

双轨·百年

The Parallel Rails

From Iron Gauge to Intelligent Gauge — Jing-Zhang AI Innovation Belt Urban Design

1909 Iron Gauge · 2026 Intelligent Gauge · Those who define the gauge define the horizon

Open Call for the Centennial Jing-Zhang AI Innovation Belt · Formal Submission (A3 Booklet)

GitHub: TryWorld2026 | Tracks: Jing-Zhang Heritage Narrative · AI Origin Community · AI+Traffic Walkability

Everything is an open co-creation proposal: it does not replace statutory planning and does not constitute government approval.

01 Design Basis & Source List

Design Basis & Source List

Primary authority

The Qualification Prequalification Announcement for the Centennial Jing-Zhang AI Innovation Belt Urban Design (Haidian Branch, Beijing Municipal Commission of Planning and Natural Resources, 2026-05-09) is the primary authority; the advertised open-call taskbook defines the six required tasks. Professional standards Urban Design Administration Measures, Regulatory Detailed Planning Measures, Land Use and Sea Use Classification Guide (read from local snapshots and answered item by item).

Data boundary

5 formal-usable sources (announcement, taskbook, three standards); 1 provisional-only source (rough boundary, official_boundary=false). Official precise boundary, regulatory conditions, existing-condition baselines, road redlines, heritage and blue lines are not public and are registered as gaps in assumptions.json.

Evidence chain

sources.json registers sources → geometry/*.geojson carries spatial evidence → metrics.json recalculates in EPSG:4548 → three matrices map tasks/standards/depth → proposal.md carries the human-readable conclusion.

02 Three-Level Scope Framework

Three-Level Scope Framework

Coordinated research area (~43.6 km²)

AI industry ecosystem, three-areas-two-wings synergy loop, dual-rail naming system and international communication framework.

Overall design area (~11.4 km²)

One Spine · Two Rails · Three Stations structure, 19 topologically complete land-use cells, urban renewal framework, mobility and blue-green systems; EPSG:4548 recalculated area 11,412,825 m².

