

Three scope layers and overall structure

Conceptual land use and shared baseline

03 / LAND USE + STRUCTURE

Four conceptual functions share one baseline

Functional relationships test whether R&D, public space, adoption and community service support each other. They are not existing land use, zoning, title or development-capacity conclusions.

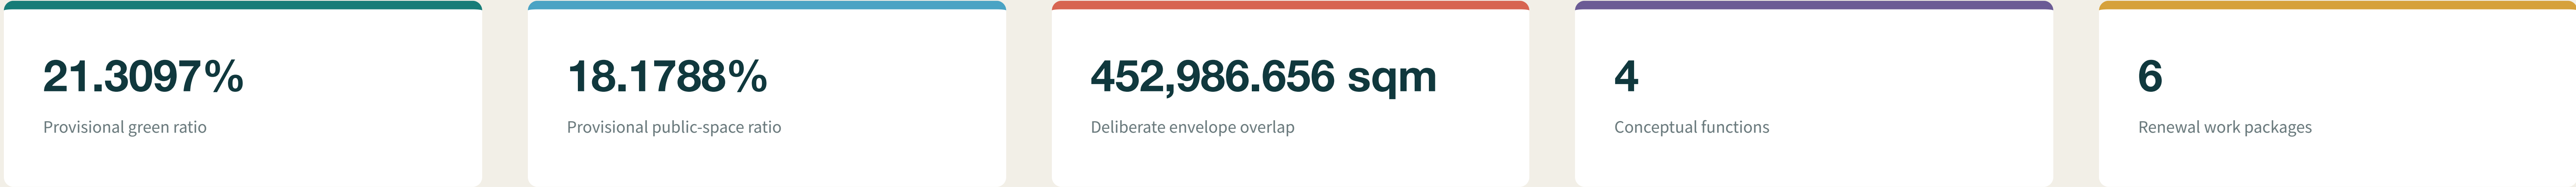

- Universal interface R&D + validation
- Accessible park + quiet open space
- Inclusive AI services + adoption
- Independent-living co-design + community

SHARED DENOMINATOR AND DELIBERATE OVERLAP

Shared denominator site_area_sqm	11,412,825.386 sqm	100%
Green envelope green_space	2,432,035.047 sqm	21.3097%
Public-space envelope public_space	2,074,716.512 sqm	18.1788%
Deliberate overlap · spine greenway	452,986.656 sqm	3.9691%

Both ratios use the same denominator and the envelopes deliberately overlap by 452,986.656 sqm — they must not be added.

KEY READINGS ON THIS BOARD

Four conceptual functions share one baseline; the land-use drawing tests functional relationships and never replaces statutory classification, title or capacity conclusions.

04 / THREE KEY AREAS

The three key areas are not three identical campuses

Zhongzhiyuan hosts controlled validation; AI Origin Community hosts voluntary co-design and independent-task tests; Dazhongsi tests procurement, maintenance, correction and exit. Every key-area boundary is provisional.

05 / MOBILITY + BLUE-GREEN

Basic service remains equivalent with AI on or off

The direct multimodal path and quiet alternative run in parallel. With AI off, offline or declined, fixed signs, paper and easy-read information, staffed help and an account-free path remain available. Centrelines express conceptual relationships only.

