

A HOME IN MOTION AND AT REST - THE JING-ZHANG HOME-WORK RELAY

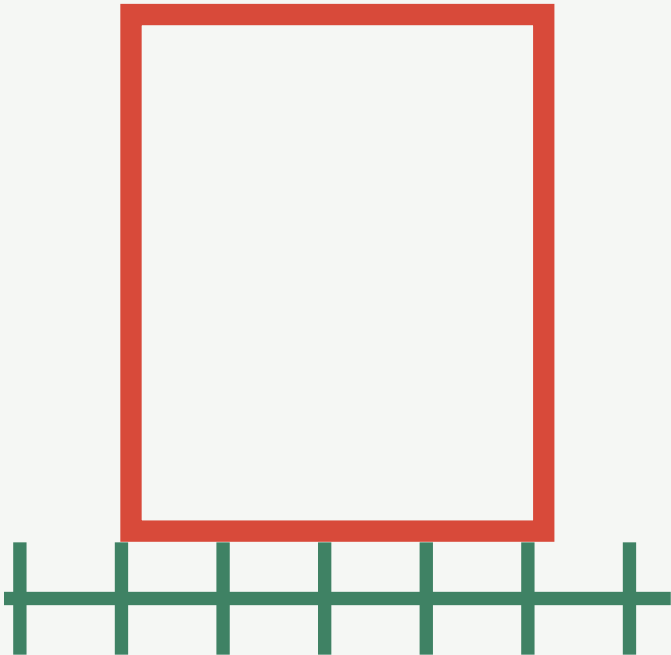

Convertible Homes and Short Links Between Living, Work and Services

READING ORDER AND AUTHORSHIP

- 01 Proposition, evidence boundaries and three-level scope
- 02 Global cases and one line, three stations, four homes, six relays
- 03 Land-use continuity and three key areas
- 04 Six personas and twelve scenario cards
- 05 Mobility, blue-green space, reversible pilots and metrics

The narrative and all visual material are jointly attributed to NearCai × OpenAI Codex. Text, geometry, metrics, figures and PDFs are generated locally; external material is used only for factual citation or background comparison, without copied images, trademarks or layouts.

