

Jingzhang Time-Vein — From Rails to Compute-Tracks: Centennial Jing-Zhang AI Innovation Belt Concept Urban Design

Conceptual design submission - drawing set (A3 booklet / A0 boards)

One vein, three stations, two wings: the Zhimai green corridor (approx. 480 m concept corridor), three key areas (Zhongzhi AI Autonomous Innovation Accelerator, Beijing AI Origin Community, Dazhongsi AI Industry Cluster), west R&D; wing and east commerce wing
Six time-vein segments (north to south): Wuhuan hub · smart-network origin / Zhongzhi acceleration · full-stack innovation / Origin community · dual-brain symbiosis / Academy canyon · talent inflow / Urban smart valley · scenario integration / South gateway · bell echoes

Core metrics (recomputed in EPSG:4548 on provisional boundaries)

指标 Metric	值 Value	单位 Unit	口径 Basis
site_area_sqm 场地面积 / Site area	11,412,825 m²	sqm	provisional recompute
green_ratio 绿地率 / Green ratio	0.329	ratio	provisional recompute
public_space_ratio 公共空间占比 / Public space ratio	0.091	ratio	provisional recompute
building_footprint_area_sqm 概念建筑基底 / Concept building footprint	259,200 m²	sqm	provisional recompute
road_length_m 慢行廊道长度 / Slow-traffic coridor length	18,803 m	m	provisional recompute
phase1_area_sqm 一期面积 / Phase 1 area	6,526,309 m²	sqm	provisional recompute
phase2_area_sqm 二期面积 / Phase 2 area	2,750,248 m²	sqm	provisional recompute
phase3_area_sqm 三期面积 / Phase 3 area	2,136,268 m²	sqm	provisional recompute

Implementation phasing

阶段 Phase	面积 Area	sqm
一期 · 智脉主廊与三站先行 / Phase 1 · spine and three stations first	6,526,309	m²
二期 · 东西缝合与双翼联动 / Phase 2 · east-west stitching and wings	2,750,248	m²
三期 · 边缘织补与品质提升 / Phase 3 · edge infill and quality	2,136,268	m²

Layer legend

图层 Layer	中文	English
geometry/site_boundary.geojson	场地边界 (临时粗略)	Site boundary (provisional)
geometry/key_areas.geojson	三处重点区域	Three key areas
geometry/land_use.geojson	用地分区 1401/1403/0802/05	Land use 1401/1403/0802/05
geometry/green_space.geojson	智脉绿廊	Zhimai green corridor
geometry/public_space.geojson	枢纽广场与滨水步道	Hub plazas and riverside promenade
geometry/buildings.geojson	概念建筑集群	Concept building clusters
geometry/roads.geojson	慢行网络 (绿廊/道口/绿枝)	Slow-traffic network
geometry/phasing.geojson	三期实施分区	Three-phase implementation
geometry/constraints.geojson	临时约束登记	Provisional constraint register

Ten AI scenario cards (03/06/09 are industry test/validation scenarios, marked ★)

#	场景卡 Scenario	载体 Space
01	开源发布厅 / Open-source launch hall	hub / corridor / street / waterfront
02 ★	安全治理沙盘 / Safety governance sandbox	hub / corridor / street / waterfront
03 ★	智能算力驿站 / Edge compute station	hub / corridor / street / waterfront
04	AI 慢行导航 / AI slow-traffic navigation	hub / corridor / street / waterfront
05	大柘寺国际路演客厅 / Dazhongsi international roadshow hall	hub / corridor / street / waterfront
06	清河低碳创新画廊 / Qinghe low-carbon innovation gallery	hub / corridor / street / waterfront
07	近松成康转化街 / Campus-facing conversion street	hub / corridor / street / waterfront
08	数据要素客厅 / Data-elements salon	hub / corridor / street / waterfront
09 ★	AI 生活服务样街 / AI living-services sample street	hub / corridor / street / waterfront
10	全球 AI 活动路线 / Global AI Week route	hub / corridor / street / waterfront

This drawing is a machine-verifiable part of the conceptual submission package; all geometry and metrics follow geometry/* .geojson and metrics.json. Boundaries are provisional constraints (official_boundary=false) and must be fully recomputed once official polygons are published.
