

Overview Map - AI Symbiosis Belt Urban Design

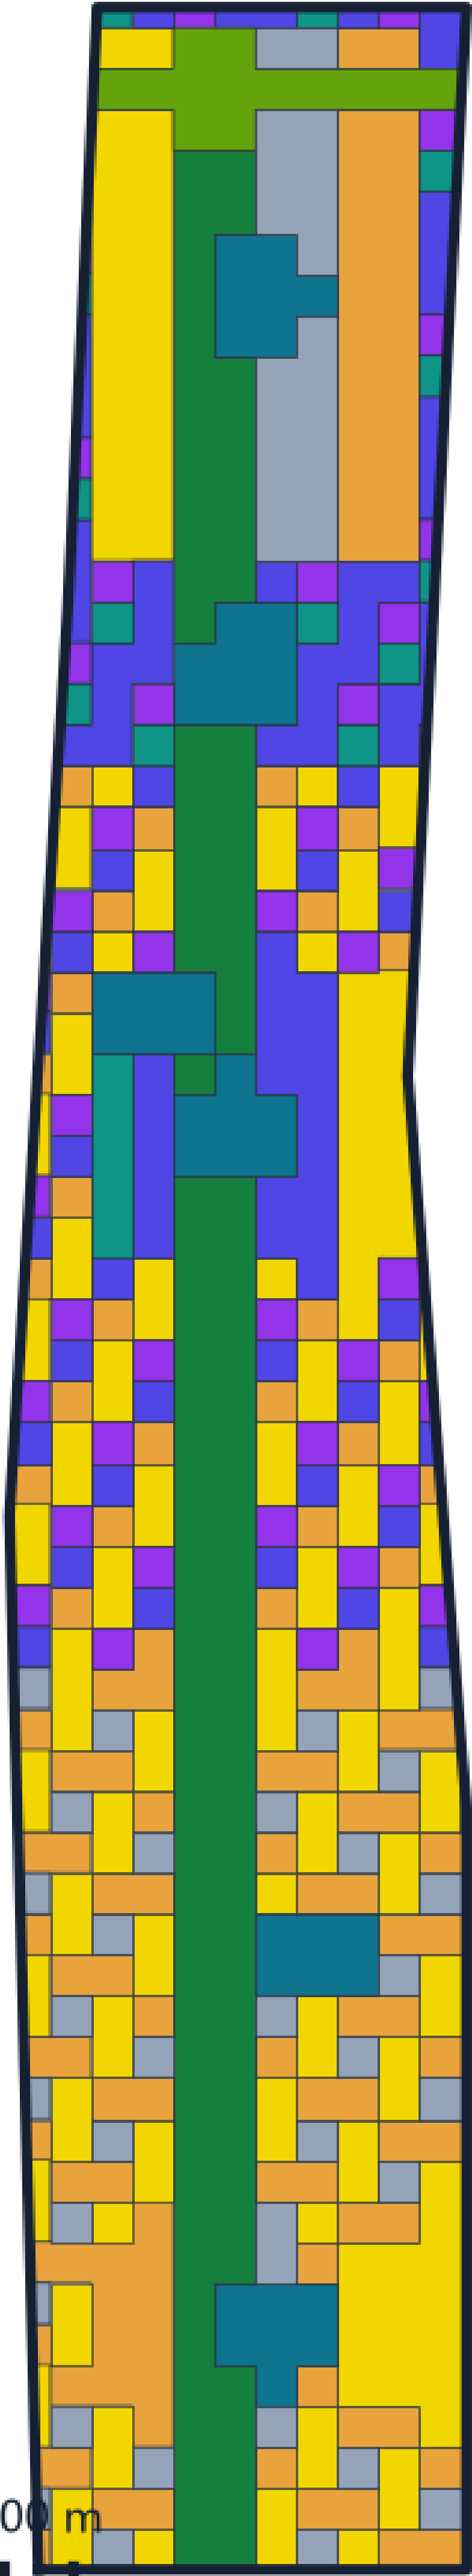

provisional_constraint - not an official redline - recalculate when official polygons are released

Fig.1 Overview: one belt, three cores, blue-green slow-traffic loop.

