

The Civic Apprentice Line: AI on Urban Probation

01 / CIVIC QUALIFICATION

A PUBLIC QUALIFICATION LINE

The city is not a laboratory: each AI service must learn, be tested, serve for a limited term, and face human renewal or exit.

- 01

LEARN
Resident questions / site limits
- 02

TEST
Fairness, access, offline and handover
- 03

PROBATION
Time-bound, scoped and reversible
- 04

SERVE
Visible responsibility and human channel
- 05

REVIEW / EXIT
Results, errors, revisions and decision

Source: submitted GeoJSON and metrics. Provisional boundary is not an official redline.

The city is not AI's test subject. The city is its teacher.

denominator · group gaps · errors · complaints · downtime

renew / revise / exit

PUBLIC RIGHTS

NO PASSIVE OPT-IN

NO SERVICE PENALTY

MULTI-CHANNEL APPEAL

COMMUNITY PAUSE REQUEST

INDEPENDENT RESTART

Counts describe this package; FAR, height, road area and total floor area remain unknown.

The brief defines three scope levels; every submitted polygon is provisional.

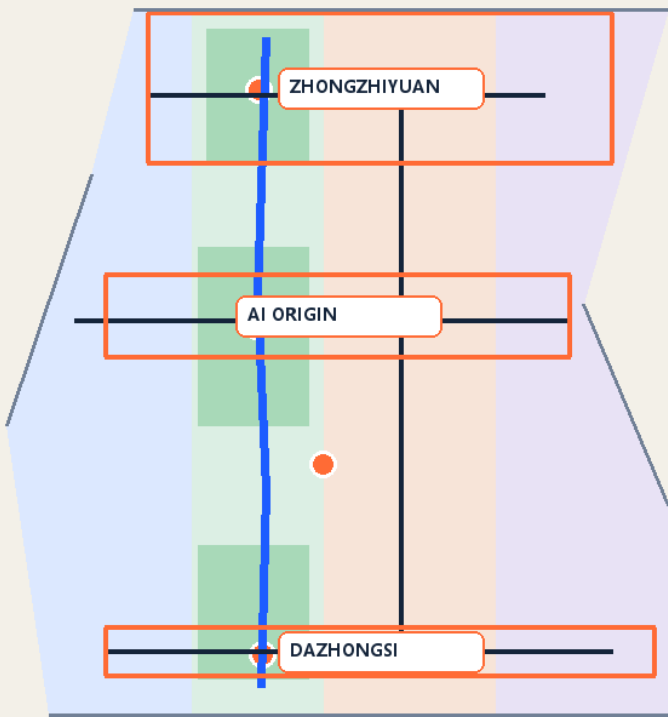

- 43.6 km² coordinated study
- 11.4 km² overall design
- 368.4 ha key areas
- FAR / height / redlines: UNKNOWN

Public Rights and Control Protocol

01 / CIVIC QUALIFICATION

A PUBLIC QUALIFICATION LINE

The city is not a laboratory: each AI service must learn, be tested, serve for a limited term, and face human renewal or exit.

- 01

LEARN
Resident questions / site limits
- 02

TEST
Fairness, access, offline and handover
- 03

PROBATION
Time-bound, scoped and reversible
- 04

SERVE
Visible responsibility and human channel
- 05

REVIEW / EXIT
Results, errors, revisions and decision

Source: submitted GeoJSON and metrics. Provisional boundary is not an official redline.

Passing through is not consent; refusing AI never reduces public service.

