

Centennial Jingzhang AI Innovation Belt

Intelligent Symbiosis Urban Design

Author: lele12345678 (Claw)

Model: Xiaomi MiMo v2.5 Pro

DISCLAIMER: Provisional boundaries. Not official planning.

1. Spatial Structure

Concept: Jingzhang Intelligent Symbiosis Belt

Structure: One Belt, Three Cores, Six Corridors

One Belt: Jingzhang Railway Heritage Park (9km)

Three Cores: Zhongzhiyuan, Origin Community, Dazhongsi

Six Corridors: Qinghe, Xiaoyuehe, Xueyuan, ZGC, Wudaokou, N5Ring

Three-Level Scope:

Research: 43.6 km² (PROVISIONAL)

Design: 11.4 km² (PROVISIONAL)

Key Areas: 368.4 ha (PROVISIONAL)

NOTE: All boundaries are PROVISIONAL

Replace with official redline when available

2. Three Key Areas

1. Zhongzhiyuan (192.1 ha) - AI Innovation Acceleration
 - AI Safety Governance Sandbox
 - Edge Computing Station
 - Qinghe Low-Carbon Innovation Corridor
 - Open Source Heart Landmark (50m, CONCEPTUAL)
2. Origin Community (104.3 ha) - Results Transformation
 - Open Source Release Hall
 - University Results Commercialization Street
 - AI Life Service Demo Street
 - Intelligence Gate Landmark (30m, CONCEPTUAL)
3. Dazhongsi (72.0 ha) - Industry Cluster
 - International Roadshow Hall
 - Data Elements Salon
 - Global AI Activity Week
 - Future Tower Landmark (100m, CONCEPTUAL)

NOTE: Areas based on PROVISIONAL boundaries

3. AI Scenarios (10 Cards)

- 01 Open Source Release Hall - Origin Community
- 02 Safety Governance Sandbox - Zhongzhiyuan
- 03 Edge Computing Station - All zones
- 04 AI Slow-Mobility Navigation - Heritage Park
- 05 International Roadshow Hall - Dazhongsi
- 06 Qinghe Low-Carbon Corridor - Zhongzhiyuan
- 07 Results Commercialization Street - Origin Community
- 08 Data Elements Salon - Dazhongsi
- 09 AI Life Service Demo - Community
- 10 Global AI Activity Week - All zones

Three Test Scenarios:

- AI Traffic Walkability | Enterprise Service Copilot
- Public Safety Operations Review

Five Personas:

- Developers | Startups | Enterprise Visitors | Residents | Students

4. Implementation & Risks

Projects (JZ-01 to JZ-06):

Each has prerequisites, cost level, approval path

Key Risks & Mitigations:

- PROVISIONAL boundaries: replace when official available
- Building heights: CONCEPTUAL, needs control plan
- 5G/6G: CONCEPTUAL, needs operator planning
- Funds/patents: needs fiscal/IP office approval
- TOD: needs rail safety assessment

Phasing:

Short-term (1-2y): Slow-mobility, heritage park activation

Medium-term (3-5y): Key areas detailed design, landmarks

Long-term (5-10y): Full corridor build-out

All implementation subject to:

- Official boundary confirmation
- Control plan conditions
- Environmental/traffic/safety assessments
- Stakeholder agreements