Land-Use Zoning Structure

N

200 m
H

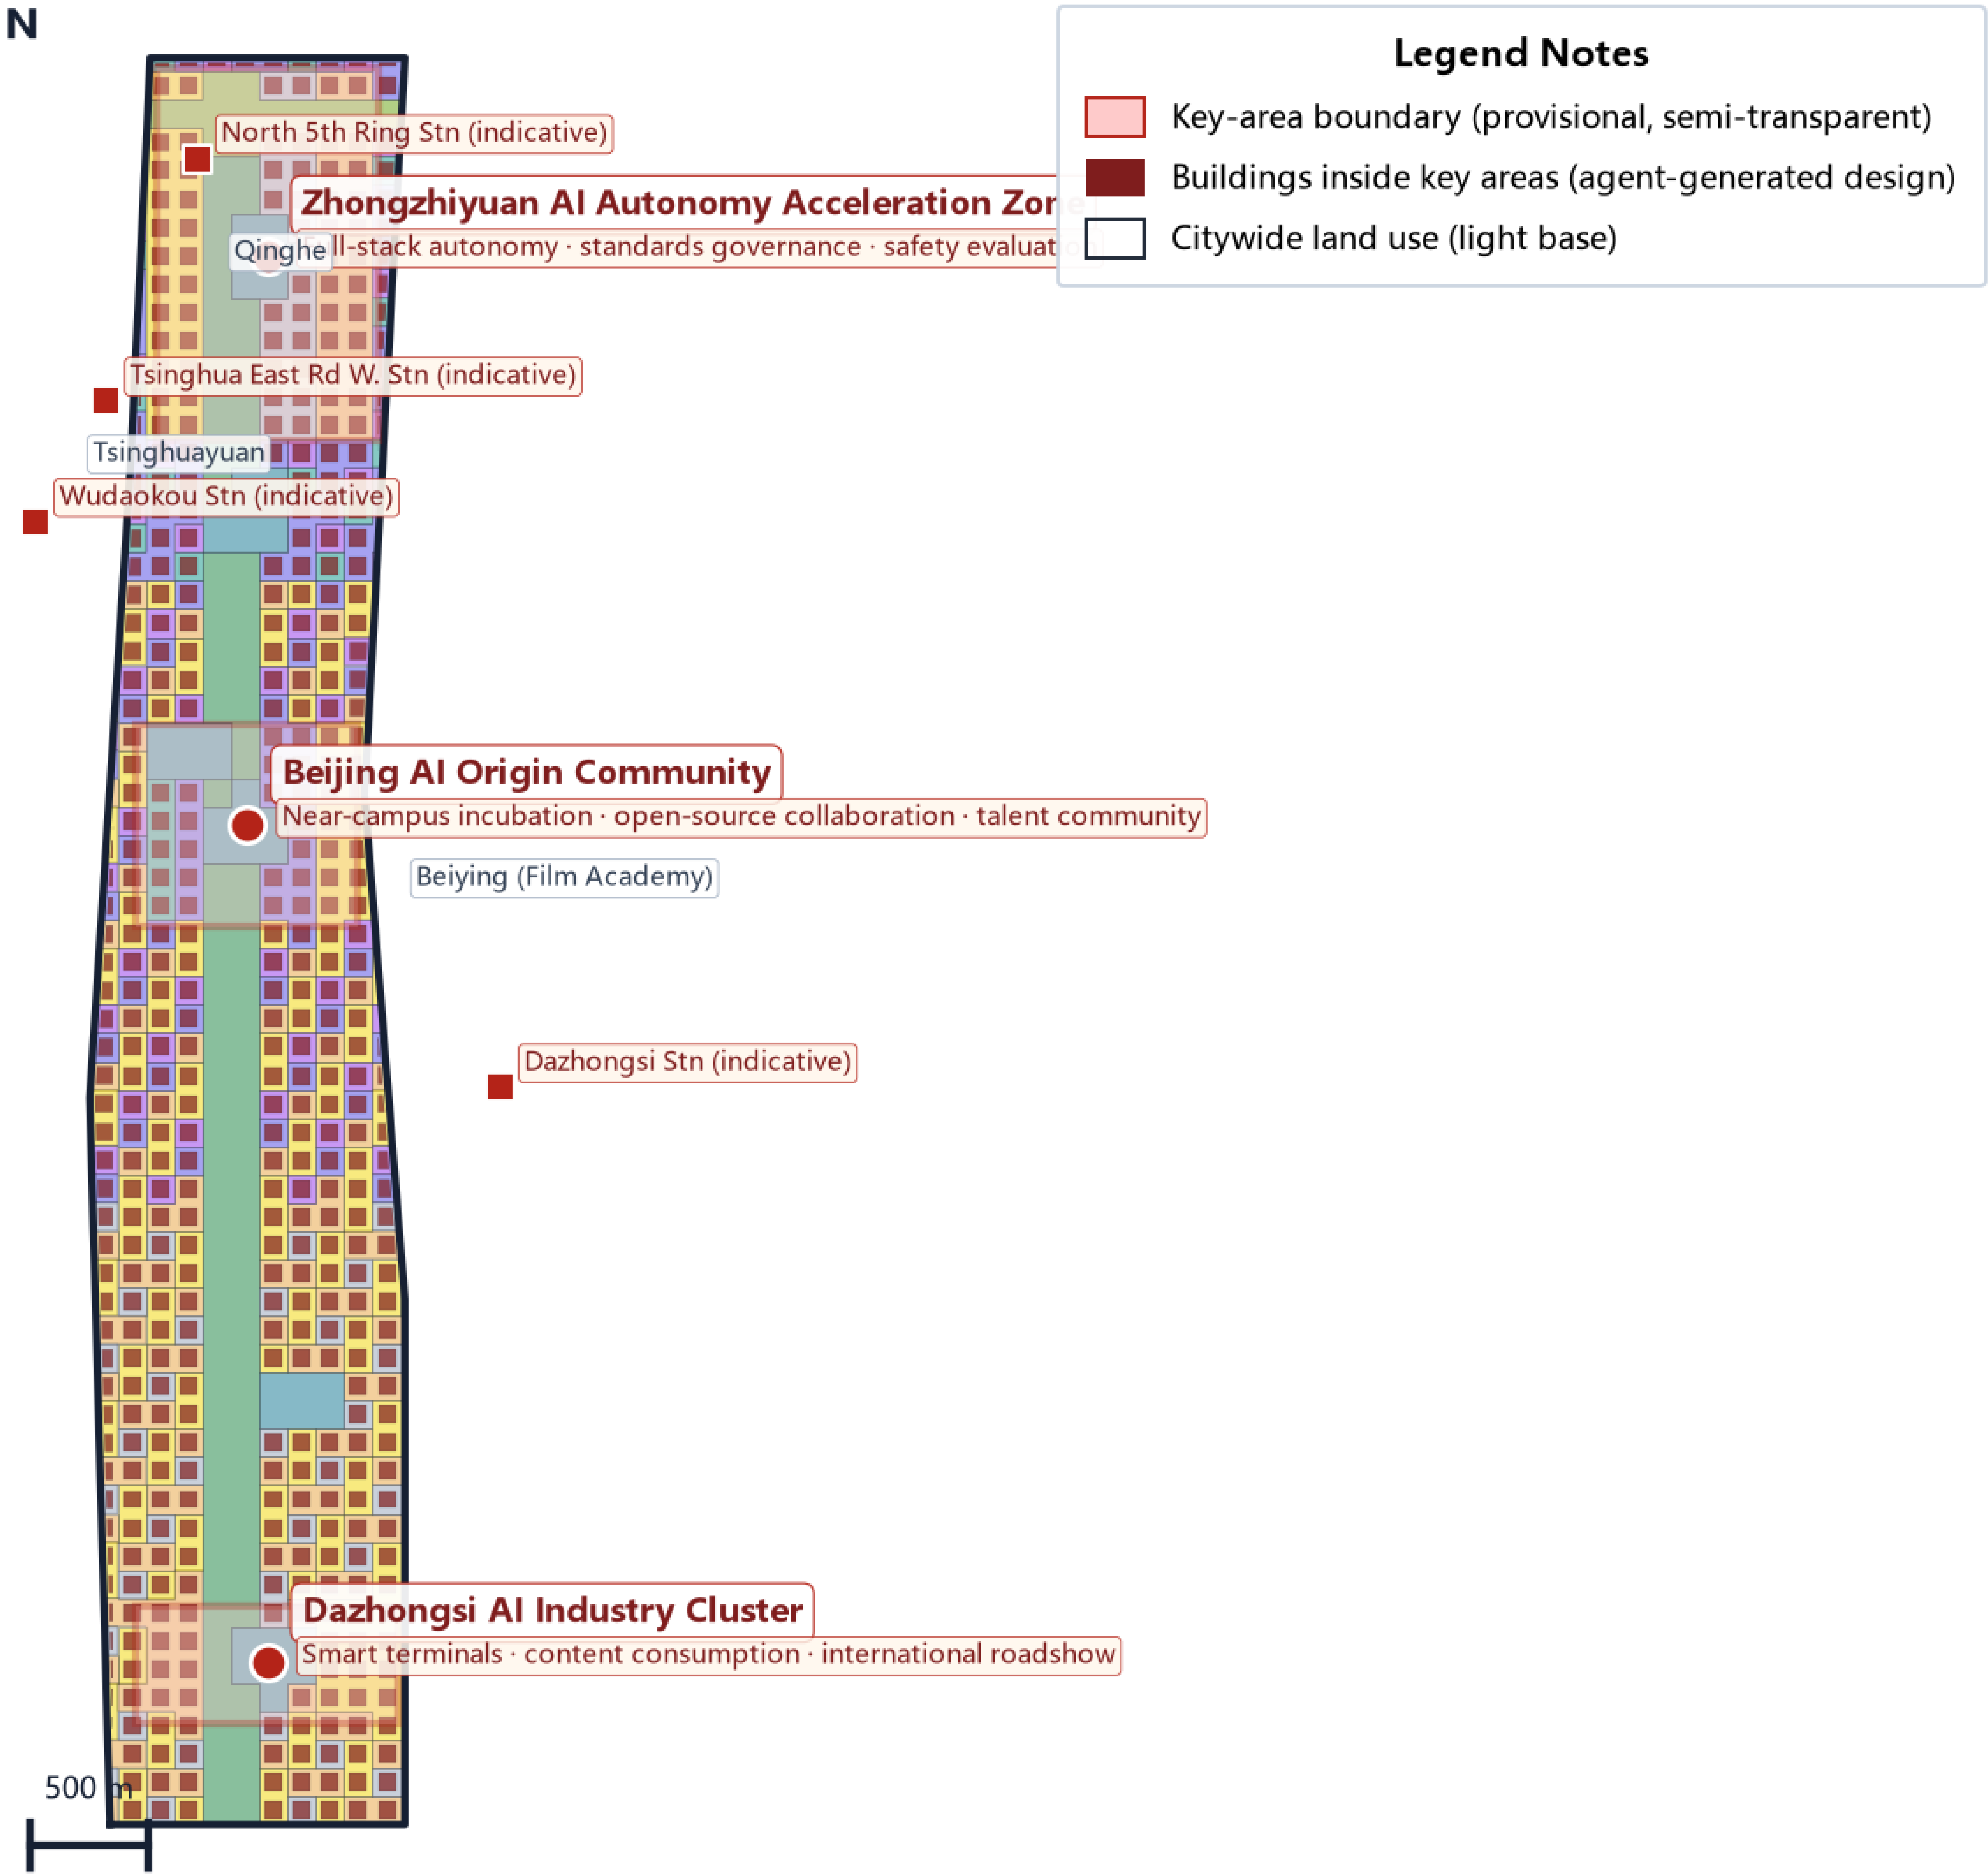

Land-Use Structure (by unit count)