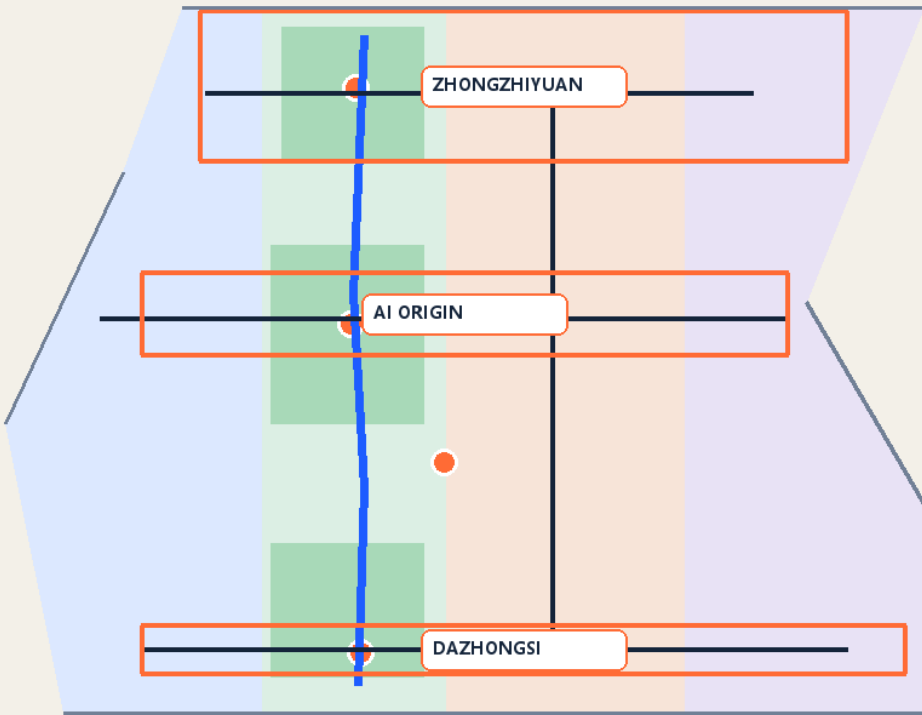

- On-site, phone, paper and proxy appeals
- Safety officer may stop immediately
- Independent reviewer approves restart
- Publish denominators, gaps, errors and downtime

Mechanism Exchange, Not Image Copying

02 / SPATIAL OPERATING SYSTEM

SPACE AS A CHAIN OF RESPONSIBILITY

Four spatial roles support training, public explanation, service conversion and community care, with a central public status spine.

Research & testing
LAND USE 0802 · CONCEPT ROLE

Public transcript spine
LAND USE 1401 · CONCEPT ROLE

Service conversion
LAND USE 05 · CONCEPT ROLE

Community teaching & care
LAND USE 0702 · CONCEPT ROLE

All ratios require official polygons and planning controls

Partition covers the submitted boundary for topology; it is not an approved land-use change.

Eight global cases inform transparency, testing, bounded scope and networks.

- Helsinki: public register
- Singapore: standard tests
- FCA: bounded sandbox
- Boston: civic prototypes
- Mila / Vector / ELLIS: talent networks

EVIDENCE PAGE 04 / 08

Three Districts, Three Same-Scale Prototypes

03 / THREE DIFFERENT JOBS

THREE AREAS, THREE DISTINCT JOBS

The three key areas share one qualification protocol but perform distinct urban roles. All boundaries remain provisional.

Announced approximate areas guide the task; polygons do not establish redlines, ownership or precision.

Zhongzhiyuan trains, AI Origin deliberates and Dazhongsi hands over.

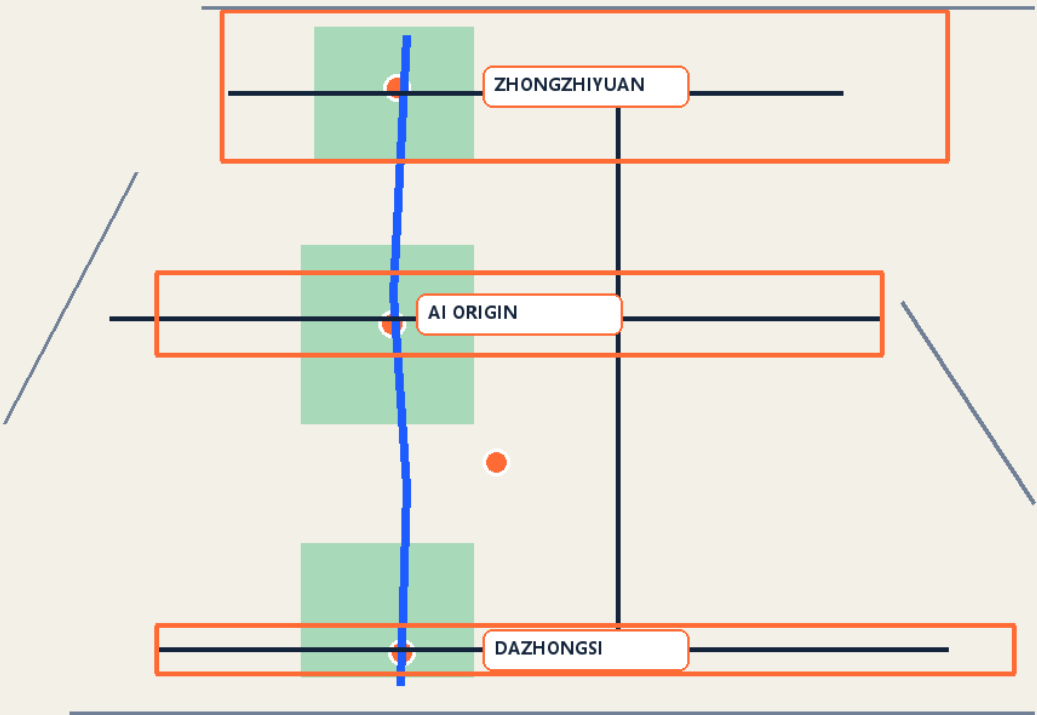

- Boundary + observers + stop exit
- Resident questions + device-free path
- Digital + human + handover

Mobility, Green, Emergency and Removal

04 / EVERY SERVICE HAS A WAY BACK

MOBILITY, GREEN AND HUMAN HANDOVER

The spine links four public interfaces; a low-sensing alternative preserves movement and human help without personalised service.