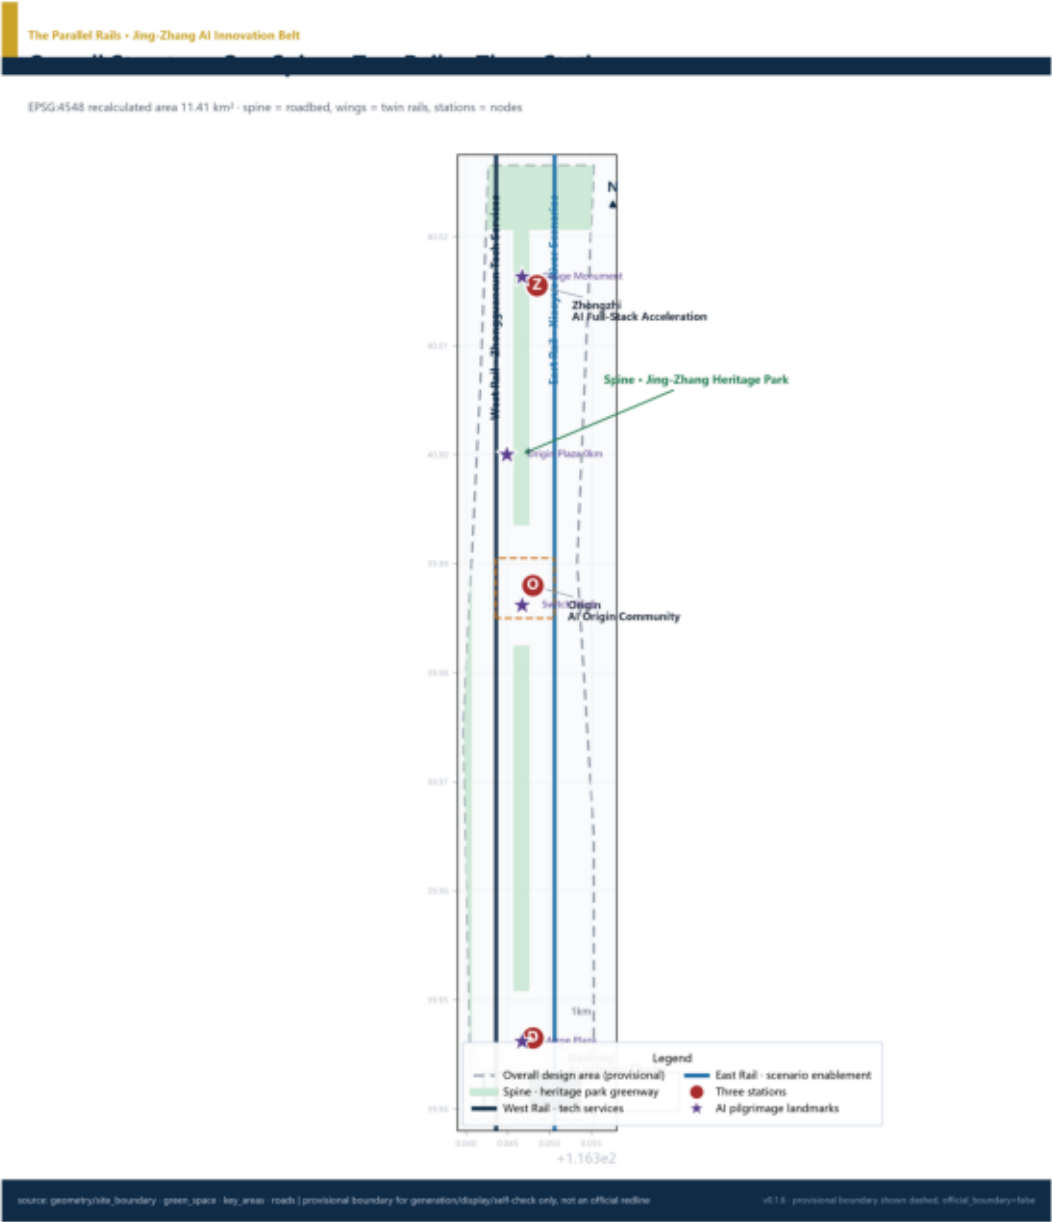

Key detailed-design areas (~368.4 ha)

Zhongzhi (192.1 ha) / Origin (104.3 ha) / Dazhong (72.0 ha) three stations at regulatory-depth detailed design.

Three hard limits: provisional boundary must not be used as official redline, approval basis or precise-area basis; full recalculation after official polygons are published.

