

Jing-Zhang Switchyard THE SWITCHYARD — A City-AI Interchange on a Century-Old Railway

One spine three plazas five wings · Memory/Living/Innovation tracks · three zones two wings loop · three pilgrimage landmarks · 12 AI scenario nodes

Submission boundary 11.4 km² (provisional) · key areas 368.4 ha · green ratio 35.3% · public space 7.6% · concept FAR 0.72 · phases near/mid/far

Master Concept

Jing-Zhang Switchyard THE SWITCHYARD • Master Concept & Spatial Structure

One spine · three plazas · five wings · Memory / Living / Innovation tracks · provisional boundary (dashed)

Three tracks • marshalling-yard functions

Key data: site 11.41 km² · concept FAR 0.72 · 12 scenario nodes · 3 phases

Legend

Source: provisional_boundaries.geojson & submission geometry (displayed EPSG:4326, recalculated EPSG:4548). Provisional boundary — display and design discussion only, not a redline

Land-use Zones & Functional Structure

Full partition within the submission boundary - seamless & overlap-free - EPSG:4548 recalculated - non-statutory land use

Land-use mix (concept)

Legend

Source: geometry/land_use.geojson (EPSG:4548). Provisional boundary for display and design discussion only

Key Area Detailed Design Index

Provisional boundary · design discussion only · per area: positioning + spatial structure + building renewal + mobility + public space + AI scenarios + implementation risks

All key areas use provisional polygons for directional design only; implementation risks (5th Ring/Qinghe ecology, heritage scope, property rights, transit integration) require official confirmation

Mobility & Blue-Green

Mobility & Blue-Green Public Space System

Interchange first · one spine two wings blue-green network · concept road centerlines (not redlines) · transit links & low-speed pilots

B. Core Data (cont.)

[illegible]

Concept: turning the herringbone switch of the Jing-Zhang Railway into a public interchange device between city and AI; three positions map to three tracks, five functions to marshalling-yard roles, and three zones two wings form a production-convergence-transformation-rule-test loop.

Renewal strategy: retain parks and heritage, retrofit inefficient buildings, build new key nodes; reserved land as flexible reserve for the AI era.

Long-term operation: SWITCH FEST, quarterly Switch Days, developer community, open scenario whitelists, public experience at three pilgrimage landmarks.
