

ON DUTY

JING-ZHANG

ACCOUNTABLE AI PUBLIC SERVICES

One duty spine, three duty halls, two support wings and twelve service nodes - every AI service has a human takeover, non-digital option and stop threshold.

007xf × Codex · 2026.08.10

CONCEPT / PROVISIONAL GEOMETRY

CONCEPT ATMOSPHERE · NOT SPATIAL EVIDENCE

01 ON DUTY JING-ZHANG

AI public services as accountable, maintainable urban infrastructure

SIX-PART DUTY ROSTER

- 01 Service window
When it runs and for whom
- 02 Data boundary
What is collected and retained
- 03 Human in charge
Named duty role and takeover
- 04 Non-digital option
Paper, counter and access route
- 05 Stop threshold
When to degrade or shut down
- 06 Restore & maintain
Tickets, review and version log

02 FUNCTION BEFORE FORM

One duty spine · three halls · two support wings · twelve duty points

FOUR FUNCTIONAL INTENTS

Community Duty and Daily Services

maintenance ledger

03 THREE HALLS, ONE ACCOUNTABILITY CHAIN

Different roles; the same takeover, fallback and maintenance discipline

01

VALIDATION DUTY HALL

- Robot and mobility sandbox
- Risk review room
- Stop-test observation deck

CONCEPT LOCATION · VERIFY WITH OFFICIAL POLYGON

02

SERVICE DUTY HALL

- No-login service counter
- Multilingual accessibility
- Resident feedback studio

CONCEPT LOCATION · VERIFY WITH OFFICIAL POLYGON

03

OPERATIONS DUTY HALL

- Station-city duty room
- Maintenance & vendor ledger
- International visitor interface

CONCEPT LOCATION · VERIFY WITH OFFICIAL POLYGON

SHARED DUTY LOG / 共享值守台账

04 ACCESS IS THE BACKUP SYSTEM

Walking, shade, human help and a non-digital path remain usable when AI is absent

UNIVERSAL SERVICE KIT

-  Named human duty counter
-  Paper map and route code
-  Tactile + audible signage
-  Seating, water and charging
-  Visible service status light
-  Emergency stop and safe zone

12 duty points share one fallback map.

05 MEASURE READINESS, NOT HYPE

The first dashboard tracks accountability coverage; spatial numbers remain provisional

06 A FUTURE THAT STARTS WITH TODAY'S CAPABILITIES

Borrow methods from Shenzhen and Chongqing; build for Beijing, the repository brief and real operators

9 DEPLOY-NOW SCENARIOS

Available products + existing service workflows

3 CONTROLLED PILOTS

Geofence + human supervisor + automatic expiry

4 EXCLUDED CAPABILITIES

No autonomous public decisions, mandatory biometrics or open-road fleets

REFERENCE TRANSFER, NOT FORM COPYING

SHENZHEN

Scene lists · modular service interfaces · innovation linked to demand

CHONGQING

Continuous route experience · station-city service · small-entry closed loops

JING-ZHANG

Railway duty discipline · Beijing public service · heritage-first renewal

NO IMPORTED SKYLINE · DENSITY · MOUNTAIN FORM · BRAND LANGUAGE

THREE IMPLEMENTATION PACKAGES

P0

Human service first

Counter · paper map · phone · duty log

P1

Reversible digital layer

Status light · accessible signs · sensors · ticketing

P2

Controlled industry validation

Temporary barrier · safe zone · named supervisor

SCALE ONLY AFTER ACCEPTANCE GATES
