

JINGZHANG PLATFORM · Overall design area and evidence chain

One gallery, three platforms, two tracks

The ≈9 km green corridor is the heritage and public-space spine; the three platforms are the key areas; the two tracks are the Zhongguancun service track and the Xiaoyuehe scenario track.

Site 11.41 km ²	Green 13.39%	Public space 2.34%	Key areas 3
----------------------------	--------------	--------------------	-------------

All areas and ratios on this page are recomputed from the organizer's provisional geometry (provisional_constraint) in EPSG:4548; they must be recomputed by tools/recompute_metrics.py and redrawn when official polygons are published.

AI ecosystem map (conceptual)

University seeding → Open-source collaboration → Enterprise conversion → Public experience → International communication

12 scenario cards

01 Open-source release hall AI Origin Community · ground floor / community node	02 Safety governance sandbox Zhongzhiyuan · garden-block open node
03 Edge-compute service station Overall design area · public-service node	04 AI slow-traffic navigation Jingzhang heritage-park vitality belt · corridor
05 Dazhongsi international roadshow hall Dazhongsi · station-city commercial node	06 Qinghe low-carbon innovation gallery Zhongzhiyuan Qinghe frontage · waterfront
07 Campus-near transfer street AI Origin Community · campus-park seam	08 Data-element salon Dazhongsi · commercial and rail composite node
09 AI daily-life sample street Community-commerce junction · small block	10 Global AI activity-week route Belt public-space system · gallery and square nodes
11 Platform shared waiting pavilion Three platform squares and gallery nodes · hybrid waiting space	12 Open-source collaboration wall AI Origin Community & Dazhongsi quadrant · public interface

3 test scenarios

Test scenario	Space carrier	Validation	Maturity · period · review
T1 Open model evaluation field	Zhongzhiyuan innovation platform	Capability/safety/standards evaluation of models	M2 validation · 12 mo · third-party review before release
T2 Edge AI civic service sandbox	Overall-area service node	Edge compute, smart wayfinding, slow-traffic sensing trials	M2 validation · 18 mo · street co-build with manual patrol
T3 Smart-device consumption experience field	Dazhongsi consumption platform	Smart devices, agents, content-consumption compliance demos	M2 validation · 12 mo · merchant-platform joint operation

Six governance dimensions (per scenario)

Data governance Data sources, privacy boundaries, authorization first	Maturity stages M0 concept → M1 pilot → M2 operation
Pilot period 6–24 months with third-party evaluation	Human review Evaluation/content/audit released after human review
Exit mechanism Stop on safety incident, missing authorization, or audit failure	Quantitative KPIs Conceptual indicators, not committed targets

Regional coordination (conceptual)

Plate	Mechanism
North-wei communities (Haidian north)	Shared industry-recruitment map and talent service network
Future Science City (Changping)	Seeding-pilot-manufacturing division of the innovation chain
Huairou Science City	Talent exchange and roadshow mutual visits
Beijing E-Town (Yizhuang)	Scenario opening, supply-chain collaboration, fair recognition
Beijing-Tianjin-Hebei hinterland	Scenario-open city alliance and industrial enclave (conceptual)

Scenario and operation KPIs are conceptual indicators, not commitments (A-SCENARIO-KPI-001).

JINGZHANG PLATFORM · Three key areas (three platforms) index

Implementation and operation

Renewal project	Type
JZ-01 Jingzhang heritage-park slow-traffic gap stitching	Public space / transport
JZ-02 Zhongzhiyuan Qinghe innovation frontage	Blue-green / industry display
JZ-03 Origin community campus-near transfer street	Urban renewal / industry service
JZ-04 Dazhongsi station four-quadrant pedestrian link	Rail integration / slow traffic
JZ-05 AI public service & edge-compute node	New infrastructure / public service
JZ-06 Global AI activity-week public route	Operation / branding

Annual events

AI developer festival, scenario open days, competition roadshows, memory experience month; ≥30 events/yr, ≥100k participants/yr

Developer community

Open-source camps, contribution-wall honor board, tech night talks; ≥60 projects/yr, ≥300 volunteers

Scenario opening

Annual scenario list, open application, public evaluation; ≥10 opened/yr, ≥5 pilots converted

International communication

Bilingual theme map, activity-week route, international roadshow season; ≥20 international exchanges/yr

JINGZHANG PLATFORM · Mobility and blue-green network

Metrics evidence chain

Metric	Value
Site area	11.41 km ²
Green space area	152.9 ha
Public space area	26.7 ha
Green ratio	13.39%
Public space ratio	2.34%
Key area count	3
Key area total area	3.69 km ²
Land-use block count	14
Building footprint area	124.8 ha
Building count	314
Road network length	23.8 km
Phasing coverage area	11.41 km ²