- Commercial & Service Land (75 units)
- Urban Residential (70 units)
- Research Land (AI R&D) (44 units)
- Cultural Land (43 units)
- Educational Land (14 units)
- Strategic Reserve / Mixed Use (40 units)
- Park Green Space (4 units)
- Protective / Waterfront Green (1 units)
- Square / Public Space (6 units)

provisional_constraint - not an official redline - recalculate when official polygons are released

Fig 2 Land-use zoning structure (colored by MNR land-use codes).

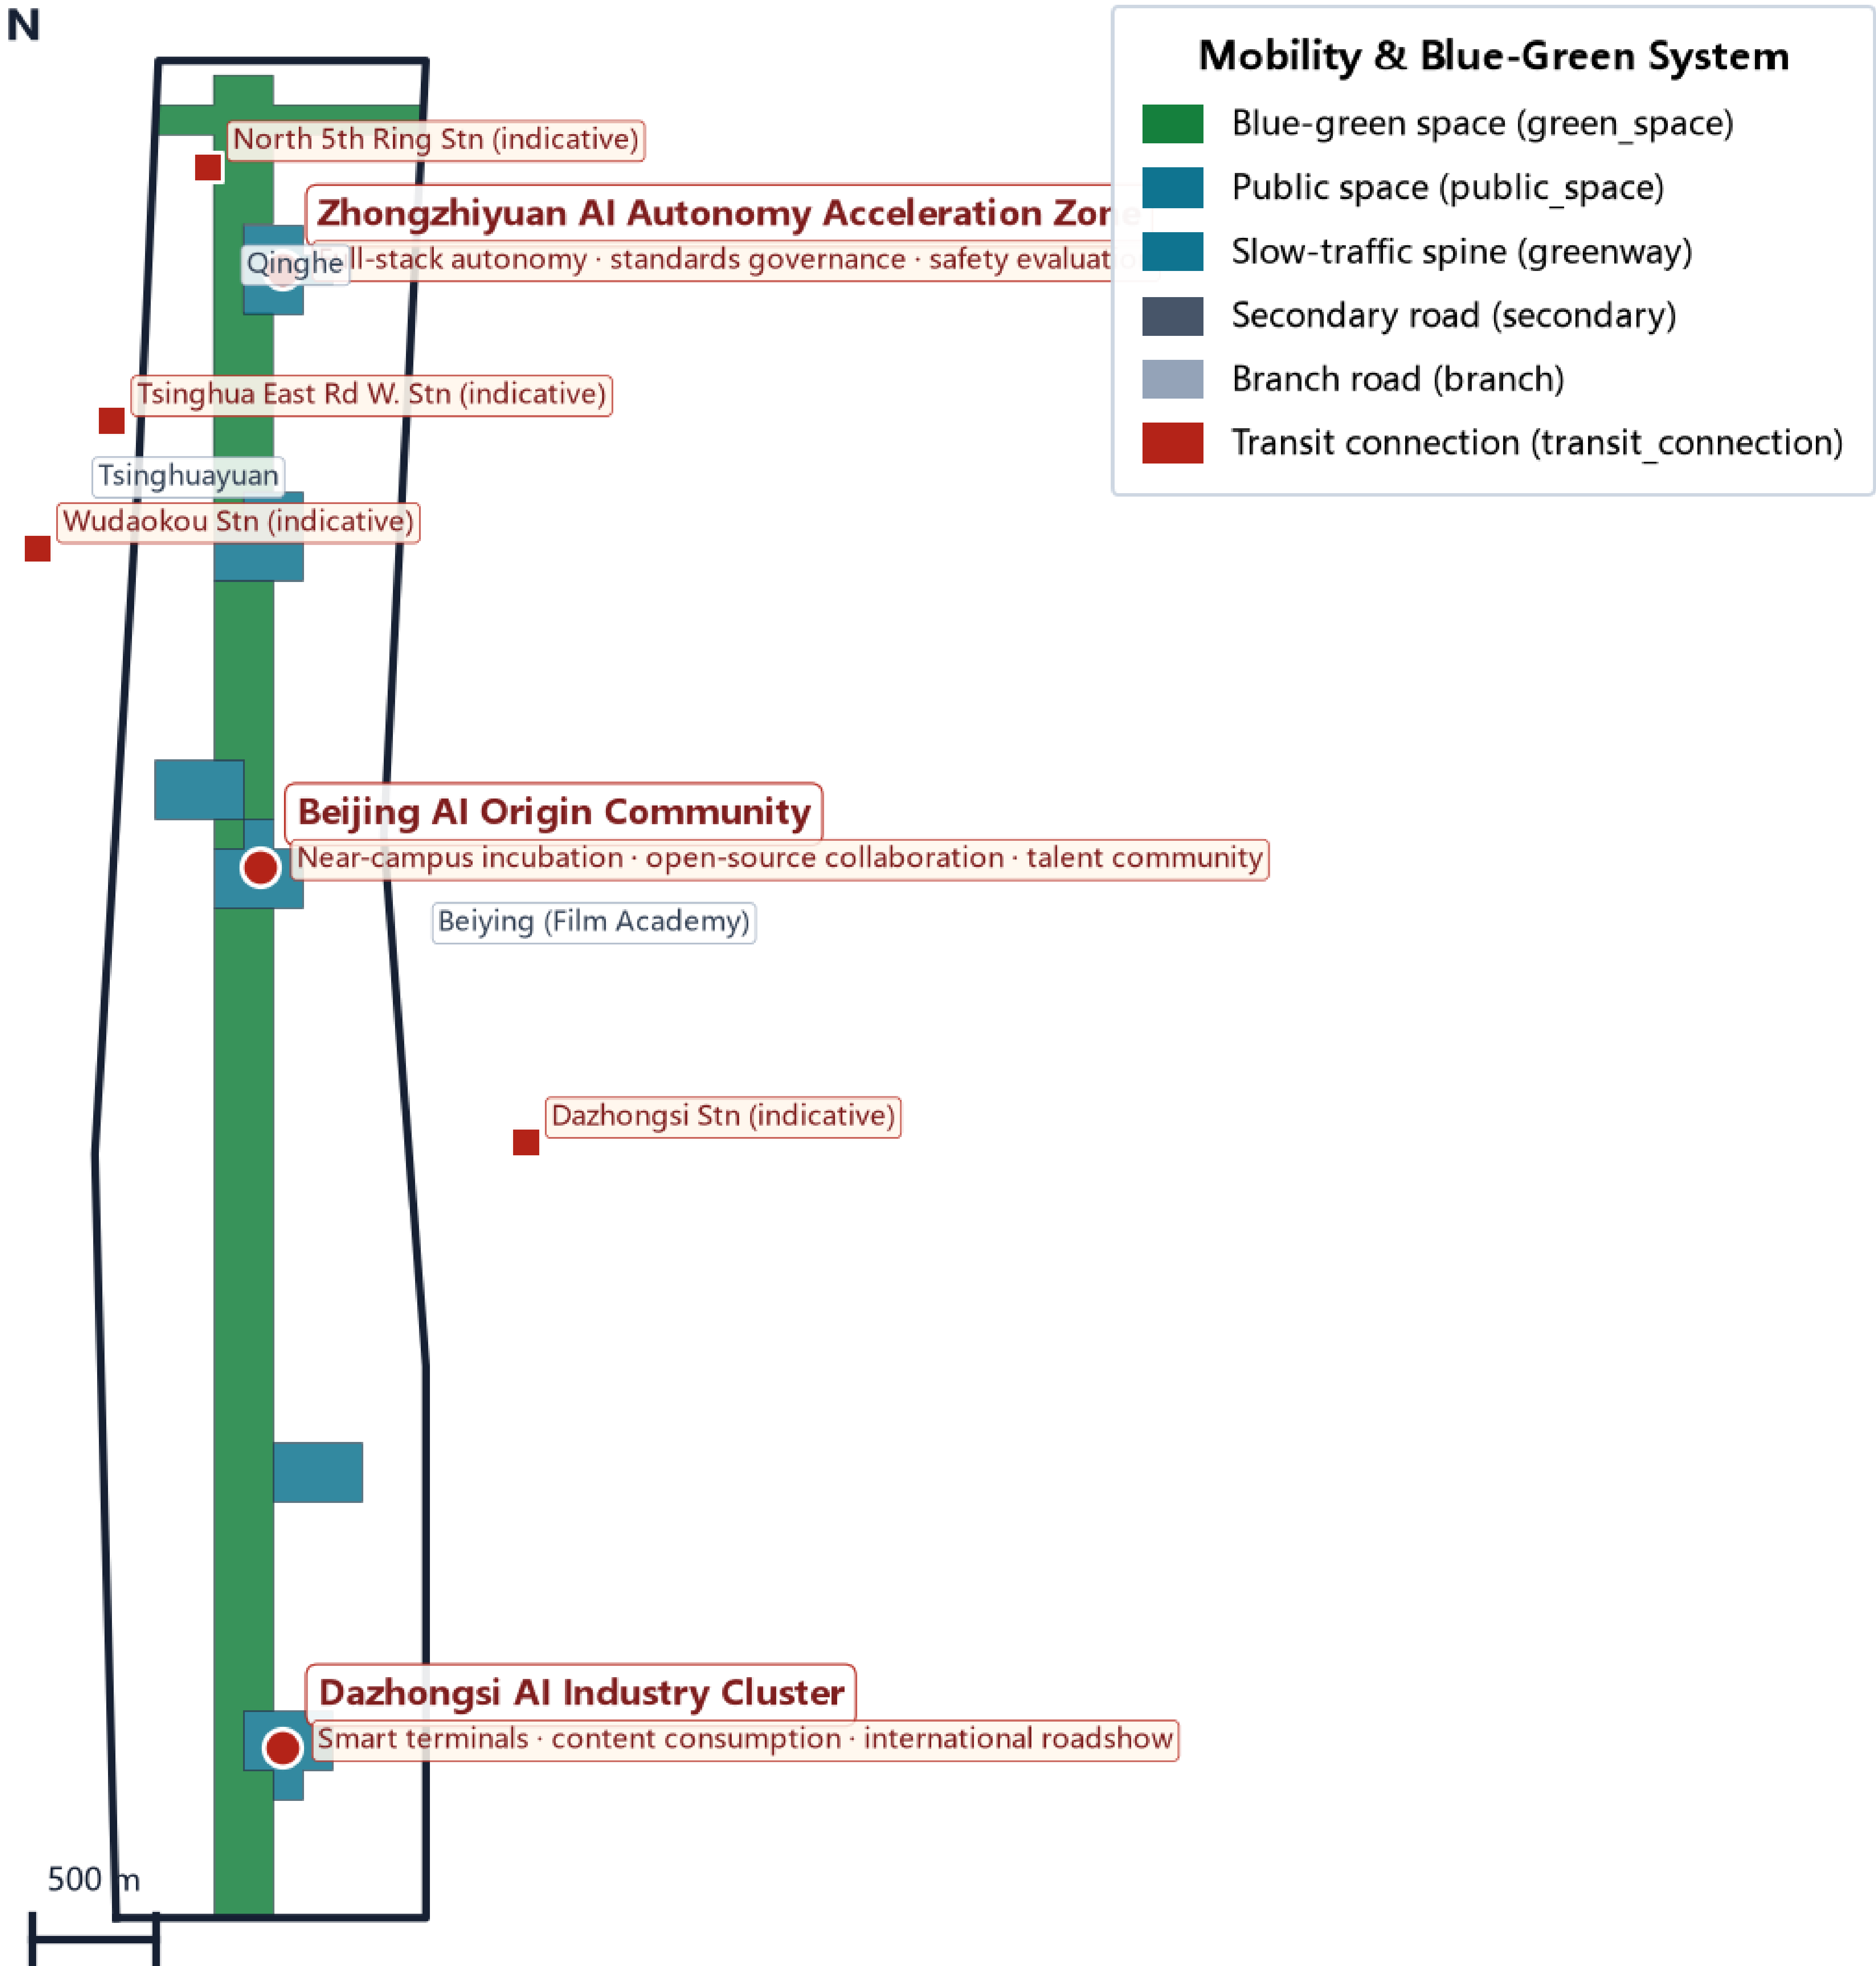

Three Key Areas - Detailed Design

provisional_constraint - not an official redline - recalculate when official polygons are released

Fig.3 Three key areas - detailed design scope (semi-transparent, interior buildings legible).