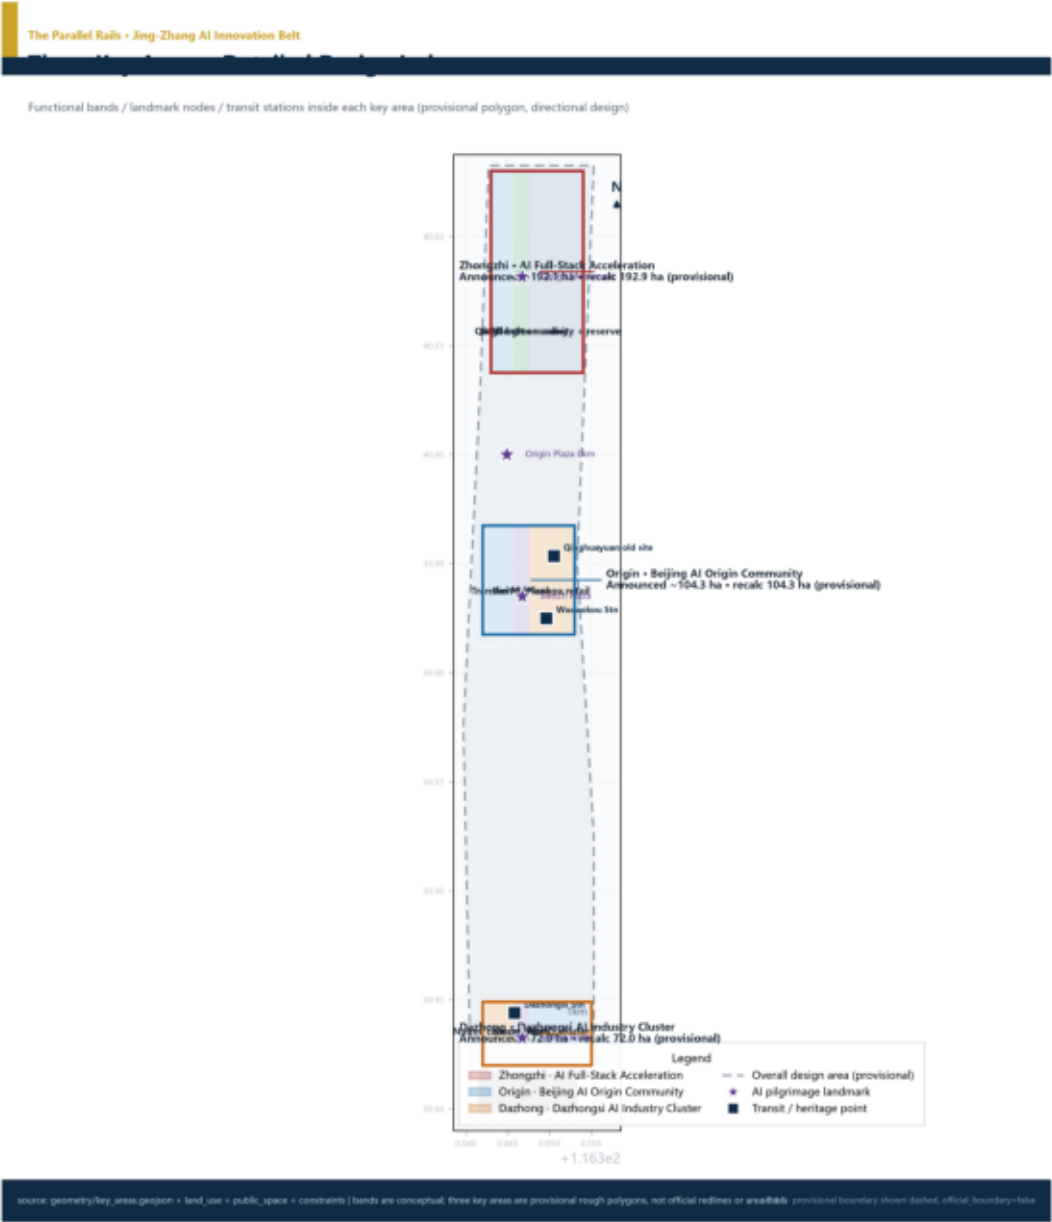

03 Overall Structure: One Spine • Two Rails • Three Stations

Overall Structure

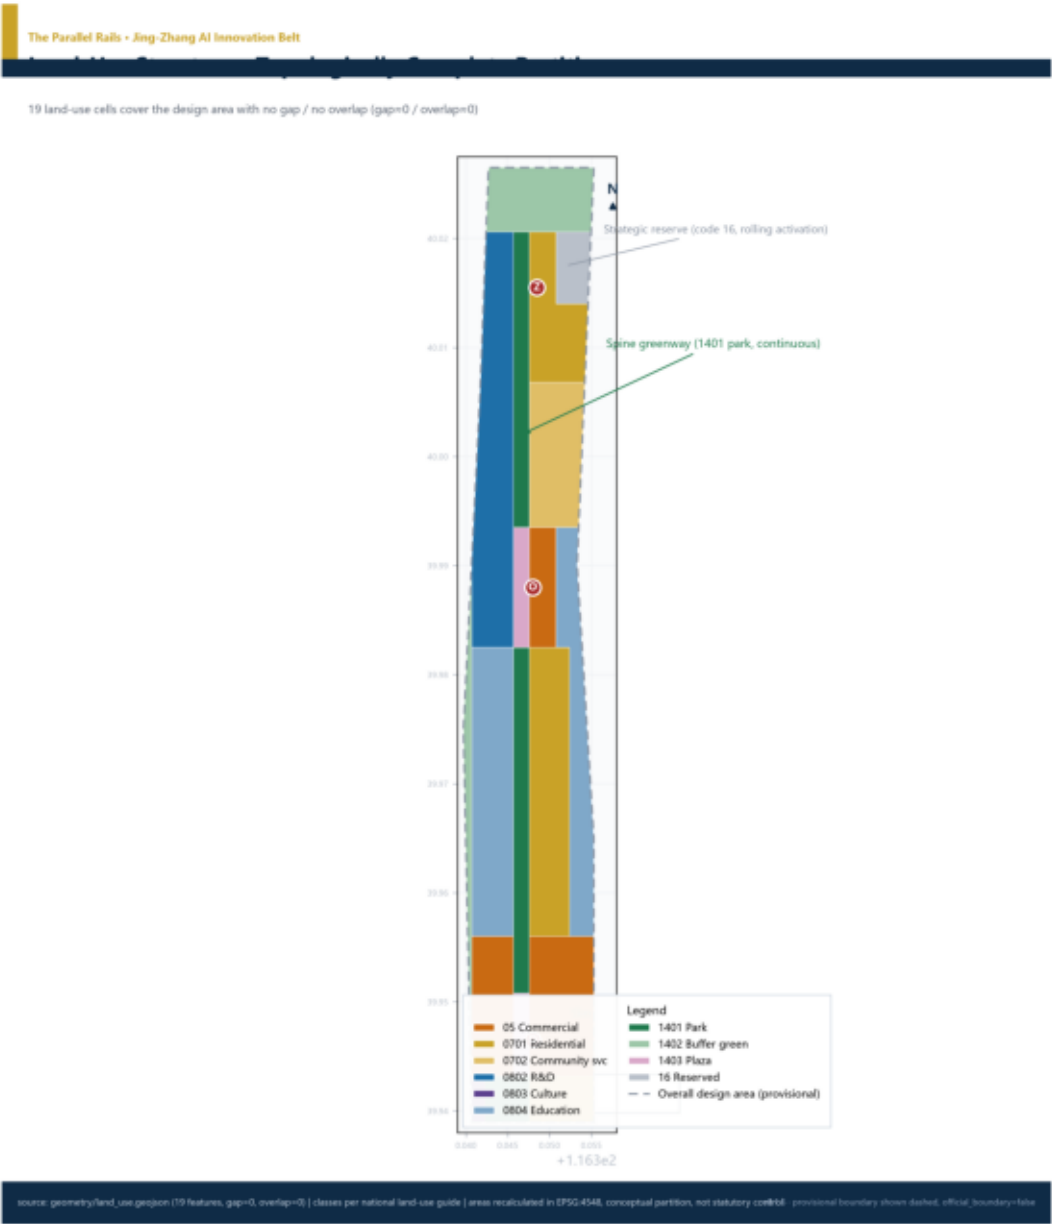

04 Three Key Areas (directional)

Three Key Areas

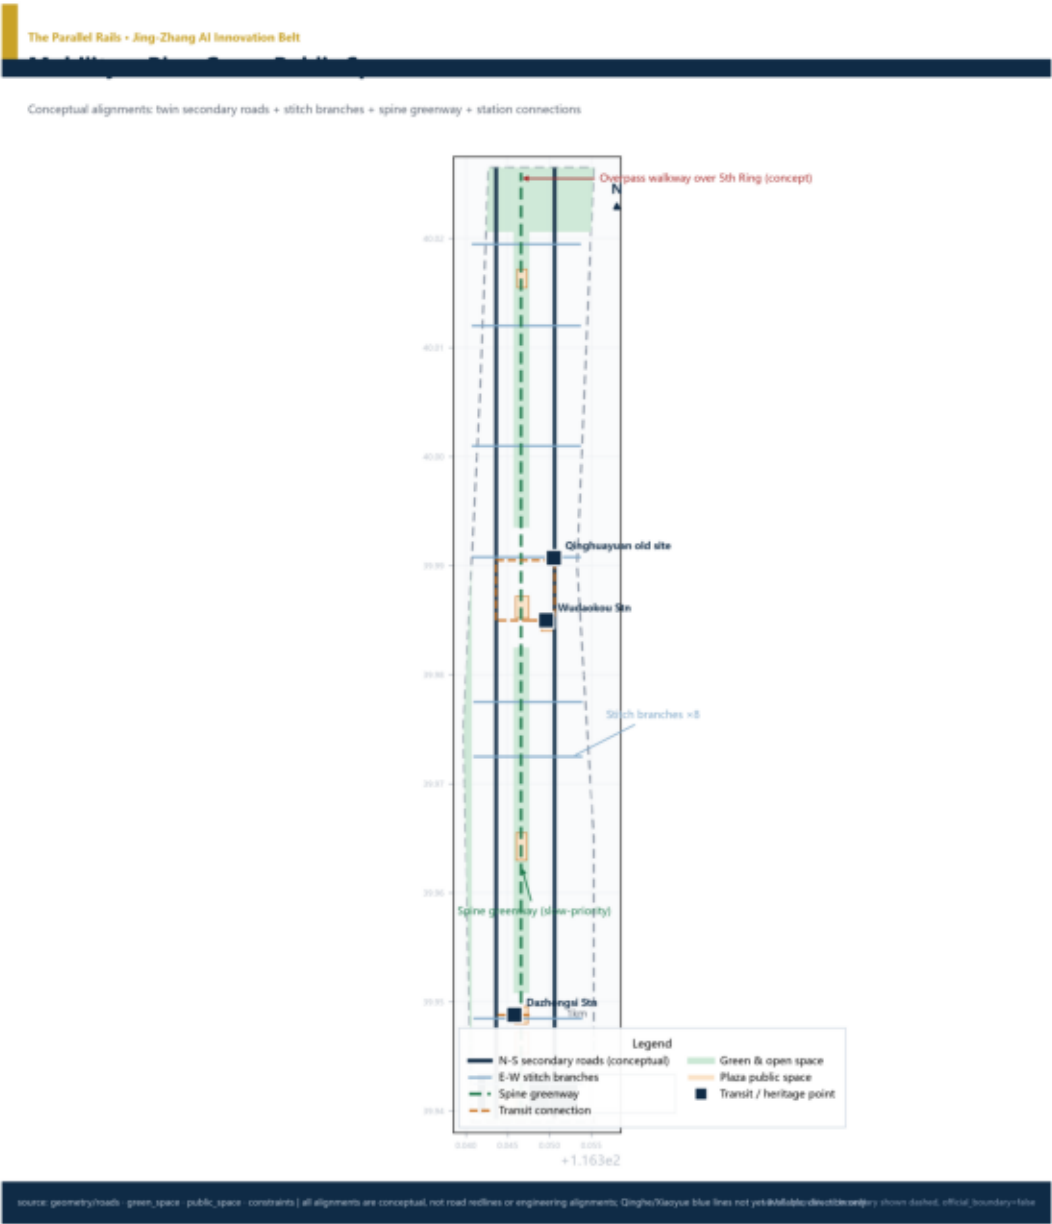

05 Land-Use Structure: Topologically Complete

Land-Use Structure

06 Mobility × Blue-Green Public Space

Mobility & Blue-Green

07 Renewal Projects & Phasing

Renewal Projects & Phasing

Spine connection & gauge-sleeper honor belt; Gauge Monument (Standard Origin) phase I; full-stack lab cluster & Zhongzhi acceleration tower; compute & data-factor hub; international talent community; Origin incubator × transfer labs; Switch Plaza; Wudaokou station forecourt integration; open-source community