Mobility and green-space relations are conceptual pending redline, ecological and engineering review.

Robots have no default right of way; ordinary, emergency and no-sensing paths remain open.

- Rail and crossings: review pending
- Power/comms: disconnectable
- Drainage/fire: never obstructed
- Removal: restore site

One Hard Gate for Three Priority Trials

05 / PUBLIC TRANSCRIPT

PUBLISH STATUS BEFORE SCALING

PUBLIC RIGHTS

NO PASSIVE OPT-IN

NO SERVICE PENALTY

MULTI-CHANNEL APPEAL

COMMUNITY PAUSE REQUEST

INDEPENDENT RESTART

Counts describe this package; FAR, height, road area and total floor area remain unknown.

If the human path cannot absorb demand, AI does not open.

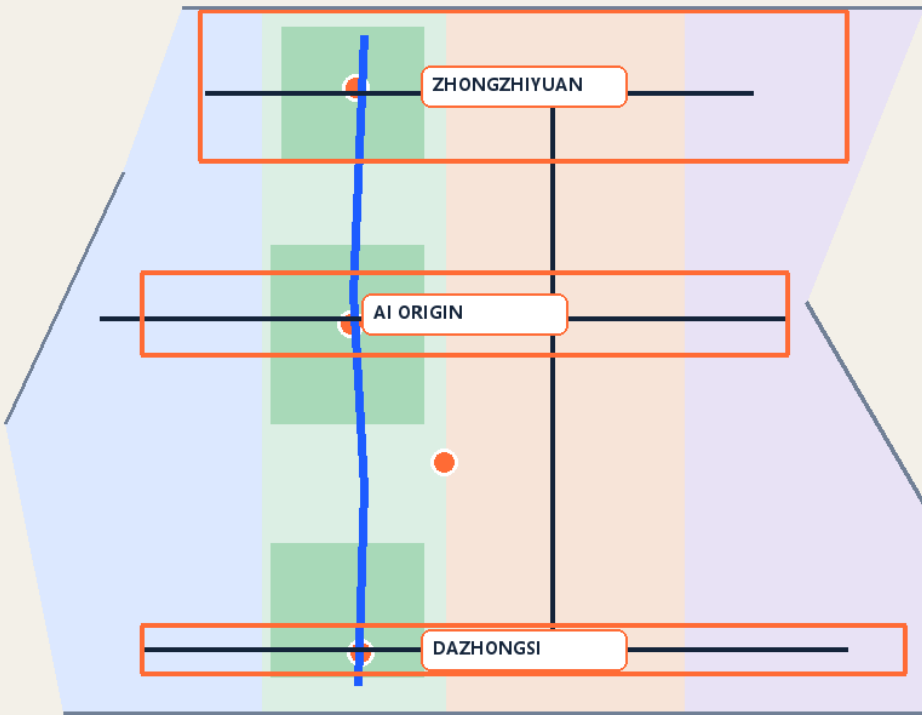

- Robot: collision/breach/failed takeover = stop
- Fairness: excessive group gap = pause
- Offline: failed alternative = do not open
- Notify 2h / triage 1d / decide 5d

Project Packages, Owners and Annual Review

02 / SPATIAL OPERATING SYSTEM

SPACE AS A CHAIN OF RESPONSIBILITY

Four spatial roles support training, public explanation, service conversion and community care, with a central public status spine.

Research & testing
LAND USE 0802 · CONCEPT ROLE

Public transcript spine
LAND USE 1401 · CONCEPT ROLE

Service conversion
LAND USE 05 · CONCEPT ROLE

Community teaching & care
LAND USE 0702 · CONCEPT ROLE

All ratios require official polygons and planning controls

Partition covers the submitted boundary for topology; it is not an approved land-use change.

0-12, 12-30 and 30+ months are linked by decision gates, not area slices.

- Lead: pilot joint office (candidate)
- Site: service unit + safety officer
- Review: independent experts + public seats
- Funding: retrofit/pilot procurement, pending
