EXIT + CARE

NOT MORE TECH — REVERSIBLE CIVIC CAPABILITY

●

 Every scenario enters as a limited, observable pilot. Four gates leave public evidence for continuation, modification, or retirement.

●

 The west wing supplies evidence from universities, open-source communities and professionals; the east wing returns feedback from residents, commuters, culture and stations.

●

 The envelope is the repository's provisional proxy boundary, for concept review and recalculation only.

THREE YARDS, THREE DISTINCT JOBS

EACH KEY AREA OWNS A DIFFERENT ACCOUNTABLE STAGE

v0.2

01

ZHONGZHIYUAN · VALIDATION YARD

Models, embodied AI and novel infrastructure undergo professional testing; failures retire.

PROFESSIONAL GATE

192.1 ha announced

02

AI ORIGIN · OPEN-SOURCE CONCOURSE

Translate university research into reproducible components, licenses and public evidence.

RIGHTS GATE

104.3 ha announced

03

DAZHONGSI · CIVIC PREMIERE YARD

Test public experience, accessibility and maintenance at transit, commerce and community interfaces.

PUBLIC GATE

72.0 ha announced

CAUTION:

Rectangular key areas are repository proxies; official parcels, ownership, heritage and road lines must replace them.

Proxy calculation: 11.413 km²; design green 9.19%; design public space 14.60%. Statutory, engineering and heritage conclusions remain pending official evidence and professional confirmation.

01 SOURCE + RIGHTS Trace provenance, licenses and data purpose	02 PROFESSIONAL + SAFETY Named responsibility, takeover and fault records	03 PUBLIC ACCESS Accessibility, notice and non-digital alternatives	04 EXIT + CARE Time limits, deletion and spatial restoration