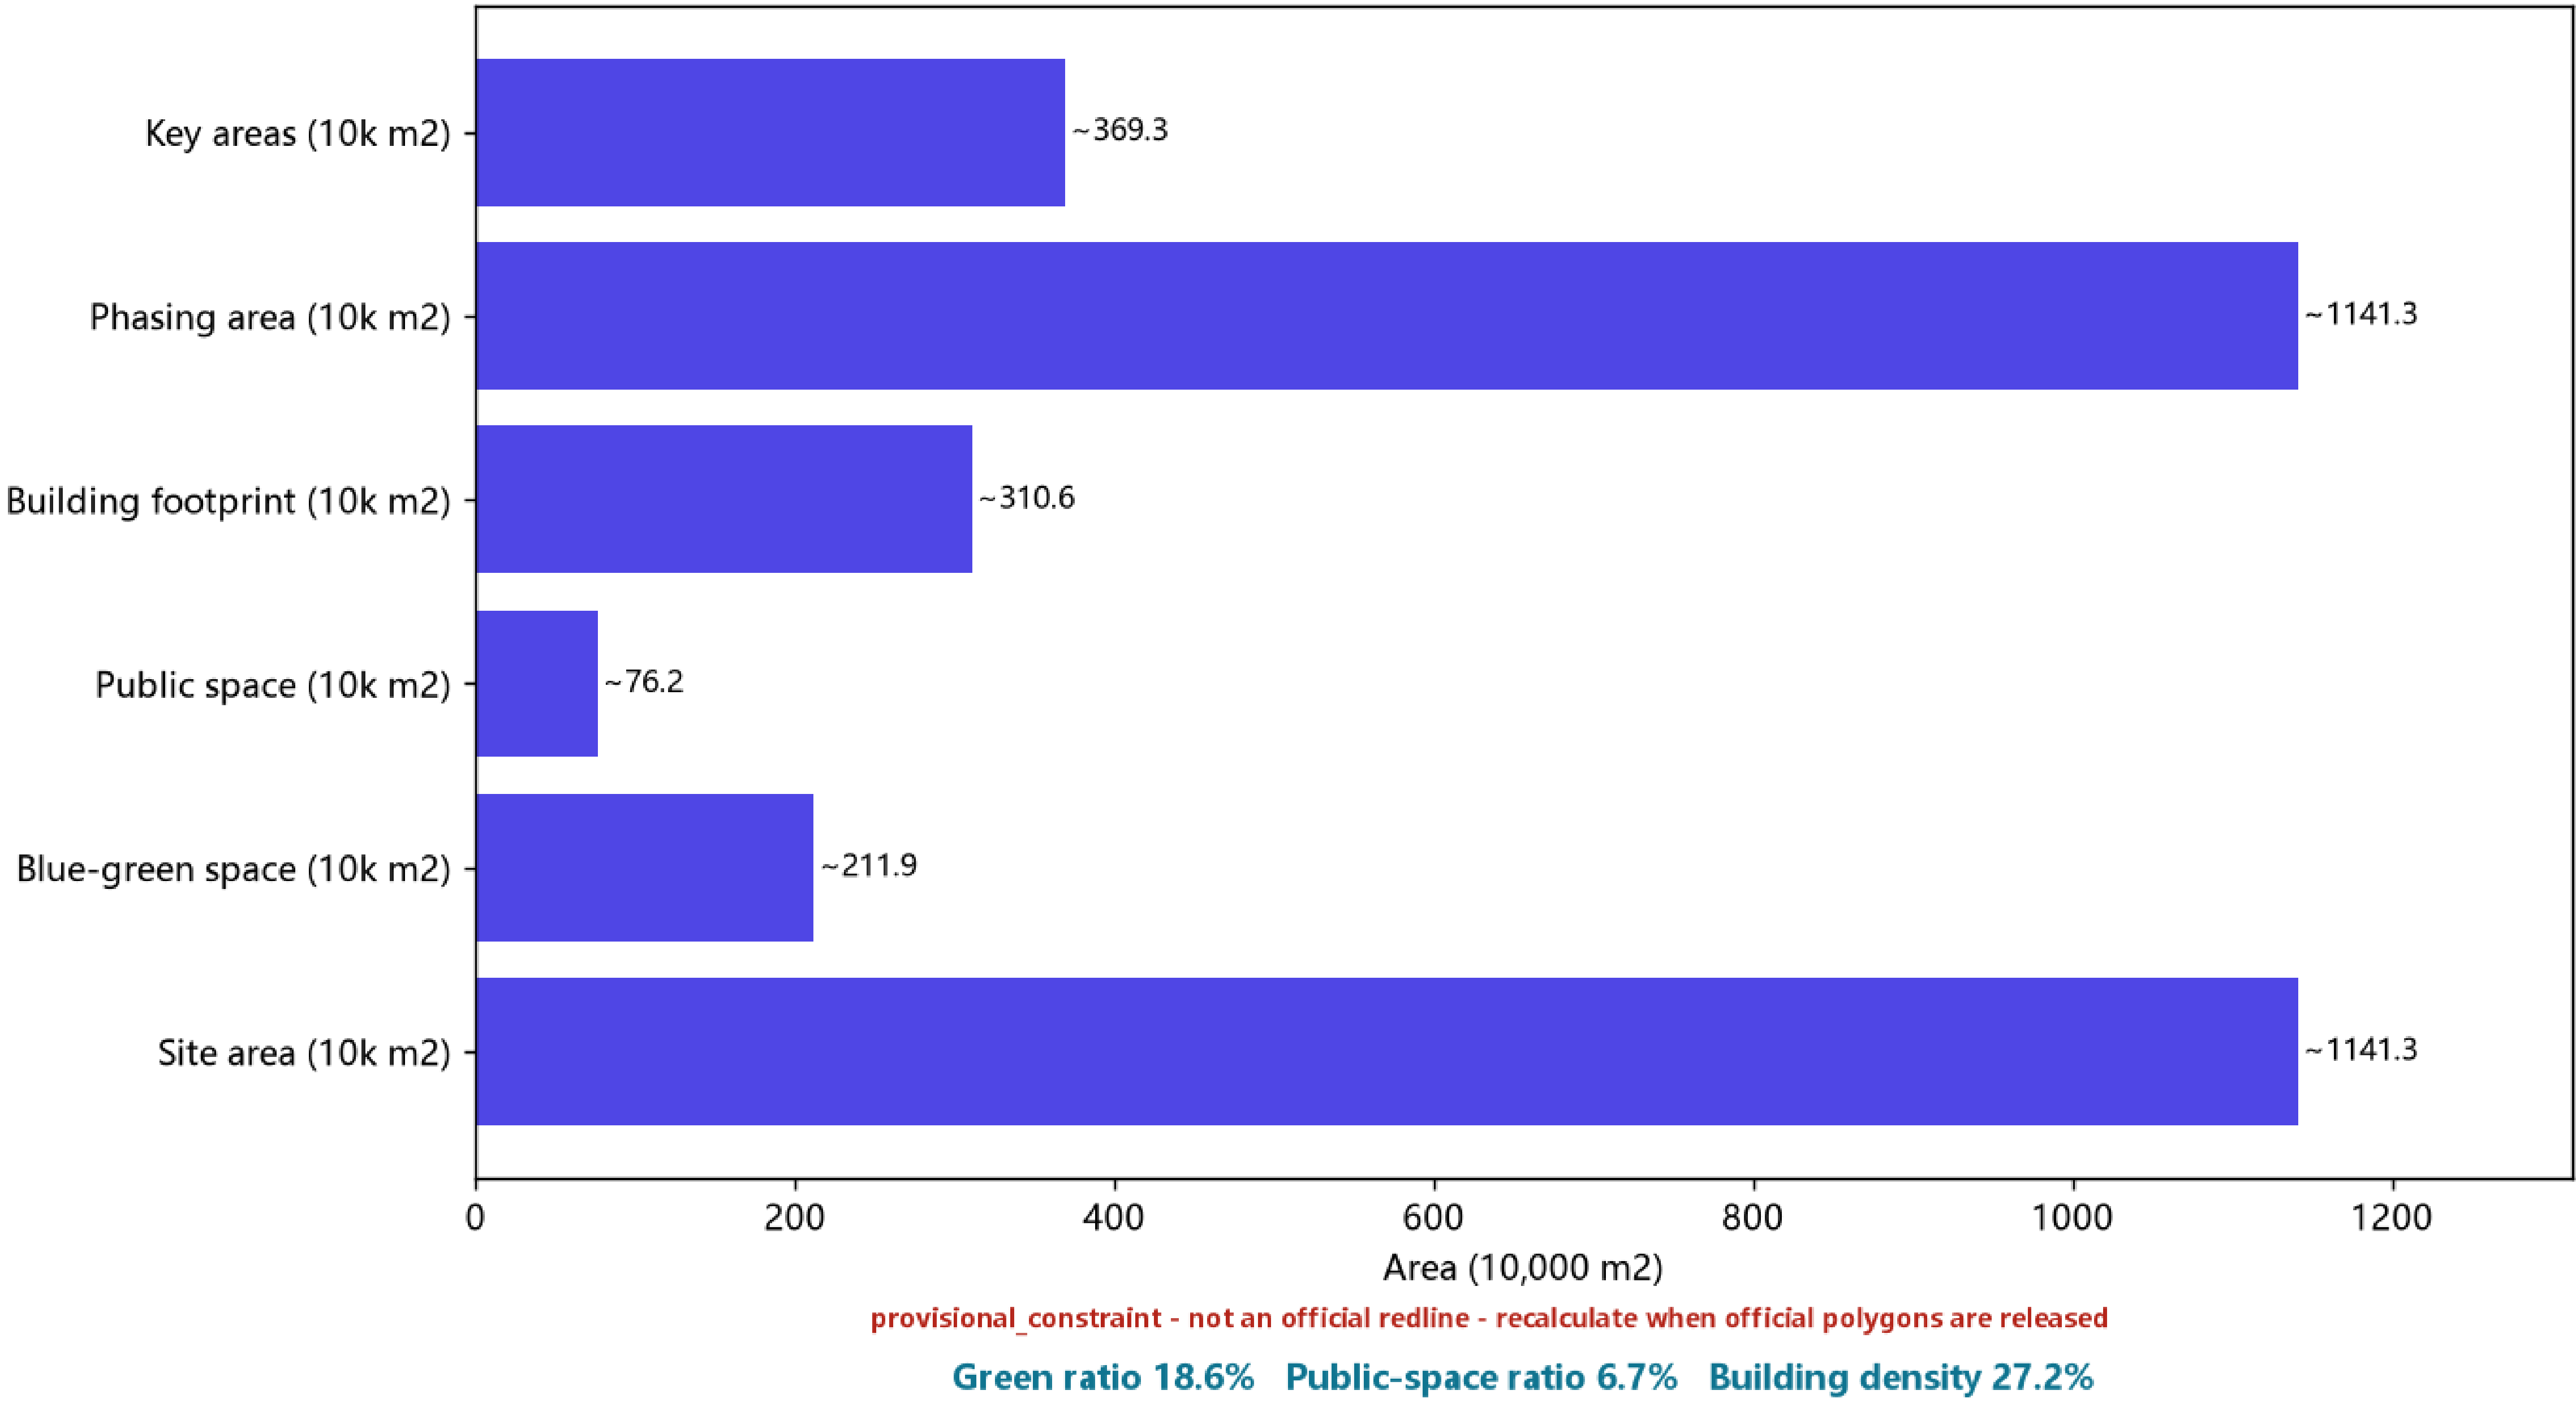

Mobility & Blue-Green Public Space System

provisional_constraint - not an official redline - recalculate when official polygons are released

Fig.4 Mobility slow-traffic & blue-green public space system.

Core Metric Recalculation Evidence

Ratios recalculated from GeoJSON projected area (EPSG:4548); the 16.9 m2 site/phasing difference is a provisional boundary tolerance, pending recalculation. ~ indicates provisional temporary area, not a precise planning metric, and must not be used as a statutory redline.

Fig.5 Core metric recalculation evidence.

Core Metrics (recalculated from GeoJSON projected area EPSG:4548)

Metric	Unit	Value (recalculated)
Site area	10k m2	1141.3