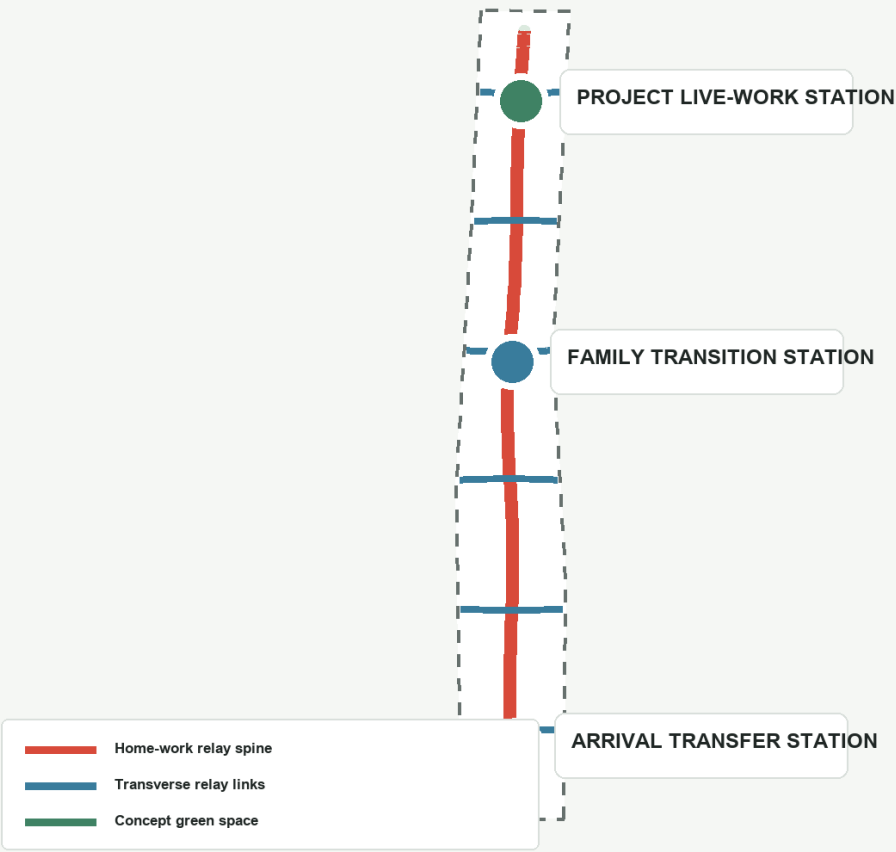

WHY A HOME-WORK RELAY

An innovation belt should not only attract people. It should preserve visible choices, exits and continuity across housing, work and everyday services as life stages change.

01 / HOME-WORK RELAY

A RELAY THAT KEEPS DAILY LIFE CONNECTED

A spatial protocol inside provisional geometry: one line, three stations, four home types, six relays

DERIVED FROM: geometry/site_boundary.geojson + roads.geojson + key_areas.geojson

01 ONE LINE

A reversible relay connects homes, workspaces and everyday services.

02 THREE STATIONS

Project live-work, family transition and arrival transfer serve distinct stages.

03 FOUR HOME TYPES

Arrival, project rental, adaptable and long-term homes remain distinct choices.

04 SIX RELAYS

Tenure, layout, work, service, consent and return are handed over visibly.

PROVISIONAL CONSTRAINT: not an official planning boundary; recalculate the full chain when official polygons arrive.

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

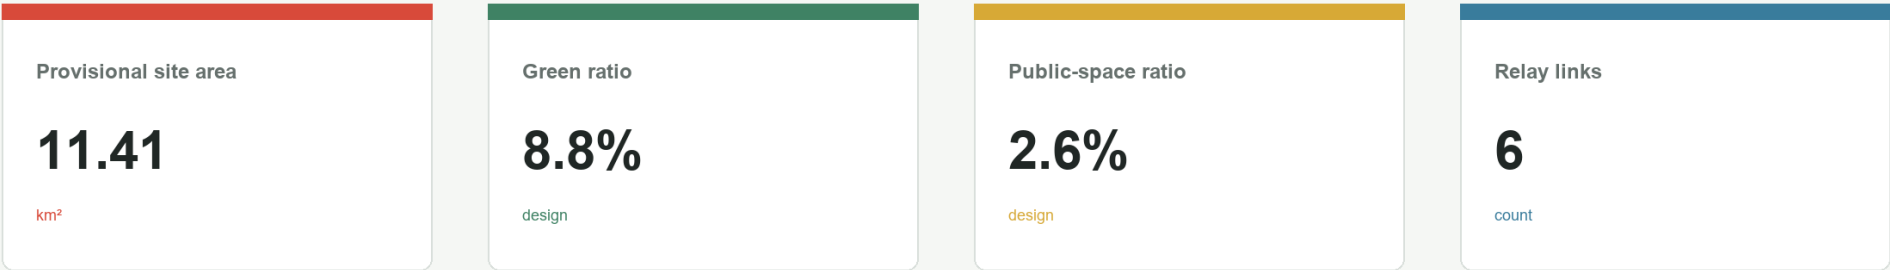

EVIDENCE BOUNDARIES

The official announcement supports tasks and approximate areas. Repository provisional polygons only support generation, display and intake checks. Rent, stock, observed commute, statutory controls and exact heritage lines remain pending.

05 / METRICS + EVIDENCE

EVERY NUMBER HAS A SOURCE; EVERY GAP HAS A REASON

GeoJSON -> EPSG:4548 recalculation -> metrics -> figures/HTML; unknown values never masquerade as numbers

PENDING OFFICIAL OR AGGREGATED DATA

Machine-gate and content-review readiness do not equal approval or official-geometry-dependent professional scoring eligibility.

DERIVED FROM: metrics.json + geometry/"_geojson + self_check.json

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

THREE-LEVEL SCOPE

The 43.6 km² layer frames industry and future-city strategy; 11.4 km² tests overall structure; three key areas host project live-work, family transition and arrival transfer.