Brand system: common gauge translated into universal design

PARALLEL SENSORY LINES + OPEN NODES · LOGO / PALETTE / TYPE / GRAMMAR · AI ON = AI OFF

01 / Identity and mark construction LOGO / TWO GROUNDS / GEOMETRY

ON DARK #10383d

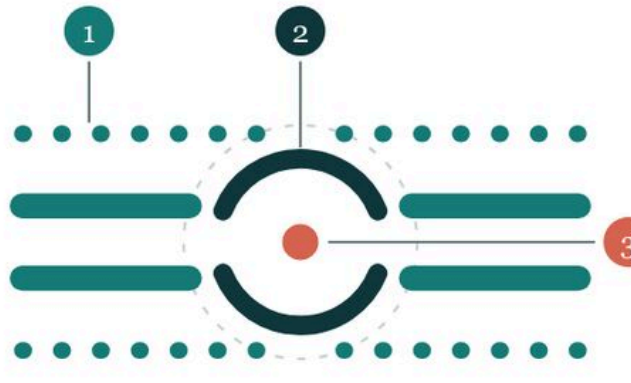

ON PAPER #f2efe7

MARK CONSTRUCTION

- Parallel sensory lines** Two solid rails carry the continuous spine for sight and sound; two dotted lines carry tactile paving and the low-stimulus alternative. Four channels run in parallel, none subordinate.
- Open node** The ring keeps openings left and right: a service can be entered and can be left. The node never closes, and never locks in one kind of body or one kind of device.
- Origin** The centre point is Every Sense Origin — where human help, human takeover and the right to stop land. Always visible, always reachable.

All four gaps sit on one construction circle. A common gauge lets different trains share one network; universal design lets different bodies share one city.

02 / Palette and colour semantics SIX COLOURS / CONTRAST RULES

--	---	--	---	--	--

Contrast recomputed under WCAG 2.1 against paper #f2efe7; the paper row is measured against deep teal #10383d. Deep teal, rail teal and node purple are cleared for body text; coral only above 24px bold or as graphics; gold as graphics and fills only. Text on dark ground uses paper or light teal, never the unlightened primary.

04 / Grammar in use SIGNAGE / PAVING / COLLATERAL / INTERFACE

Wayfinding SIGNAGE

The main panel carries the mark and bilingual name, a low panel adds tactile and braille layers, and the coral help post stays in view.

Tactile paving GROUND

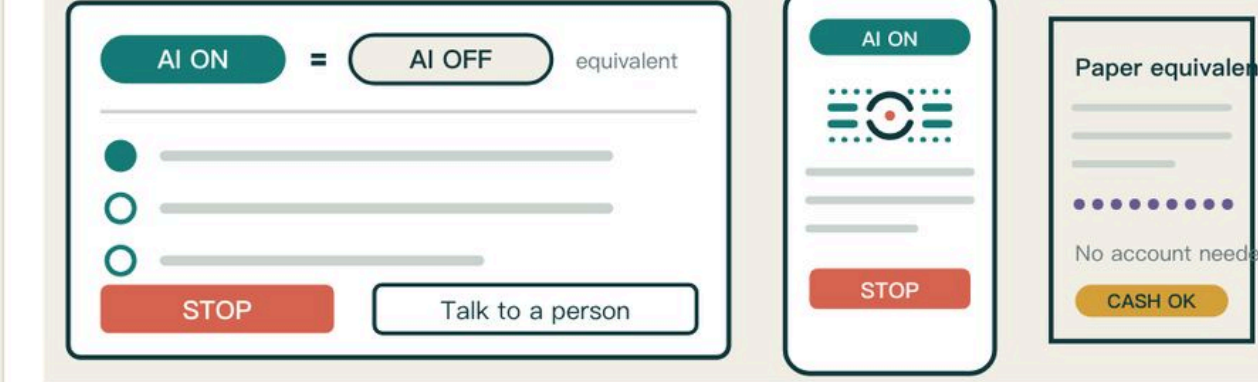

Parallel sensory lines become paving bands; the open node becomes a dot-grid circle that can be walked around, with the help post at its centre.

Event collateral PRINT

Posters flood-hill the parallel lines, booklets keep the stop notice, and tickets stay usable without an account through mono codes and a tactile strip.

Interface SCREEN

Both channel states stay visible, stop ranks equal to human handover, and the paper version is the same grammar in an equivalent form.

06 / BRAND · CULTURE · GLOBAL

One line grammar carries brand, culture and outward communication

The brand grammar abstracts the Jing-Zhang railway's "one standard gauge" into parallel sensing lines and an open node: one gauge lets different trains share a network, universal design lets different bodies share a city. Cultural work first builds a traceable resource inventory, then chooses carriers, and only then reaches symbols and wayfinding.
