

JINGZHANG RINGS · Master Overview: One Spine, Three Cores, Two Wings, Thirteen Rings

Coordinated research area 43.6 km² (provisional)

Boundaries are repository provisional constraints, not official redlines; recalculate when official polygons are released

Read the century railway as an unrolled ring

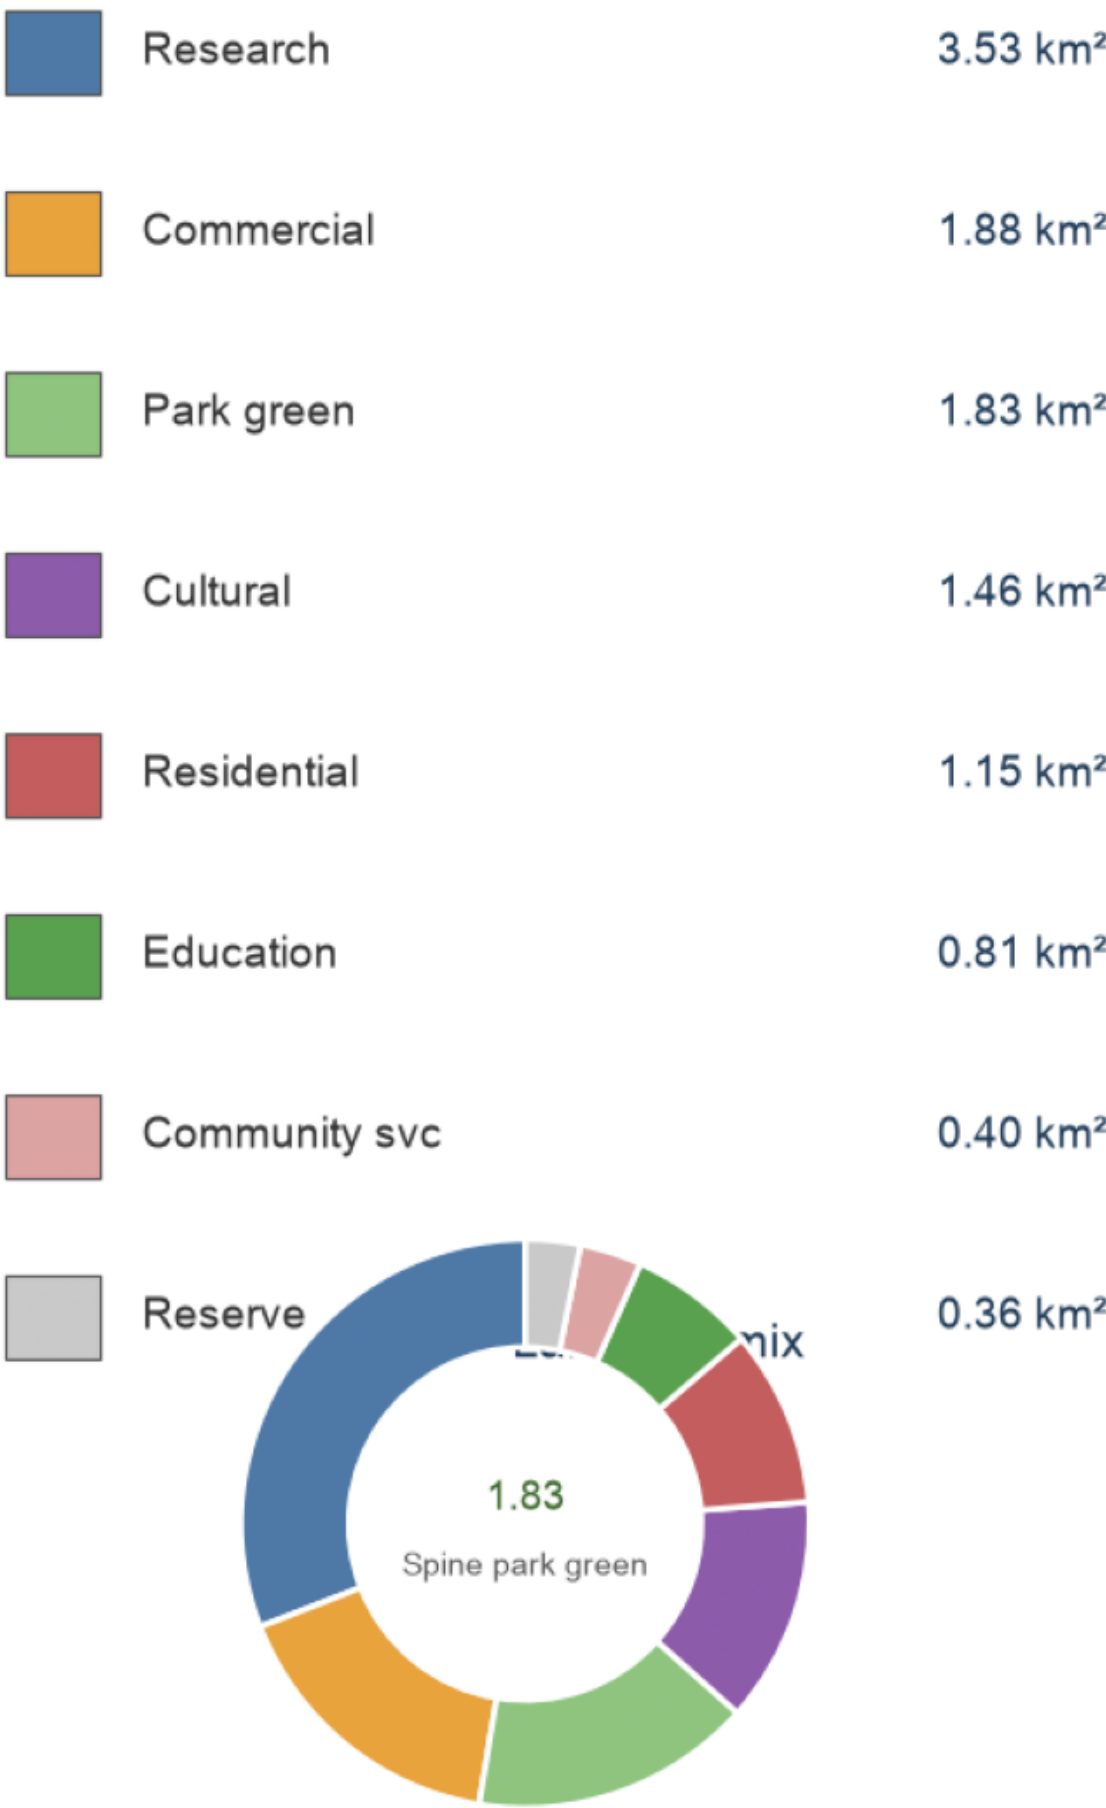

Logo direction: 12 solid rings + a bright open 13th ring (gap toward the park) - conceptual