01 / HOME-WORK RELAY

A RELAY THAT KEEPS DAILY LIFE CONNECTED

A spatial protocol inside provisional geometry: one line, three stations, four home types, six relays

DERIVED FROM: geometry/site_boundary.geojson + roads.geojson + key_areas.geojson

01 ONE LINE

A reversible relay connects homes, workspaces and everyday services.

02 THREE STATIONS

Project live-work, family transition and arrival transfer serve distinct stages.

03 FOUR HOME TYPES

Arrival, project rental, adaptable and long-term homes remain distinct choices.

04 SIX RELAYS

Tenure, layout, work, service, consent and return are handed over visibly.

PROVISIONAL CONSTRAINT: not an official planning boundary; recalculate the full chain when official polygons arrive.

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

SIX GLOBAL CASES, MECHANISMS ONLY

Eddington, STATION F, one-north, MIT Kendall, MaRS and Barcelona 22@ offer comparative mechanisms for community housing, founder living, Work-Live-Play-Learn, mixed renewal, service platforms and productive districts. Their numbers and institutions are not copied.

03 / THREE STATIONS

THREE STATIONS, THREE VISIBLE HANDOVERS

Each key area tests a different stage; all locations remain constrained by provisional polygons

01

ZHONGZHIYUAN | PROJECT LIVE-WORK

Project rental + shared lab + reversible fit-out test

Align project cycles with living, experimentation and visible exit responsibility.

02

AI ORIGIN | FAMILY TRANSITION

Adaptable home + care relay + partner work interface

A changing household stage does not require leaving the innovation network; human and no-AI paths remain.

03

DAZHONGSI | ARRIVAL TRANSFER

Arrival stay + city services + transfer to long-term options

A conceptual first relay connects identity, housing, work and everyday services without automatic allocation.

Key-area location uncertainty is documented in Issue #1029; these diagrams make no claim about actual station footprints, official boundaries or engineering siting.

DERIVED FROM: geometry/key_areas.geojson + public_space.geojson

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

ONE LINE · THREE STATIONS · FOUR HOMES · SIX RELAYS

The line is not a new official alignment; it is a map of responsibility and service handovers. Every transition names options, human review, exit conditions and maintenance ownership.

01 / HOME-WORK RELAY

A RELAY THAT KEEPS DAILY LIFE CONNECTED

A spatial protocol inside provisional geometry: one line, three stations, four home types, six relays

DERIVED FROM: geometry/site_boundary.geojson + roads.geojson + key_areas.geojson

01 ONE LINE

A reversible relay connects homes, workspaces and everyday services.

02 THREE STATIONS

Project live-work, family transition and arrival transfer serve distinct stages.

03 FOUR HOME TYPES

Arrival, project rental, adaptable and long-term homes remain distinct choices.

04 SIX RELAYS

Tenure, layout, work, service, consent and return are handed over visibly.

PROVISIONAL CONSTRAINT: not an official planning boundary; recalculate the full chain when official polygons arrive.

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

LAND USE AND CONTINUITY

One topology source produces research, residential, service, culture, road, green and plaza areas. Shares are recalculable design quantities, not statutory controls.

02 / LAND-USE STRUCTURE

LAND USE AS A TEST OF CONTINUITY, NOT A STATUTORY PLAN

Every partition comes from one topology source; areas are recalculable design quantities inside a provisional boundary

DERIVED FROM: geometry/land_use.geojson + metrics.json

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

ZHONGZHIYUAN | PROJECT LIVE-WORK

Project rental, shared laboratories and reversible fit-out testing form one station prototype. Live-work adjacency must pass noise, safety and private-space separation tests.

03 / THREE STATIONS

THREE STATIONS, THREE VISIBLE HANDOVERS

Each key area tests a different stage; all locations remain constrained by provisional polygons

01

ZHONGZHIYUAN | PROJECT LIVE-WORK

Project rental + shared lab + reversible fit-out test

Align project cycles with living, experimentation and visible exit responsibility.

