review → Public learning

Technology Services Wing

Full-Stack Proving Ground

Open-Source Marshalling Yard

Scenario Enablement Wing

Urban Arrival-Departure Yard

Provisional geometry is a low-contrast constraint; locations and areas require full recalculation.

Three-Level Scope and Structure

Low-contrast provisional boundary; high-contrast design network

STRUCTURAL TRANSLATION

From Three Scope Levels to Operable Space

43.6 km²

Coordinated research: industry + future city

≈ 11.4 km²

Overall design: renewal + public networks

3 areas

Key areas: three yard prototypes

Two-wing loop: enabling services ↔ urban feedback

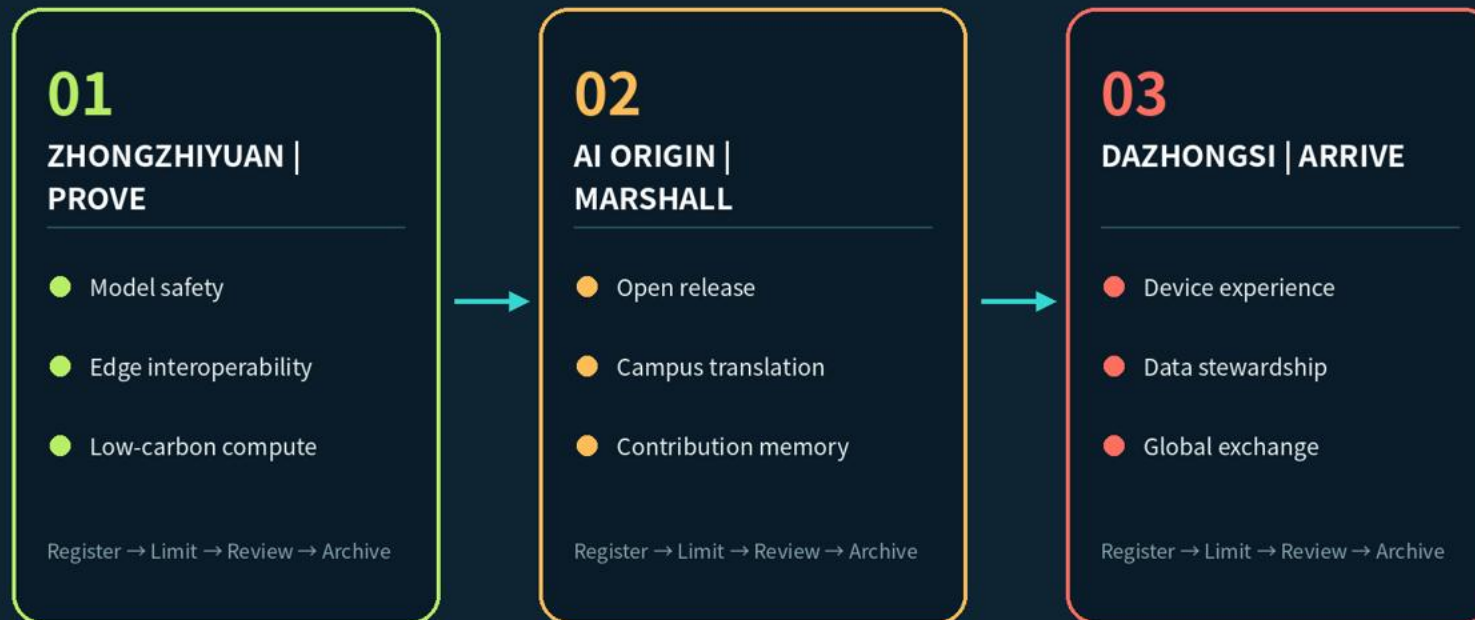

Concept land use retains complete topology; relationships—not provisional polygon shapes—lead the drawing.

Three Differentiated Yards

Zhongzhiyuan proves · AI Origin marshals · Dazhongsi arrives

KEY AREAS

Three Yards, Not Three Identical Parks

All three polygons are provisional indexes; rectangular edges mean neither roads, parcels, nor ownership.

Mobility, Blue-Green, and Public Verification

Walking and cycling first; engineering conditions pending

MOBILITY × BLUE-GREEN × SCENARIOS

A Verifiable Public Route Across Four Urban Systems

All alignments are conceptual relationships, not road, rail, bridge, tunnel, or utility engineering.

Metrics, Scenarios, and Compliance

12 scenarios / 4 industry tests / 3 landmarks

METRICS & EVIDENCE