JINGZHANG RINGS · Master Overview: One Spine, Three Cores, Two Wings, Thirteen Rings

Boundaries are repository provisional constraints, not official redlines; recalculate when official polygons are released

Land-use structure (13 rings × west band + green spine + east band)

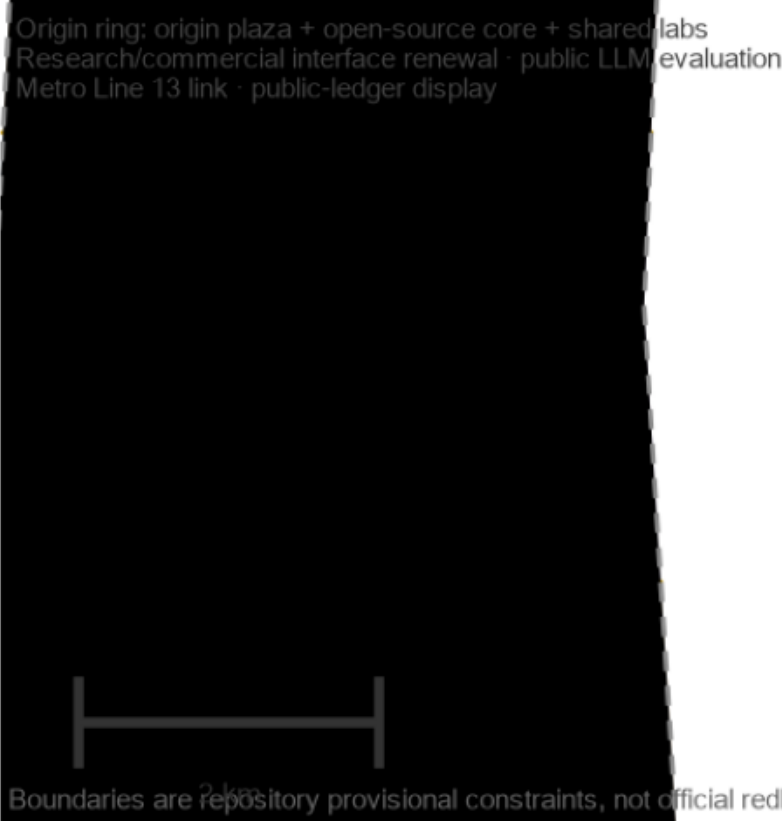

JINGZHANG RINGS · Master Overview: One Spine, Three Cores, Two Wings, Thirteen Rings

JINGZHANG RINGS · Master Overview: One Spine, Three Cores, Two Wings, Thirteen Rings