02

AI ORIGIN | FAMILY TRANSITION

Adaptable home + care relay + partner work interface

A changing household stage does not require leaving the innovation network; human and no-AI paths remain.

03

DAZHONGSI | ARRIVAL TRANSFER

Arrival stay + city services + transfer to long-term options

A conceptual first relay connects identity, housing, work and everyday services without automatic allocation.

Key-area location uncertainty is documented in Issue #1029; these diagrams make no claim about actual station footprints, official boundaries or engineering siting.

DERIVED FROM: geometry/key_areas.geojson + public_space.geojson

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

AI ORIGIN | FAMILY TRANSITION

Adaptable homes, care relays and partner-work interfaces provide explainable options only. They do not allocate housing, score households or remove human service.

03 / THREE STATIONS

THREE STATIONS, THREE VISIBLE HANDOVERS

Each key area tests a different stage; all locations remain constrained by provisional polygons

01

ZHONGZHIYUAN | PROJECT
LIVE-WORK

Project rental + shared lab + reversible fit-out test

Align project cycles with living, experimentation and visible exit responsibility.

02

AI ORIGIN | FAMILY TRANSITION

Adaptable home + care relay + partner work interface

A changing household stage does not require leaving the innovation network; human and no-AI paths remain.

03

DAZHONGSI | ARRIVAL
TRANSFER

Arrival stay + city services + transfer to long-term options

A conceptual first relay connects identity, housing, work and everyday services without automatic allocation.

Key-area location uncertainty is documented in Issue #1029; these diagrams make no claim about actual station footprints, official boundaries or engineering siting.

DERIVED FROM: geometry/key_areas.geojson + public_space.geojson

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

DAZHONGSI | ARRIVAL TRANSFER

Arrival stays, city services and transfer to long-term choices form the first relay. The provisional key area has documented location uncertainty, so no actual station siting is claimed.

03 / THREE STATIONS

THREE STATIONS, THREE VISIBLE HANDOVERS

Each key area tests a different stage; all locations remain constrained by provisional polygons

01

ZHONGZHIYUAN | PROJECT
LIVE-WORK

Project rental + shared lab + reversible fit-out test

Align project cycles with living, experimentation and visible exit responsibility.

02

AI ORIGIN | FAMILY TRANSITION

Adaptable home + care relay + partner work interface

A changing household stage does not require leaving the innovation network; human and no-AI paths remain.

03

DAZHONGSI | ARRIVAL
TRANSFER

Arrival stay + city services + transfer to long-term options

A conceptual first relay connects identity, housing, work and everyday services without automatic allocation.

Key-area location uncertainty is documented in Issue #1029; these diagrams make no claim about actual station footprints, official boundaries or engineering siting.

DERIVED FROM: geometry/key_areas.geojson + public_space.geojson

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

SIX PERSONAS, NOT ONE TALENT STEREOTYPE

New researchers, startup teams, young families, international developers, service and maintenance workers, older and disabled users jointly test continuity.

01 / HOME-WORK RELAY

A RELAY THAT KEEPS DAILY LIFE CONNECTED

A spatial protocol inside provisional geometry: one line, three stations, four home types, six relays

DERIVED FROM: geometry/site_boundary.geojson + roads.geojson + key_areas.geojson

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

SCENARIO CARDS S01-S06

Arrival option explanation, human-verified housing sources, tenure transition, adaptable-home booking, partner/career interface and shared-lab booking. Every card defines data minimisation, human review and exit.

04 / MOBILITY + BLUE-GREEN

SHORTEN THE HOME-WORK LINK BEFORE OPTIMISING TRAVEL

One public spine and six transverse relay links; conceptual centrelines are not road redlines

SCENARIO CARDS S07-S12

Door-to-desk links, care relay, private-home consent withdrawal, maintenance/offline fallback, departure/return handover and an aggregated home-work ledger. Private homes default to zero sensing.