center; Gauge Museum at Qinghuayuan Station; Dazhongsi four-quadrant connection; AI-native flagship consumption; Merge Plaza; education-corridor interface opening; Origin Plaza & dual-rail culture pavilion.

15 core renewal projects (examples)

Phasing plan

Near-term three-stations-first (~406.3 ha) → mid-term corridor stitching (~606.2 ha) → long-term portal weaving (~128.8 ha). Policies: renewal bundled with scenario opening; reserve land rolling activation by annual review; campus interface protocol-open; public participation embedded in the city-issue mechanism.

Implementation entities are to be confirmed; phasing is conceptual; the implementation sequence follows government arrangements.

08 Metrics, Area Recalculation & Compliance

Metrics & Compliance

09 Risk, Copyright & Compliance

Risk & Compliance

Data risk

Official boundary, regulatory conditions, existing-condition baselines, redlines, heritage and blue lines are not public; all related conclusions are downgraded to conceptual proposals, with the recalculation path fixed in metric formulas for full regeneration.

Copyright & privacy

All drawings and text are original agent-generated output using no unauthorized assets; scenario cards collect no unnecessary personal data and retain human-review boundaries.

Disclaimer

Nothing here constitutes official approval, regulatory adjustment, parcel-level demolition conclusions, road redlines, engineering feasibility, ownership or investment commitments; all names are open co-creation proposals.