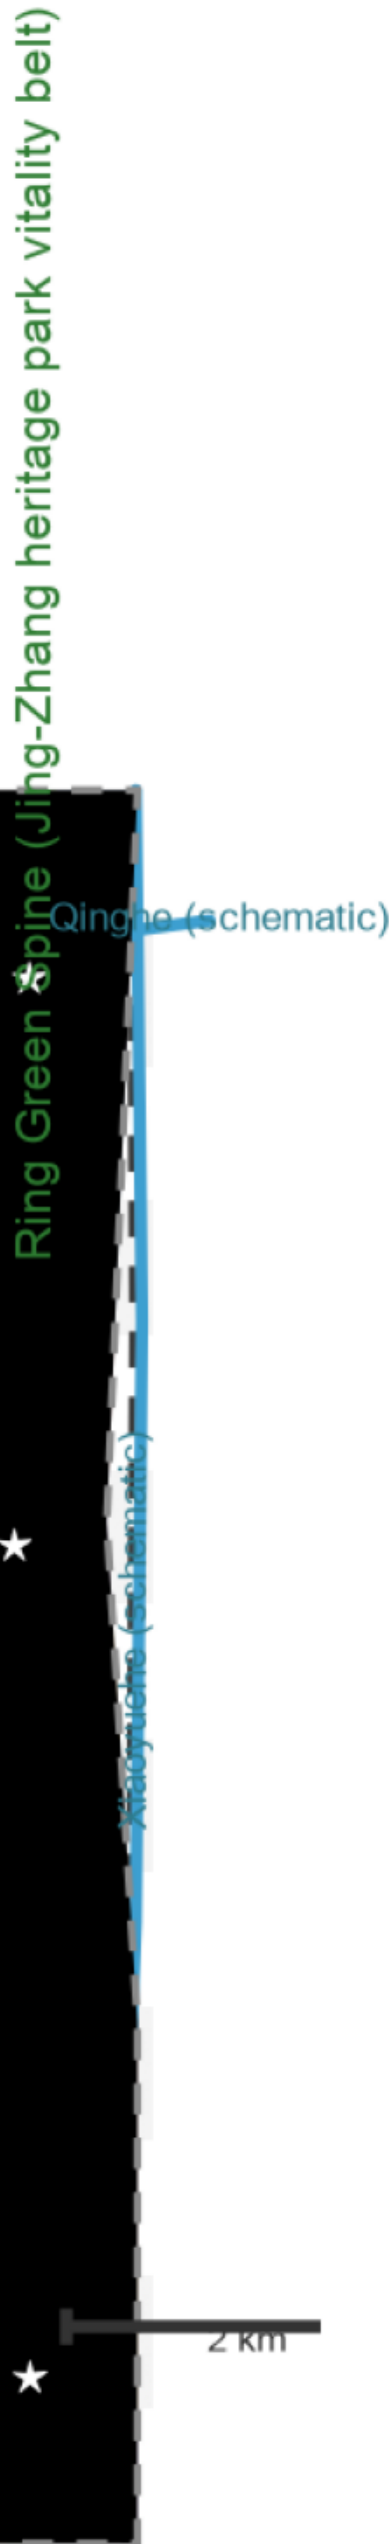

Zhongzhiyuan AI Acceleration Area

Beijing AI Origin Community

Dazhongsi AI Industry Cluster

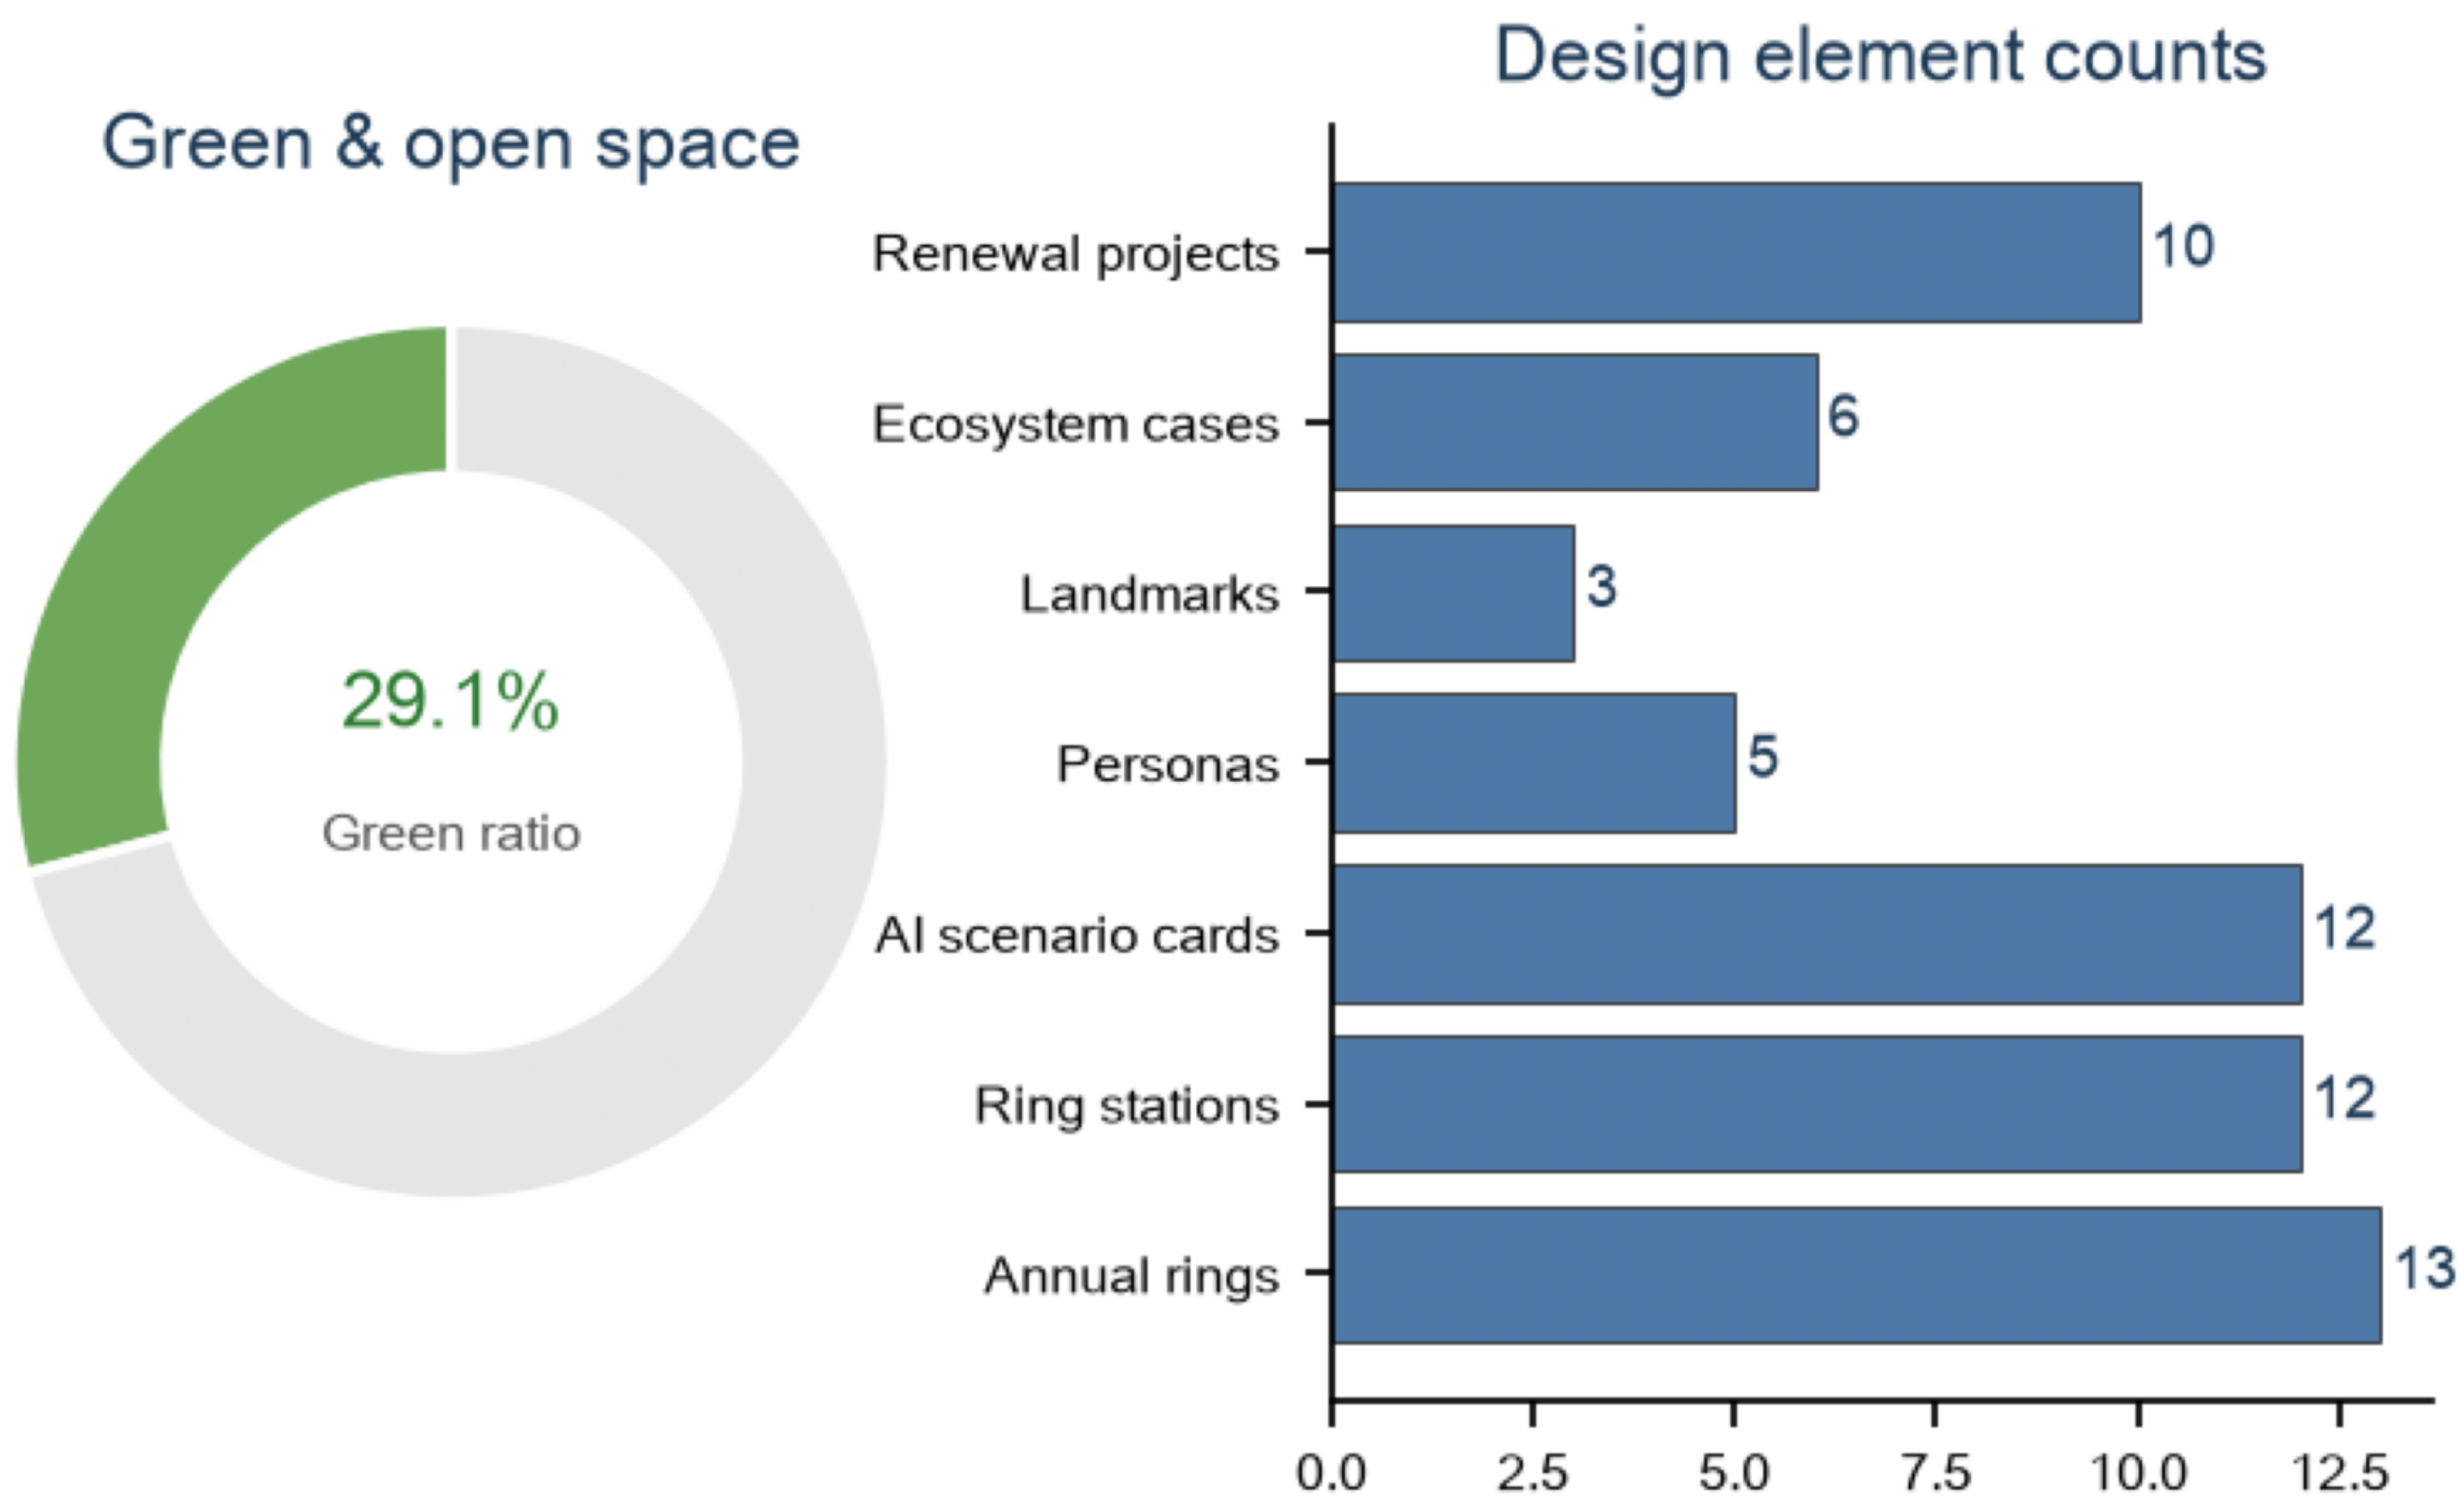

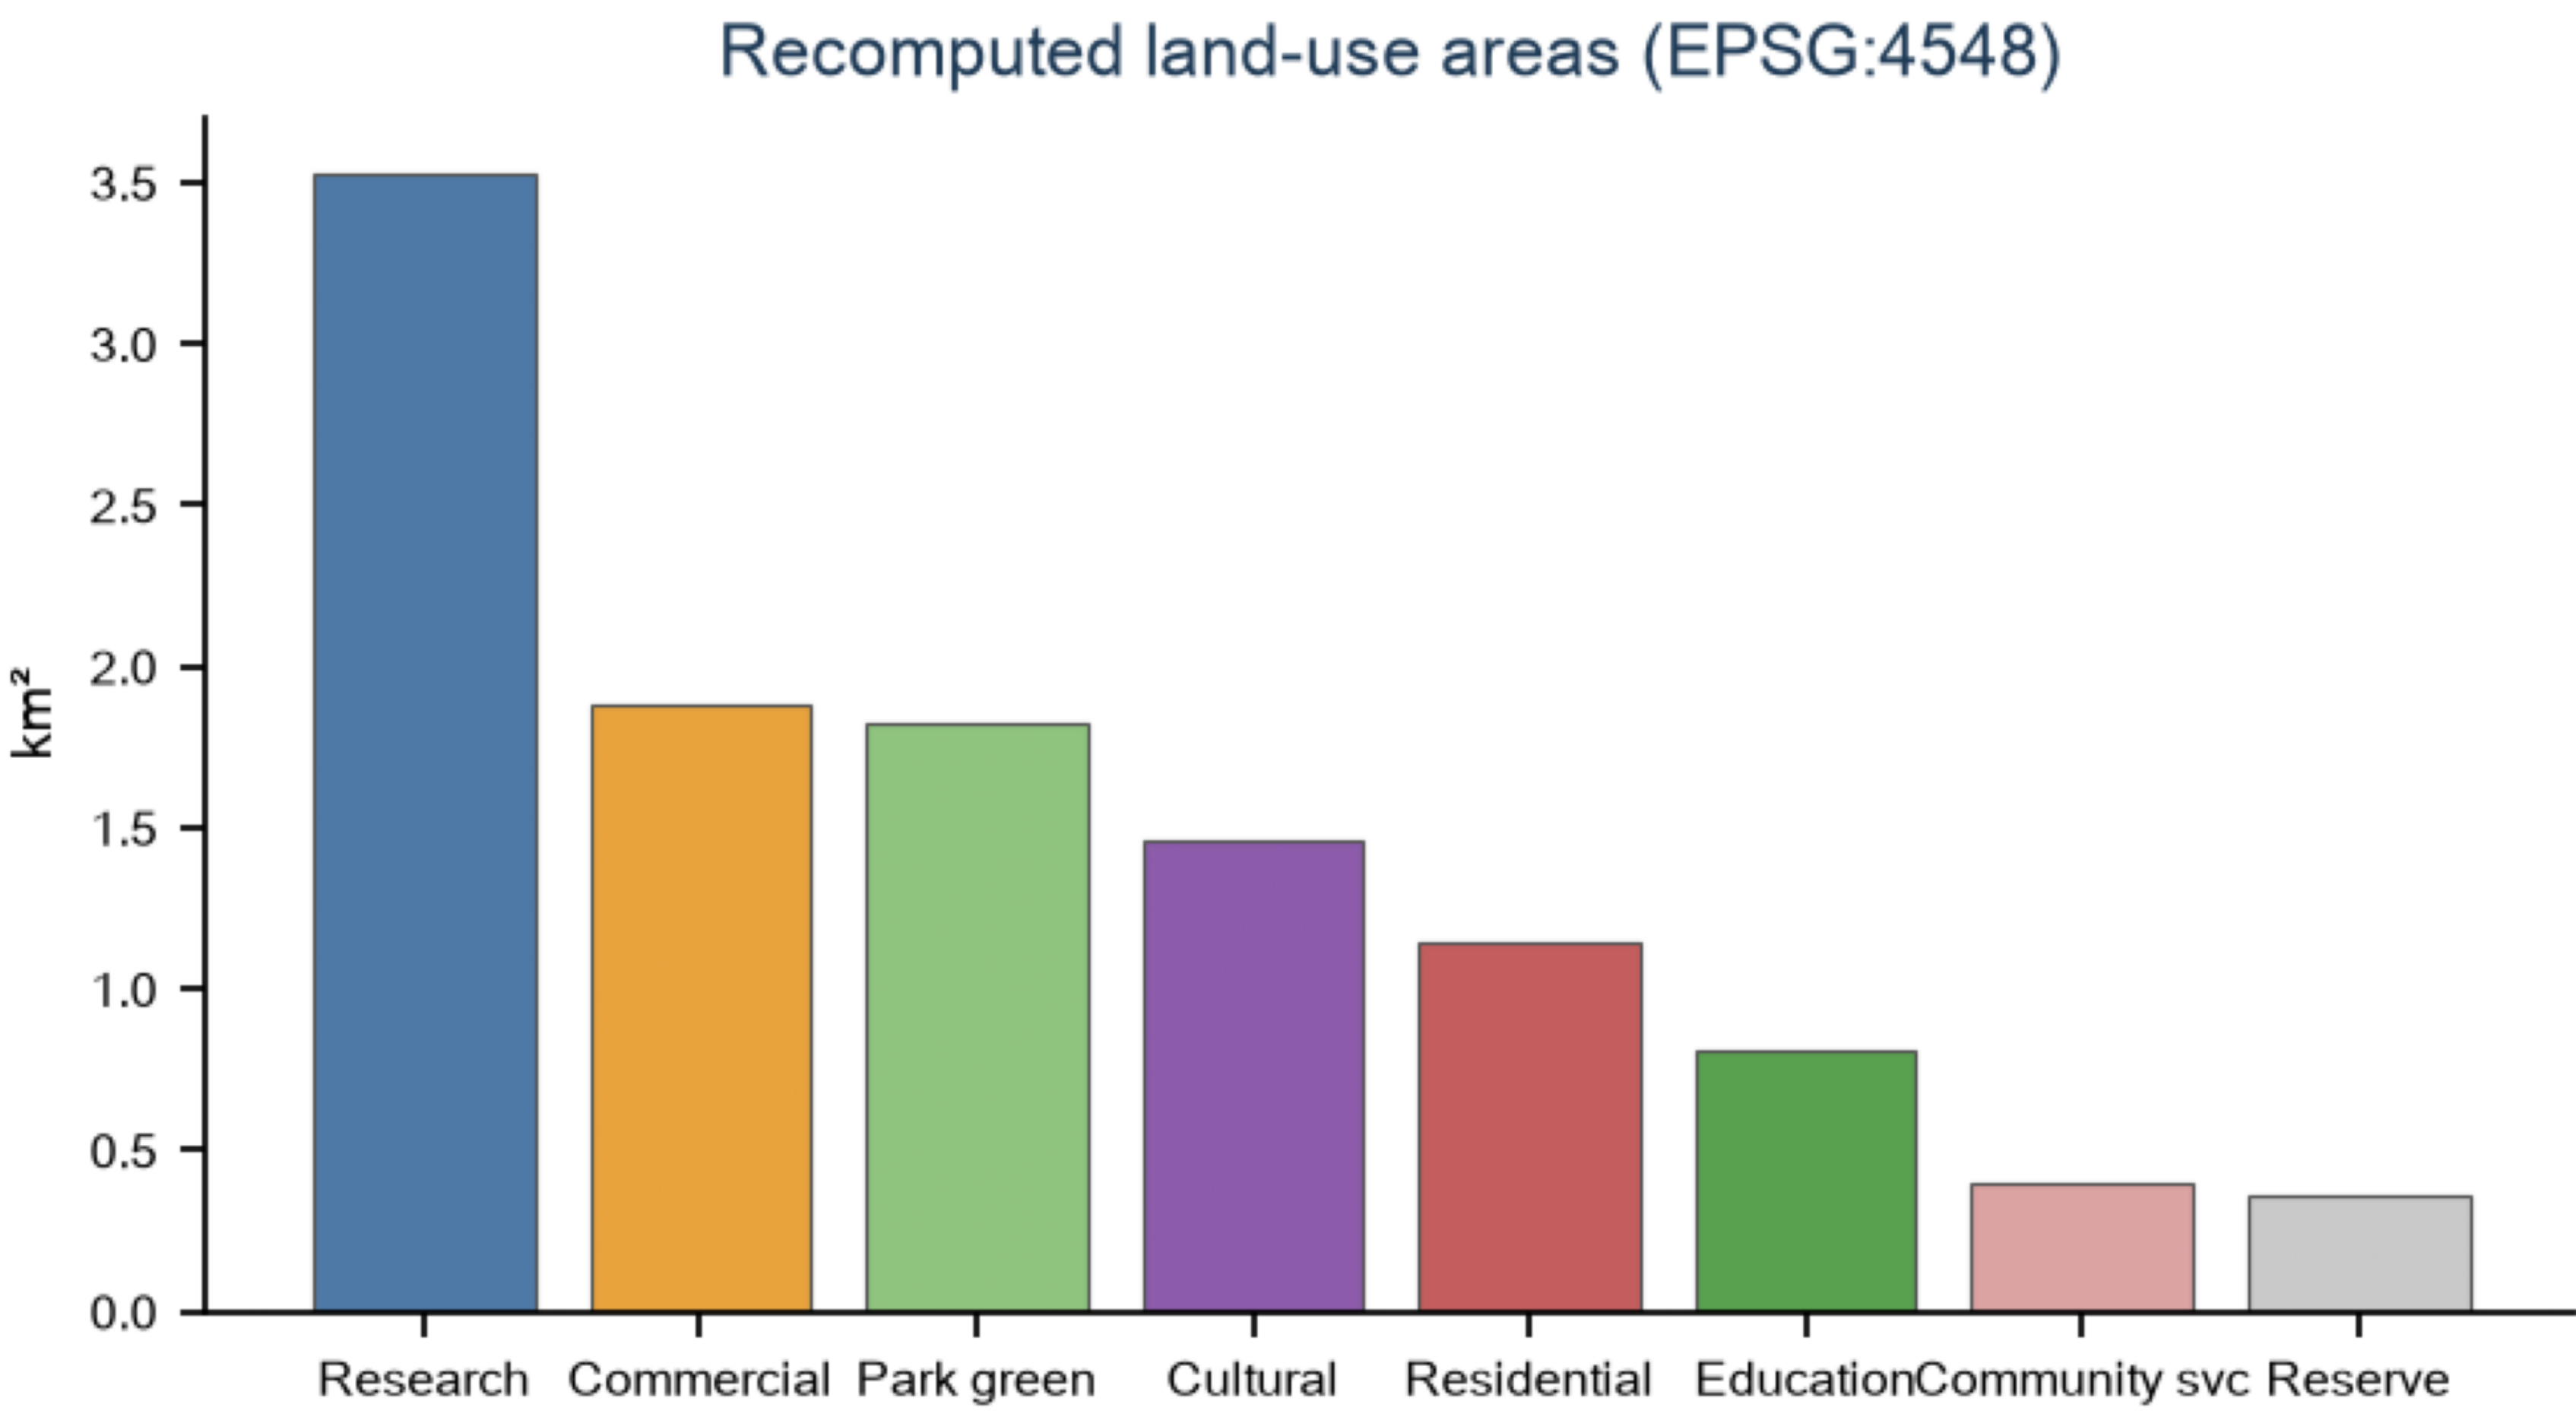

System legend and mechanisms

- Ring-spine greenway (9.7 km slow corridor)
