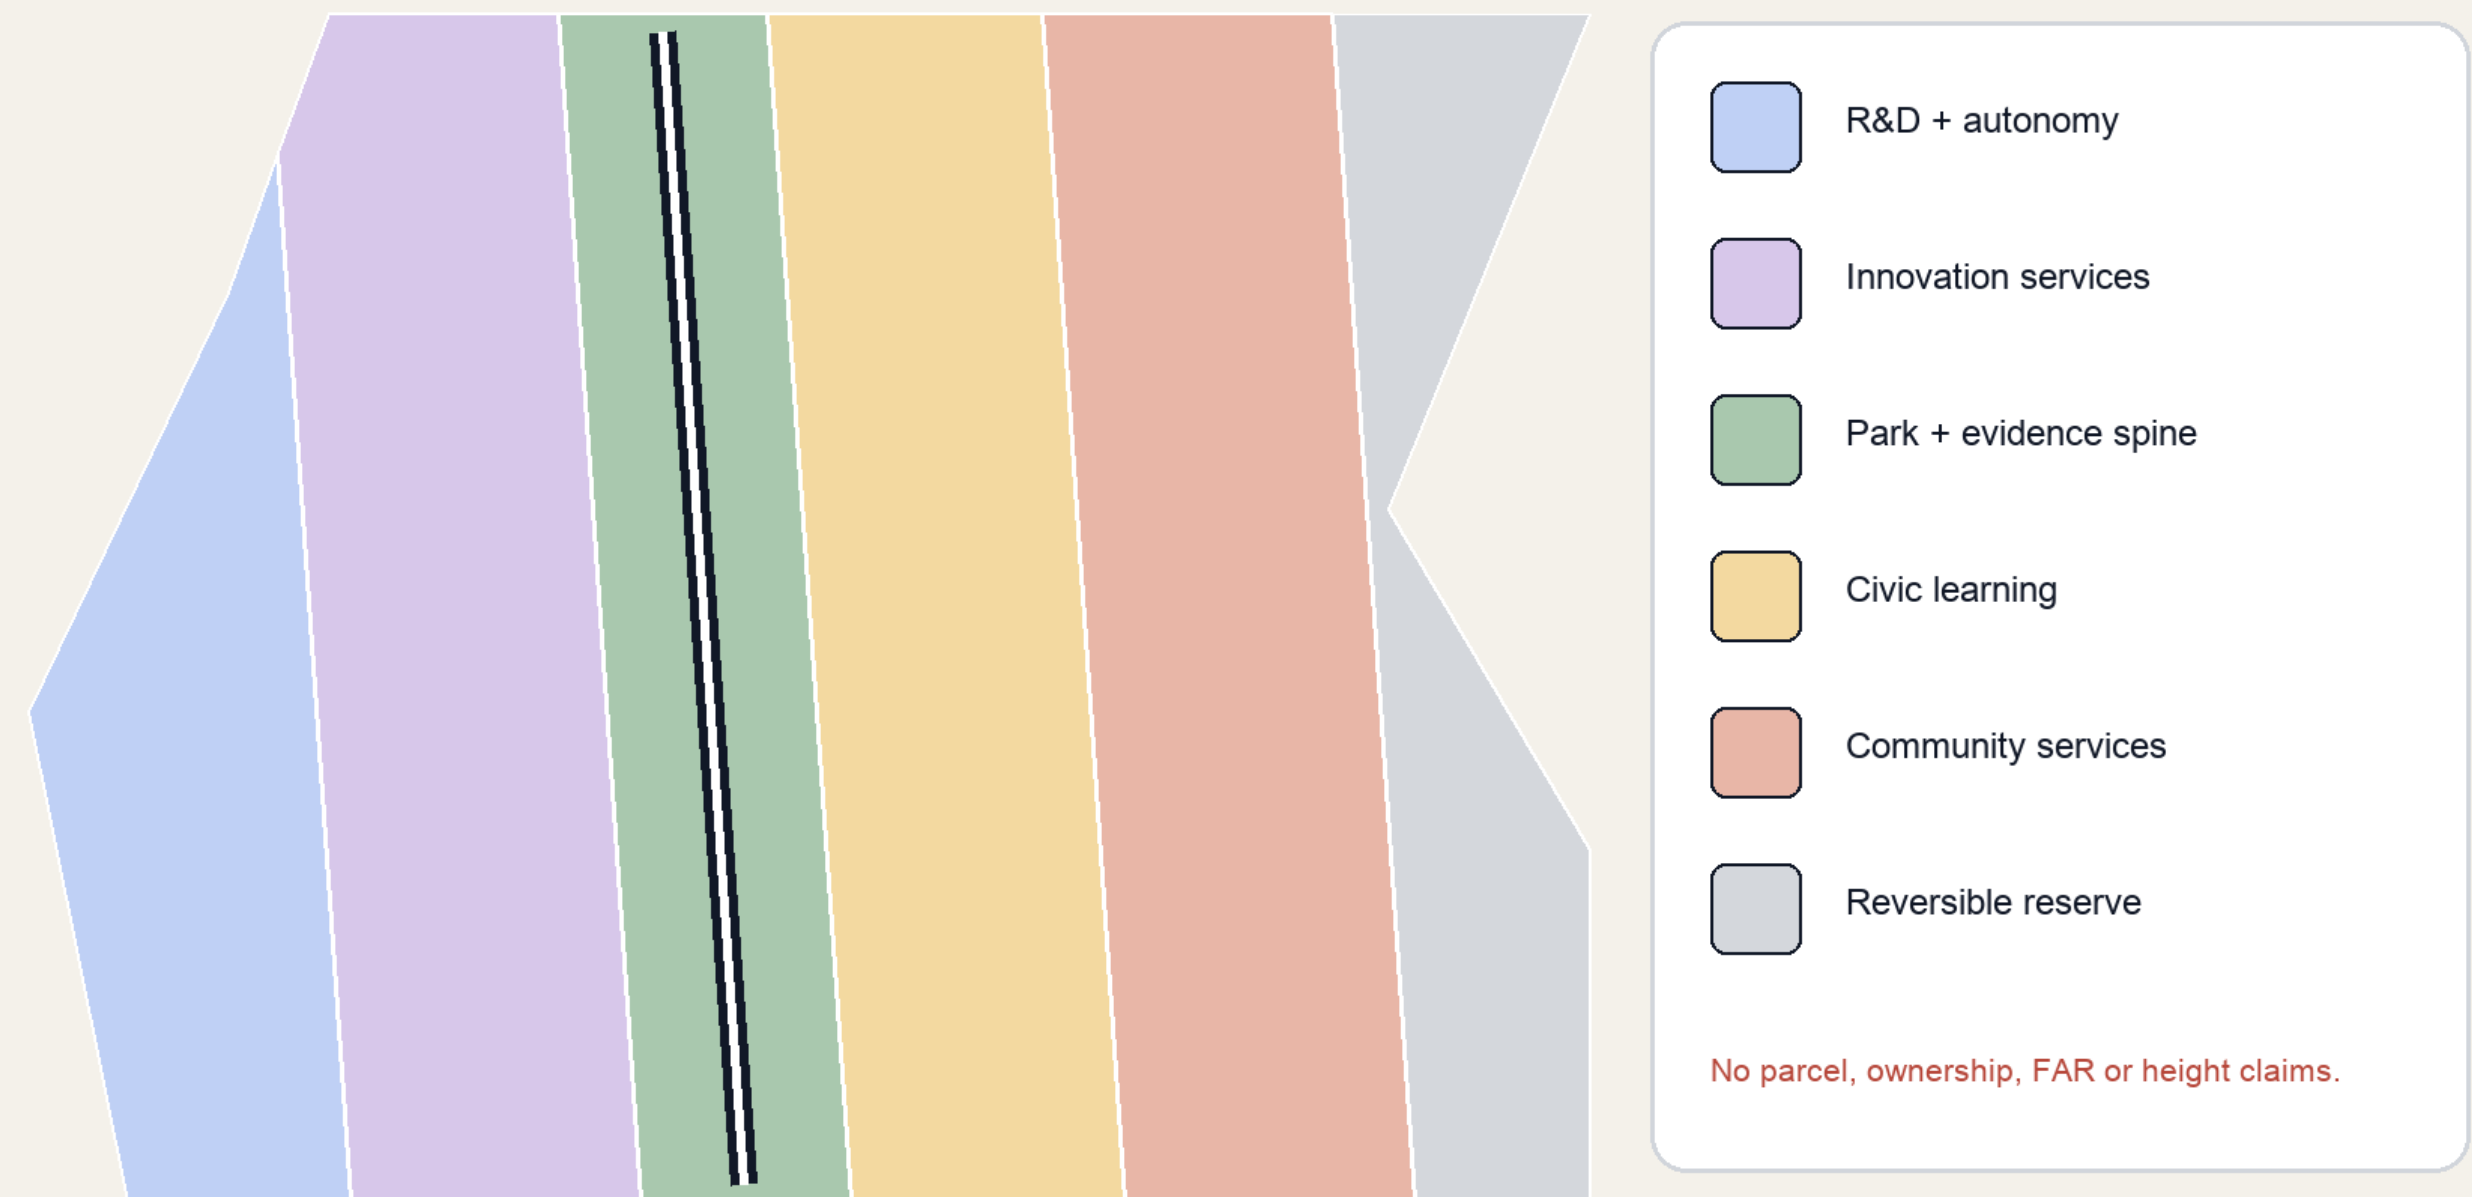

Simulation compares alternatives. It does not predict, approve, or transfer public responsibility to AI.

Six-band reversible structure

A complete conceptual partition, official controls trigger full redesign.

