

JZ Public Ledger

A verifiable AI urban loop · v0.2

One ledger

Trust testing

Knowledge transfer

Daily delivery

12 scenario cards

3 civic landmarks

Human review + exit

Spatial Structure and Civic Ground

Land use, mobility, blue-green space and evidence

One ledger, three loops, two wings

Land-use bands are a design skeleton, not a development commitment

PROVISIONAL CONSTRAINT · schematic, not measured scale · intake/discussion only · recalculate when official polygons arrive

Lay the public ledger on the walkable ground

Heritage park, blue-green space, nodes and stations form a walkable audit route

PROVISIONAL CONSTRAINT · schematic, not measured scale · intake/discussion only · recalculate when official polygons arrive

Metrics · evidence · recalculation

Structured data is authoritative; drawings are the human-reading layer

Design area

11,412,825

sqm

GeoJSON → EPSG:4548 → metrics.json

Green ratio

0.181

ratio

GeoJSON → EPSG:4548 → metrics.json

Public-space ratio

0.016

ratio

GeoJSON → EPSG:4548 → metrics.json

Building footprint

285,532

sqm

GeoJSON → EPSG:4548 → metrics.json

Slow/service corridor

26,140

m

GeoJSON → EPSG:4548 → metrics.json

AI nodes

12

count

GeoJSON → EPSG:4548 → metrics.json

Public-ledger rule: every spatial suggestion carries provenance, accountability, human review and exit conditions.

Unknown regulatory, ownership, road, heritage and engineering conditions are not presented as settled metrics.

Detailed Design of Three Key Areas

Evidence, spatial scenes and non-statutory targets

Three Spatial Prototypes: Evidence + Interpretation

Trust testing, knowledge transfer and daily delivery under one public ledger

Zhongzhiyuan · Trust Garden

3–5m route· 20%–35% blue-green ground· 30–90 day review

Interpretive scene

AI Origin · Transfer Street

50%–70% public frontage· 40–120m² module· 40%–60% cover

Interpretive scene

Dazhongsi · Delivery Commons

8–15m hall· conflict-free delivery· staffed fallback

Interpretive scene

Provisional boundary and generated interpretation: not to scale, not site photography or regulation; recalculate with official data

Three Public-Value Interfaces

From abstract AI functions to experiential, reviewable and reversible space

Zhongzhiyuan · Trust Garden

Accessible ground, rain gardens, lightweight audit deck and public review

AI Origin · Transfer Street

Open-source hall, adaptable shared floors, prototype modules and community service

Dazhongsi · Delivery Commons

Station-city hall, controlled handoff, blue-green street and staffed service

Zhongzhiyuan: 3–5m route | 20%–35% blue-green ground | 30–90 day review

AI Origin: 50%–70% public frontage | 40–120m² module | 40%–60% cover

Dazhongsi: 8–15m hall | conflict-free delivery | staffed fallback whenever automation operates