04 / MOBILITY + BLUE-GREEN

SHORTEN THE HOME-WORK LINK BEFORE OPTIMISING TRAVEL

One public spine and six transverse relay links; conceptual centrelines are not road redlines

DERIVED FROM: geometry/roads.geojson + green_space.geojson + public_space.geojson

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

MOBILITY, WALKING AND BLUE-GREEN SPACE

First reduce the structural production of long commutes through adjacency, then connect service, green and shared spaces with one public spine and six transverse relays. No unverified transport-engineering conclusion is made.

04 / MOBILITY + BLUE-GREEN

SHORTEN THE HOME-WORK LINK BEFORE OPTIMISING TRAVEL

One public spine and six transverse relay links; conceptual centrelines are not road redlines

DERIVED FROM: geometry/roads.geojson + green_space.geojson + public_space.geojson

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

FROM DATA GATE TO REVERSIBLE PILOTS

Stage 0 obtains official boundaries, ownership, existing-building, heritage and service-capacity data. Stages 1-3 test fit-out, live-work adjacency and private-home consent; any scaling needs professional and public review.

05 / METRICS + EVIDENCE

EVERY NUMBER HAS A SOURCE; EVERY GAP HAS A REASON

GeoJSON -> EPSG:4548 recalculation -> metrics -> figures/HTML; unknown values never masquerade as numbers

PENDING OFFICIAL OR AGGREGATED DATA

Machine-gate and content-review readiness do not equal approval or official-geometry-dependent professional scoring eligibility.

DERIVED FROM: metrics.json + geometry/"_geojson + self_check.json

PROVISIONAL CONSTRAINT | CONCEPTUAL RECOMMENDATION | EPSG:4548 RECALCULATION

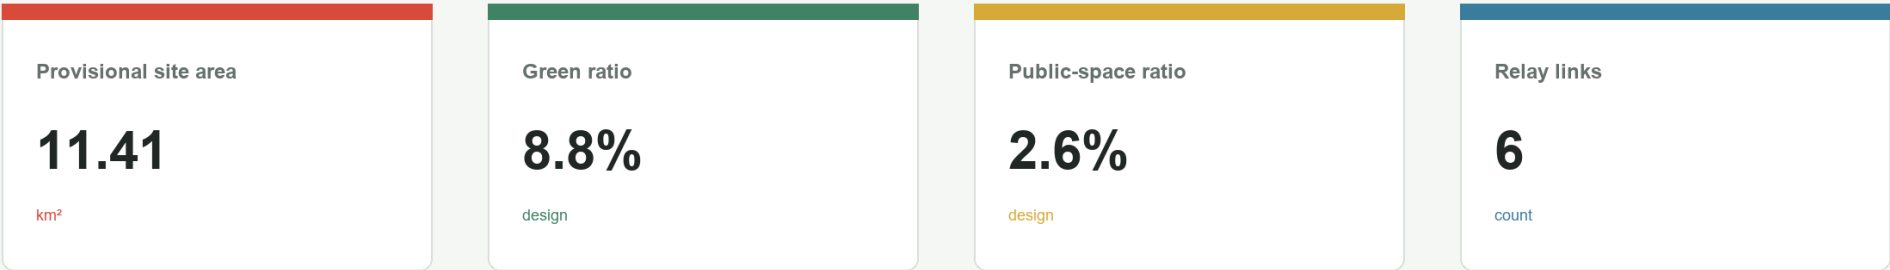

METRICS, RISKS AND HANDOVER

Every known value is recomputed from geometry.
Unknown metrics retain null values, reasons and triggers. Passing machine gates only means content-review readiness, not approval, investment commitment or statutory planning.

05 / METRICS + EVIDENCE

EVERY NUMBER HAS A SOURCE; EVERY GAP HAS A REASON

GeoJSON -> EPSG:4548 recalculation -> metrics -> figures/HTML; unknown values never masquerade as numbers

PENDING OFFICIAL OR AGGREGATED DATA

Machine-gate and content-review readiness do not equal approval or official-geometry-dependent professional scoring eligibility.

DERIVED FROM: metrics.json + geometry/"_geojson" + self_check.json