- Ring connector roads (12 lateral mends)
- Key-area inner loops
- Schematic water (Qinghe / Xiaoyuehe)
- Schematic rail (HSR / metro)
- Ring stations ×12
- Lounge plazas ×3 (★ landmarks)

Mechanisms

- Integrated rail + spine + cycling transfer (3 cores)
- Utility tunnel and edge-compute pods under spine (conceptual)
- Unmanned delivery and robot patrol on branches and public zones
- All networks are conceptual, not redlines

JINGZHANG RINGS · Master Overview: One Spine, Three Cores, Two Wings, Thirteen Rings

Overall design area
11.41 km²
geometry/site_boundary.geojson

Green ratio
29.1%
geometry/green_space.geojson

Public-space ratio
1.9%
geometry/public_space.geojson

Building density
4.5%
geometry/buildings.geojson

Slow greenway
25.3 km
geometry/roads.geojson

Phase-1 area
3.81 km²
geometry/phasing.geojson

Metrics — evidence chain (fully recalculable)

1. Overall design area 11,412,825 m² (provisional)
2. Green & open space 3,319,546 m² → green ratio 29.1%
3. Public space 212,261 m² (3 plazas + 12 stations) → 1.9%
4. Building footprint (union) 508,132 m² → density 4.5%
5. Slow greenway 25,312 m + 12 connector roads mending east-west
6. 13 rings = 13 epochs: 1909–2026. Ring 13 the AI bright ring

All metrics recomputed from submitted GeoJSON in EPSG:4548, regulatory indicators (FAR/height/density/green) pending official data — no approved values shown