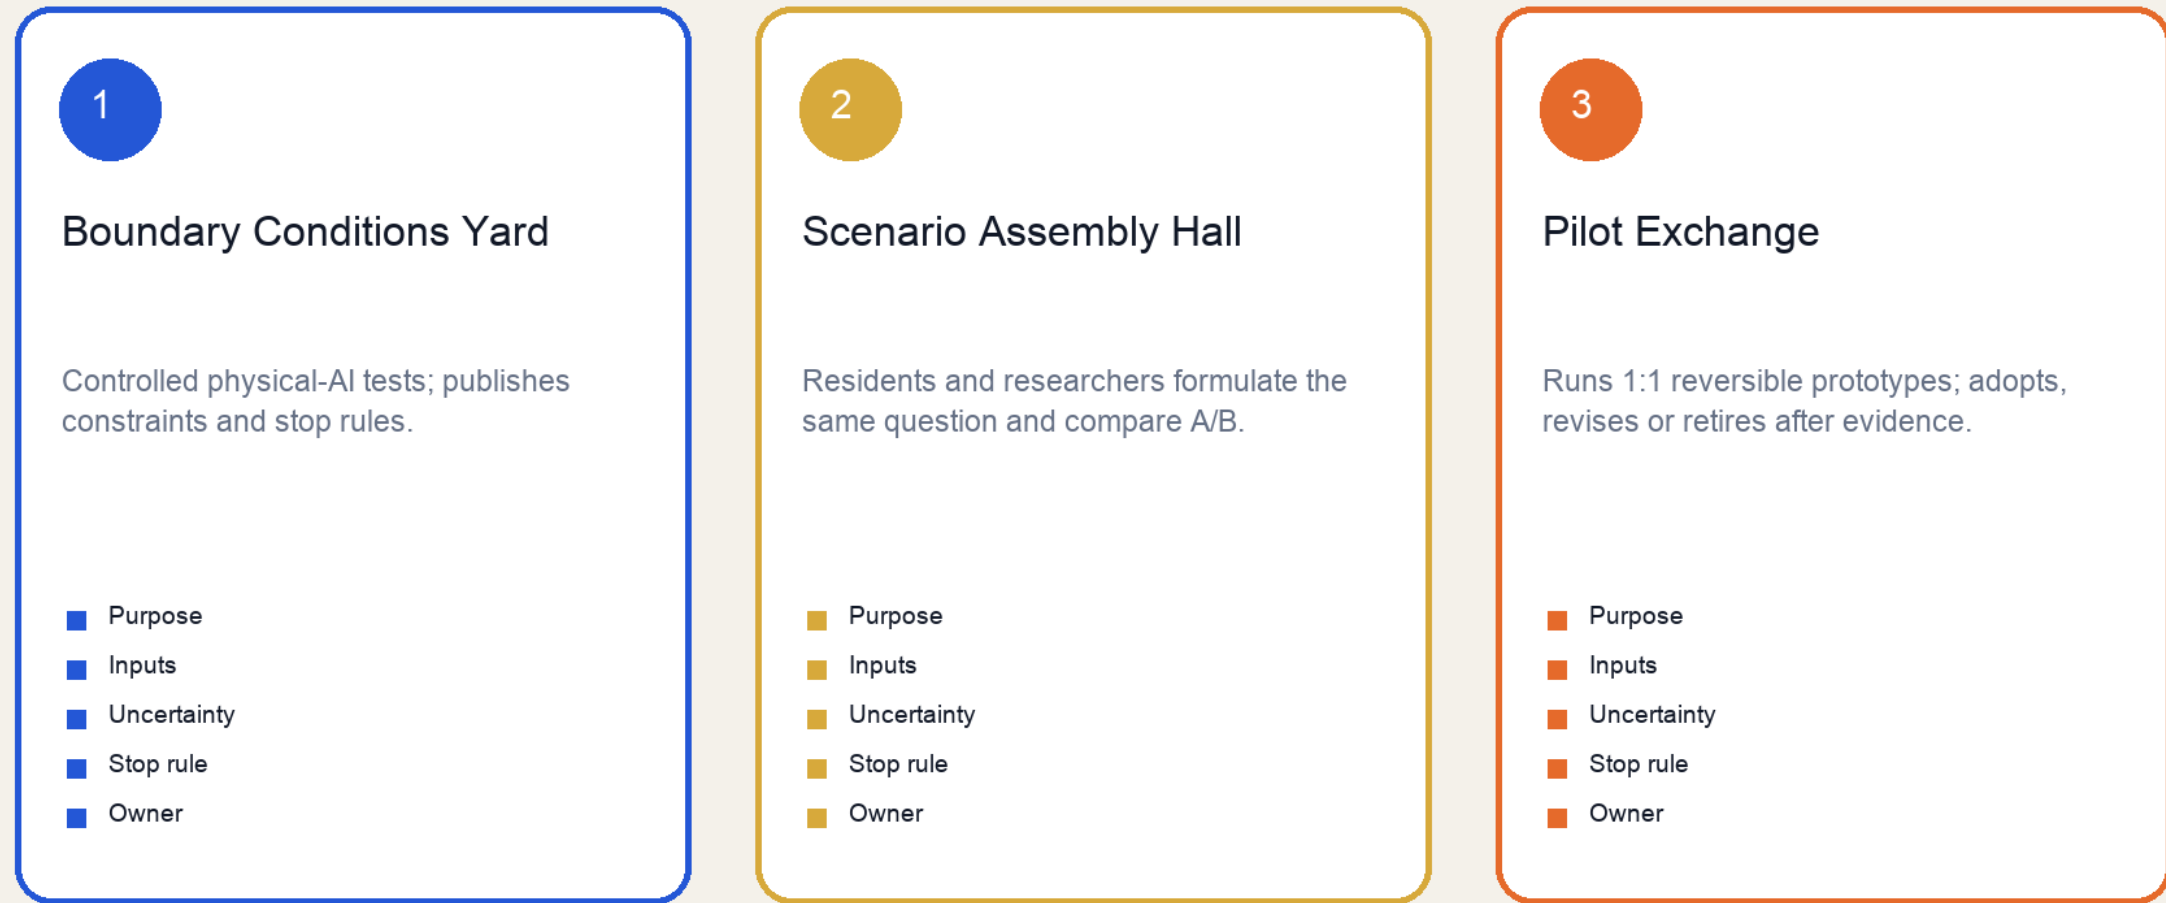

JZ-CC / 2026

Three labs, one public protocol

Each key area owns a different step of the compare–test–decide loop.

JZ-CC / 2026

Three labs turn evidence into a public spatial system

Boundary Conditions Yard → Scenario Assembly Hall → Pilot Exchange

Three labs, one public protocol

Each key area owns a different step of the compare–test–decide loop.

JZ·CC / 2026

1

Boundary Conditions Yard

Controlled physical-AI tests; publishes constraints and stop rules.

Purpose

Inputs

Uncertainty

Stop rule

Owner

2

Scenario Assembly Hall

Residents and researchers formulate the same question and compare A/B.

Purpose

Inputs

Uncertainty

Stop rule

Owner

3

Pilot Exchange

Runs 1:1 reversible prototypes; adopts, revises or retires after evidence.

Purpose

Inputs

Uncertainty

Stop rule

Owner

12 scenario cards

SC-01

Shade and rest chain

SC-02

Robot-pedestrian co-presence

SC-03

Shared curb

SC-04

Accessible interchange

SC-05

Offline-first elder service

SC-06

Public-service assistant

SC-07

Campus–district access

SC-08

Night services

SC-09

Storm response

SC-10

Delivery micro-hub

SC-11

Public-space programming

SC-12

Distributed cooling and energy

Mobility + blue-green test field

Routes are judged by the worst affected persona, not average speed alone.

JZ·CC / 2026

P95 travel time

accessible failure path

near-miss proxy

heat exposure

offline completion

reversible stop rule

Exact routes require road redlines, station interfaces and field audit.
